The formation of this company will be beneficial to the railroad interests of the North and West, in which they propose chiefly to operate. It will at once create something like a healthy *competition*, where heretofore scarcely anything of the kind existed, with exceptions of the large cities and a few of the more prominent points in communication with them. Henceforth at least two active rival interests will be found competing, not only for the express business offered by the public, but the vehicles run by railroad companies.

This is a step gained in the right direction; yet it is but one step toward that which all our railroad managers should keep steadily in view, namely, the absorption of all the express business along their routes. What is there in the nature of things to call for this department being farmed out to individuals, any more than the transportation of passengers, freight, or the mails? Why should not some outside interest contract to carry wheat, petroleum, or anthracite coal, as well as light packages, to be delivered instantly at the journey's end? We confess our inability to see the propriety of drawing any dividing line between one species of income and another.

Every railroad manager knows, and every stockholder *should* know, that in thus neglecting the express business the most profitable source of income is sacrificed to individuals or corporations, who become rich at the companies' expense. They are a set of "climbers," taking hold of railroads, like ivy to the oak, and never letting go until they have sucked the last drop of nourishment out of them. Hence it is found that while the one interest finds it difficult to divide five, six or seven per cent. annually, the other can distribute from ten to one hundred. Individual expressmen think their business scarcely worth looking after, if it does not net them $10,000 a year; while the profits of not a few run up to five times that amount or more.

All these considerations are apt to be offset in the minds of many, by the fact that some railroad companies have tried the express business and found it to be less profitable than it now is in the hands of outside parties. If the experiment had been fairly and generally made, we might be disposed to give up the point; but we feel confident this has not been done. We cannot regard it as a fair test, that a President or Superintendent directs certain agents to receive light packages and others to deliver them. Those agents have their hands perhaps already as full as they wish; and naturally enough feel little desire to aid in the extension of a business, which devolves upon them much additional labor, without corresponding remuneration. They do not co-operate heartily with managers in the endeavor to make this attempt successful. They may possibly treat the outside public with a degree of indifference, if not of discourtesy, discouraging further calls upon them in this capacity. Nay, it is probable that in many instances they may be *bought up* by ex-expressmen, who naturally feel chagrined at the loss of a lucrative business, and would hesitate at no means to bring about its restoration.

As far as we are aware the public have never been fully informed as to the *why* and *wherefore* of such failures on the part of railroad companies to conduct the express business. In the absence of positive information to the contrary, we have a right to assume that it arose, first, from the inexperience which is necessarily a drawback at the commencement of any novel enterprise or service; next, from the passive resistance manifested by agents and other employes, who had no stomach for promoting the companies' interests at the expense of their own ease; and lastly, from the appliances which have been brought to bear upon officials by the expressmen, whose occupation was gone. A chapter of disclosures on such a theme would be equally interesting and instructive, as showing how "rings" can be formed among subordinates and outsiders for the purpose of thwarting needed reforms, as well as for carrying an odious measure through a corrupt Common Council.

It is obvious that for our railroads to assume the express business a separate department must be created to some extent. As each express company has its agent in every principal point, looking after business and attending exclusively to his employers' interests, so such agencies must be established by our railroad companies at all paying points. In other cases, a percentage of the receipts might be allowed to existing agents, so as to remunerate them properly for their additional labor. In any case, the men entrusted with this service ought to be pecuniarily interested in its success; and as far as possible held responsible for any decline which might take place, as trace-

able to their own indifference or rudeness shown to the business community.

The anecdote of Patrick, who, before venturing upon a feather bed, stretched himself for a night upon a single feather, and then protested against reposing on a whole bed of down, will apply to the question before us. An experiment has been made here and there, but only upon the single feather plan. The work was not properly systematized, in the first place; then, it was abandoned without a sufficient trial. Under such circumstances, of course, it proved a failure, as every reform will prove, unless the requisite steps be taken to overcome the *vis inertiae* of subordinates, and even their positive ill-will. When local and traveling agents feel themselves directly interested in the success of the plan, and means are taken to bring railroad companies as express carriers into direct communication with the outside public, there will be no occasion to complain about failures.

We would urge this subject, not only upon the attention of our railroad officials, but of the conventions which assemble from time to time. With concerted action and a properly digested plan to begin with, followed by the fixed purpose which is necessary everywhere to achieve success, there is no reason why a rich source of income, now passing into the hands of a powerful outside interest, should not be tapped and retained by the companies to whom it rightfully belongs.

St. Louis and Iron Mountain Railroad.

The earnings and expenses of this road for the years ending October 1, 1863 and 1864, have been as follows:

Earnings:	1863.	1864.
From passengers	$138,156 38	$143,116 40
" freights	140,635 67	196,885 43
" mails, rents, etc.	13,195 46	11,480 70
" U. S. troops	33,066 56	11,820 79
" " freight	95,857 84	35,988 02
	$420,911 91	$399,291 34
Expenses, viz:		
Maintenance of roadway	$69,679 77	$102,923 63
Maintenance of rolling stock and machinery.	57,260 62	111,364 71
Operating expenses	132,747 68	153,674 24
	$259,688 07	$367,962 58
Net earnings	$161,223 84	$31,328 76

The net earnings of 1863 were appropriated as follows:

To pay liabilities	$35,985 41
To pay interest on State bonds	40,000 00
To pay interest on St. Louis Co. bonds	23,717 13
To construction account for new cars, station houses, machinery, tools, etc.	20,938 63
To increase of assets	40,582 67
	$161,223 84

Between the close of the fiscal year, (September 30,) and the annual meeting of stockholders (November 2,) the company paid into the State Treasury the further sum of $20,000, and into the County Treasury, for interest that matured on their Iron Mountain Railroad bonds in July of that year, $7,000, leaving to be paid the county in 1864, the further sum of $14,000—the company having adopted the policy of paying into the State Treasury, on account of interest on State bonds, all surplus earnings not needed to pay liabilities, or for supplying the wants of the road.

The above comparative statement of earnings exhibits a diminution in 1864, of aggregate business of $21,620 57. But as the receipts from Government service were less by $81,115 59, it follows that the legitimate local business had increased nearly $60,000, (say $55,000 from freights, and $5,000 from passengers.) The expenses on the other hand have been increased $108,274 51; which is solely attributable to the enormous advance in the price of all kinds of labor and material. In maintaining roadway, bridges and machinery, this increase is nearly double; but for operating the road, the expenses are only about 20 per cent. above those of the previous year.

The company have 18 locomotives. Number of miles run, 280,189; in 1863, 292,019—decrease, 11,830. Through passengers carried, including U. S. troops, 9,772; do., way, do., 383,862; in 1863, 22,468 and 332,409 respectively—showing a decrease in the former of 12,696, and in the latter an increase of 51,453. Number of passengers carried one mile, 4,547,272, a decrease, as compared with the previous year, of 503,247. Tons of freight transported, 96,951; in 1863, 99,943—a decrease of 2,992. Tons carried one mile, 5,521,880—a decrease of 60,082. Troops carried one mile in 1864, 594,600; Government property, 900,000 tons. The expenses were 92.1 per cent. of the earnings; in 1863 61.7.

BALANCE SHEET.

The Russo-American Telegraph.

The State Department at Washington has received an official copy of the conditions stipulated between the Russian Telegraph Department and Hiram Sibley, for the establishment of telegraphic communication between Russia and America, by which the exclusive right is granted to the plenipotentiary of the American Western Union Telegraph Company for thirty-three years, from the day the line shall be opened, the Russian Government to grant a further term as it may judge convenient. In order to encourage the undertaking, the Government grants to the company an allowance of forty per cent. on the net produce of dispatches transmitted by it over the lines to and from America, and in order to contribute as much as possible to the success of the present undertaking, the Minister of Public Utility will adopt the measures necessary for securing the company's telegraph from being maliciously injured by the local population, but at the same time, the Government refuses to take upon itself any responsibility for such injuries of any nature whatsoever. The company is allowed to import materials free of duty.

Henderson and Nashville Railroad.

We have read with much interest a pamphlet setting forth the prospects of this road and of the Providence Mining, Manufacturing and Shipping Company, by which it appears that the former designed to connect Nashville with the Evansville road is completed for 46 miles, and with a little assistance can be for the short remaining distance. To obtain this large tracts of coal lands with rich veins are offered to capitalists for such aid as they may be disposed to give. We trust the efforts of the company will be successful.

Cleveland and Toledo Railroad.

The earnings and expenses of this road for the fiscal years ending April 30, 1864 and 1865, have been as follows:

	1864.	1865.
From passengers	$784,059 41	$1,098,695 65
" freight and mails	907,206 42	1,005,402 99
	$1,691,265 83	$2,104,098 64
Expenses, viz:		
Repairs of road	$193,946 49	$375,821 44
" bridges	5,459 49	24,048 45
" buildings	29,635 46	89,559 54
" fences	1,579 71	5,074 11
" engines	62,008 17	84,908 46
" cars	66,638 46	89,863 93
" tools, etc.	6,509 49	11,107 65
Fuel	69,613 54	94,458 44
Oil and waste	13,386 71	13,445 49
Train hands	75,384 79	97,598 76
Watchmen	8,042 33	10,863 44
Station expenses	104,522 01	132,089 91
Mail expenses	736 00	902 00
Losses and damages	35,798 52	19,528 44

Interest on bonded debt	$179,869 22	
Dividend, Oct. 25, 1864, 5 per cent.	245,768 42	
Dividend April 25, 1865, 5 per cent.	246,873 68	
	672,511 32	
Balance	$162,269 24	

—equal to 4¼ per cent. on the capital stock.

The income account of the company, which had been accumulating for four years, stood on the first day of May at | $769,940 49
Income for the current year | 654,911 34
| $1,424,851 83

From which has been paid—

Regular dividends, as above	$492,642 10
Extra dividend in Aug., 1864, 10 per cent.	491,326 00
	983,968 10
Balance of income account June 1, 1865	$440,883 73

—which sum has been used in the equipment and necessary improvement of the property, and contributions to the sinking fund for the purpose of gradually retiring the bonded debt of the company.

Compared with 1864, the gross earnings of 1865 show an increase of $412,832 81; with an increase in running expenses of $351,483 50.

The following is a comparative statement of the bonded indebtedness of the company as given in their reports for the last and preceding years:

	1865.	1864.
Toledo, Norwalk and Cleveland 1st mortgage bonds, due Aug. 1, 1863	$3,000	$9,000
Cleveland & Toledo income bonds of 1858, due Sept. 1, 1868	.....	250
" " " 1854, due July 1, 1864	.....	286,000
" " dividend bonds, due April 1, 1865	12,235	123,560
" " certificates, due April 1, 1865	575	2,180
Junction 1st mort. 1st division bonds, due April 1, 1867	229,000	244,000
Cleveland & Toledo bonds of 1857, due Sept. 1, 1870	6,000	6,000
Junction 1st mort 2d division bonds, due Dec. 1, 1872	159,000	161,000
Cleveland & Toledo sinking fund bonds, due July 1, 1885	2,205,000	1,802,000
	$2,614,810	$2,633,990
Less redemption funds	.....	194,000
Total bonded debt	$2,614,810	$2,439,990
Capital stock	4,690,600	4,654,800
Total stock and bonded debt	$7,305,410	$7,094,790
In hands of Sinking Fund Commissioners	324,000	276,575
Outstanding stock and bonds	$7,629,410	$6,818,215

The company has paid during the last year $422,180 of bonds, which matured and have been canceled, from funds on hand at the last annual report applicable to this purpose, and from the sale of the balance of the sinking fund bonds remaining in the hands of the company.

The sum of $46,000 has been contributed to the sinking fund commissioners from the earnings of the company during the past year, and this fund now amounts to $324,000, which, with the accrued interest added annually, and the annual contribution of the company, will entirely pay off the mortgage debt of the company on or before its maturity.

The road has been maintained in good order during the past year, and $1,080,756 used in running expenses, being 51⅓ per cent. of the gross receipts, and if we add the taxes and general expenses it will amount to 57 1-7th per cent. Of this sum $375,821 54 has been expended in repairs and renewals of the road, being $181,000 more than the previous year. There has been placed in the road 2,278 tons of re-rolled iron, equal to twenty-four miles of new iron, 14,408 new chairs, 66,450 lbs. new spike, and 59,434 new ties. $24,000 has been expended in repairs and renewals of bridges.

The equipment of the company is in good order, and will compare favorably with any other road, and although during the past year there has been no comparative increase of equipment, still $84,900 has been expended on locomotive repairs, and $89,863 on car repairs. These sums have been expended in renewals as well as repairs, so as to place all the equipment in an efficient condition.

The company are now constructing, at its shops, some new first class passenger coaches, equal in strength and finish to any in the United States, two of which are nearly ready for use; and has raised the roofs and rebuilt seven of its coaches during the past year.

The material is now on hand for the construction of 100 new box cars and 10 passenger coaches, and the new work is being done as rapidly as the repairs and maintenence of the equipment will warrant.

The construction account of the company remains the same as at the time of the last annual report, $6,699,573 33, and the new constructions put upon the road during the past year, have been paid for by the sale of old rails not required for the use of the company, and from other sources not belonging to the income account, viz:

Paid on Union Passenger House, Cleveland	$30,935 57
Office at Toledo	10,000 00
Balance finishing engine house at Toledo	8,200 00
Freight house at Cenoa	1,800 00
	$50,935 57

There is still belonging to this fund the sum of $48,285 94, applicable to new station buildings, and permanent improvements without increasing the construction account of the company.

The offices at Toledo are constructed of brick, upon the middle ground, with a permanent foundation, with fire-proof vaults for preserving the company's books and papers connected with the freight department at that point, and are so arranged that a town freight house can be built on at some future time making one uniform building.

The number of passengers carried during the past year was 586,172, being an increase of 122,364, and of this number 392,740 was local, being an increase in the local passengers of 67,891.

The total number of tons of freight carried during the year, was 410,401, of which 159,505 tons was local, and which in the aggregate shows a falling off as compared with the former year of 22,016 tons, but while the total tonnage shows a decrease, the local freight shows an increase of 6,832 tons.

The earnings from local passengers and local freight for the year amounts to the sum of $877,832 09, and is more than the total earnings of the road five years ago from all sources.

The movement of through freight was retarded during the past winter through the months of January and February, owing to the blockade of freights at Buffalo and Dunkirk, and the inability of the Eastern trunk lines to receive and take away the freight offered to them by your line.

This state of things has existed more or less for the last three winters, but was more so during the last winter than before, owing to the heavy snows east of your line which blocked up the roads and kept back freight, much to the injury of the earnings to your company.

The question is frequently asked, "now the war is over, if your road will be able to keep up its earnings," and in reply to this question, we can only say, that the increased earnings for six weeks of the year to June 14th, are $59,852 over the same time last year, and also point to the increase of population and increased productions of the vast country west of us during the last four years, and in the future, which is tributary to your line of road, and to the largely increasing local traffic of the line, and we come to the inevitable conclusion that the traffic of your road can only be limited by the facilities of the trunk lines East of us to take the freight away, particularly in the winter months, and what is more needed to encourage shippers by rail routes than anything else, is greater and more efficient dispatch in the movement of freight and less delay in its transshipment at points where it is changed from one road to another, or from one car to another, which occupies under the present railroad management more time in many instances than is generally consumed while the freight is in motion on the roads. Some system must soon be devised and adopted, whereby freight will be kept in motion from the time of its shipment until it reaches its point of destination, so that shippers can calculate with some degree of certainty the time their produce will reach market, or their goods their point of destination, which facilitation in the movement of freight would add largely to the traffic of the roads, and be much more satisfactory to the business community.

The equipment of the road consists of: 37 locomotives; 28 passenger, 9 emigrant, 13 baggage, 4 mail, 403 box and stock, 89 rack, 146 platform and 3 boarding cars.

Number of miles run by freight cars, 5,635,072; by passenger cars, 1,039,806; by second class cars, 211,483; by baggage cars, 425,614; by mail cars, 75,750.

The number of passengers carried eastward was 286,075, of which 122,008 were through, and 164,067 way; do., carried westward, 300,097, of which 134,772 were through and 165,325 way—total passengers carried 586,172, of which 392,740 were local, and 193,432 foreign passengers. Equivalent number of passengers carried one mile, 38,133,340, equal to 340,476 through. Number of passengers carried in 1863–'64, 464,348, increase, 122,364; increase in mileage of passengers, 9,634,978.

Tons of freight transported eastward, 263,949, of which 159,913 were through, and 104,036 way; do., westward, 146,452, of which 90,983 were through, and 55,469 way—total tons transported, 410,401, of which 250,896 were through, and 159,505 way. Equivalent number of tons carried one mile 34,796,293, equal to 310,636 through. Tons carried in 1863–'64 432,417, showing a decrease in tonnage of 22,016, and in mileage of freight 2,853,055.

GENERAL ACCOUNT.

Journal of Railroad Law.

COMMON CARRIERS OF GOODS.—EXTENT OF LIABILITY.—EVIDENCE.

The case of Smith *vs.* The New York Central Railroad Company, lately decided by the Supreme Court in Monroe County, is interesting as bearing upon the duties of common carriers. The facts of the case will be gathered from the opinion of the Court, written by

JOHNSON, J.—I am of opinion that the non-suit was wrong, and should be set aside. The defendant's counsel insists that there was no evidence to show that the property was in a sound condition when it was received by the defendant. If this is so, the non-suit was proper. The plaintiffs must of course give evidence to show that the goods were in good condition when they came to the possession of the carrier, as part of the evidence that they have been injured while in the carrier's custody. Merely showing a delivery by the carrier in an injured condition is not enough. It must be shown in what condition the carrier received them in order to prove an injury in his hands. This may be shown by direct affirmative evidence, or by proofs of facts and circumstances from which the presumption of fact arises, that the goods were in proper condition when the carrier received them. Enough was, I think, proved in this case to raise such presumption. The property was placed in the possession of the Western Railroad Company in good order and condition, and until the contrary is shown, must be presumed to have continued in that condition while in the possession of that company. It was delivered by the defendant, after being transported over its road from Albany to Rochester, in a damaged condition; and the further presumption necessarily follows, that it received the injury while in the possession of the defendant. The general rule is, that things once proved to have existed in a particular state are to be presumed to have continued in that state until the contrary is established by evidence, either direct or presumptive (Best on Presumption, § 186; Sleeper *vs.* Van Middlesworth, 4 Denio, 431; Walrod *vs.* Ball, 9 Barb., 271; Cooper *vs.* Dederick, 22 Id., 516.) Unless this rule is to be applied to goods delivered, to be transported over several connecting railroads, there would be no safety to the owner. It would often be impossible for him to prove at what point or in the hands of which company the injury happened. But give to such party the benefit of the presumption that the goods he has delivered in good order in such case, continued so until they came to the possession of the company which delivers them at the place of destination in a damaged condition, and his rights will be completely protected. The burthen is then shifted upon the latter company of proving that such goods came to its possession in a damaged condition, by way of defense. This proof the latter company can always make much more easily and readily than the converse can be proved by the owner. This is in perfect harmony with a well settled rule of law, as an exception to the general rule. The general rule undoubtedly is, that the burthen of proof is always upon the party who asserts the existence of any fact which infers legal responsibility. But the exception is equally well established that in every case the *onus probandi* lies on the party who is interested to support his case by a particular fact which lies more particularly within his knowledge, or of which he must be supposed to be cognizant. If the subject matter of negative averment lies peculiarly within the knowledge of the other party the averment is taken as true, unless disproved by that party. (1 Greem, 1 Ev. M. § 79; 1 Stark, Ev., 362, 395; Wills, on circumstantial Ev., 183, 184.) This applies in all civil cases. A familiar instance is the action to recover the penalty for the violation of the excise law. And it applies in criminal cases in weighing the evidence after such evidence had been given. Sufficient to raise the assumption that the allegation is true, in the absence of any evidence to the contrary.

In this case and all cases of like nature I think it is enough for the owner to show that he delivered the property to the connecting road in good condition, and that the burthen is then cast upon the company delivering the goods injured, of proving that they were not injured in their possession, or that they came to their possession thus injured. This evidence in almost every case is all that the owner can give, inasmuch as he is not supposed to accompany his property in the transit. The defendant was unquestionably a common carrier in reference to this property, and subject to all the liabilities of such carrier to the plaintiffs, though it may have received it from the Western Railroad Company alone, and upon its undertaking to transport the property to Rochester. The statute (2 R. S. 693, § 67, 5th ed.,) expressly makes any railroad company, receiving freight for transportation subject to the same liabilities as common carriers. The liability attaches upon the receipt of the property for the purpose of being transported, and is to the owner of the freight. But this liability is for its own acts or for injuries which such freight receives while it is in its custody for such purpose, and not for the acts of other companies which may have previously injured such freight. The plaintiffs' counsel seems to insist that, under section 67 of the statute above referred to, the defendant would be liable to the plaintiffs, even though the goods were injured while in the possession of the Western Railroad Company, and came to the possession of the defendant in the same injured condition in which it was delivered by the defendant at Rochester. But I do not think the statute was intended to create any such liability against any company except the one which first received and undertook to transport the freight. The language is, "whenever two or more railroads are connected together, any company, owning either of said roads receiving freight to be transported to any place on the line of either of said roads so connected, shall be liable as common carriers for the delivery of such freight at such place." It is obvious, I think, that this was intended to apply only to the company originally receiving and undertaking to convey and deliver the freight. In this respect the statute is only declaratory of the common law obligation of the carrier making the contract. He undertakes for all the carriers intermediate the points of shipment and delivery, (Burtis *vs.* The Buffalo and State Line Railroad Company, 24 N. Y. Rep., 269.) But an intermediate carrier, who was not a party to the original undertaking, would, I apprehend, be liable only as an ordinary carrier, for loss or damage arising while the goods were in his possession as such carrier. This gives the owner his election, in case of loss or damage, to bring his action either against the carrier with whom the original undertaking was entered into, or against the particular carrier in whose hands the loss or injury has occurred. There can be no doubt, I suppose, that the latter is clearly liable for his own default, without any aid from the statute.

Courts may take judicial notice of whatever ought to be generally known, within the limits of the jurisdiction (1 Green, 1 Ev., § 6.) This would, I think, include notice of the great lines of public travel and transportation of property, and their connection with each other and the general course of trade and transportation through the country. In a case like this the Court would infer without further proof that was given a delivery of the property by the Western Railroad Company to the defendant to be transported by the latter as a carrier to Rochester. I am clearly of the opinion therefore that enough was proved by the plaintiff to put the defendant upon its defense, and to authorize a recovery by the plaintiffs, as no counter evidence was given. If these views are correct, it follows that the non-suit should be set aside and a new trial granted, with costs to abide the event.

Schuylkill Mutual Coal Co.

The *Schuylkill Mutual Coal Company* has purchased the Tunnel Colliery in Ashland, Schuylkill Co., Penn., and is now prepared to deliver coal, to the subscribers to its stock, *at the actual cost of mining and transportation.*

This is a first class colliery, yielding two hundred and fifty tons of coal per diem, and for this quantity transportation is permanently secured.

The quantity of coal in the mine, and the facilities for mining the same, are ample for many years' work. The coal is the very best of White Ash—more nearly of the character of the *Lehigh* than any other coal of this region—and for domestic and steam uses, commands the highest price in the general market.

In a word, the company commences its operations on a sound basis, with a limited capital, and with all the conditions necessary to entire success. It offers, in the following proposition, perfect security for the investments of its stockholders, who cannot fail to receive satisfactory dividends, and to procure for their use coal of excellent quality, *in full weight*, and at the lowest possible price. They, in fact, become the miners, shippers, and dealers of their own coal, and save the profits and commissions which, under ordinary circumstances, they would pay to others. In addition to this, they are the actual owners and workers of the colliery, and will receive their proportional share of the profits of its business.

It is proposed to sell twenty thousand shares of *preferred* stock at the full par value, for the amount of the *purchase money* and *working capital.* The remaining *one hundred thousand dollars* of the capital stock, which is held by the Directors and originators of the company, is subject to certain restrictions, as set forth below.

The daily yield is at least two hundred and fifty tons of coal. This, for three hundred working days per year, would make seventy-five thousand tons. Of this amount, it is proposed to sell forty-five thousand tons in the market, and to deliver, annually, to the stockholders, thirty thousand tons, (one ton per share,) *at the actual cost of mining and transportation.*

At the present prices, there is a difference of *more than four dollars per ton*, between the actual cost of the coal, delivered to the consumer, and the price charged by dealers; (this difference goes to make up the profits of the miner, the middleman, and the retail dealer.) It will hardly, at any time, fall below three dollars. This differ-

ence, which is saved to the consumer, is the chief advantage which the company offers to its stockholders; but the profit on the coal sold, will furnish satisfactory dividends.

To secure, beyond peradventure, the advantages held out to the purchasers of the preferred stock, the Directors engage that no coal shall be delivered on the stock issued to the projectors of the company, *until the whole amount due to the holders of the preferred stock* shall have been delivered, and until enough coal shall have been sold in the market to *pay seven per cent. annual dividend on the par value of the preferred stock.* This arrangement will leave forty-five thousand tons of coal, which may be sold to pay dividends, amounting to only $18,000—requiring a profit of less than thirty-five cents per ton; less than one-fifth of what may be reasonably expected. It is believed that the cash dividends would be much more than seven per cent.

Dr. J. P. Kimball, Mining Engineer, says of the quality of coal of this colliery:

The anthracite of the Mammoth Seam in the Ashland basin is a dry, hard and dense variety, of a deep black color and splendid lustre. Its fracture is semi-conchoidal—a test of great purity and homogeneousness. In specific gravity and composition, it greatly resembles the best standard Lehigh coal. It is practically free from sulphur, and burns to a white ash. It has scarcely a superior as an anthracite for blast furnaces, and is commended as a steam-generating anthracite—burning freely, and igniting readily. The dividing slate separating the two benches is so clearly defined, and its subordinate courses of slate are so few and insignificant, that the coal is prepared for market uncommonly free from this admixture.

The Overland Traction Engine Co. of N. Y.

Among the many projects which are now being agitated for facilitating the mining operations of our western Territories, and for quickening and cheapening the communication between the centre of this great region, and the rivers and railroads of the Missouri Valley, not the least important is that of placing a line of steam Traction Engines and Trains on the Plains, between certain points on the Missouri River and the Rocky Mountains.

Engines of this description have been used for several years. In England they are quite extensively adopted, not only for agricultural purposes, but for hauling the heaviest loads in the dock yards, and great numbers are now constructed in that country for Australia.

Successful experiments have also been made with a light class of such engines, both in England and on the continent for the carrying of persons, and a rate of speed has been obtained on good roads, exceeding 20 miles per hour.

So far, however, their use has been confined to local purposes, and it is only within a very recent' period, that attempts have been made to introduce them on long routes like the one in question. The great difficulty in the way has been the supply of fuel. The ordinary engines in use, have been unable to carry any useful load for considerable distances, unless supplied with fuel at frequent intervals. And the adhesion of their wheels upon the ordinary roads, has borne so small a proportion to the great weight of the engine, and to the power it ought to exert, that they have not been able to haul the loads due to their power.

The stereotyped plan is a boiler similar to that of a locomotive, mounted upon four wheels, the two rear wheels being the drivers, and the forward wheels serving to steer the engine. The rear axle is fixed, while the forward one turns upon a king bolt, the whole arrangement being precisely like that seen in any ordinary wagon.

Two cylinders are applied to a crank shaft from which endless chains running over proper pullies give motion to the driving wheels.

Having but two cylinders they are applied to the same shaft in order to avoid any dead centres, and consequently both driving wheels must move at the same speed, no matter how sharp a corner it may be necessary to turn. One wheel must necessarily slip, and it therefore becomes impossible to provide any additional means for obtaining adhesion, unless the engine is confined strictly to a straight line. About one-third the weight of the engine is placed upon the forward wheels, so that the traction power of such an engine is limited entirely by the adhesion due to two-thirds the weight of the engine, resting upon two smooth wheels, and it makes no difference how much power there may be exerted in the cylinders, the engine can haul no more load than its adhesion upon the road will permit. The additional power exerted serves simply to slip its wheels.

A great improvement in the construction of these engines, has been made in this country by Jesse Frye of Brooklyn, and the value of his inventions has been practically demonstrated by the performances of an engine, of about 22 tons.

In Frye's engine, all the wheels act as driving wheels, forward as well as rear the power being communicated to the former at all times, no matter how much they are turned from their normal position in the process of stearing.

Each wheel is driven by two cylinders, and therefore they are entirely independent of each other. No slipping being necessary in passing a curve, additional means of adhesion are applied in the shape of cogs or corrugations on the tread of the wheels, which enter the surface of the road slightly and grasp it so that adhesion to the full extent of the power of the cylinder is obtained. Thus is an engine of given weight, made to do a duty twice or thrice as much as is performed by an ordinary engine of the same size.

The Overland Traction Engine Company of this city, has been organized for the purpose of placing Frye's Traction Engines and Trains, on the various routes between the Missouri River and the Rocky Mountains, and is now constructing an engine of 32 tons weight, with a train of wagons which is to start from Nebraska city as soon as completed. These trains are to be multiplied as fast as possible. From the actual tests made with the engine completed, no doubt is entertained that the new one will easily transport a net load of 200 tons of freight across these plains to Denver city, a distance of 600 miles with a consumption of coal less than 100 tons. Until within a very recent period, such a performance would have been impossible, simply for the reason that the engine has capacity to carry only a supply of fuel for 20 miles, in addition to such a load of freight.

Coal, however, is now found near the city of Denver in unlimited quantities, and as the consumption of coal for the round trip would be less than the engine can haul, it can be brought back and distributed at proper intervals on the return trip.

Paying freight will be hauled West and coal brought back. The company has taken hold of this mattor in earnest. A thorough survey of the routes has been made during the past summer by A. P Robinson, Esq., civil engineer.

He reports that a route may be followed for the entire distance, upon which the inclinations need not exceed 3 feet per 100 in any case, and that with the exception of the construction of three or four small bridges and the filling of a few unimportant ravines, very little expenditure will be required. The transportation across these plains is enormous, and is increasing almost beyond belief. In 1864 from actual returns kept at the various points from which trains are sent it, is reported at about 80,000,000 pounds. For the year 1865 the accounts of freight already sent, added to that which it is known is yet to go forward will make a grand total of 200,000,000 pounds, and all this is hauled by cattle and mules requiring from 40 to 60 days' time.

The rates are about 15 cents per pound which would show that the expenditure for transportation across the plains this year,would reach the enormous sum of thirty millions of dollars. The railroad is needed to-day, and will come in due time, but at least ten years will be required to reach the mountains.

In the mean time this magnificent traffic is open for the Traction Engine. The entire expense of the round trip, cannot exceed $5,000.

Two hundred tons of freight would at 10 cents per pound yield a profit of $35,000.

The engine can run night and day at a speed of 5 miles per hour, crossing easily in 6 days. It is the intention of the company as soon as their freight trains are established, to place on the route a class of light engines for passengers and express packages, which will run at about twice this speed making the trip in 3 days.

The present stage coaches require 6 days. The establishment of such a line of freight and passenger engines across the plains, would defy competition by anything except a railway. Until the Pacific Railroad reaches the mountains the Traction Engines must rule, and there offers a prospect of profits in their operation, during the intermediate time which hardly any of the great projects of the present day can equal.

Baltimore and Ohio R. R.

The regular meeting of the directors of this company was held in Baltimore on the 11th inst. J. W. Garrett, Esq., President in the chair.

After action upon the reports of the Committees of Transportation and Construction, the Committee of Finance reported the following resolutions which were unanimously adopted:

Resolved, That a dividend of four cent. be declared on the stock of the Main Stem of the Baltimore and Ohio Railroad Company, payable on and after the 23d October, instant, at the Merchants' Bank of Baltimore, and that the transfer books be closed on the 12th instant and remain closed until the 23d instant.

Resolved, That the United States tax be paid by the Company.

Resolved, That a dividend of five per cent. be declared on the stock of the Washington Branch Railroad, for the half year ending 30th September last, payable on and after the 16th October, at the Merchants' Bank of Baltimore.

Resolved, That the United States tax be paid by the company.

In connection with the financial condition of the Company, the President stated that the expenditures were still very large, the force of employees being larger than at any former period, and now

numbering 7,705 men. The aggregate of the pay rolls for the month of September was $347,275 54. The business upon the road continued uniformly very heavy. Rapid progress had been made in restoring the line to a strictly first-class and effective condition. The additional abutment at Harper's Ferry had been constructed, and the great west span of the iron bridge at that point had also been erected. The three spans of the fine new iron bridge at South Branch, two spans at Patterson's creek, two spans of the 21st section, and the splendid and great iron bridge, 615 feet in length, over the Monongahela river near Fairmont, have also been completed. The new abutment at Great Cacapon has been finished, and the new piers at Sleepy creek and Youghiegany are progressing satisfactorily.

The extensive new foundry at Mount Clare has been finished and is in full operation. The large new machine shop there is also approaching completion. Much work has also been done on the new machine shop and new engine house at Martinsburg, and it is hoped that these important structures will be prepared for the business of the approaching winter. A large force is engaged quarrying stone, and at work upon the foundation of an extensive new engine house at Grafton.

Five hundred and ten men are engaged in the construction of double track, thirty-six miles of which, it is expected will be completed during the calendar year. It is anticipated that the entire line of double track between Baltimore and Piedmont will be completed under the arrangements in progress by the close of the year 1866.

Thirty new engines of great capacity have been added to the equipment of the Company, and twenty additional engines have been contracted for, and are under construction. Eleven of the engines seized and taken by the Confederate armies during the war have been recovered. One has been rebuilt, and is now in service, and the remaining ten are under repair at Mount Clare. Upwards of sixty powerful locomotives will thus be added to the equipment of the Company. Large numbers of freight and passenger cars have also been purchased and constructed to meet the heavy requirements of traffic.

It is understood that the Northern Central Railway Company this day advanced its tariff on coal one dollar per ton, which makes the rate from Sunbury to Baltimore (138 miles), $4 50 per ton of 2,240 lbs. The Philadelphia and Reading Company charges from Schuylkill Haven to Richmond near Philadelphia 93 miles, $3 50 per ton of 2,240 lbs. The charge from Mauch Chunk to Elizabeth, 110 miles, is $3 81, and from Mauch Chunk to Philadelphia, 89 miles, $3 40 per ton. The Baltimore and Ohio Company charges per ton of 2,000 lbs. but $3 75 for 179 miles from Cumberland, and $4 10 for 206 miles from Piedmont to Locust Point wharves.

While the charges and costs of Anthracite coal, transported by roads with generally descending and easy grades, are thus high, and have resulted in partly causing the present enormous price of those coals in the market, namely $13 per ton, the relatively low charges maintained by the Baltimore and Ohio Company, notwithstanding the larger cost of its road, its heavy grades and curves, have resulted in enabling dealers to furnish the superior coal from the Cumberland region at $7 per long ton.

It is hoped that the working expenses of the Baltimore and Ohio Railroad can be so economized as to still enable the Company to maintain such comparatively low rates of freight, and to continue to furnish coal thus cheaply to our manufacturers and citizens, and also to continue to demonstrate the great relative advantages of the use of the semi-bituminous coal from the line of the Baltimore and Ohio Road and its vicinity. The transportation of coal is at present very heavy, the average quantity brought to the city being upwards of twenty-five hundred tons per day.

With the large increase of motive power and additional tracks, and the general arrangements of the company for vigorously prosecuting this important business, it is hoped that a largely increased supply can be brought to market. The manufacturers of Baltimore are thus realizing great advantages by the comparatively low cost of this invaluable fuel, and the company finds a daily growing demand from the railroads and factories throughout New York and New England.

The policy of the Board in prosecuting with rapidity the extensive improvements upon its line, and adding to its already vast facilities for traffic, it is believed will result, in a large and permanent increase of the general business of the Company and of the trade of the city.

The attendance of the directors was quite full, and, after the transaction of much routine business, the Board adjourned.

Our Financial Policy.—Mr. McCulloch's Speech.

The Secretary of the Treasury, while on a visit of relaxation at his former home in Indiana, received the honor of a banquet from his friends at Fort Wayne, and made them an address at some length, the most important portion of it embracing the consideration of the present and the future of our National Finances.

Mr. McCulloch at this moment is the most important personage in the Cabinet of President Johnson, occupies a position infinitely more responsible than any of his associates, and by the success or non-success of his measures, will lead the country into a safe position, or involve it still further in financial disorder.

The past life of Mr. McCulloch has always given assurance to his friends that his future career would be equally as successful, because at the bottom of all his conduct there have been sound principles, and these he never sacrificed for political purposes, as too many of the prominent men of the day have not hesitated to do whenever their interest or promotion required it.

The opinions of such a man, coupled with a consistency of life and experience of business of which secretaries hitherto were generally quite innocent, are therefore of very great consequence at this time when the Nation is heavily in debt, the people as heavily taxed, the country flooded with irredeemable paper money, prices rising fabulously, and gold going constantly out to foreign nations and our other exports falling off. The man who is competent to remedy all this by the judicious management of the credit and income of the country will become its greatest benefactor, and Mr. McCulloch has an opportunity of financial distinction which shall eclipse that of any American financier, not excepting the famous Robert Morris of the revolution, or even the illustrious Hamilton, the father of our revenue and our commercial system.

Mr. McCulloch thus becomes the principal personage in this picture, and we naturally wish to know the quality of the man's mind, and the opinions which govern its action. His previous letters and publications have been well received, because he has recognized distinctly the necessity and importance of a mixed currency, but always to be convertible into coin at pleasure. This is the doctrine of the ablest writers on the subject, and the practice of all civilized commercial prosperous nations.

At present we are unfortunately the possessors of only one kind of currency, viz: paper, the other having become a commodity and no longer current. It becomes therefore a matter of moral, political and financial necessity to equalize them again, so that our trade shall not suffer any longer from its anomalous condition, and that the paper dollar of the country shall no longer be a reproach and a falshood, leading men into constant criminality. The speech at Fort Wayne is clear enough. He says:

"I am not one of those who seem to repudiate coin as a measure of value, and to make a secured paper currency the standard. On the contrary, I belong to that class of persons who, regarding an exclusive metallic currency as an impracticable thing among enterprising and commercial people, nevertheless look upon an irredeemable currency as an evil which circumstances may for a time render a necessity, but which is never to be sustained as a policy. By the common consent of the nations, gold and silver are the only true measures of value. They are the necessary regulators of trade. I have myself no more doubt that these metals were prepared by the Almighty for this very purpose than I have that iron and coal were prepared for the purposes in which they are being used. I favor a well secured convertible paper currency. No other can to any extent be a proper substitute for coin. Of course it is not expected that there shall be a dollar in coin in reserve for dollar of paper in circulation. This is not necessary. For all ordinary home transactions a paper currency is sufficient, but there are constantly occurring periods when the balances between countries, and in the United States between its different sections, must be settled in coin. These balances are insignificant in amount in comparison with the transactions out of which they arise, and when a vicious system of credit does not too long postpone settlements, they are arranged without disturbing the movements of coin. Whenever specie is needed for this purpose, the paper currency of the country should be convertible into it, and a circulation not so convertible will not be, and ought not to be, long tolerated by the people. The present inconvertible currency of the United States was a necessity of the war; but now that the war has ceased, and the government ought not to be longer a borrower, this currency should be brought up to the specie standard; and I see no way of doing this but by withdrawing a portion of it from circulation. I have no faith in a prosperity which is the effect of a depreciated currency, nor can I see any safe path for us to tread but that which leads to specie payment.

We have sometimes feared that Mr. McCulloch's career had been so exclusively one of a Banker, that he had not sufficiently considered the morals of the question, and had not sufficiently philosophised on the effects of a vitiated currency, but we were mistaken. Nothing can be more profound or just than the following opinion:

"There are other objections to the present inflation. It is, I fear, corrupting the public morals. It is converting the business of the country into gambling, and seriously diminishing the labor of the country. This is always the effect of excessive circulation. The kind of gambling which it produces is not confined to the stock and produce boards, where the very terms which are used by the operators indicate the nature of the transactions, but it is spreading through our towns and into the rural districts. Men are apparently getting rich, while morality languishes, and the productive industry of the country is being diminished. Good morals in business, and safe persevering industry, if not at a discount, are considered too old fogyish for the present times."

This alone, if there was no other, would be reason enough for a return to a sound currency. The traders, merchants, small dealers as well as large manufacturers are all striving for large and sudden gains, irrespective of the value of the article sold, and are getting more for their goods when gold is 146 than when it was 280, to the actual impoverishment of the middle classes, of con

sumers and persons of fixed incomes. Something of the whirl and confusion of the hour is apparent from one fact alone, that in the city of New York in a single year, six thousand millions of dollars have passed through the hands of the brokers, in consequence solely of the fluctuations in the markets, inspired greatly by the speculations in gold, and also the depreciation of paper money. So our imports on foreign account are now on an increasing scale, most of them of costly and luxurious fabrics, food and wines affording enormous profits to the foreign shipper. The plentifulness of paper money also favors combinations in almost every article of necessity, so that no longer the wheat and grain merchant buys up the market for foreign export and a legitimate trade, but to get a profit out of some one nearer home. In short speculation turns its eye and its hand on our own people, and cares not if bread should rise to 50 cents a loaf, any more than when dairymen by a similar temptation put up butter to 75 cents a pound. In relation to this Mr. McCulloch says:

"The extreme high prices which now prevail in the United States are an unerring indication that the business of the country is in an unhealthy condition. We are measuring values by a false standard. We have a circulating medium altogether larger than is needed for legitimate business. The excess is used in speculations. The United States are to-day the best market in the world for foreigners to sell in, and among the poorest to buy in. The consequence is that Europe is selling us more than she buys of us, including our securities, which ought not to go abroad, and there is a debt rolling up against us that must be settled in part, at least, with coin. The longer the inflation continues the more difficult will it be for us to get back to the solid ground of specie payment, to which we must return sooner or later."

The resumption of specie payments strongly urged in this speech, is to be brought about by the funding of the legal tenders. In regard to this he says:

"If Congress shall early in the approaching session authorize the funding of the legal tenders, and the work of a reduction is commenced and carried on resolutely, but carefully and prudently, we shall reach it probably without serious embarrassment to legitimate business. If not, we shall have a brief period of hollow and seductive prosperity, resulting in widespread bankruptcy and disaster."

How much of this legal tender will have to be funded is yet an open question, and is worthy of grave consideration.

Let us look at this for a few moments. We have now a paper circulation in all of about nine hundred millions, government and national bank paper included. This is not $30 per head, and the Southern States almost destitute of currency. It is not more than the circulation was in England or very closely in 1815. It is our opinion that an entire funding of the legal tenders will not become necessary, and that one third of the amount redeemable in gold left afloat, will be sufficient to keep them there at par, and possibly at a premium.

And as to the difficulties in the way of a return to specie payments. Some persons who can never have an opinion, unless it is founded on something derived from English history, say it will take us as long to effect resumption as it did England. There were near half a century of wars for England to encounter, and it took about 20 years to come back to the specie standard. On the contrary here we have had almost continual peace till 1861, and no taxation worth speaking of.

Our abnormal state has lasted but four years. It is a curious and cheering fact that but 510 failures occurred in the last year in the loyal states, instead of thousands as in former years, showing that business has been transacted on a different plan, and with the abolition of long peace credits. If we now postpone resumption for many years, the whole business of the country will be adjusted accordingly. High prices and long credits will rule, and then when specie redemption comes, it will come with a general crash, cutting down the values of all property, and ruining debtors as well as creditors, for while the one will see their property melting away, the others will have not enough left to pay their debts by the very same depreciation.

In our opinion the sooner we return to specie payments, the better for all classes. The country can bear a reduction just in proportion to the inflation. It is really strong up to this moment. Whatever amount of paper is withdrawn will furnish just so much purchasing value to what is left in circulation. Half the currency left will buy just as much, as the whole does now. We do not think the operation at this moment would do any harm to any body, but the contrary.

We therefore heartly approve of Mr. McCulloch's speech, plans and policy. Let us one and all give him our support. A competent financier is at last in charge of our National finances.

Debt of Philadelphia.

On the 1st of July, 1865, the actual debt of the city of Philadelphia, of all kinds, was $32,310,866 69. The offsets to this are the following items:

Cash on hand by sinking fund commissioners	$360,861 78
City loans at par held by sink'g fund	1,830,313 39
Amounts payable by trustees of gas-works	1,950,000 00
Mortgages, ground-rents, etc. at par	101,732 66
Pennsylvania railroad stock at par.	4,409,000 00
Sunbury railroad stock at par.	2,250,000 00
North Pennsylvania railroad stock at par	1,400,000 00
Northwestern railroad stock at par	750,000 00
Hempfield railroad stock at par	600,000 00
Wharves and Landings	1,000,000 00
Markets	50,000 00
Water-works	6,000,000 00
Tobacco warehouse	100,000 00
Philadelphia tow-boat company	7,500 00
Westchester turnpike company	2,000 00
Haverford turnpike company	2,000 00
Real Estate of various kinds	175,000 00
Outstanding taxes collectable	500,000 00
Total	$22,472,466 19

During the year 1864 the income derived from the above sources was $1,376,924 93 above all costs and exclusive of the stock dividend of the Pennsylvania railroad. These offsets were valued by the commissioners of the sinking fund at twenty millions of dollars, and there can be no doubt that they were worth more than that. The real estate included in the above statement is exclusive of vacant property, police stations, public schools, park grounds, gas works, prison, almhouse, parade ground, etc., and consists entirely of salable buildings. The account current thus stands as follows:

Total debt for July 1, 1865	$32,310,866 69
Offsets " "	20,000,000 00
Balance of debt	12,310,866 69

Among the items quoted above is $360,861 78 cash on hand to the credit of the sinking fund, and $1,830,313 39 of city loans at par held by the several sinking funds, making altogether $2,191,175 12 of this account. This needs a word of explanation. Legal provisions long since made provide that one and two-tenths per cent. of all city taxes shall be set apart for a sinking fund for the redemption of the city loans and the reduction of the municipal debt. This amount is duly approximated every year, and the commissioners invest it in the purchase of city loans, the interest on which is reinvested in the same way.

In order to reach the real city debt there must be deducted from it the $2,191,175 12 belonging to the sinking fund, which would leave the total amount as above.

Next, as regards the loans authorized, but not yet negotiated. The following will show their character and amount:

Water-works loan	$1,000,000
School-house loan	1,000,000
Gas works loan	877,400
" "	135,300
Chestnut-street bridge loan	49,300
Bounty loan	1,333,400
Deficiency loans	213,100
Aggregate	$4,608,500

The gas-works pay every dollar of interest on the gas loans, which are separate from those of the city, though guaranteed by it. The water-works always yield a clear return of seven per cent. revenue over expenses. As the interest on the water loans is only five and six per cent. the city is not under any additional burthen on that account. The bounty and school-house loans need no explanation.

The New Railroad Project to New York.

We learn that Engineers have surveyed a new route for the proposed railroad leading from the Schuylkill Coal Region to New York. This new route is to lead from Lehighton, on the Lehigh Valley Railroad, through the Mahoning Valley to Tamaqua—from Tamaqua through the Schuylkill Valley to St. Clair—from St. Clair to the Mine Hill Gap, Where it will cross the Broad Mountain by planes and extend to the New York and Middle Coal Company's lands at Mt. Carmel. A glance at the map will show that this route opens up nearly the whole of the Coal Region of Schuylkill County, together with that of the Mahanoy and Shamokin Regions, requiring but few lateral railroads of short distances to connect with the main branch.

The New York and Middle Coal Field Company hold a charter to connect their lands with the Lehigh Valley Railroad, and also the North Pennsylvania Railroad, at any point, with the privilege of making such branches as may be required, no one branch to exceed ten miles in extent.

It was proposed at first to adopt the Schuylkill Haven and Lizzard Creek route, but this new route is considered preferable because it passes the whole distance from Tamaqua (which is but 16 or 17 miles from Lehighton,) to Mt. Carmel through the coal region, and will not require one-fourth the extent of lateral roads to open up the coal fields of Schuylkill and Northumberland Counties as the former would. The distance by this route will also be considerably nearer to the New York market than by any other route.—*Pottsville Miner's Journal.*

☞ The case of the Commercial Bank *vs.* The Great Western Railway Company, has been heard before the Privy Council in England, and the appeal been dismissed with costs. The rule therefore for a new trial obtained by the defendants, and against which the plaintiffs appealed, stands. The case will probably come on for trial at the next assizes at Kingston. This appeal, it is said, will cost the Commercial Bank the sum of $10,000, or thereabouts.—*Upper Canada Law Journal.*

☞ The total value of foreign exports from the port of Portland for the quarter ending September 30, 1865, was $311,567 55.

FEDERAL AND STATE SECURITIES.

American Railroad Journal.

Saturday, October 21, 1865.

Stock Exchange and Money Market.

We have in another place commented upon the speech of the Secretary of the Treasury, recently delivered at his home in Indiana. It has attracted great attention, much comment, and given almost universal satisfaction. It is sound on finance, displays a thorough knowledge of the condition of the country, and points out the way in which it may return to a position in which we may compete fairly with foreign commercial nations. In other respects, it is worthy of commendation for its breadth of views and accuracy of perception.

The great question of the day now is, when shall we resume specie payments, and how? Many are for an immediate resumption; others for delay. We are of the opinion, the sooner it can be brought about the better.

We have always been of the opinion, that while Mr. Chase had no other resort than that of the system of legal tenders, there was a great mistake in his various complicated bonding arrangements. The Government has been actually paying interest on a large scale for the use of paper money not as good nor as popular as its own. The true method, in our judgment, was not to have borrowed any bank paper at all. On the contrary, it should have issued legal tenders up to the full extent of its necessities from time to time, with the understanding and condition, that at fixed periods they should cease to be money, and be at once and solely redeemable in a funded debt at 5 or or 6 per cent. interest. In this way it would have saved four years' interest at least on a great part of the amount, the receipts from revenue and customs could have been ascertained and aggregated in a large sum ready for an extinguishment of a portion of the debt, or with means in advance to meet the accruing interest. The valuable tabular statement of Messrs. CULVER, PENN & Co., enables us to see the effect of this policy at a glance.

Outstanding debt, June 30,	1861.	$90,755,736 09
" "	1862.	514,099,232 89
" "	1863.	1,098,793,184 43
" "	1864.	1,740,690,492 55
" "	1865.	2,845,999,245 10
And in August	1865.	2,834,039,074 57

In round numbess the interest has been for the whole as follows:

4 years interest on debt of	1861	.....	$21,600,000
3 " "	1862	.....	92,620,000
2 " "	1863	.....	131,760,000
1 " "	1864	.....	104,000,000
½ " "	1865	.....	85,200,000
			$445,180,000

Deduct interest gained on the legal tenders, for we have included these in the foregoing calculation for greater convenience, and saved by their being used as money, and we find that by our plan we should have saved of interest a large part of the sum of $337,000,000 paid out, and have had on hand five years' revenue. No one can doubt that we would this day have been able by the double saving of interest and revenue, to make a large reduction in the actual amount of indebtedness on these legal tenders, and have had a balance adequate to any immediate wants of the Government when it returned to specie payments.

If it is objected that bonds were necessary for banking capital, it was just as easy to require that the National Banks should deposit greenbacks in the Treasury, as the basis of their banking capital, as the bonds which represent them, and the result would have been, that by this policy, we should have had so far a contraction of the legal tender currency to the extent of $300,000,000 instead of the large amount now afloat. In fact, of the demand notes without interest amounting to $427,000,000, and upwards, there would not at this time have been but about one hundred millions in circulation. But again if by this process it were probable we should have had too much paper money afloat at the close of the war, which is the real objection, then that contingency might have been guarded against by funding this paper whenever it exceeded a certain amount, say a thousand millions, about the sum now afloat of various descriptions, and thus while a large amount of interest would still have been saved

the too rapid increase would have been prevented, and the amount of currency would have remained the same. As the increase of debt from year to year has been about five hundred millions of dollars, except in 1865, the total amount afloat of Government currency could have been restricted to about what it is now, and still the saving of interest would have been enormous, and the accumulation from revenue equally so.

Interest then would not have commenced until 1863, when the issue in 1862 of 514 millions acting as money, would by this plan have become fundable, and also the 90 millions previously issued in 1861. Thirty-six millions of interest would have been saved to the Nation, and so on to 1865. So that the real pressure for interest on these sums would not have really been felt until 1865, when four years' revenue had accumulated and grown into a large fund, ready as before to be applied to the reduction of the debt in the same year. This accumulation would now have been near a thousand millions, and the Government in the meantime saved the necessity of borrowing paper money of the banks based upon its own securities. The National Banks would have had the benefit of the circulation, with their just and immediate liabilities, but the Government would have been financially as stable as a rock. Instead of this, it has been borrowing paper money not as good as its own, founded on its own loans, and paying an enormous amount of interest for nothing. If there is any error in this reasoning we have yet failed to perceive it.

But we are where we are; and how to get back to sound principles remains to be seen. The next difficulty in the case is the when? We notice that there is a class of persons who ask for delay; who wish this irredeemable currency to be cherished until they can have made money enough to retire from their engagements with safety. But we have shown in the article already referred to, that the country was never in a better condition than now to meet the emergency. Our manufacturers have been coining money during the last four years; so have the banks; so have the merchants and importers; failures are almost unknown, and fortunes have accumulated in a most astonishing and unprecedented manner. The farmers have reaped immense profits on all their products, and hundreds of thousands of men, speculators, contractors and brokers, have become wealthy, many of them beyond the dreams of avarice. The National Banks have a circulation of but 50 cents on the dollar of capital with large assets and surplus. They can never be in a better situation than they are at this moment, and if their currency is called in, in any amount, what remains out will increase in specie value in proportion to what is withdrawn.

This contraction while it will do no real injury to the value of paper, will therefore have a decided moral effect in repressing the extravagance of the public, now existing in a degree hitherto unknown.

When bankers and brokers can, out of their transactions in paper and paper securities, afford to display in our fashionable drives, equipages valued at $20,000, we can see to what extremes the new rich are passing, and how the love of display sometimes leads even those we have hitherto respected, to the commission of great acts of crime. When Mr. McCulloch alluded to this usual consequence of an inflated and depreciated currency, *Rem, acu, tetigit.*

Finally, in relation to the subject, we may say that if the legal tenders had been originally issued in this way, with the patent fact that they were redeemable, after fixed periods only in a funded gold bearing debt, it would have led the public to have been careful in the use of them, cautious in their contracts, and economical in their expenditures; while resumption would have been easy for the government, and the people would have been looking out for it without alarm or detriment to their business at least such is our opinion.

The money market is unsettled, the rate to borrowers being generally 7 per cent. owing it is said, to an influence exerted by the great leading houses, which have not only called in their loans, but have induced the Banks to join them in the measure. We think it quite probable, for the Houses alluded are nearly all of them connected in some way closely with these institutions. This state of things has made the market heavy, and railway securities have shown a tendency to decline, and even governments were heavy, though firm, especially when it was found that in London a fractional decline had occurred in the 5-20s. The reduction of a quarter per cent. seems to be a perfect God-send to our Wall street bears. The stock remains the same; the interest is paid as before; the resources of the country are undiminished; on the contrary they are increasing. But no matter. The Bank of England puts the screws on its customers, 5-20s go down ¼ of one per cent., and down goes everything in Wall street. We confess we see in this conduct only the most insane policy and the poorest logic. At the same time, up goes gold 1 and 2 per cent., and exchange, in the language of the curb, hardens.

Some persons disgusted with this ever-varying and senseless system, have declared war against stock-jobbing, and would have a law passed prohibiting it altogether. But we suppose the evil is somewhat compensated for by the facility it affords for the sale of securities at some price or other, and whenever a sale really becomes necessary to holders.

We notice that a large amount of government cotton, about 8,000 bales, took place in this city on Tuesday, at an advance on former prices. The Sea Island actually brought for the 1st quality 116¼ cents per pound, and the 2d 92@94. The amount in the aggregate was a very large one, and as gold was required for it, this probably affected in part the rise in the premium the same day.

Business generally is active. The southern trade is growing very rapidly and bids fair to swell its ancient bounds. A very good temper is prevailing in the reconstructed States and visitors from them, whether for health or business, acknowledge they receive here the kindest attentions. It looks indeed as if fraternity and good will were again to return, as in the happiest days of the republic.

On the whole we consider the Stock market as firm, though not excited; and money, though active, yet still accessible; while in exchange, the transactions are moderate at former rates.

The balance in Sub-Treasury on Wednesday was $62,975,521 33.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Interest and Dividends.

The Milwaukee and Prairie du Chien Railway Company will pay November 1, a dividend of 4 per cent. on their first preferred stock, and 3½ per cent. on the second preferred. The mortgage bonds of the company can be converted into the first preferred stock from the 1st to the 11th of November.

Krupp's Cast Steel.

We notice in a circular from Messrs. Thomas Prossser & Son, sole representatives of Krupp's Cast Steel Works in Rhenish Prussia, that the cast steel tires manufactured by this company have been adopted by at least sixty-six railroad companies in North and South America, and that in eight of our principal iron works and locomotive factories the article itself is used in the construction of machinery generally. Not one of these tires has ever broken, or proved defective. The office of Messrs. Prossor & Son is at 28 Platt street, New York.

New York and California Express and Exchange Company.

It will be perceived by an advertisement in another column, that Messrs. Wells, Fargo & Co., have become the regular freight agents of the Pacific Mail Steamship Company, by which freight may be dispatched with punctuality and safety to all the principal ports on the Pacific, and as well to Central America, and the Sandwich Islands. Notwithstanding this wide range of their facilities, they carry freight to all our mineral States and territories, and at the same time act as bankers, exchange dealers and letter carriers. This house illustrates the rapid growth of our commerce and the enterprise of our people.

Harmony Mutual Coal Co.

The greed and extortion of the combination coal companies are producing a hopeful reaction. In the Journal, of the last week and this, it will be perceived, that companies on the mutual plan, ensuring fuel at a cheap rate to every holder of stock are beginning to be rapidly organized.

We now call the attention of our readers to still another organization, that known as the Harmony Mutual. We refer for particulars to their advertisement in another place, and particularly to the standing of the Directors and officers, all first-class citizens, and whose names are a guarantee for the faithful performance of their promises to the public. Let the good work go on.

Schuylkill Mutual Coal Co.

The enormous profits now made by the coal monopolists to the great wrong of the consumers is compelling a system of counteraction, which seems to be the only remedy left against combination. A Scranton paper says that the whole cost of a ton of coal at Elizabethport, N. J., taken from the mines in Scranton is at the outside $6 47. Of course a charge of $11 or $12 at New York is no more nor less than an extortion. We therefore rejoice to see the Mutual Coal companies coming to the rescue of the people, the more the better.

The Schuylkill Mutual Coal company advertises its philanthropic enterprise in another part of this Journal, offering most liberal terms to shareholders in the company, and guaranteeing to them the best of anthracite in New York at $8 75 per ton. We hope the public will appreciate the advantages of their proposal, and we add our personal knowledge of the fact that the management is in the hands of first-class business men, who will do all that they say. The attention of our readers is called to the plan of the preferred stock for the complete organization and working of the company, and to the advantages of an early subscription to the company.

Oddie & Co.

In the change among the brokers, we notice the firm of Oddie & Gamble have dissolved, Mr. Gamble retiring therefrom. Mr. Oddie continues on with a younger brother, under the firm of Oddie & Co. Both are members of the old Board of Brokers.

Patent Window Catch.

Our Railroad Travelers, (and who is not of this class) will thank any inventor who will provide some simple fastening, which will permit a sash to be raised without the aid of a crowbar, and hold it at any required height without the risk of its falling upon ones head or elbows. Such an invention is put forward by Mr. William Toshach, of 54 William street, New York.

The apparatus is a simple one, worked by the forefinger and thumb, not likely to get out of order, and its adoption by both Steam and Horse Railroad Companies will save great vexation to passengers, and relieve railroad managers from what may be considered anything but blessings.

Water as Fuel.

Among the wonders revealed to us by the science of chemistry is the fact that water, which extinguishes fire, is composed of two gases, both of which are inflammable, imparting heat, but not light. If only an easy method for decomposing that liquid could be devised, and a supply of carbon be procured at little expense, it has long been manifest that the clouds, the springs, the rivers, the lakes, the oceans might be made reservoirs of heat and light, enabling us to feel as unconcerned about the coal mines giving out as we have become about the forests, which were once our sole dependences for fuel.

Even if at little cost water could be decomposed and consumed, it was clear that heat, if not light, could thus be obtained, the gases used for that purpose being generated at public works and conveyed to houses as gas for illuminating purposes now is. The difficulty consisted in decomposing water with sufficient economy to make it profitable for heating purposes.

It had long been observed, however, that by sprinkling a few drops of water thinly on a hot fire in the stove, or by pouring a slender current from a fire engine, to fall in fine spray upon a building in flames, the effect was to intensify the heat, making the fire blaze with greater fury than before. The explanation of this phenomenon was simple. In the fierce heat prevailing the water was converted first into steam, then decomposed into its original gases, which in igniting caused the flames to leap up with intensified power and grandeur.

The idea had, accordingly, entered the minds of several practical persons that, while we might not be ready to place in the oxygen and hydrogen composing water our *sole* dependence for a supply of fuel, yet advantage might be taken of them to augment the heating capacity of coal or wood in furnaces and even ordinary stoves, either by converting water into steam and directing a current of this into the fire, or by throwing over the latter a thin spray, so that, instead of checking, it would aid combustion and assist materially in generating heat. In this capacity the water would be a valuable auxilliary, though not as yet a principal.

The objection to this suggestion was purely

theoretical, being deduced from the maxim that nothing can come from nothing. In other words, that it would abstract from the fire as much heat to decompose the water as would be added to it afterward by burning the gases. "You are seeking the perpetual motion," it was said. "You are pumping up water to turn a wheel, forgetting that the power gained is only equal to that expended on it, minus the friction in machinery."

But this objection might be valid or it might not. The mere utterance of a general principle, or the bringing in of an illustration could not establish or refute the arguments presented on behalf of the possibility of increasing heat by the process described. *That* must be established, or the contrary by actual experiments.

At the meeting of the New York Association for the Advancement of Science, last Monday evening, an interesting discussion took place on this subject, based upon a series of experiments made by Dr. Wm. E. Hagan of Troy, in this State. A committee had been appointed by the association to test the merits of Dr. Hagan's plan. The committee reported that, for lack of a sufficiently delicate apparatus, they were unable to determine with perfect accuracy the amount of power gained by the use of a volume of steam injected into a heated furnace. The general result of seven days' experiments, however, showed that while one pound of coal, burned in the ordinary way, would evaporate, on the average, 3.82 pounds of water, the same coal, burned in connection with the steam, would evaporate 5.49 pounds—in other words, would *increase the heating power of coal forty-three and a half per cent.!* This simple discovery indicates, if not a revolution in motive power, yet an economy in the use of fuel, whose consequences must be of the first importance to the public at this moment. Dr. Hagan stated that a locomotive is now running on the New York Central Railroad, in which, by the use of his discovery, 30 lbs. of water are converted into steam by an average consumption of one pound of coal. That company are applying the principle to six more of their locomotives, and are about to construct twenty others on the same principle.

The apparatus made use of by the committee is simple, but defective, consisting of a common cooking stove, with a thick piece of cast iron, containing a cavity, attached to it in front. On the stove holes four kettles containing water were placed, and the liquid evaporated in a given time by the use of a certain quantity of coal only, or the use of this and a small volume of steam, which was injected into and distributed over the top of the furnace. In these experiments a considerable part of the heat was necessarily lost by radiation. Had this been economized, there can be no doubt but that the gain accomplished would have been still larger than appears in the figures presented to the association.

We suggest the propriety of instituting experiments everywhere, especially by those who are using stationary engines or locomotives. A trial can be made at almost no cost, as compared with the advantages to be gained. Should the discovery turn out as there is reason to believe it will, the country ought to be placed in the immediate possession of it without charge, and Dr. Hagan be handsomely rewarded for his services by the National Government.

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of Sept., compared with the same period last year, were as follows, viz:

	1865.	1864.
Freight	$439,481 48	$387,728 48
Passengers	288,270 04	264,978 81
Express matter	14,502 49	5,200 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 34	7,083 34
Miscellaneous	2,243 23	2,544 01
Total	$759,405 58	$675,359 64

Earnings from Jan. 1, to Sept. 30:

1865	$6,305,437 63
1864	4,813,475 97
Increase	$1,491,961 66

The earnings of the Erie Railway for the month of Sept., 1865, were $1,345,456 52
Corresponding month last year 1,301,005 75
Increase $44,450 77

The Rome, Watertown and Ogdensburg Railroad earnings were:

	1864.	1865.
July	$71,351 50	$89,978 44
August	84,483 12	103,626 75
September	87,515 52	131,885 45
Total	$243,350 14	$325,490 64
Increase		$82,140 50

The earnings of the Housatonic Railroad for the month of Sept., 1865, were $45,534 08
Corresponding period of previous year. 38,377 53
Increase $7,156 55

The earnings of the Chicago and Milwaukee Railway for the months of July, August and September, 1865, were $231,729 00
Corresponding months of prev. year.. 178,333 00
Increase $53,396 00

The earnings of the McGregor Western Railway Company for the month of September, 1865, were $26,152 99; Net earnings, $13,105 58.

The earnings of the New Brunswick and Canada Railway for September, 1865, were $5,272 66
Corresponding month of previous year.. 3,580 26
Increase $1,692 40

The earnings of the Milwaukee and Prairie du Chien Railway for the month of Sept., 1865, were $228,020 35
Corresponding month of previous year 168,217 57
Increase $59,802 78

The earnings of the St. Louis, Alton and Terre Haute Railroad for the month of Sept., 1865, were $216,787 57
Corresponding month of previous year 236,195 18
Decrease $19,456 61

The Ottawa Canal.

This project which has been long and unsuccessfully agitated up to this time, has received a new impulse, since the establishment of the Canadian seat of Government at Ottawa. Sir John Mitchell, who administers the Government of Canada in the temporary absence of Lord Monck, has recently been giving the subject his attention, and after a personal examination of the direct route from the Lakes to the seaboard has expressed the opinion that "the route is not only practicable but has few material difficulties to contend with." A water communication between Lake Huron and the Ottawa river through the French river, and Nipissing lake will require land cutting of a very few miles, only five according to the opinion of some Engineers, and the greatest depth of excavation will be but ten feet. There is no doubt that now the city of Ottawa has been made the capital of Canada, this canal project will have a new and vigorous support.

Railroad Earnings.--Weekly.

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Oct. 7, were:

	1865.	1864.
Passengers	$4,952 09	$3,552 90
Freight	14,538 21	7,022 34
Express	130 22	104 16
Mail	296 58	296 58
Total	$19,917 10	$10,975 98

Receipts from January 1 to Oct. 7:

1865	$516,985 31
1864	440,046 03
Increase	$76,939 28

The earnings of the Marietta and Cincinnati Railroad for the 1st week in Oct., 1865, were:

	1865.	1864.
Passengers	$10,951 70	$10,526 31
Freight	13,780 10	8,220 76
Mail, express & telegraph	1,100 00	1,169 58
Total	$25,831 80	$19,916 65

Total for the fiscal year commencing Jan. 1. $911,147 08 $704,274 00

The traffic of the Great Western Railway for the week ending Oct. 13, 1865, was as follows:

Passengers	$42,575 30
Freight and live stock	46,291 99
Mails and sundries	2,462 60
Total	$91,329 89
Corresponding week of 1864	59,298 45
Increase	$32,031 54

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Oct. 1865, were $114,944 00
Corresponding week of 1864 83,651 00
Increase $31,293 00

The earnings of the Michigan Central Railroad for the 1st week in Oct., 1865, were $109,846 34
Corresponding week of previous year.. 85,425 31
Increase $24,420 58

The earnings of the Chicago and Northwestern Railway for the second week in October, 1865, were $226,988 80
Corresponding week of previous year. 160,078 57
Increase $66,910 23

The earnings of the Grand Trunk Railway for the week ending Oct. 7th, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$54,411 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	96,253 00
Total	$154,700 00
Corresponding week, 1864	134,625 00
Increase	$20,075 00

The earnings of the Chicago and Alton Railroad for the 1st week in Oct., 1865 $91,818 00
Corresponding week of previous year.. 66,845 00
Increase $27,973 00

Important Railroad Decision.

The Court of Appeals has just rendered a decision in the case of the Louisville and Nashville Railroad Company against Jerry Collins, announcing some new principles of law, and settling the rights of employees and strangers, and determining the liabilities of railroad companies in which decision the people at large, as well as all employes on roads and the roads themselves, have a deep interest. We therefore lay the principal points in the decision before our readers.

Some three years since, one of the engines of a construction train on the Louisville and Nashville Railroad needed some attention. The engineer ordered Jerry Collins, a common laborer on that road, to go under the engine while it was standing still, but while steam was up, and fasten some screws or taps on the lower side of the engine. Collins obeyed, and while lying on his back with his face toward the bottom of the engine, the engineer, who was at his post on his engine, either carelessly or purposely touched the lever, and allowed steam enough to pass into the cylinder to cause the engine to start. The motion of the wheel instantly cut off one of Collins's legs. A bystander told the engineer of the injury he had inflicted by the forward motion of the engine, when he immediately reversed the motion and run the engine back so far that it cut off Collins's other leg.

Being thus made a cripple for life, Collins brought suit in the Circuit Court at Bowling Green for $50,000 damages. He recovered a judgment against the Road for $5,500, and the Road appealed.

The Court of Appeals held the following doctrines:

1. A railroad is responsible to one of its employes for any damages sustained by the gross negligence of any other employe of the road.

2. A railroad is responsible to persons occupying the attitude of strangers for damages sustained by the ordinary negligence of the agents of the road.

3. One who is employed to load railroad ties on a construction train must be regarded in law as a stranger to the road, and the road is liable to him for damages sustained by the negligence of the engineer.

4. The old English law relieving a railroad from all liability for injuries received by employees of the road, and requiring employees to take the risk of each other's gross negligence, is not the law in Kentucky.

5. An engineer is the lawful agent of the road, and the road will be held responsible for his gross and ordinary negligence upon the usual principles of agency.

John L. Scott, of Frankfort, argued the case for Collins. Hon. J. R. Underwood and Attorney General James Speed were counsel for the railroad.

The opinion of the Court, affirming the judgment of the lower Courts, was delivered by Judge Robertson.—*Frankfort Commonwealth.*

Trade between Canada and the U. S.

It appears from the official returns of the last fiscal year ending 30 Jan. 1865, the entire value of the Canadian exports was $42,481,151 showing a decrease however, of $1,237,040 from the previous year. Out of the whole amount, about half came to the United States consisting of the following items:

Mine products	$575,000
Fish "	89,000
Timber and lumber	5,000,000
Animals and their products	7,000,000
Agricultural "	8,300,000
Coin and bullion	1,600,000
Other articles	300,000
Total exports to the U. S.	$22,864,000

It is now to be considered whether we shall keep this trade or shut it off.

Wealth of Chicago.

The assessors have completed their assessment of real estate and personal property for the present year. The aggregate assessment is $64,703,600—an increase of $12,029,182 over the assessment for 1864. The entire municipal tax amounts to two cents on the dollar, or an aggregate of $1,294,072 for municipal expenses. Twenty years ago the total city taxes from all sources amounted to $8,647; fifteen years ago they amounted to $25,270; and five years ago they were only $373,315. Probably there is not another city in the world whose taxes have increased at such marvellous rates.

The following tables, compiled from the assessment rolls in the office of the city clerk, show the official valuation in each division, together with the tax, at two cents on the dollar:

South Division.	Valuation.	Tax.
Real estate	$24,001,511	$480,030 22
Personal estate	16,925,363	338,507 48
Total	$40,926,374	$818,537 26
West Division.		
Real estate	$13,208,051	$264,161 02
Personal estate	2,572,985	51,459 70
Total	$15,781,036	$315,620 72
North Division.		
Real estate	$6,849,360	$136,987 20
Personal estate	1,146,330	22,926 60
Total	$7,993,695	$159,913 80
Aggregate.		
Total real estate	$44,058,922	$881,178 44
Total personal estate	20,644,678	412,893 56
Grand totals	$64,703,600	$1,294,072 00

The following table shows the valuation of property, with the municipal tax for several successive years after the incorporation of the city:

Year.	Real.	Personal.	Total.	Taxes.
1837.	$236,842	$——	$236,842	$5,905
1840.	94,437	——	94,437	4,722
1843.	962,221	479,093	1,441,314	8,648
1845.	2,273,171	791,851	3,065,022	11,077
1846.	3,664,425	857,231	4,521,656	15,826
1847.	4,995,446	853,704	5,849,170	18,159
1848.	4,998,216	1,302,174	6,300,440	22,051
1849.	5,181,637	1,495,047	6,676,684	30,045
1850.	5,685.965	1,534,284	7,220,249	26,271
1853.	13,130,177	3,711,154	16,841,831	135,663
1855.	21,637,500	5,355,393	25,992,893	206,209
1856.	25,892,308	5,843,776	31,736,084	396,652
1860.	31,198,135	5,855,377	37,053,512	373,315
1862.	31,587,545	5,552,300	37,239,845	564,038

Western and Atlantic R. R.

The Savannah *Herald*, of 7th inst., says: "The Georgia State Railroad was turned over to the State on the 25th ult. The United States very liberally proposed to furnish running stock, machinery, tools, etc. The Commissioners took 7 locomotives, 2 stationary engines, 100 box-cars and 50 platform cars, and they could have obtained more had they asked for them. Car shops and all necessary machinery were also secured. This stock is an advance made to the road by the Government at prices exceedingly liberal. The Commissioners have let out contracts for building fourteen bridges on the road, to be completed by the 15th of December. These contracts were all given to Georgians."

MORRIS AND ESSEX RAILROAD COMPANY,
OFFICE OF CHIEF ENGINEER AND GEN'L SUP'T,
HOBOKEN, N. J., October 12, 1865.

SEALED PROPOSALS will be received at this Office until the 21st inst., for the construction of a Pier to be built by the Morris and Essex Railroad at this place. Plans and specifications can be seen at this office from 8 A. M., until 4 P. M.

1142 J. B. BASSINGER, Chief Engineer.

ODDIE & CO.,

NEW YORK.

ORVILLE ODDIE, JOHN W. ODDIE.
(Late Oddie, St. George & Co.)

THE HARMONY

Mutual Coal Company.

CAPITAL ..... $600,000.

(Represented by the lands owned by the company.)
Divided into 60,000 shares, the par value of which is fixed at $10 each.
Of these, 12,500 are appropriated for working capital.

OFFICERS:

President ..... Mr. DAVID B. TURNER.
Vice-Presid't and Treas. ..... Mr. MARTIN G. BATES.
Secretary ..... Mr. JOHN H. ROLSTON.
Attornies ..... PLATT, GERARD & BUCKLEY.

DIRECTORS:

HENRY A. SMYTHE, President of the Central National Bank.
JOHN P. YELVERTON, President of the Bank of North America.
NOAH L. WILSON, President of the American National Bank.
FREDERICK SCHUCHARDT, of F. Schuchardt & Sons, Bankers.
NATHAN CHANDLER, of John Munroe & Co., Bankers.
WM. H. TOWNSEND, Treasurer of the Sterling Iron Company.
DAVID B. TURNER, of New York.

Each share will be entitled, from the coal mined by the company in any one year, to its proportionate share of said coal so mined at cost, not exceeding one ton per share, (or the profits thereon,) and a dividend of the profits from the product, beyond the amount delivered on the shares.

The property of this company is situated between the town of Scranton, Penn., and the Wyoming Valley Railroad and Coal Company's property, about one mile from Scranton, and adjoining the Wyoming Railroad and Coal Company. It is free and unincumbered, and the company has no debt of any kind. It is one of the best coal properties in the valley, being estimated to contain seven millions of tons of coal, almost the whole of which is above water level, and capable of producing from 100,000 to 150,000 tons a year.

Any shareholder not wishing to take his coal can have it sold by the company for his account, and receive the profit.

Subscriptions for a limited number of shares received by
WILSON, GIBSON & CO.,
No. 80 Broadway, New York.

COAL AT $8 75.

(Editorial of The Tribune of October 10, 1865.)

THE PRICES at which Coal is sold in our City and vicinity are simply atrocious—there is no sense nor reason in them. And, as railing will do no good, we advise every one who has not yet laid in his Winter's stock to join one of the Mutual Coal Companies and supply himself at cost, which is four or five dollars per ton below the ruling price.

We have before us the prospectus of "The Schuylkill Mutual Coal Company," office No. 35 Wall st. Its capital is $300,000 in shares of $10, each of which entitles the holder to receive one ton of Coal *per annum* at cost, which is now from $8 to $9, but will of course be lower ere long. Knowing a majority of the directors and officers, and having faith in their capacity and integrity, we urge those who want Coal to call at the office aforesaid, take $50 to $500 each of the Company's stock, and help diminish the unconscionable gains of the Coal monopolists.

THE

Schuylkill Mutual Coal Co.,

No. 35 Wall Street,

is now delivering Coal at the above price to its subscribers.

SHARES TEN DOLLARS EACH.

Seven per cent. dividends secured.

DIRECTORS.—Charles Tuttle, John H. Platt, Edmund Blunt, George L. Trask, George E. Waring, jr.

Irredeemable Paper Money.

The continued issue of irredeemable paper money is no more nor less than a legalized fraud upon the public. Every week we are informed that several millions of bank promises to pay are added to the circulation, with the expectation that they are not to be redeemed. Suppose this system should be tolerated in relation to other than mere money contracts. Society could not hold together a single day. Contracts to buy, sell and deliver, to transport by sea or land, to do certain acts for any consideration, would not be worth the paper they are written on, and a reign of falsehood would be inaugurated with an endless train of embarrassment and losses. Such disorders would lead very soon to violence itself, and yet we are very complacent, indifferent indeed, to the non-performance of these contracts made by our present banking institutions. These banks promise to pay their notes in money on demand, or in other words coin, and yet they do not attempt to perform their contracts, but continue to put them out as largely as possible, and charge 7 per cent. for the use of them by the public. Not only this, but they are making and declaring enormous dividends on this false basis and false pretence.

It so happened that when the rebellion broke out, and for some time threatened to destroy the republic, it became necessary for the Government to raise enormous sums of money. Opinion was divided as to the best method of effecting this object. There were those who were for selling Government stocks at whatever price they would bring. The result of this would have been a loss of 30 or 40 per cent. almost at once. The Treasury would have been the victim of bankers and capitalists, men who in the last period of Mr. Buchanan's administration demanded and were paid 12 per cent. interest, and would have followed up this policy to its extreme. Others again were for carrying on the war upon a specie basis alone, forgetting that in six months' time every dollar of coin in the country would have been drawn out of the bank vaults and would not have returned there, but would at once have gone out of circulation into private hoards, as it most generally does on such occasions. Besides this, the banks themselves would have been driven into suspension as they often have been with much less cause. The next step would have been to wind them up, and this would have spread bankruptcy through the land and broken the spirit of the Northern people. Bank paper could not then have been used at all except at an enormous loss, and worse perhaps than this, would not have circulated except in the immediate localities from whence it proceeded. The march of our armies through different States, for want of money receivable everywhere, might have been stopped, and our cause have languished for want of means. It was therefore a bold but most justifiable measure to adopt a legal tender currency, and the people joyfully accepted it.

But the war, an unparalleled success, is over, and it is the duty of the Government to place its promises to pay on the footing of the coin it has so admirably represented. For its line of conduct it had the best of reasons. Legal tenders were indeed a forced loan, nothing else, and necessity and the safety of the country fully justified the measure. Now the plea is no longer valid nor does the necessity exist. The Government has nobly sustained its military character, it must now preserve its integrity and redeem its promises As long as it hesitates, it sets a bad example, and delays the return to sound financial principles. If it continues its own paper system, it encourages that of the banking institutions, and we never shall know when they shall be called to redeem their promises.

The unfavorable course of trade, the extravagance of the times, the high price of all the necessaries of life are the fruits of the present enormous inflation. And here we wish to be distinctly understood. We would have no objection to an increase of the National banking system, especially in the Southern States, if it is made an indispensable preliminary, that bank notes issued under it, shall be at all times redeemable in, and convertible into coin. We can undoubtedly for our numbers sustain and profitably employ a larger amount of paper money than any other Nation on the globe, but it must be what it pretends to be, good for its face in coin. This absolutely settled, the issue of paper will be regulated by the actual *bona fide* wants of commerce, and if overstepped will bring down on the violators of the principles which underlie sound banking, the natural and just penalty for the offence, discredit, if not destruction. We have not known of a bank in the United States, any more than any individual who has attempted it, to succeed in business by persistent and open insolvency.

The first step therefore to be taken by the Government, is to set an example and to redeem its pledges. We believe it is practicable. The country expects it, and is in a good condition to meet the event. The only particular change which will in our opinion occur, will be a fall in the enormous and unfair prices which now rule in the market. Strange as it may appear, gold is the cheapest commodity this day in this country. Any one who has anything to sell may buy gold at 46 premium. Almost everything else brings from 100 to 300 per cent. Of course foreigners cannot buy our products and export them at this rate, while they can sell what they send to us at the high prices, and then convert the actual proceeds into the cheaper commodity gold and take it away. This fact appears to have struck Mr.

McCulloch, who in his late speech in Indiana said ours was now the best country in the world to sell in, and the worst to buy in. The reason is obvious enough.

The path to safety, the plan to increase our exports, is to resume specie payments. We really gain nothing by the exchange of goods among ourselves at high prices. It is no real advantage to us. It is the old story of boys swapping jack knives, "only this and nothing more."

We rejoice then at the frank and early avowal of the Secretary as to the policy he intends to pursue. We repeat it we are in a good position to make the change. It will not be necessary to fund all the legal tenders afloat. If they are reduced ⅔ the residue can be redeemed in specie, and the offer to redeem these will keep them afloat furnishing a general and popular currency better even than that of the National Banks.

We already perceive a movement in interested quarters to prevent an early resumption. If it is delayed too long, it will end in the total smash up of debtor and creditor. Now is the accepted time, the day in which we may save ourselves.

Maryland and Delaware Railroad.

At a meeting of the Board of Directors of the Maryland and Delaware Railroad, on Thursday last, the appointment of Chief Engineer of the work was tendered to T. F. Tilghman, Esq., and has, we understand, been accepted by him. We congratulate the company on securing the services of an Engineer of such acknowledged ability as Mr. Tilghman. He was formerly connected with the road under Mr. Henderson, as a resident Engineer, and is of course thoroughly conversant with all matters connected with the road. His administration afterwards of the affairs of the Junction and Breakwater road as Chief Engineer, gave great satisfaction to that company. If the Board give him the means to work with, we predict a speedy completion of our road. Mr. T. has been raised in our midst, and is well and favorably known. In home enterprises of all kinds it should be a matter of congratulation that our own young men are competent to manage them. We bespeak for him the hearty co-operation of our stockholders and citizens generally, in pushing forward a work which all agree will be of such universal advantage to our community. The contracts are complete, and the Engineer will shortly commence active operations. We understand the contractors are already delivering cross ties on the line of the road above Greensborough. —*Easton (Md.) Star, Oct.* 10.

Pacific Railroad of Missouri.

The company was incorporated Feb. 12, 1849, and organized Jan. 31, 1850. The surveys were commenced in June, 1850, and the formal breaking of ground took place July 4, 1851. The road was opened to Cheltenham, 4.75 miles from St. Louis, Dec. 23, 1852; to Kirkwood, 13 miles, May 9, 1853; to Franklin, 37 miles, July 20, 1853; to Washington, 54 miles, Feb. 11, 1855; to Hermann, 81 miles, Aug. 7, 1854; to Jefferson City, 125 miles, March 13, 1856; to California, 150 miles, May 14, 1858; to Tipton, 163 miles, July 26, 1858; to Syracuse, 168 miles, Aug. 1, 1859; to Otterville, 176 miles, Aug. 24, 1860; to Smithton, 181.50 miles, Nov. 12, 1860; to Sedalia, 189 miles, Feb. 1, 1861; to Dresden, 196 miles, May 10, 1863; to Knobnoster, 207.50 miles, May 2, 1864; to Warrensburg, 218 miles, July 3, 1864; and to Kansas City, 283 miles, September 19, 1865.

An act was passed by the General Assembly, and approved February 10, 1864, providing for the extension and completion of the road to Kansas City. This act was accepted by the stockholders on the 7th of March ensuing, and its acceptance filed in the office of the Secretary of State; so that the same has been adopted, and has become part of the legislation of the State for this and other roads. No event, says the report, in the history of this road or the city of St. Louis is more pregnant with permanent welfare than this Act of the General Assembly; and when the road is completed, and a few years shall have passed, its importance will be so patent, that with one accord the wisdom of the legislature will be acknowledged. The two great *ear marks* in the law, are the *one* mortgaging the road from Dresden, in Pettis county, to Kansas City; the *other*, the sacred application of the earnings of the whole road to the payment of interest and principle of the debt created by the mortgage. As the road has since been completed, it is needless to repeat the arguments used to prove that the bonds issued under its provisions will be promptly paid. The act also provided for the classification of the Directors into three divisions, to wit: the first, consisting of four members, to serve until the election of 1864; the second to serve until 1865; and the third, consisting of five members, to serve until 1866; and all annual elections are to be for four or five Directors, to serve for three years. The introduction of this feature into legislation is not unusual, but, on the contrary, it has been the experience of corporations, that frequent changes are not attended with advantages; but among the many reasons advanced, the principal one was, that as the securities created by the bill itself only operated on any imaginary road, and their negotiation dependent on the confidence in the management, and on the proceeds being applied to its extension, a majority of the Directors negotiating these bonds should remain in the Board sufficiently long to see the faithful application of the same. The report of the President for the year ending March 1, 1865, says:

During the period of fifteen years of the Company's organization, there has not been a more eventful year, varied and perplexing as many of them have been, than the year closing with this Report. Obtaining from the State a partial release from its lien, the securities for its completion having generously been purchased by our own people, all the ingredients for a completed Road were secured, leaving nothing but grading, masonry, bridges, &c., to be done; all was again quiet in the interior of our State, her people once more at home and contented, with our daily revenues increasing, and all flattering and prosperous, when, almost without warning, our State was once more invaded by *rebel forces*, who, like an avalanche, came down, destroying with the torch our depots, bridges, water stations, engines, and indeed almost everthing perishable; leaving everything a wreck, and destroyed, as if it had been a thing of life. The invasion of Gen. Sterling Price, on the 30th of September, 1864, found the unfinished line alive with laborers, the Transportation Department never so prosperous, and the most sanguine friends of the Road gratified with its earnings.

We embody the succinct statement made by a Committee of the Board to the St. Louis County Court, showing the localities, loss, and damage sustained from the insane invasion, as well as the general condition of the work and its progress at that time:

In September last, when Price invaded the State, trains were running regularly to Warrensburg—a distance of 218 miles. The track was laid 7½ miles beyond Warrensburg, and the work was making good progress all along the line from where the track-layers were engaged to Independence—the track between Independence and Kansas City having been put down in July last.

The number of men engaged on the work at the date first named was about eleven hundred, and such was the progress of the work that the Chief Engineer, Mr. McKissock, and the Superintendent of Construction, Mr. Garrison, predicted that we could open the Road to Holden by the middle of October, and to Pleasant Hill by the 15th of December. In fact, Mr. Garrison was hopeful of completing the entire Road within the first month of the coming year, and all were confident of running trains through to Kansas City early in the spring. But the invaders came, and the destruction of bridges, station houses, water tanks, locomotives and cars followed.

The bridges destroyed were as follows: Bœuf Creek, 230 feet; Big Berger, 190 feet; Little Berger, 90 feet; Hermann Creek, 110 feet; Cole Creek, 160 feet; Gasconade River, 759 feet (including a draw); Bailey's Creek, 110 feet; Osage River, 1,122 feet; (including a draw of 180 feet); Moreau Creek, 220 feet; Gray's Creek, 100 feet; Lamine Creek, 163 feet, and two bridges in Jackson county.

The depot buildings, wood sheds, &c., at Franklin, Gray's Summit, South Point, Washington, Miller's Landing, Hermann, Osage, Lookout, California, Syracuse and Otterville, were all burned.

At Franklin they also destroyed a machine shop and engine house, and at different points along the Road, nine water stations, including serious damage to all the stationary engines. Four locomotives were broken and seriously damaged, and thirty-nine freight cars destroyed by burning. There are many other items, such as tearing up the track, the burning of cross-ties and wood collected along the Road, that go to swell the aggregate of the Company's loss, and we feel justified in saying that the replacing of the property destroyed will at the present prices cost full five hundred thousand dollars. In addition to this, the net earnings of the Road before the bridges were destroyed were full fifty thousand dollars per month, and the four months that will be lost before trains can run through again will cost the Company $200,000, making a present loss to the Company of $700,000 to say nothing of the prospective loss resulting from the delay in completing the Road.

Early in October the men engaged in construction were all driven off and scattered, and the work west of Warrensburg entirely suspended.

It will be seen from the foregoing that the loss to the Company was estimated at seven hundred thousand dollars, but there can be little, if any, doubt, but that it far exceeds that sum in loss of business and delay of a completed Road.

To repair the damages sustained would absorb all the resources of the Company, leaving nothing for its extension; and although the replacing of bridges, depots, &c., was at once begun, yet it was not until the 18th of February that the trains were operated over a connected Road. Our finances exhausted, and the General Assembly powerless to extend further aid, we applied to the St. Louis County Court for a loan of its bonds. On the 18th day of January, 1865, an order was issued, loaning seven hundred thousand dollars to the Company. This amount was paid in bonds of one thousand dollars each bearing seven per cent. interest, payable semi-annually; they are dated February 1, 1865, and have twenty years to run; both principal and interest payable in the city of New York. The bonds, although loaned and to be paid at maturity by the Company, are plain, ordinary bonds, the Company not being mentioned in the same; but were loaned upon condition that the annual interest should be in monthly instalments paid into the County Treasury, and the bonds at maturity. A part of these bonds have been sold; a number of mortgage construction bonds yet remain undisposed of and in the custody of the fund commissioner.

Your attention is earnestly attracted to the financial condition and future necessities of the company. With a continuous and operated road to Kansas City; there will be little left to furnish the necessary rolling stock; and as in the past, so in the future the Directors of the road must furnish money or credit to pay for the same, to be reimbursed from its future earnings.

We have added, the present year, made at our own shop, two passenger cars, two drovers' cabooses, twenty box, forty flat, and ten stock cars; also, purchased from manufacturers, eighty flat, and fifty box cars; but, during the year fifty-four freight cars were burned by the rebels, and sixteen box and five flat cars were sold to the Government to be used on the southern roads. There have been added four locomotives; and have contracted for sixteen more locomotives, fifty box and eight stock cars, and six passenger coaches, all to be delivered and paid for as the months in this year expire. So necessary is this rolling stock to operate a continuous and completed road, that from past experience it were impossible to furnish transportation either for freight, passenger, or mails with facility and profit.

From the exhibit of the annual earnings, found in the Superintendent's report, it will be seen as follows, viz:

Total earnings for fiscal year.....	$1,295,537 93
Total expenses charged to transp..	1,082,332 70
*Net earnings.....	$213,205 23

Although there was no continuous road or transportation from the 30th of September to the 20th day of February, yet it will be seen that the earnings of the Main Line were $191,047 52, over those of 1863, while those of the South West Branch fall short $53,806 54. The cost of operating both roads was 83.54 per cent. of the gross earnings.

That the business will greatly increase so soon as we reach Kansas City, requiring a much larger increase of stock, is obvious; for there we meet the "Union Pacific," now extending and being operated through the centre of Kansas to Lawrence, and tributary to our own, to say nothing of the competition we offer competing roads. It becomes important, then, in view of the financial aid devolving on the directors, that those to be elected to-day should be willing to share with those remaining an equal burden.

There have been replaced on the Main Line, during the year, 42,067 cross-ties between St. Louis and Gasconade, and, west of that stream, 20,270. Five hundred tons of new rails have been laid in repairs, and about one thousand tons of old rails are being accumulated preparatory to their re-rolling at the East St. Louis Mills, which are to be used in repairs. From the Superintendent's report, the following explains itself:

The number of ties, and the iron replaced, as well as the renewal of the burnt bridges, depots, buildings and water stations, repairs of locomotives damaged, and losses upon wood, ties and fencing, have all been charged among the operating expenses of the road; and this, coupled with the fact that the earnings were for a while almost entirely cut off by the raid, makes the report of operating expenses show a very large percentage of the gross earnings.

As the road progressed, the necessity of the telegraph became more obvious, and an arrangement was made with the telegraph company for an independent line. It is regularly operated to Warrensburg, and all material is on hand for its extension to Kansas City.

SOUTH-WEST BRANCH.

This was the first that the rebels in their invasion destroyed, and from its earnings above shown it is obvious that no extension of the same could be made unless other sources were found. The road is under the exclusive control of the company, and pursuant to the Act of the General Assembly approved February 10, 1864, with the view of its extension to the Little Piney, negotiations were inaugurated with the late Treasurer of the State, for the sale of the lands and re-investment of their proceeds in the company's bonds, in compliance with the terms of said act; but as trustee of the fund arising from the sale of said lands, created by Act of December 10, 1855, vesting discretionary authority, he could not assent to such investment, and hence the road has not been extended as contemplated. Every effort has been made to induce the Government to extend the road, but without avail; and, unless some new policy by the General Assembly is adopted for the extension and completion, it must remain as it is. Its road-bed and rolling stock are in good condition; but until the country in the South-west becomes more quiet, and the people resume their labors, little if any additional business can be expected.

The equipment of the road consists of: 42 locomotives, 26 passenger, 8 baggage, 6 mail, 184 box, 20 caboose, 2 wrecking, 1 paymaster's, 1 magazine, 98 stock and 218 platform cars. Number of miles run, 598,415; do., on the South West Branch, 100,562. Total cost, $232,395 17. Average number of miles run by each engine, 14,248.

* All the repairs of the road, new iron in track, as well as the expense of rebuilding bridges, depots, water stations, and in fact repairing the damages sustained by the raid of General Price, are charged to "Operating Expenses," and not to "Construction Account;" hence it follows that the damages being repaired, the same were paid from the net earnings, which explains the increased expense of operating; leaving the net earnings as above stated.

President.—GEORGE R. TAYLOR.
Vice President.—DANIEL R. GARRISON.
Secretary and Treasurer.—J. C. PORTER.
Chief Engineer and Sup't.—T. MCKISSOCK.

Philadelphia Central R. R.

The route for this new line from Baltimore to Philadelphia has been surveyed and will be permanently located in a short time. The new road will leave the Philadelphia, Wilmington and Baltimore line at Stemmer's run, thence passing through the twelfth and eleventh districts, it will cross the Belair road at Mr. Brooks' and the Gunpowder river at Mr. John Fox's saw mill. It will prove of immense advantage to that section of our country in developing the fine water power found there, and lining the streams with mills and factories.—*Towsontown Union.*

Western Maryland R. R.

The annual meeting of the stockholders of this company was held at Westminster on the 18th inst. Three directors were elected to serve for the ensuing year, viz: Nathan Engler, Augustus Shriver, and Granville S. Haines. The directors elected are those who acted in that capacity for the past three years, are the friends of Captain Robert Irwin, president of the company, and his re-election for another twelve months is thus secured. Prior, however, to the hour of voting, a resolution was offered by Captain Irwin, to the effect that the recent act of the Legislature, authorizing the Mayor of Baltimore to appoint two directors upon the part of that city in said road, who, after being confirmed by the City Council, shall represent Baltimore's interests therein, was unanimously accepted. The appointees under this resolution are Samuel McCubbin and John W. Randolph, Esqs. They hold their office for one year from date.

The annual report of the president, including the reports of the superintendent and treasurer, was read to the meeting. It shows the business and financial condition of the road for the past year. In brief stands as follows:

Gross earnings		$105,181 66
Gross expenses:		
Operating road	$57,854 75	
Construction	10,585 58	
Tools for engines and cars, and roads and shops	2,083 39	
		$70,523 72
Residue		$34,607 92
By the treasurer's report it is shown that the gross receipts, including the residue of last year, are		$128,542 81
And his disbursements		120,332 96
Residue, Sept. 30, 1865		$8,209 85

Through freights on produce have fallen off somewhat, yet the increase on passengers over the previous year amounts to $20,309 69, which promises well for the future of this work as it progresses. There are evidences also of an increase henceforward in freight tonnage.

The president in his report strongly and earnestly advocates the extension of the road to Hagerstown. In view of this fact he shows enough money, wanting only about $200,000, has already been guaranteed in the way of endorsements and subscriptions, to justify putting the work under contract. In reference to the obtaining of the comparatively small sum, either from Baltimore in her corporate capacity or from individuals, he has no doubt. It would make altogether over $1,100,000 guaranteed toward the extension; enough almost, if not entirely, to complete the work.

He also advises against all "entangling alliances" calculated to interfere in any way with the legitimate objects and purposes of this truly Maryland enterprise—that no combination be permitted to wrest it from the exclusive management in the future, as in the past, of those who would have its uses subservient to citizens along its line and to the present stockholders.

The report also speaks favorably of the Gwynn's Falls road, likewise of a third track on the Northern Central, from the Relay House to Bolton depot, and finds no objection to laying a track to Canton. It is in favor of all enterprises which may tend to enhance trade and prove of convenience to the people. An independent road from the Relay House to Baltimore, which will obviate the dependence of the Western Maryland upon the Northern Central, as at present, is strongly urged as an unavoidable necessity.

Steam Traction Engines on the Plains.

We published in our last an article on the Overland Traction Engine Company of this city, the object of whose organization is the transportation by steam power of trains of wagons across the plains between the Missouri River and the Rocky Mountains upon the ordinary roads of the country. Since then we have read the report of A. P. Robinson, Esq., who has been engaged this summer in exploring a section of the country immediately south of the Platte River for the purpose of determining the practicability of adopting these engines upon or near the present main line of travel. The points of departure for the transportation to Denver City and its vicinity as well as for the North Platte and the countries west of the Rocky Mountains are: Kansas City, Leavenworth City, Fort Leavenworth, Atchison, St. Joseph, Nebraska City and Omaha. From Kansas City a direct route extends to Denver City *via* Fort Riley and the Smoky Hill Fork, but owing to the difficulties with the Indians and to the absence of Government protection this route has not been used to any considerable extent. From all the points named, however, routes extend to the Platte River centering in the neighborhood of Fort Kearney, from which station one general road is adopted as far as Post Junction, a military post on the Platte about 85 miles east of Denver. From this post to Denver are two routes, one called the "cut off," forming a chord to the great bend of the Platte, while the other follows the general course of the river.

Between Fort Kearney and Denver City are various fords by which routes diverge to the North Platte, Fort Laramie, Fort Collins, Bridgers Pass, and so on to points west of the mountains. The stages, however, run by way of Denver, and their entire travel is carried from Post Junction, southwest to that city, and thence northward *via* Golden City and Central City to Fort Collins, the whole distance around to the latter point being about 170 miles, while an excellent route exists running direct from Post Junction up the Platte to the mouth of the Cache le Poudre River, and up that stream to the Fort the whole distance being only about 70 miles. By inspection of the map it will be seen that the distance is less from Nebraska City to Denver City, than from any of the other points named on the south of the Platte River. The direction of the Missouri River is northwest and southeast, and mathematically a point on this river due east of Denver must be nearer to that city than points lower down. By a right line there would be but little difference between Omaha and Nebraska City, but Omaha lies above the mouth of the Platte, and consequently any route from that city must either cross the Platte by a difficult and expensive bridge, or a dangerous ford, or follow its meanderings on the northerly side and cross the Loup Fork, the North Platte and other streams, involving also expensive bridges, or bad fords. Fording is besides at times absolutely impossible. The Platte has no tributaries of consequence on the south side, and during a great portion of the time there are but two, viz., Salt Creek within about 20 miles of its mouth, and Beaver Creek about 100 miles from Denver, which have any water in them at all. These are both small streams, easily bridged. The others are merely dry sandy beds crossed without trouble. For a distance of 75 miles west of Nebraska City the present stage route crosses many streams which take their rise near the Platte and run southward; but the divide between their sources and the Platte may be followed, furnishing a nearly level route to Fort Kearney, crossing only one of the streams named (Salt Creek.) This is the route of the old California trail, and it is still used to a great extent for heavy loads, although for the great majority of the trains the stage line is adopted on account of the saving of distance. Unlike the process of locating our eastern roads which to avoid undulation must follow the vallies, the engineer on these great prairies, to find level roads must follow these divides.

The country for 75 miles west of Nebraska City s a rolling prairie capable of cultivation, well watered by the various streams running southward, on the immediate banks of which there is a considerable growth of timber. Beyond this the country becomes arid and dry. Timber disappears and no streams are found until the Platte is reached at Nebraska City junction, about 43 miles east of Fort Kearney. It is at this point that the direct stage route and the old California trail join. Following this latter route to this point not a grade exceeding 8 feet per 100 need be encountered, and not a particle of grading is required except upon the first four miles from Nebraska City. For this distance a new road involving a trivial amount of work will be required. The Platte River is a shallow stream varying from a half mile to one mile in width with a quicksand bed, and is full of islands of all shapes and sizes. These have generally more or less timber and bushes upon them, but not a particle of wood is found upon the main land until arriving within 50 miles of Denver City. The river meanders through a bottom of variable width sometimes as great as 20 miles. This bottom is bordered by an undulating ridge called "the bluffs" varying from 50 to 100 feet in heighth. Back from the bluffs is a dry undulating plain covered with a sparse growth of grass and weeds. The entire descent in the Platte from Denver City to its mouth is about 3,000 feet, (or less than 5 feet per mile) very uniformly distributed. No difficulty is therefore experienced in the selection of a route substantially level except at special points where ravines are met with, or where the river has washed away the bottom lands and encroached upon the bluffs. These in a few cases as at "O'Fallon's Bluff," and at Fremont's Orchard, are washed down into perpendicular faces of cemented sand more than 100 feet high, and it is neces sary to take to the plains south of them.

Indeed for most of the way this higher ground would furnish a magnificent road, the only necessity for adhering to a route nearer the river being for the purpose of obtaining grass and water.

The soil of the bottom lands is an alkaline clay,

making a road of the best description, while upon the plains above, it is with a few exceptional points of a cemented material forming the most magnificent natural highway possible. For long distances the route is upon a sort of glacis extending from the bluffs to the bottom lands with just sufficient inclination for drainage. No roads in the world can excel these, and for days they may be followed without an undulation. Throughout the entire route of 650 miles at the present time not an acre of ground is under cultivation, except perhaps for 50 miles at either end. The whole intermediate space is a waste upon which nothing can be raised except on the immediate bottom lands of the Platte, and owing to the dryness of the climate for eight months of the year, even these lands require irrigation. Capital is therefore required, and although it cannot be doubted that its investment in such improvements would meet with the most profitable return, the difficulties with the Indian tribes which roam this country are such as to deter any one from making improvements. From Fort Kearney to Post Junction a distance of nearly 300 miles, the ranches which were built thickly along the route were all with a few exceptions destroyed by the Indians last winter, and nothing can now be seen except the ruins of their turf walls. In some cases a portion of these have been patched up by some adventurous squatter for the purpose of opening a little stock of groceries and whiskey for the supply of the trains, and a very profitable business is carried on.

The road is a great thoroughfare filled from one extreme to the other with a constant succession of ox and mule teams, carrying their own provisions and supplies, and camping when night overtakes them.

They are in trains varying from 5 to 50 wagons, each team consisting of six animals hauling from 2½ to 3 tons.

It is upon this tedious and expensive process that the great region west of this barren distric is now dependent for its entire supplies.

Even at the mountains such is the uncertainty of a crop owing to drought and insects, that agriculture is an exceptional employment, and every article of food or clothing must pay not only the enormous tax of fifteen to twenty-five cents per pound for transportation from the Missouri River, but a profit upon this as a part of the cost and at times an usurious interest for the delays which occur for the want of teams.

The result is a range of prices at Denver City, even for the commonest necessaries of life so exorbitant as to prohibit any successful development of the mining operations, and to preclude hope of any reasonable return for the immense investments which are being made, until more reliable and cheaper and speedier modes of transportation shall be provided.

The railway from Kansas City is only in operation to Lawrence 40 miles. The Omaha route is not yet laid for 30 miles. The rates of progress heretofore made would not lay the rails to the Rocky Mountains in half a century, and no practical railroad constructor will venture to say that it would be practicable to lay the track upon 600 miles of road in six years, even if all graded in advance, through a country destitute of timber for sleepers, and with no possibility of procuring a particle of the material required for the work of to-day, except over the rails laid yesterday. That it will be built cannot be doubted, but the popular idea that it can be built in a year or two is absurd.

Not only for the time occupied in the construction of this road are increased facilities necessary, but when it is constructed tenfold the means will be required to reach the lateral points, which in that period will be developed.

The enormous transportation of the past year involving an expenditure of more than twice the gross income of the Erie Railway cannot wait for the rails.

The road is already graded for the traction engine, and a less *number* of months will put them in operation, than would be required of years to send a locomotive over the route.

The experience so far with traction engines has been just sufficient to show what conditions are necessary to be fulfilled, to insure their success.

With an engine of given capacity and an adhesion upon the road sufficient to use all its power, it is as simple a problem to determine the load it will draw, and the fuel it will consume as it is to determine the same results in the locomotive engine. Designed to run at a rate of speed less than one-third the locomotives, they can be geared to carry correspondingly greater proportional loads. Their broad wheels to which there is no limit of tread, give them no greater weight on the ground than there is in the case of the lightest wagon. The simple difference is the rolling resistance. In the railway a ton of load upon a level straight line may be moved at a speed of five miles per hour, with 10 pounds of power, while upon a level highway of the character of that in question, it requires ten times as much, or one hundred pounds. As the grades increase this proportion would be lessened, so that upon a grade of 1 in 20 or 5 feet per 100, the ton upon the railway, would require 110 lbs., while that upon the highway would require but 200 lbs., or less than double.

The peculiar features of the Frye engines designed for this route are:

1st.—All the wheels are driving wheels, the whole weight of the engine being thus available for *adhesion*.

2d.—They are not coupled in any way, but are entirely independent of each other.

3d.—Each wheel has a double engine there being 8 cylinders, so that their are no dead centres.

4th.—The wheels are thus permitted to be corrugated on their tread, so that on a good hard road their adhesion is sufficient to use the entire power.

As ordinarily constructed, only the two rear wheels would be driving wheels. There would be but two cylinders attached to the same driving shaft, consequently its driving wheels must move at the same speed and cannot be corrugated to avoid slipping.

A comparison of the two engines supposing them to be of same weight and with same cylinder capacity, would be as follows:

Let the engines weigh 32 tons each, the total cylinder area be 600 square inches, and let them be so geared that the speed of the pistons and the speed of the tire of the driving wheels are alike, and let them carry a pressure of 100 lbs, steam. The actual power upon the pistons in each engine is therefore, 60,000 lbs.

Deducting the power consumed by the friction of the machinery and the resistance of the blast, &c., &c., and the balance is the traction power which each engine *should* exert in hauling its load. Supposing 20 per cent. to be lost in this way there would be left 48,000 lbs. of traction power, which upon a level hard road should haul a gross load of 480 tons.

Deduct from this the weight of the engine, and its fuel and water for 20 miles, say 54 tons, and 426 tons would be the weight of wagons and load. If one-third of this be wagons, then 284 tons would be the weight of freight which such an engine *should* draw.

In the Frye engine the corrugated wheels as previously described, give adhesion to an unlimited extent, and therefore this is the comparative load it *would* draw. In the other engine its load would depend entirely upon the adhesion of smooth tires upon an earth road. This is found to vary from one-quarter to one-third the insistent weight. Giving it the highest value, and assuming ⅔ the weight of engine and fuel and water to be on driving wheels, viz., 36 tons, the value of this for traction would be 24,000 lbs., equal to hauling 240 tons of gross load. Deducting the weight of engine and water and fuel, 54 tons, there remains for wagons, and freight 186 tons. One-third of this being wagons, 124 tons would be the net load, or 36 tons less than one-half the load that the Frye engine would draw. It is in this way that Frye's engine fulfills conditions necessary in a route like that across the plains where fuel can only be obtained at each end.

It must carry full loads of freight west, and bring coal east. It must therefore have capacity to haul a load equal to the amount of coal it would require for the round trip.

No engine yet designed, except Frye's, has shown the elements necessary for such a performance, and hence although they have answered a purpose in a small way, they have never yet been placed on long routes. Nor has such a route heretofore presented itself.

Here is one, not only requiring these certain conditions to be fulfilled, but offering a reward to him who accomplishes the task almost beyond computation. Steam will show the same results here that it has always shown in comparison with animal power no matter to what purpose it has been applied. Even in the smallest as well as the most Herculean tasks, it performs the service cheaper, quicker, and with more certainty.

Minnesota Railroads.

The Minnesota Valley road has been completed to Mendota, and a junction made with the Central road. The track is laid on the Valley road to within five miles of Shakopee or fifteen miles beyond Mendota. The Valley and Central companies have agreed to complete the road to a temporary terminus to West St. Paul, at St. Paul Bridge, by the first of June next. The Minnesota Central was completed, and the cars running to Faribault, on the 12th inst.

☞ The first line of railway in the Danubian Principalities will shortly be commenced. It is to be about fifty miles long, and will extend from Bucharest to Giurgewo.

Liabilities of Canal Companies.—How Different from those of Common Carriers.

The case of the Exchange Fire Insurance Company of the City of New York, *vs.* The President &c., of the Delaware and Hudson Canal Company, was brought by the plaintiffs as assignees of the Ogden Rosendale Cement Company, to recover from the defendants the sum of $588 61, the value of a quantity of cement shipped on a boat navigating the canal of the defendants, and damaged by the sinking of the boat caused by an obstruction on the bottom of the canal.

The defendants were incorporated for the purpose of constructing and maintaining a canal from the Delaware to the Hudson River to be used by the public on payment of tolls, and by their charter were authorized to establish such by-laws, rules and regulations as should be necessary for the due management of their property, interest and affairs. One of their regulations for all persons navigating the canal required, in effect, that all boats should be of a pattern approved by them.

The Cement Company were the owners of the boat C. O. David, and of a cargo of cement with which she was loaded. The plaintiffs had insured the cargo against the risk of transportation. The boat was of the pattern prescribed by the defendants, and had been for several years on the canal. She drew five feet of water on this trip; and according to the testimony of the master, was loaded to that depth by the direction or with the assent of the defendants' servants. On the trip she struck a large stone, filled and sunk, and the cement company claimed and received the amount of loss from the plaintiffs, and assigned to them their claim against the defendants. On the trial the defendants moved for a non-suit on the grounds that no negligence had been shown on the part of the defendants and that, without such negligence the plaintiff's could not recover.

The Referee granted the motion, and judgment having been entered for the defendants, the plaintiffs appealed.

Robertson, J.—The action in this case is brought for damages for a breach, not of duty but of contract by the defendants with the assignors of the plaintiffs, (The Ogden Rosendale Cement Company.) The contract alleged in the complaint is, that the defendants agreed with the cement company that they would float a canal boat, with a certain cargo on board, on their canal from a point thereon to the Hudson river, in consideration of the payment of tolls fixed by them, and "would furnish sufficient water to float such boat" between these points, "without obstruction or delay of any kind," except such as should arise from enforcing these regulations. The breach alleged is that such canal boat, with such cargo, started on her voyage on such canal, and while on such voyage was "struck against a rock or stone, which had been carelessly or negligently placed or allowed it to be placed or laid by the defendants at the bottom of such canal, so as to obstruct the proper navigation thereof," by which she sunk and damaged her cargo. The complaint alleges that the boat was of a "pattern approved by the defendants as suitable to navigate such canal, and was allowed by them to navigate it." The defence in the answer substantially is that if any such rock or stone was in such canal, "it was wrongfully placed there by others without the knowledge or consent of" the defendants, and "its existence in the canal was not known to the defendants before or at the time of the" supposed injury.

The only question of law in this case seems to be the extent of the obligation of the defendants to keep their canal free from obstructions. If, like common carriers, they are bound to insure the navigation on such canal against all accidents from unforeseen causes, and which human foresight could not reasonably have guarded against, the defendants would be responsible. If they are only obliged to use reasonable diligence and take reasonable precautions to prevent accidents, it then becomes a question of fact whether they did so in this case. The canal, like a highway or railroad, if used by others is a mere instrument of use and profit belonging to the defendants which they are bound to keep in proper order for use. If they tempt the public to use it, and neglect proper precautions to make it navigable and safe they are undoubtedly liable for damages for such neglect. (Lancaster Canal Company, *vs.* Parnaby, 11 Ad. & El., 223; Townsend *vs.* Susquehanna Turnpike Company, 6 Johns, 90; Wilson *vs.* same 21 Barb., 68, 78; Adsit *vs.* Brady, 4, Hill, 630; Harris *vs.* Baker 4 Maule & S., 27.) And the rule is of universal applicability to individuals as well as public bodies, that they who induce others to make use of an instrument or article belonging to them, for a particular purpose, they retaining its possession, are bound to be innocent of all negligence in keeping it in a proper condition to be used, (Chapman *vs.* Rothwell 1 El. B. & E., 168; Seymour *vs.* Maddox, 16 Ad. & El., N. S., 326; Free *vs.* Cameron, 4 Rich., 228,) at the peril of being responsible for damages.

But there is no consideration of public policy to enlarge the liability of the owners of a canal beyond the employment of reasonable diligence. Unless they owned the canal boats, they could reap no benefit from either the simulated or real destruction of them or their cargoes, and therefore is no reason for putting them on a footing with common carriers, so as to render them insurers. No case has been cited which goes this length.

It is therefore a mere question of the fact whether the evidence shows neglect. The compliance by the cement company with the regulations of the defendants as to the character of the boat, was necessary in any case to give them a right of action at all; it does not make the liability of the defendants greater.

It is claimed that the presence at all of the stone in the canal, by which the injury was done, was *prima facie* evidence of negligence. This perhaps is a nice question to decide, upon any principle of law; it must depend upon the frequency and consequent possibility of such an obstruction getting there, notwithstanding due diligence. It would be impossible for a court to say, without evidence of the character of the neighboring banks, or the nature of cargoes transported, that the presence of a stone was to be attributed to negligence rather than unforeseen accident.

One thing is very clear, that the stone being covered by water, there was no notice of its presence until something came in contact with it. It would be unreasonable to require the defendants to sound and drag the whole length of their canal perpetually, to ascertain what obstructions might lie at the bottom, or keep guards along the banks to prevent the commission of injuries by designing persons.

But if there be any such presumption, there was evidence enough in the case to repel it. The stone which was the cause of the injury was, as appeared in evidence, over a foot and a half thick, of irregular shape, split or sledged off on one side. During that year, cobble stones had been lying on the banks of the canal, although none were so large. It did not appear to have been long in the water. The same vessel had passed down loaded a week previous, and up a day or two before unloaded. A witness testified that the level of the water was lowered by the drawing of the lock below, and the vessel could have got over if the level had been kept up. Under these circumstances there was room for the inference, in the absence of evidence to the contrary, that the stone had been where it was but a short time; that the defendants had no notice of its being there, and that it was placed there either by accidentally falling from a vessel, or by design of some unknown persons; and that as found by the referee, its presence was not owing to the fault or negligence of the defendant. (Toomey *vs.* London, Brighton, &c., Railway Co., 3 J. Scott, N. S. 146.)

The report and Judgment therefore, were correct and the latter should be affirmed with costs.

The Isthmus Commerce.

Although the Panama Railway is an American property, and the result of American enterprise, it is the cause of immense profit to others, as may be seen from the following extract from the London Daily *Star*. It is worthy of notice, that we have no regular postal communication with the United States of Colombia beyond the two ports of Aspinwall and Panama, while England has four regular monthly mail lines to Aspinwall and Santa Martha; so that while we have shaken the tree, she is really getting all the fruit:

The trade across the Isthmus of Panama is of great importance to England. The amount of treasure which we obtained by that route in 1864 from British Columbia, California, the west coast of Mexico, and other places, was no less than $45,718,881, or 9,148,676*l.* During the same period ninety British vessels entered and cleared at Panama, on the western side of the Isthmus, of a tonnage equal to 71,049; while there entered and cleared at Colon (Aspinwall,) on the eastern side, 289 vessels, with a tonnage of 248,811. We have four regular steam packets per month to Colon—two from Southampton and two from Liverpool. So much for British shipping; but that is only a small portion of the traffic. Altogether 355 vessels entered and cleared at Panama, and 556 entered and cleared at Colon, during 1864, of an entire tonnage at both places of 852,-202. There are during the month thirty-four arrivals and departures of regular steam packets at the two ports. The transit trade consists of manufactured goods from Europe and the United States, and of treasure from California, British Columbia, &c., to Europe. The total transit trade amounted to 19,954,000*l.* for 1864, and the trade on the Isthmus itself for the resident population raised the total to 20,400,000*l.* It is believed the trade would be immensely increased if the transit could be accomplished under better conditions. In this belief a new route has been surveyed further to the northward than the line from Colon to Panama, at both ends of which there are said to be excellent harbors. The whole undertaking is, we believe, about to be brought before the

public for the necessary capital to construct the line of railway—about sixty-five miles—and the harbors.

☞ The Baltimore *Sun* says that capital stock nearly to the requisite amount has been subscribed to construct a railroad from Alexandria to Fredericksburg, Va., thence connecting with the road to Richmond. This project will reduce the distance between the National Capital and Richmond to 109 miles, and four hours travel.

"The Oil Regions of Pennsylvania."

This is the title of a neat volume of 275 pages, brought out by Messrs. Harper & Brothers. The author, Mr. William Wright, has been for many years connected with the press of this city, whom we know to be equally diligent and conscientious in his statements. In the month of April last he visited all the productive wells along Oil Creek, French Creek, Cherry Run, Pithole Creek, the Allegheny River, &c., gathering from superintendents, mechanics and laborers, his own observations, and the statements of neighbors, the actual yield of each well, its characteristics, history, &c. The result of all these observations, from every possible source of information within reach, is now before us.

In the opening chapter, on the "Physical Features of the Country," the author maintains that petroleum has no connection with the river-beds, slopes, &c., as many have argued; that it is as likely to be reached by boring on the table-lands as along the bottoms, allowing for the greater distance and cost; that the rivers have dug their channels to various depths from 100 to 400 feet, instead of the uplands having been individually upheaved. In this position he is fully sustained by Prof. Rogers, from whose Geological Survey several extracts are made.

The second chapter is a vivid sketch of the "Appearance of the Country," its wells, villages, hotels, modes of life, &c.

The third describes the processes in "Locating and Sinking Wells," concluding with the following estimate of the cost:

Engine and boiler of fifteen horse-power, delivered	$2,500
Engine-house, derrick, bull-wheel and cable, samson-post, walking-beam, and fixtures.	750
One tank, five hundred barrels	250
Drilling-tools, ram, driving-pipe, tubes, etc.	1,000
Labor, fuel, and extras	2,500
Breaks, delays, and other accidents, say	500
Total	$7,500

These figures may perhaps be reduced one-half, if the operators own the engine, and put forth their own hands freely in the various operations.

Chapter fourth is termed "the Law of Lawlessness," showing the freaks of the wells after oil has been reached. Various points of interest are discussed here, without, however, being able in all cases to explain the causes of such unexpected phenomena.

The next chapter, "Obstacles in the way," is much akin to the last named. We are here treated to the unpleasant truths that good wells are liable to whims, which involve large expenditures, and that finally all cease to be productive, the average period during which they continue profitable being not more than two years.

Chapter sixth gives in brief space the statistics and history of all the producing wells of that region in the month of April last, while the author visited them. We believe the figures given to be mainly correct, according to his best judgment. The chapter is long, but full of solid facts and figures. The following is a recapitulation of the whole:

Sections.	Wells in operation.	Total yield, barrels.	Av. per day.
Watson Flats, etc	21	362	17.1
Miller Farm	1	28	28.0
Foster and McElhenny Farms	15	523	34.9
Funk and Boyd Farms	16	648	40.5
Wash. McClintock "	15	345	23.0
Hyde and Egbert "	6	725	120.8
Storey "	22	855	38.8
Tarr and Blood "	19	411	21.6
Rynd & Wid. McC. "	14	147	10.5
Rouse & Buchanan "	17	415	24.4
H. McClintock to Oil City	16	682	42.6
Oil Creek valley	162	5,141	31.7
Cherry Run	51	1,972	38.7
Pithole Creek	3	*300	100.0
French and Sugar Creeks	14	50	3.6
Lower Alleghany	51	404	7.9
Upper "	31	669	21.5
Omitted	10	317	31.7
Grand totals	322	8,850	27.5

*Partly estimated.

"At this rate, the annual product of Petrolia may be set down at three million nine thousand barrels. We can very well afford to leave out of the account the odd thousands, and accept the round three millions as the amount of very sensible perspiration which has exuded from the pores of our common mother in that twenty miles square block of Pennsylvania.

"But, in truth, the amount given, magnificent as it may be, is far below the grand aggregate, taking one season with another. Along the Alleghany and the lower farms on Oil Creek and Cherry Run, I estimate the proportion of wells temporarily disabled by the freshet at one-fourth of those producing in the early part of March. Again, there are large numbers which are now operated during the summer months only, and had not then got fairly under way. I think one hundred of these at least would be going by the first of May, and continue steadily during the summer months. It is true the average productiveness of these is considerably below that of the aggregate. But if an allowance of one-half be made for this drawback, the residue would make a material increase in the quantity. The newly opened and re-opened wells will do more, during this summer, than replace those which go out of date as non-producers. Taking all these increments into consideration, I have no doubt that the actual yield of Venango is over ten thousand barrels per day, giving as a grand annual aggregate *nearly three millions and a half of barrels.*"

The remaining chapters are on "Oil Refining and Refineries." "How Strangers are Taken in." "Ought I to invest?" and "Practical considerations." We commend these particularly to all who would dabble in petroleum stocks, which certain of our leading journals appear desirous of galvanising afresh. Without asserting that the subject is exhausted, which it is not, we know no other publication approaching this in fullness, trustworthiness, and thoroughness. The author prosecuted his labors mostly *on foot*, journeying fully 200 miles during the four weeks it took him to collect the materials for his volume.

Union Pacific Railroad.

CORRESPONDENCE OF THE RAILROAD JOURNAL.

Omaha, Oct. 16.

The Union Pacific Railroad begins to look like a thoroughly successful enterprise. Those who have been misled by the difficulties which have unfortunately attended the Pawnee and Leavenworth branch; and have expressed their doubt as to the Grand Trunk itself, are rapidly discovering their mistake. The official report of Mr. Harbough on its actual condition and certain progress, is every hour confirmed by the daily extension of this great work.

We have just tested the truth of that report in relation to a part of the line. A few days since a section of the part completed was submitted to the test of an excursion, made particularly interesting by the presence of Gen. Sherman, the Vice President and Manager of the road, Mr. T. C. Durant of New York, the Governor of Nebraska, the Hon. Mr. Upham, S. Seymour Consulting Engineer, and other distinguished men. This assemblage of visitors were carried over 15 miles of the line, inspecting the culverts by the way, and giving particular attention to the working parties engaged in laying ties and rails beyond the present terminus of the completed part.

The presence of Gen. Sherman, whose name had been given to the splendid locomotive which drew the train, and that of Mr. Durant, Manager, brought out numerous complimentary and eloquent encomiums on these gentlemen. Whatever doubts may have hitherto existed among the interested or the unbelieving, were now completely removed by this excursion. The work is proceeding with great energy, no less than 13 mills are constantly employed in sawing ties, and six steamers are actively engaged transporting these exclusively. It is as certain as anything can well be, that by the 1st of January, 60 miles of the road will be ready for business.

There is not the least hitch or difficulty apparent in the work or management. Three quarters of a mile of track per day can and will now be laid by the company, and at this rate the public eagerness for rapid construction is in a fair way to be gratified. If there was any doubt about the efficiency of the means to do this, it has vanished before the logic of facts, and the personal assurances of Mr. Durant, whose experience, energy and capital are enlisted in the work. No foreign aid is at all necessary to complete the Union Pacific. The people who have constructed upwards of thirty thousand miles of railway, may challenge the admiration and respect of foreign contractors, however large their plans or pretensions, and I express only the general sentiment now prevailing here, that this road may be set down as a "fait accompli" without their assistance.

We all here look forward to its early completion, and to Mr. Durant and his associates as the guarantors to that effect. We also confidently expect that this result will be the greatest triumph of skill, capital, and American energy and foresight yet recorded in the history of our works of internal improvements.

NEBRASKA.

☞ About $19,000 has been subscribed to the proposed railroad in Kent county, Md., leaving a deficiency of $23,000. Another meeting of the friends of the enterprise is to be held in Chestertown on the 11th of November.

American Railroad Journal.

Saturday, October 28, 1865.

Stock Exchange and Money Market.

The agricultural resources and production of a country may be estimated pretty correctly by the value of its live stock. On a former occasion we took the pains to show that, in this respect, France was far behind the United States. By our last arrivals from England, we received a statement showing the value of its live stock during five years. It is as follows:

In 1859	£85,368,000
In 1863	80,050,000
In 1864	80,729,000
In 1865	82,772,000

which last sum in our money is $163,860,000.

According to our census of 1860, when our currency was at par with gold, the value of our live stock was $1,098,862,355, having about doubled in ten years. In sterling money, at five dollars to the pound, this was £219,772,471, showing a difference in our favor of nearly 700 per cent.! This is a remarkable fact, and we have no doubt but that in many other items of agricultural production, similar differences would be quite as apparent. One would suppose that our exports of salted, cut and packed meats would be something on the same scale; but with our present inflated currency and high prices at home, the export is not in proportion. We have hitherto been large exporters of flour as well as beef; but the same reason can be given for the falling off in this article also.

Looking at the last Liverpool Price Current, we perceive that the best kinds of American flour may be bought there at $6 in gold per barrel. Here, in our currency, and to the consumer, the price is as high as $16. Of course it is not possible to export it at a profit, for this price, reduced to gold, is $7.36, and the shipper would lose by the sale of it at Liverpool, $1.36 per bbl., besides freight, insurance, port charges and duty. At this rate we shall not be surprised if flour should ere long be imported into this country from England, as it now is from Canada, and at a profit to the importers. The truth is, we are now, all of us, no matter what the extent of our means, living at a more expensive rate than any other people in the civilized world. And what is still worse, the present system is making the rich richer, and the poor poorer. If nothing is done ere long to change this, those classes who live by labor, or on fixed incomes, gained by lives of industry and economy, must go to the wall. What will our readers think when we tell them, there are persons before the war independent in their circumstances, who now to maintain their usual position in society, and by no means given to extravagant living, are paying for the board of three persons in private lodgings as much as five thousand dollars a year. At our leading hotels these persons would have to pay $6,000. Certainly there must be something wrong, something rotten, something destructive, when such things are the rule rather than the exception. And if the rich incomists see their property melting away before their eyes, what must be the condition of those in moderate circumstances, when beef is from 35 to 40 cents a lb., butter 60 cents, and even apples 4 to 5 cents apiece! Bad enough, and in many dwellings these articles are now very rarely seen. While those who find employment may obtain nominally high remuneration in paper, it does them but little good, while on the contrary the demand for labor is far below the average, from the high price of the materials on which labor is employed. Thus, in this city, building is at a complete stand still, except in peculiar cases, because the necessary materials are not to be had except at an enormous rate. Thus thousands of industrious and willing laborers cannot find their accustomed employment. Under all the show of prosperity in our city, the extravagance in certain quarters as regards equipage, dress and entertainments, the great masses of the people, all other than the class of speculators, are real sufferers, notwithstanding the plentifulness of our currency. The political economist, the philanthropist, or the patriot cannot shut his eyes to these facts; and seeing them, also sees where to learn the cause. A return to specie payments can alone reverse the

present unhealthy condition of things; and as regards our foreign commerce, as long as everything is dearer here than anywhere else, we must expect to see it dwindle away, and our gold taken from us in a continued stream. Goods of a certain class are forced upon this country at long credits already, and the prices paid for most of them are almost fabulous. Were it not for the constant transmission of our stocks abroad now held by foreigners to the extent of hundreds of millions, we should this day be unable to pay for what we import and consume, in any other way, for the reason that with our immense production as we have shown in a single item at the commencement of these remarks, the prices current here, make them unsaleable abroad. Thus the richest, most productive, and the most industrious people in the world are in danger of falling behind hand from the condition of their paper currency.

Surely it is time for us to attend to this before it is too late. Let us not be misunderstood. No journalists have ever maintained our ultimate solvency with more confidence than ourselves through the darkest moments, or have pointed out our inexhaustible resources with more pleasure; but there is a line beyond which we cannot pass without danger of bankruptcy. If prices held any relation or proportion to gold the evil would not be so great. Gold is in fact the cheapest thing for sale in the market, but the prices of everything else are from 100 to 300 per cent. higher, and solely because we have paper money to tempt the cupidity of the producing classes and the combinations, in possession of large amounts of paper money, and with easily borrowed capital. Consider for a moment the operations of the cotton manufacturers, the flour dealers, the provision dealers, the cattle dealers, the leather trade, the clothiers and the bootmakers, all firmly banded in maintaining high prices, and striving to make fortunes, not by trade or exchange with other nations, but entirely by sales at home. Take the first example that happens to strike us. A good suit of clothes can be bought in London today for from $12 to $15, the price of which here is $60! Have we not wool? have we not manufacturers? What is the reason of this great difference, but paper money? The tariff does not explain it.

We therefore look with unfeigned anxiety to the Treasury department, and trust that the redemption of fifty millions of the compound interest notes will be followed up by other equally decided measures, with the support of other departments by immediate retrenchment. We feel justified in using this precise language and putting forth these opinions, for we regret to perceive in certain quarters, opinions favorable to a continuance of a system, which if persisted in, can end in nothing else but ruin. Paper money in the abstract is invaluable; we cannot do without it. Government stocks are also in several respects of great national advantage, afford the best and safest of all securities, promote investments, ensure certain income to the holders, and steady other securities, but too much of them, is the greatest misfortune that can befal a nation. Too much of them takes away the earnings of labor, depresses their value, increases taxation and impoverishes the people at large. If the hundred and fifty millions of dollars now annually taken from the pockets of the nation to be transferred to those of capitalists, could remain untouched with the producers, and be added to their profits, the wealth of this nation would go on increasing at a rate, which would in a few years secure every industrious man a competence, by the mere effect of economy and aggregation.

Our recent advices from abroad bring us the intelligence, that the Bank of England has been suddenly and rapidly advancing the rate of interest, and whenever this is done it seriously checks all commercial operations, if not occasioning serious losses to operators in stocks. It is a remarkable fact, however, that whatever restraint it thus puts upon speculation, is cheerfully acquiesced in by the large majority of capitalists, and solid merchants who recognize in its transactions a sound and conservative spirit. The old United States Bank, in the days of its best management, exercised a somewhat similar influence; but the public were uneasy under its financial sway, and it fell beneath the repeated blows inflicted upon it by its numerous enemies. Such an Institution as the Bank of England, could not maintain itself long in this country, for conservativism in Banking is not in much favor. Yet the fiats of this institution are not without effect even in New York, for all the numerous British agencies here are compelled to follow the fortunes, the interests and the instructions of their Home principals.

The market, again threatened with rumors of an immediate stringency with an actual attempt to produce it, has after all been too strong to be much influenced by the attempt against it. Money has been quite abundant. Governments have been rather dull under the news of the rise in the Bank of England's rate, and State Bonds were also dull. The English holders of those of the rebel states, have had a meeting to see how they can get their back interest, and will probably offer some proposition for a settlement before long. Railway shares were very animated in the beginning of the week, but some of them fell off from the circumstance that one of the largest holders had met with his second accident on the road by a fall from his wagon. The logic which worked this decline might be good for Wall street, but it could not prove that the stocks in question were in reality one cents worth less in value than they were a few hours previously.

Coal shares are growing firmer and getting into favor. The Coal companies are certainly coining money at the present prices of fuel.

We notice that the Treasury department is about to issue notes payable in gold on deposites therefor. The plan hitherto adopted by the dealers in this article, was to pay very roundly for the privilege of depositing their gold in a Bank, and drawing for it in a particular way.

We think the the Department might therefore be well entitled to receive a trifling per centage for the same operation, since it affords perfect security to the depositors and puts the Sub-Treasury to considerable trouble. Sometime ago we proposed the Government should sell gold notes to the extent of its surplus from time to time, and realise the profit, instead of putting the coin out in driblets, which, as experience proves, have had but a slight effect on the market.

It being supposed that the reconstructed States will require large banking facilities, and cannot be well denied, we think the law should be so altered as to require them to deposit legal tenders instead of bonds. This will at the sametime reduce the circulation, save interest on those bonds, and require no more outlay of capital in the one case than the other.

Foreign exchange is lower again. Bills with documentary security have been sold at 107½, nearly 2 per cent. lower than Banker's bills, this difference being entirely paid for the unquestioned security they offer, and not for any purely commercial reason. Exchange is in fact ruling in favor of this country, if we believe the usual formula. The exports from this port for the week ending Oct. 24, were unusually large, amounting to $5,008,602, consisting mainly of such articles as we exclusively produce, and must be bought at our own price, among these, cotton and tobacco. These at present are our principal safeguards against the enormous imports coming in to us, and to be paid for in gold.

The balance in the Sub-Treasury on Tuesday was still heavy $61,804,585.

Gold has risen and fallen the last week in fractional amounts, but it is a curious fact that the operators for a rise are paying very heavily to sustain themselves.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—New York 7s Bounty Loan, 98¾; Georgia 6s, 86; Indiana 5s, 83; McGregor Western R. R., 22; Macon and Western, 45; Spring Mt. The Mexican Loan.

We have given place in another column to the proposals for a Mexican Loan, presented and brought forward to the notice of the American people by the banking house of John W. Corlies & Co., 57 Broadway. It has for some time been thought that New York was likely to become as great a financial mart as London or Paris, and that hereafter loans would be negotiated here as readily as in those cities. When the trade and capital of the world are to be shifted from their present routes to the new one, consequent upon the construction of the railway to the Pacific, no doubt we shall see remarkable changes in this direction. But it seems we are not to wait for that. A neighboring country, appreciating our wealth and resources, seeks to rehabilitate itself by asking of us to lend her on good security, enough money to carry her through a struggle, the result of which is to press her under the heel of a foreign despot, or place her once more in the society of the republics. Such an appeal as this should be responded to at once, and we are glad to know that already the loan is making hopeful progress and likely to succeed.

To those persons who look merely to secure investments, we need but remark that in the States of Tamaulipas and San Luis Potosi, five millions of acres of agricultural, and half a million of mineral lands, the former worth up to $50 per acre, and the latter $100, are specifically pledged for the repayment of the loan. In addition to these, and as further security, 60 per cent. of all the Federal and State dues from port duties, imports and taxes in those States is pledged for the payment of the interest, and also to form a sinking fund. Still further, these bonds are to be received as legal tender at par of gold, for all debts and dues to the Mexican Government within those States, port duties, imports and taxes, and for lands. The terms therefore are of the most liberal character.

Aside from all these considerations there is another which should secure the success of the loan at once, and that is the *Munroe doctrine*, which may now receive immediate force, and without a war on our part to sustain it.

The Mexican Republican Government is in want of money and the materiel of war, nothing else. Supply it with money, and its resistance will end in a great triumph.

We therefore call on the press, politicians, and people who have been clamoring for the enforcement of the Munroe doctrine to step forward and subscribe at once to this loan. Let public meetings be held all over the United States to secure this object.

A direct war with France, possibly with England, also would involve this country in a new expenditure of hundreds of millions of dollars at once, and for a time destroy our whole commerce with foreign nations. Now we can avoid all this waste of money, and the waste of life by the simple and cheap process of filling up this loan without delay.

We therefore call upon the Munroe doctrinaires to come up to the mark, and prove their sincerity by their subscriptions. If they are not mere clamorers and pretenders, let them show their truthfulness by their actions. This loan will save us a war with France and enormous financial difficulties, and in that light, politically considered, merely without discussing the financial merits of the case, we recommend its immediate and general support.

California Freight and Passage Agency.

In addition to the agency of Wells, Fargo & Co., for the Pacific Mail Steamship Company, we observe another by the advertisement of F. W. G. Bellows, which gives the days of sailing, and the rates of through and way passage from New York to San Francisco, apparently of a different character. His advertisement being very full and explicit, we refer our readers to the same, for all necessary information. Mr. Bellows assures us that the entire passage from New York to San Francisco can be made in twenty-two days.

Dakin, Olcott & Co.

We publish the card of this new banking house with great satisfaction. Mr. F. P. Olcott is the son of Thos. W. Olcott, Esq., the President of the Mechanic's and Farmer's Bank at Albany, and has been the pupil consequently of one of our soundest and most eminent financiers and bankers. We therefore take great pleasure in recommending his house to our readers and the public, as one which they will find prompt, energetic, able, and worthy of confidence.

French Industrial Exhibition.

We have received a private note from T. D. Stetson, Esq., No. 5 Tryon Row, which fully explains the facilities offered to American exhibitors. Persons desirous of embracing this opportunity of exhibiting their inventions and fabrics in Paris, would do well to see Mr. Stetson at once.

Visit to the Oil Regions.

A very large party of gentlemen from this city and elsewhere visited the oil regions the last week by special invitation from the Hon. Mr. Culver, who having rapidly accumulated a fortune in the oil business, and being about to establish a city on the Alleghany River, took this method of inviting public attention to his new project. This new town is to be called Reno, and Mr. Culver has commenced the construction of a railroad on his own account, between that place and Pit Hole, 18 miles in length. The road will be finished by January, 1866, and in the transit of oil alone pay for itself in six or eight months, as it now costs $3.50 a barrel to team the oil in between the two places. The oil freight will be two dollars, and if there were nothing else to carry, the enterprise would be a fortune to the owners. Gen. Burnside is at the head of this enterprise, and Hon. G. A. Grow, ex-M. C., is, with Mr. Culver, in the land interests of Reno. It is no small labor to build a road to Pit Hole. Hills and streams, creeks and brooks, are in the way of plain and easy work, and it will cost about $650,000 to make the road at this season of the year, but several hundred men are now at work, and all who go to the oil regions, as well as those who have property there, will bless the day of its completion.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Northwestern Railway for the third week in October, 1865, were $205,829 29
Corresponding week of previous year. 175,982 13

Increase $29,847 16

The earnings of the Chicago and Rock Island Railroad for the second week in October, 1865, were $78,215 00
Corresponding week of previous year.. 69,165 00

Increase $9,050 00

The earnings of the Michigan Central Railroad for the 2d week in Oct., 1865, were... $116,430 00
Corresponding week of previous year.. 92,546 00

Increase $23,884 00

The earnings of the Grand Trunk Railway for the week ending Oct. 14th, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$60,940 00
Express, freight, mails and sundries..	4,036 00
Freight and live stock	86,844 00
Total	$151,820 00
Corresponding week, 1864	120,089 00
Increase	$31,731 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Oct. 14, were:

	1865.	1864.
Passengers	$3,537 95	$3,767 49
Freight	20,163 40	8,365 13
Express	180 22	104 16
Mail	296 58	296 58
Total	$24,128 15	$12,533 36

Receipts from January 1 to Oct. 14:

1865	$541,113 46
1864	452,579 39
Increase	$88,534 07

The earnings of the Marietta and Cincinnati Railroad for the 2d week in Oct., 1865, were:

	1865.	1864.
Passengers	$9,890 00	$10,350 67
Freight	13,041 50	9,169 56
Mail, express & telegraph	1,100 00	1,169 58
Total	$24,031 50	$20,689 81
Total for the fiscal year commencing Jan. 1	$935,178 58	$724,964 77

The traffic of the Great Western Railway for the week ending Oct. 20, 1865, was as follows:

Passengers	$39,737 30
Freight and live stock	44,691 49
Mails and sundries	2,501 16
Total	$86,929 95
Corresponding week of 1864	60,433 25
Increase	$26,496 69

Interest and Dividends.

The Chicago, Burlington and Quincy Railroad Company have made an extra scrip dividend of 20 per cent., and declared a cash half-yearly dividend of 5 per cent. on both stock and new scrip. The profit to the Shareholders is thus made equal to 26 per cent., exclusive of the market premium on the new scrip, should they elect to turn into cash.

☞ Will be sold at public auction on Wednesday, November 8, at one P. M., near the depot of the New York Central Railroad, in Buffalo, N. Y., ten new Eight-wheeled Box Freight Cars, five foot guage. Terms—cash, in government funds.

Railroad Earnings--Monthly.

The earnings of the Cleveland and Pittsburg Railroad for the month of September last, are as follows, viz:

Freight	$151,436 83
Passengers	82,104 36
Miscellaneous	6,500 00
Military	3,372 21
Total	$243,413 40
SEPTEMBER, 1864.	
Freight, Passengers, &c.	$215,424 46
Military	26,747 13--242,171 59
Increase	$1,241 81
Increase in regular traffic	24,616 73

The earnings of the Philadelphia and Erie Railroad for the month of Sept., 1865, compared with same month in 1864:

From freight	$128,623 57
" passengers	152,949 87
Total	$281,573 44
Earnings in September, 1864	108,193 64
Increase in 1865	$173,379 80

The following are the comparative earnings of the Norwich and Worcester Railroad during the month of September:—

1865	$78,430 42
1864	56,028 75
Increase this year	$22,401 67

Harlem Railroad Extension.

The Springfield *Republican* says the extension of the Harlem Railroad northward from its present terminus at Chatham, N. Y., to Bennington, Vt., so as to connect at that point with the Western Vermont Road, and thus form a straight through line from New York to Montreal, is a matter now settled upon between the Directors of the Harlem Road and those of the Vermont Road. Stock to the amount of $1,300,000 has been subscribed for, leaving only $500,000 to be taken to secure the construction of the road. The question which is now agitated in the extreme northwestern corner of Massachusetts is, whether the road shall be run outside the State line, or shall be brought up through the Hancock valley, striking the Green River valley at South Williamstown, and so on through North Williamstown, crossing the Troy and Boston road near the college, and then running straight through Pownal, Vt., to Bennington. The road was graded some years ago as far up as Lebanon Springs, New York. It would unquestionably be a great advantage to Northern Berkshire to have the road in question run through it, and the recent election of Messrs. Stanford Blackinton of Adams and P. A. Chadbourne of Williamstown among the directors is thought to augur a favorable decision.

☞ The repairs of the different railroads between Petersburg, Va., and Charleston, S. C., have been completed, and the railway route of travel is now open through from the former to the latter city. It runs via Weldon and Wilmington, N. C., and Florence, S. C. Petersburg can be reached from New York by steamers direct or by rail via Washington, Fredericksburg and Richmond. From Charleston to Savannah there is a regular line of steamers, and from the latter place Augusta can be reached by rail or Savannah river steamers. The roads from Augusta via Atlanta and West Point to Montgomery, Alabama, are now also in operation.

Central Pacific R. R.

The Sacramento *Union* says the Central Pacific Railroad Company has laid its plans for next year's survey. They have developed a better line over the mountains than was anticipated. The Directors, after a full consideration of the work before them, have concluded that they can and will lay a track to Truckee river, on the eastern slope of the Sierra Nevada, 118 miles from Sacramento, before next year. They have given the necessary orders to effect the object.

Pittsburg and Connellsville Railroad.

The Pittsburg *Chronicle* says that the work on the "Sand Patch" tunnel has already been commenced, and a considerable force of laborers are being put to work on the other portions of the line. The Baltimore and Ohio Railroad Company have decided to aid in the construction of the the road, which will ensure its completion.

Russian American Telegraph.

A telegram has been received from Fort St. James, on the Frazier River, British Columbia, announcing the completion of the Russian American Telegraph Line to that point, and that Capt. Conway is rapidly pushing on toward Stuart's Lake. The cable to cross the straits will be laid next August. A party is also on the way to Amoor River to build northward to meet another working party from the Anadyr. The enterprise bids fair to be carried to a successful completion at a much earlier day that generally anticipated. Col. Buckley was on his way to Gulf Anadyr at last advices.

Portland and Rochester R. R.

The bondholders have taken possession of the York and Cumberland Railroad, in Maine, and organized a new corporation, under the title of the Portland and Rochester Railroad Company. It is the purpose of the new management, to complete the line (now in operation between Portland and Saco River) to Rochester, N. H., on the Dover and Lake Winnipissiogee Road, instead of running to Great Falls, N. H., on the Boston and Maine Road, as originally designed.

☞ The Titusville *Herald* says that the stock has all been subscribed for the construction of a road from Union to Titusville, and the work will soon be commenced. The distance is but twenty-three miles; the grade of the road will not exceed, at any point, forty feet to the mile. The company is stocked with a capital of $500,000. It is estimated that it will not cost half that sum to grade the road, and that, by issuing its bonds, the company may obtain the iron, &c., to equip the road.

☞ The Winona *Republican* urges the speedy completion of the railroad connecting that place with the La Crosse road, and says: "if we cannot get an outlet this way we shall get it south through Iowa. There are but 26½ miles of road to be built to give us connection with the heart of Minnesota, and this link should be supplied at once."

☞ The Shore Railroad, which is to reach from New York to Norfolk (Va.) will be completed, it is now given out, in a year from this October. It is to extend through the county of Worcester in Maryland, and Accomac and Northampton, in Virginia, until it reaches Annamessex, a point opposite Norfolk, on this side of the Chesapeake Bay.

Turning the Course of a River.

We have all heard of the River Euphrates having been turned out of its channel, to afford a passage into Babylon for the troops of Cyrus; but to find an example of the current of a river being made to flow in an opposite direction to that in which it ran originally, we must look to Chicago. The river of that name, upon whose banks the modern city grew up, has a scarcely perceptible motion at times flowing into Lake Michigan. On its way it becomes a receptacle of all the washings and other filth which collect in a large city, sending up an effluvium, that is equally unpleasant to the olfactories and detrimental to health.

It is now proposed to open a canal from near the source of the river or bayou to a point on the Des Plaines River, which flows southward into the Illinois and the Mississippi. The two streams discharging in opposite directions, approach within eight miles of each other, the divide consisting of a tract of land so low that a cutting of less than 15 feet will suffice to connect them and force the Chicago River *to run up hill*, making its source to be Lake Michigan, instead of its outlet. The surveys have been made and the work of construction has begun, the expense being borne by the city. It has been ascertained that by deepening the Illinois and Michigan Canal to Lockport a distance of barely 20 miles, a brisk current can be created, which will cause a constant influx of pure, fresh water, instead of the dull, stagnant, poisonous stream, which now creeps lazily through the place. This, with the tunnel improvement, will give that city a supply of water unexcelled in quality as in quantity by that of any other city in America or in the world.

☞ The Great Falls and South Berwick Branch Railroad will be sold by Auction at Portsmouth, N. H., on the 4th of December. The track extends from the termination of the Great Falls and Conway Railroad in Somersworth, and through Somersworth and Rollinsford, in New Hampshire, and Berwick and South Berwick, in Maine, to the Portland, Saco and Portsmouth Railroad.

☞ A despatch from St. Paul to the Chicago *Tribune*, says: "It is currently reported that a company of New York capitalists have purchased the railroad through Wisconsin from Hudson to Bayfield for $175,000. They agree to build 40 miles by the 1st of next September. As the land grant is still held by the State, the sale at such figures is doubtful."

☞ The grading of the first ten miles of the Cedar Falls and Iowa Central Railroad has been begun.

DAKIN, OLCOTT & CO.,

BANKERS,

NO. 23 WALL ST.,

NEW YORK.

Government and State Securities, Stocks, Bonds, Gold, &c., Bought and Sold on Commission. Interest paid on deposits in excess of $1,000 at the rate of four per cent. per annum.

Pacific Mail Steamship Company's

THROUGH LINE TO

CALIFORNIA,

Carrying the United States Mail.

THE PACIFIC MAIL STEAMSHIP COMPANY will despatch on WEDNESDAY, the 1st of NOVEMBER next, at twelve o'clock, noon, from the Company's PIER, No. 42, FOOT OF CANAL STREET, North River, their NEW AND FIRST-CLASS STEAMSHIP

HENRY CHAUNCEY,

Capt. ALFRED G. GRAY,

for Aspinwall, connecting via the PANAMA RAILROAD across the Isthmus of Panama, and on the Pacific with the Company's favorite steamship

GOLDEN CITY,

for San Francisco.

The steamers of this Company will sail regularly thereafter, as above, on the 1st, 11th and 21st days of every month, except when such dates fall on Sunday, when the departure will be on the preceding Saturday. The

ATLANTIC,

Captain JEFFERSON MAURY will sail on SATURDAY, November 11th, connecting on the Pacific with the COLORADO. The

BALTIC,

Captain ROBERT H. HORNER, will sail on TUESDAY, November 21st, connecting with the SACRAMENTO.

THROUGH PASSAGE RATES,

INCLUDING RAILROAD FARE.

First Cabin, $350; Second Cabin, $250; Steerage, $125. Children between 6 and 12 years, ½ fare; children from 2 to 6 years, ¼ fare; children under 2 years, free.

Bankable funds (currency) only taken in payment.

Out of town applicants may secure passage by remitting bank drafts on New York to the Company's agent, who will send tickets by mail or express, as may be directed.

Baggage checked through in charge of baggage masters over the entire route.

100 pounds baggage allowed each adult passenger. For all over this weight 10 cents per pound must be paid to the purser on board. No merchandise nor bedding taken as baggage.

WAY PASSAGE RATES,

NEW YORK TO ASPINWALL.

First cabin, $125; second cabin, $90; Steerage, $50. Children at proportionate rates.

WAY-BAGGAGE.—On all over 100 pounds to each adult passenger three cents per pound, payable to the purser on board.

ASPINWALL TO PANAMA.

$25 in gold, and children in proportion, payable at Aspinwall.

An Experienced Surgeon assigned to each Ship, Medicines and Professional Services free of Charge!

For Passage Tickets, or further information, apply at the Company's Ticket Office, on the wharf, foot of Canal Street, North River.

THE HARMONY

Mutual Coal Company.

CAPITAL ....$600,000.

(Represented by the lands owned by the company.)

Divided into 60,000 shares, the par value of which is fixed at $10 each.

Of these, 12,500 are appropriated for working capital.

OFFICERS:

President.....Mr. DAVID B. TURNER
Vice-Presid't and Treas.....Mr. MARTIN G. BATES.
Secretary.....Mr. JOHN H. ROLSTON.
Attornies.....PLATT. GERARD & BUCKLEY.

DIRECTORS:

HENRY A. SMYTHE, President of the Central National Bank.

JOHN P. YELVERTON, President of the Bank of North America.

NOAH L. WILSON, President of the American National Bank.

FREDERICK SCHUCHARDT, of F. Schuchardt & Sons, Bankers.

NATHAN CHANDLER, of John Munroe & Co., Bankers.

WM. H. TOWNSEND, Treasurer of the Sterling Iron Company.

DAVID B. TURNER, of New York.

Each share will be entitled, from the coal mined by the company in any one year, to its proportionate share of said coal so mined at cost, not exceeding one ton per share, (or the profits thereon,) and a dividend of the profits from the product, beyond the amount delivered on the shares.

The property of this company is situated between the town of Scranton, Penn., and the Wyoming Valley Railroad and Coal Company's property, about one mile from Scranton, and adjoining the Wyoming Railroad and Coal Company. It is free and unincumbered, and the company has no debt of any kind. It is one of the best coal properties in the valley, being estimated to contain seven millions of tons of coal, almost the whole of which is above water level, and capable of producing from 100,000 to 150,000 tons a year.

Any shareholder not wishing to take his coal can have it sold by the company for his account, and receive the profit.

New York, Saturday, November 4, 1865.

Liability of Railway Companies for Acts of Contractors, Agents, &c.

It seems to be now well established that a railway company is not liable for the act of a contractor's servant, where the contractor has an independent control, although subordinate, in some sense, to the general design of the work. The distinction, although but imperfectly defined for a long time, has finally assumed definite form, that "one is liable for the act of his servant, but not for that of a contractor, or of the servant of a contractor." (Redf. on Railways, § 168.)

The English case of Steel *vs.* Southeastern Railway, 32 Eng. L. & Eq., 366, was an action against the company for flowing the plaintiff's land, by the defective manner in which certain mason work was done, by the workmen of one Furness, who did the work as a contractor under the company, but under the superintendence of one Phillips, the surveyor of the company who furnished the plans. It appeared that the injury resulted from the workmen not following the directions of Phillips. The Court held that the action could not be maintained, and one of the judges remarked, in his opinion, that "if it could have been shown that the plaintiff's land was flooded in consequence of something done by the order of Phillips, the company's surveyor, it might have been said that was the same as if Phillips had done it with his own hands, and then the company would have been responsible. This work was done under a contract, and there is nothing to show negligence in any one for whose acts the company are responsible."

But if the contractor or his servants do an act which turns out to be illegal, or a violation of the rights of others, and it be the very act he was employed to do, the employer is liable. (Ellis *vs.* The Sheffield Gas Consumer's Co., 22 Eng. L. & Eq., 198.) The Chief Justice said, in this case, "The position in effect contended for by the defendants' counsel, I think wholly untenable, namely, that where there is a contractor, the employer can in no case be made liable. It seems to me that if the contractor do that which he is ordered to do, it is the act of the employer, and this appears to have been so considered in the cases."

Some of the earlier cases in this country and in England, held that the employer was responsible for all the acts and omissions of a contractor, the same as for those of a servant, but the course of decisions is now in conformity to the two cited by us, and adopt substantially the same view. (See Hilliard *vs.* Richardson, 3 Gray, 349.)

Sometimes a distinction has been attempted to be drawn in regard to the employer, whether the employment were by the job or by the day, making him liable for the acts of the operatives in the latter and not in the former case. But this is obviously no satisfactory ground upon which to determine the question, although it might in point of fact, come very near to effecting the same, or a similar separation of the instances in which the employer is, or is not liable. But the true ground of distinction is, not the form of employment nor the rule of compensation, but whether the work was done under the immediate control and direction of the employer, so that the operatives were his servants and not the servants of another, who was himself the undertaker for accomplishing the work, and having a separate and independent and irresponsible control of the operatives.

Every man is answerable for acts done by the negligence of those whom the law denominates *his* servants; because such servants represent the master himself, and their acts stand upon the same footing as his own. The *sub-contractor*, and not the persons with whom he contracts, is liable civilly, as well as criminally, for any wrong done by himself or his servants in the execution of the work contracted for. (Laugher *vs.* Pointer, 5 B. & C., 547; Overton *vs.* Freeman, 11 Com. B., 867.) It is said: "The liability of any one, other than the party actually guilty of any wrongful act, proceeds on the maxim *qui facit per alium facit per se*. The party employing has the selection of the party employed, and it is reasonable that he who has made choice of an unskilful or careless person to execute his orders, should be responsible for any injury resulting from the want of skill or want of care, of the person employed; but neither the principle of the rule nor the rule itself can apply to a case where the party sought to be charged does not stand in the character of employer to the party by whose negligent act the injury has been occasioned." (Hobbit *vs.* London, &c., 4 Exch., 255.) Thus, it is often held that municipal corporations, are not liable for the acts or negligence of their contractors, unless the relation of master and servant exists between them. (Barry *vs.* St. Lowis 17, Mis., 121.) So trustees or commissioners, intrusted with the conduct of public works, are not liable for injuries occasioned by the negligence of the workmen employed under their authority. (Harris *vs.* Baker, 4 M. & S., 27; Hull *vs.* Smith, 2 Bing., 156.) As where the corporation of the City of New York, having ordered a street to be graded, contracted with A. to do the grading, the whole work to be done under the direction and to the entire satisfaction of the commissioners, &c. And it was held that the city was not liable for damages caused by the workmen employed by A. (Kelly *vs.* New York, 1 Kern., 432.) So A. contracted with B. to erect a tubular bridge. B. had a surveyor, C., whom he paid a salary of £250 a year to attend to his general business; and, after obtaining the contract for the bridge, contracted with C. to provide the necessary scaffolding, for which he was to receive £40, irrespective of his salary, B. to furnish the requisite materials, in-

cluding lights. One of the poles of the scaffold rested on a highway, and owing to the want of sufficient light to warn the passers by, D. stumbled over the pole and was injured; subsequent to which, additional lights were placed on the spot, and B. paid for them. Held, that B. was not liable, and that D.'s remedy was against C. (1 L. & Eq., 477.)

LIABILITY FOR ACTS OF SUB-CONTRACTORS.

Contractors for public improvements are not liable for the negligence of workmen employed by sub-contractors. (Gourdier *vs.* Cormack, 2 E. D. Smith, 254.) So a railroad company is not liable for the negligence of a contractor's servants. (Clark *vs.* Vermont, &c., 2 Wms., 103; Pawlet *vs.* Rutland, &c., ib., 297.) So, if the owner of goods, in shipping them, has no control over the process, which is entirely in the hands of the master of the vessel; an action for an injury, sustained by one employed by the owner to assist in shipping his goods, by reason of a defect in the tackle, unknown to the injured man, and which by the use of ordinary care might have been cured, should be brought against the master alone; though it would be otherwise when the duty lies wholly upon the owner, or is jointly divided between him and the master. (McGatrick *vs.* Wason, 4 Ohio, 566.) So, the defendant, a builder, employed by the committee of a club to make certain alterations at the club house, employed A., a gas-fitter, by sub-contract, to do that part of the work. By the negligence of A., in the course of the work, the gas exploded, and injured the plaintiff. It was held that the defendant was not liable. (Rapson *vs.* Cubitt, 9 M. & W., 710.) So the defendants were admitted to construct a public sewer at their own expense, and employed one A. to do the whole work at a stipulated price. The plaintiffs received an injury from the negligent manner in which the sewer was left at night. Held, the defendants were not liable. (Blake *vs.* Ferris, 1 Seld., 48.) So a public licensed drayman was employed by the defendant to haul salt from a warehouse, and deliver it at the defendants' store for so much a barrel. While in the act of delivering it, a barrel through the drayman's carelessness, rolled against and injured the plaintiff, being on the sidewalk. The defendant was held not liable. (De Forest *vs.* Wright, 2 Mich., 368.) So upon a declaration that the defendant was licensed to run a skiff ferry across a river, and did run it by his lessee; and that the plaintiff's intestate was taken on board, and by negligence and want of skill of the rower was drowned; held, whether the rower was the lessee or one in his employ, and though the lease was a breach of the defendant's duty to the Government, he was not liable. (Blackwell *vs.* Wiswall, 24 Barb., 355.) So A. contracted, with parish officers to pave a certain district, and entered into a sub-contract with B., under which the latter was to lay down the paving of a street, the materials being supplied by A. and brought to the spot in his carts. Preparatory to the paving, the stones were laid, by laborers employed by B., on the pathway, and there left unguarded at night, in such a manner as to obstruct the same, and C. fell over them and broke his leg. It was held that B. was responsible for this negligence, and not A. (Overton *vs.* Freeman, 11 Com. B.) In Potter *vs.* Seymour, an owner being about to erect a building on his lot, contracted with a person to furnish and set the marble for the front, agreeably to certain specifications, and for a definite sum agreed to be paid therefor. As the owner neither interfered with the work, nor reserved any right of interference, it was held that he could not be held liable to a third person for an injury sustained by the latter in consequence of the negligence of the contractor's employees engaged in setting the marble. (4 Bosw., 140.)

These cases will suffice to indicate the general drift of decisions on this subject.

LIABILITY FOR ACTS OF AGENTS GENERALLY.

For the wrongful acts of an agent, done within the proper range of his employment, the corporation is liable. It has been held in some of the cases, that where a servant pursues his own whim or caprice and acts upon his own impulses, the act is his own, and the company should not be liable therefor.

This doctrine, however, is deemed by lawwriters to be based upon a misconception of the law. Without stopping to discuss the soundness of the general principle, as applicable to the relation of master and servant, we quote the language of an eminent writer on this subject. (Redfield on Railways,) "that it is not applicable to the case of corporations, and especially such as railways. In regard to such corporations, it is altogether, an inadmissible proposition, to excuse them for every act of their servants and agents which is done, or claimed to have been done, positively and wilfully, and which results in an injury to some other party, or proves to be illegal, unless directed or ratified by the corporation."

Of course, where a servant goes out of his employment, and does a wrong, as committing an assault by his own hands, upon a stranger, or stealing goods or any other act, wholly disconnected with his employment, the master is not liable.

It will happen that when the company is under a positive duty to keep or carry things safely as bailee, or to carry persons safely, that while the company will be liable for the mere non-feasance of the servant, the servant will not be liable to the same party for such non-feasance, there being no privity between the servant and such party, no duty owing to such person from the servant. But in such a case, the servant will be liable for his positive wrongs and wilful acts of injury.

The corporation virtually assents to all the acts of its agents and servants, done in the regular course of its employment. A railroad or any business corporation exists and acts only by its agents or servants, and by putting them into their places, or suffering them to occupy them the company consent to be bound by their acts. Thus, a conductor or engineer of a railroad, while he acts with the instruments which the company puts into his hands, to be used on their behalf upon the line of their road, is acting instead of the corporation, and his acts will bind the corporation whether done negligently or continually, heedlessly or purposely.

☞ It is stated in the Mexican *Times* that the railroad between Puebla and the City of Mexico will be completed by the 1st of May next. There are more than 4,000 laborers, at work on the Imperial Railroad from Vera Cruz to Mexico.

James River and Kanawha Canal.

At the annual meeting of this company held in Richmond, Va., on the 23d ult., a vote was passed to carry out an arrangement for the sale to a French house, of the property, conditioned upon its enlargement and completion to the Ohio River, and asking the Legislature to extend the charter of the company in order that the agreement may be consummated.

Louisville and Nashville Railroad.

The annual meeting of the stockholders of this company was held in Louisville on the 2d of October. The Annual Reports of the President and Directors, Secretary, Superintendent of Transportation, and Superintendent of Machinery and Road Department, were read, adopted, and ordered to be printed. We have been favored with a copy of this report, from which we learn that the receipts from transportation, etc., during the year ending June 30, 1865, were:

	Memphis Branch.	Lebanon Branch.	Main Stem.
From pass..	$56,566 89	$51,721 23	$2,588,476 89
" freight	28,102 41	29,088 63	1,250,050 18
" expr'ss	3,409 02	6,672 82	110,802 05
" mails			86,825 00
Total Main Stem			$3,986,154 12
" Lebanon Branch			87,482 68
" Memphis Branch			88,078 32
" Bardstown Branch			12,730 83
Hire of cars and engines by U. S. Gov., rents, and other sources			140,094 10

Total Main Stem and Branches, viz:

From passengers	$2,703,775 04	
" freight	1,311,342 42	
" express	121,828 49	
" mails	37,500 00	
" rents, etc	140,094 10	
		4,314,540 05

And the expenses were:

Repairs of road	$791,759 93	
" bridges	41,926 48	
" buildings	40,849 21	
" cars	125,954 93	
" engines	94,887 02	
Motive power	134,796 89	
Fuel	144,127 24	
Oil and waste	34,562 45	
Watchmen	14,657 45	
Water supply	12,394 79	
Loss and damage	29,615 35	
Salaries	24,719 05	
Transportation	231,468 07	
U. S. tax on earnings	91,892 88	
Reconstruction	73,892 03	
Improvement account	182,021 41	
General expenses	31,810 05	
Discount	32,463 16	
Miscellaneous	9,227 24	
		2,142,024 68
Net earnings (50.4 per cent.)		$2,172,515 42
Interest account		221,758 84
Balance		$1,950,756 58

The expenses of operating the Bardstown Branch, purchased during the year, are included in the above statement.

The company continued during the year, under the former arrangement, the operation of the 14 miles of the Memphis, Clarksville and Louisville Railroad. The earnings of which were $12,628 78, and the expenditures, $16,411 18. The arrangement for its operation being only temporary, and the bridge over Red River needing renewal, this operation will be discontinued, unless new arrangements are made.

The amount of damage done by the Confede-

rate forces and guerrillas to the company's property during the year is stated in the report of the Superintendent of Machinery and Road Repairs at $94,346 45, and the whole damage sustained at $688,372 56. The amount expended in restoring the company's property during the year was $87,288 03; and previously $501,305 57—in all $588,593 60, leaving $99,778 96, yet to be expended to fully repair all the damages sustained during the war.

In the Superintendent's report of last year, the amount estimated for construction and improvement of the road was $1,258,303 71. His present report shows that there was expended for this purpose last year the sum of $490,692 84, and that it still requires $767,610 87 to finish the construction and improvement; making, with the $99,778 96, for reconstruction, $867,389 83.

It has been determined to continue the work of construction, reconstruction and improvement during the current fiscal year; and the Superintendent recommends the expenditure during the year for that purpose of at least $300,000.

A statement is submitted of the extension of the Lebanon Branch. The grade to Stanford, the county seat of Lincoln, a distance of thirty-six and one-half miles, was under contract at the date of the last report. The iron superstructure is being laid, and ought to reach Stanford this year or early next year. The extension has been located to Crab Orchard, a further distance of about eleven miles, and within some twelve or fifteen miles of good coal banks. The $600,000 bonds from the city, and the $600,000 of the mortgage bonds of the Lebanon Branch and extension, provided for the construction, will probably extend the road to Crab Orchard, and leave a surplus, notwithstanding the high price of labor and materials. It is believed the extension will prove beneficial to the business of the road, and make the investment in the branch more profitable.

The Government tax of 2½ per cent. on the gross earnings, and 5 per cent. on the net earnings after paying interest, amounts to about 10 per cent. of the net income.

The expenses of operating proved greater than in 1863–'64, owing to the increased price of labor and materials. The road, engines, and rolling stock are materially improved in condition.

At the stockholders' meeting, in October 1861, a sinking fund of $400,000 per annum was directed to be set apart out of the net earnings of the road to pay—first, the interest of the debt, next to completing the road, and then to the payment of the bonded debt, and the fund placed under the direction of the President and Directors, with a request to report upon its operation. The first year, to the 30th June, 1862, the $400,000 of the sinking fund was applied to the payment of interest and the floating debt; the second year, to the 30th June, 1863, the $400,000 of the sinking fund was applied to the payment of the interest and to the reconstruction of the road; the third year, to the 30th June, 1864, it was applied to the payment of interest, the redemption of the mortgage debt, and completing the road; the fourth and last year, it has been applied to the payment of the interest, the redemption of the mortgage debt, and completing the road. The surplus earnings of the fiscal year, after paying the immediate demands against the company, are for the benefit of the sinking fund, and will be applied to the completion and improvement of the road, and the redemption of the debt as fast as it can be purchased.

Since the establishment of the sinking fund, in 1861, the aggregate sum of earnings to the 30th June, 1865, applied to construction, has been $750,763 98. The stock and stock liabilities of the company, on the 30th June, 1865, were $5,527,870 63; the aggregate bonded debt, exclusive of the Tennessee State Aid Bonds, provided for as heretofore stated, $3,297,000—making $8,824,870 63.

The aggregate cost of the road to the 30th June, 1865, stands at $9,665,563 97, the difference between it and the stock and bonded debt, amounting to $840,693 34, has been paid out of the earnings, as have dividends of 24¼ per cent., paid or provided for, with a surplus for the sinking fund to complete the road and redeem its bonds. The 10¼ per cent. stock dividend has been added to the stock liabilities. The interest on the capital invested in the road has been capitalized, and forms part of the stock liability of the company. The dividends declared are 24¼ per cent.—10¼ per cent. in stock and 14 per cent. in cash. The surplus on hand, and the good condition of the road, motive power, and rolling stock, gives assurance of the ability of the company to pay the interest and principal of the debt, and complete the road in all respects as a first class road, and pay reasonable cash dividends in the mean time. There can be no question but that the suppression of the rebellion will reduce the business of the road and its profits, but it seems hardly possible it will take away the ability to pay interest and principal and six per cent. to the stockholders.

The adjusting of the stock liabilities of the company has been a work of great labor and difficulty. The liabilities outstanding on the 30th June, 1865, were $440,398 99. They consist of tax receipts in the city and counties subscribing to the stock, and applied to the payment of interest and principal of the bonds, and payment on subscriptions. From present prospects, the accounts may not be closed for years.

The road has been operated with but little damage to persons or property, considering the mass of passengers and freights, the guerrilla raids, and the unsettled condition of the country.

The following table shows the cost of road repairs per mile of road, and per revenue train mile, during the past six years:

	Ordinary repairs.	Renewal of iron and ties.	Total per mile of road.	Per revenue train mile.
1859–'60.	$470 73	$135 00	$605 73	26.03 cts.
1860–'61.	339 54	48 93	388 47	14.84
1861–'62.	321 28	219 78	541 06	38.18
1862–'63.	382 29	389 56	771 85	38.30
1863–'64.	616 94	2,547 12	3,164 06	102.30
1864–'65.	1,012 18	2,782 03	2,794 31	99.08
Average ..	$523 84	1,020 40	1,544 24	53.12 cts.

3,538 tons of rails were bought during the year, of which there is still on hand unused 1,130 tons. 991½ tons of rails have been re-rolled, of which 500 tons are still on hand. About 1,500 tons more iron will be required during the current year. 1,000 tons have been repaired and replaced in the track. 39 miles of road have been relaid with new iron, and with improved joint fastenings, making a first class track. 41 miles of road in continuous stretches have received new cross-ties.

The following table shows the number of cross-ties, and the quantity of new, re-rolled, and repaired iron used since the completion of the road:

	Number of cross ties.	Tons of new ties.	Tons of re-rolled iron.	Tons of repaired iron.
1858–'59.....	1,500	.....	.....	.....
1859–'60.....	16,672	109.0	.....	113.0
1860–'61.....	10,082	.....	.....	516.0
1861–'62.....	27,752	463.0	32.50	143.5
1862–'63.....	16,871	433.0	95.25	558.0
1863–'64.....	96,709	2,936.5	471.10	1,104.0
1864–'65.....	112,179	2,268.0	491.05	1,000.0
Total	281,765	6,209.5	1,090.85	3,434.5

The cost of repairs and renewals of the Lebanon Branch during the year was $1,796 82 per mile, or 193.82 cents per revenue train mile; 12.2 miles have been relaid with new cross-ties; 26,014 tons were bought, and 134¾ tons of new rails, while 56 tons of iron have been repaired. There have been used since the completion of the road in 1857, 66,229 cross-ties, 218.25 tons of new iron, and 97.5 tons of repaired iron.

The cost of repairs on the Memphis Branch per mile of road has been $375.08; and per revenue train mile, 49.08 cents; 16.80 cross-ties were bought during the year, and 4 279 ties on hand last year transferred to the main stem; 36 tons of rails have been repaired.

The engines have run in the service of the transportation department 778,423 miles; and in the service of the road department, inclusive of the mileage made on the M., C. & L. R. R., 106,722 miles—total, 983,047. The cost for repairs per mile run has been 10.68 cents. Total cost per mile run by engines, 42.06 cents, against 31.52 cents in 1863–'64. Average cost per mile of all trains, 46.71 cents.

The length of the Main Line is 185 miles; sidings, 17.16 miles—total, 202.16 miles. Length of Lebanon Branch, 37 miles; sidings, 1.49 miles—total, 38.49 miles. Length of Memphis Branch, 46 miles; sidings, 267 miles—total, 48.67 miles. Length of Bardstown Branch, 18 miles. Total length of road and branches, 307.32 miles.

The equipment of the road July 1, 1864, consisted of—52 locomotives; 31 passenger, 8 baggage, 8 express, 257 box, 91 rack, 22 gondola, 95 flat, 57 gravel, and 7 boarding cars. There have been added during the year, 8 locomotives; 26 passenger, 6 baggage, 3 express, 64 box, 21 rack, 19 flat, 13 gravel, 9 boarding and 1 wrecking car. There have been destroyed by raids or accidents, 15 passenger, 5 baggage, 3 express, 26 box, 8 rack, 1 gondola, 7 flat, and 4 boarding cars.—Leaving on the road July 1, 1865, 60 locomotives; 42 passenger, 9 baggage, 8 express, 295 box, 104 rack, 21 gondola, 107 flat, 70 gravel, and 12 boarding cars.

Secretary.—WILLIS RANNEY.

Superintendent of Transportation.—B. MARSHEL.

Superintendent of Machinery and Road Department.—ALBERT FINK.

HANDBOOK of the Steam Engine, and Key to the Catechism of the Steam Engine. By J. BOURNE, C. E.—D. APPLETON & Co., 1865.

We have examined this "Key" with great attention, and it is the best work on its peculiar subjects we have met with, more intelligible, explanatory and useful than anything of the kind we have read in the English language. Its introductory chapters explaining the philosophy of arithmetical and algebraic calculations are really perspicuous and admirable. Their application to the necessities of machinists in the various branches in which their work is required is clearly pointed out, and we recommend that this class of persons should especially make it their study. In addition to the explanation of arithmetic, the other subjects treated of are, the mechanical principles of the steam engine, its theory, proportions, power and performance, and steam navigation generally. Mechanical science is made easy, and the most difficult work explained by this excellent volume of Mr. Bourne. It is got up by the publishers in their best style, and should form a part of every scientific library.

Flint and Pere Marquette Railroad.

The principal opening to this important portion of our State, except that afforded by the navigable waters, is the Flint and Pere Marquette Railroad, which, connecting with the Flint and Holly and the Detroit and Milwaukee Railroad, forms a continuous line between East Saginaw and this city. An idea of the extent of traffic on this line may be formed from the following statement, which we derived from a responsible officer of the company, the figures being obtained from the books of the Flint and Pere Marquette Company, and include a period of eight months, closing the 31st of August respectively:

	No. pass'rs.	Total earn'gs.
Eight months, 1863	39,643	$58,330 65
Eight months, 1864	56,718	69,653 17
Eight months, 1865	65,803	100,680 21

The above table shows a most gratifying increase of business. No railroad in the State is in better repair, nor one that is better managed. Its extension to Lake Michigan is an event to which the citizens of the northern part of the State are looking forward with great anticipation.—*Detroit Advertiser.*

Camden and Atlantic R. R.

The following gentlemen have been elected directors of this company for the ensuing year: R. Frazer, Stephen Colwell, A. J. Antelo, And. K. Hay, S. Richards, W. D. Bell, Jonathan Pitney, Enoch Doughty, Joseph W. Cooper, G. W Carpenter, Jos. C. Potts, H. H. Boody, and H. M. Alexander.

New York State Debt and Taxation.

COMPTROLLER'S OFFICE, ALBANY, Oct., 1865.

At the general election in November, the electors are to decide whether the large amount of bonds issued for bounties under the laws of the last session of the Legislature, shall be paid at once, by direct taxation, or shall become a State debt, payable in twelve years, with interest at seven per cent. per annum, payable semi-annually. For the purpose of enabling the people to act intelligently upon this question, the following statements are published:

The circular issued from this office to the Board of Supervisors in each county, requires the following taxes to be levied in pursuance of the laws referred to:

"For schools, ¾ of a mill, per Chapter 555, Laws 1864.

For general purposes, 2½ of a mill, per Chapter 709, Laws 1865.

For canals, ⅞ of a mill, per Chapter 85, Laws 1865.

For canals, ¼ of a mill, per Chapter 271, Laws 1859.

For extension of Chenango Canal, 3-16 of a mill, per Chapter 185, Laws 1864.

For Champlain Canal, 1-10 of a mill, per Chapter 186, Laws 1864.

* For bounties, 1¾ per cent., per Chapter 56, Laws 1865.

The advantage of paying the debt at once will be, that it will be paid in the same currency in which it was contracted, the credit of the State will be restored to what it was before, and the people will be saved from paying a high rate of interest for twelve years, and then paying the principal, as is most probable, in specie or its equivalent. If the debt could have been confined to ten or twelve millions of dollars, as was originally estimated, it would undoubtedly have been wise to pay it by a tax which would not have exceeded three-fourths of one per cent.; but it has gone up to $23,963,000, and will probably be increased to a somewhat larger amount, and, as will be seen above, the tax required to pay it will be 1¾ per cent. This will be a very heavy amount to be paid in a single year. It is, therefore, submitted, without the expression of any opinion, for the people to decide whether they will vote for the debt, and pay it with interest in twelve years, or against the debt, and pay the whole amount in one year. Chapter 325, Laws of 1865, prescribes the form of the ballots to be used in voting upon this question.

If the majority shall be against the debt, then the whole tax will be 22 13-80 mills upon the dollar; if in favor of the debt, the tax will be 4 53 80 mills upon the dollar.

The total assessed valuation of the State, as fixed by the Board of Equalization, is $1,550,879,685, being an increase of $49,879,808 over the valuation of 1864.

It may be pertinent to add the present debt of the State, exclusive of bounty bonds, is, including canal and general fund debt, $25,634,539 86. It has been reduced since 1860 to the extent of nearly $8,000,000, and would be wholly extinguished within about ten years if the bounty debt should not be added to it. If that shall be approved, estimating the amount at $26,000,000, the total amount of the State debt will be $51,684,539 86.

The canal revenues have fallen off largely during the last fiscal year, and fail to make the usual annual contribution of $550,000 to the general fund, and render heavy taxation necessary for the support of the canals.

The table appended hereto, shows the aggregate valuation of the real and personal estate in each county for the years 1864 and 1865 respectively. It also shows, in one column, what will be the amount of the tax upon each county if the debt shall be rejected, and in another column what will be the amount if the debt shall be approved.

LUCIUS ROBINSON, Comptroller.

A statement showing the aggregate valuation of real and personal property in the several counties, for 1865, as fixed by the Board of Equalization; also, the State tax to be levied for the current year.

Counties.	1865. Valuations.	Tax for pr. ct. bounty 1865 22 13-80 mills.	Tax for '65, omitting 1¾ tax, 4 53-80 mills.

* If a majority of votes shall be given at the general election in November, in favor of creating a debt for the bounties, this item will be omitted from the tax levy, and a circular directing its omission will be issued from this office."

Albany and Coeymans R. R.

This company was organized at Albany on the 26th ult., by the appointment of the following named gentlemen as directors: Ezra P. Prentice, Billings P. Learned, Benj. A. Sweet, John Taylor Cooper, John Tracey, Franklin Edson, Charles B. Lansing, William A. Rice, Lansing Pruyn, Henry Lansing, Paul Cushman, Cornelius V. Baker, Worthington Frothingham.

The Board of Directors was partially organized by the election of John Tracey, Vice-President; Lansing Pruyn, Treasurer; and W. Frothingham; Secretary.

This company proposes to build a railroad from Albany to Coeymans, and there connect with the Saratoga and Hudson River railroad. The Albany *Journal* of the 27th ult., from which we obtained the above, says:

We regard this as a very important enterprise. The Saratoga and Hudson River Railroad was originally designed to run from Saratoga Springs, connecting at Schenectady with the New York Central, and thence to Athens, which point was intended as the terminus of the steamboat line, including the St. John, Dean Richmond, and all the larger steamboats belonging to the gentlemen principally interested in the railroad, and which boats will probably soon be withdrawn from the Albany line. The road is nearly completed, and it is expected that an excursion train will be run over the road early next month.

There are roads already constructed, or in process of construction, from New York to Newburg, and a route is being surveyed for a road from Newburgh to Catskill. There will then be a hiatus of only six miles between Catskill and Athens and twelve miles between Coeymans and Albany, to connect New York and Albany by a west side railroad.

Our citizens will soon be called upon to sustain this new enterprise and determine, first, whether Albany shall be entirely deprived of the use and enjoyment of what she has been accustomed to call *her* floating palaces. Secondly, whether Albany or Schenectady shall be the terminus of a west side railroad to New York.

Virginia and Tennessee Railroad.

At a late meeting of the stockholders of this road, held in Lynchburg, Colonel Robert L. Owen was unanimously re-elected President. It was resolved to apply to the next Legislature of Virginia for permission to borrow one million of dollars on a mortgage of the road for ten or twenty years.

From the report of the directors, which was presented at the meeting it appears that the gross earnings for the year ending June 30, 1865, were $3,291,907 37; and the expenses of operating, $2,990,504 76—leaving net earnings $301,402 61.

The net earnings are 9.16 per cent. and the expenses of operating 90.84 per cent. of the gross earnings.

There were six different raids during the year by the armies of the United States, and the road destroyed each time for long distances. Much property was also destroyed by the soldiers of the Confederate States, and to such an extent were these injuries committed, that there were only three bridges, original structures, left standing, and but three depots.

The road was open for its entire length one hundred and forty-three days during the year; for ninety-one days closed nearly its whole length, and for one hundred and thirty-one days closed the entire distance. The depots were yet unbuilt, but the bridges were repaired as speedily as possible, and the entire amount, 7,729 feet, replaced with new structures (trestle-work), which will, in a majority of cases, last four or five years. One or two are in danger from high water, and will be replaced by truss bridges, similar to the original structures, as quickly as possible. The wood sheds, water stations, etc., were destroyed the same time with the depots, but are now repaired, and freight cars are now used for the reception and distribution of freight until new depots can be built. There were destroyed at the same time 72 passenger and freight cars and three locomotives.

Finances of Vermont.

From the recent message of the Governor we learn that the receipts of the State Treasury for the past year were $2,009,269 51, and the expenditures $1,996,772 50. The funded liabilities amount to $1,661,179 18, and the current resources reduce this amount by $23,411 60. The extraordinary receipts for the past four years have been:

Taxes	$3,406,093 26
State bonds outstanding	1,650,000 00
Reimbursements from United States	607,303 11
	$5,663,396 37

Disbursements:

Governor's warrants and Auditor's orders approved by the Governor	$1,179,938 08
Extra pay to soldiers	3,275,804 92
Direct tax paid United States	179,407 80
State bonds paid	150,000 00
Ordinary expenses, including interest on bonds	878,245 57
	$5,663,396 37

The amount expended by, and due from, the State for war purposes, may be approximately stated as follows:

General military expenses	$1,180,000 00
Extra pay to soldiers	3,904,000 00
Direct tax to United States	179,407 80
Interest on the debt, over premium and interest received on bonds	320,000 00
	$5,073,407 80

In addition to this sum may be added the sum paid by towns for bounties to soldiers, which will amount to at least $4,250,000.

Profits of the Express Business.

As an illustration of the profitableness of the Express business, we have only to refer to the dividends paid by the American Express Co. This company paid, in 1864, dividends on a capital of $2,000,000, amounting to 38 per cent. in cash, and 50 per cent. in paid-up stock. On its capital, thus increased to $3,000,000, it has already declared, in 1865, cash didends of 25 per cent., and 20 per cent. in stock, with every reasonable prospect, it is said, of an additional 25 per cent. within the coming four months.

☞ The Buffalo and Oil Creek railroad company was recently organized at Buffalo by electing a board of directors of whom Mayor Fargo was chosen as President. The route was also decided upon. The road will start from a point on the Lake Shore Railroad, at or near Westfield, running to Corry *via* Mayville, and connecting at the former place with the Oil Creek Railroad, the line of which extends to Franklin. The work on the projected road will be commenced immediately upon the completion of the surveys.

Cape Cod Central Railroad.

Some five years ago a charter was obtained for a railroad connecting with the rails of the Cape Cod Railroad at Yarmouth and terminating at Orleans, a distance of some twenty miles from Provincetown, to be called the Cape Cod Central Railroad. Actual work was not begun upon the road until about a year since. It is now completed as far as Harwich, and it is hoped the remaining eight or ten miles will be completed by winter, and the road be in running order in the spring. The eight miles of road now completed have cost about $200,000, which includes besides, a couple of miles of partially completed road beyond Harwich. It is not yet definitely settled when the road will begin business, but it is anticipated that an arrangement will be made with the Cape Cod Railroad by which the rolling stock of that company will operate the Cape Cod Central Railroad, or that part of it completed from Falmouth to Harwich. The President of this new road is Benjamin Freeman, Esq., of Brewster, and Freeman Cobb, Esq., of Boston, is one of its leading and most active directors.

Tomah and St. Croix Railroad.

It will be remembered that a few weeks ago we mentioned the fact that some capitalists from New York had been here examining this road, having traveled over the entire line, with a view of taking hold of it. They have returned to New York, and signified their willingness to go ahead nd build the road. In pursuance of an arrangement to this end, Pliny Fisk, a leading banker and capitalist of New York, and one of the gentlemen who was here has been elected President, of the road and the following Board of Directors: W T. Price, Black River Falls; J. G. Thorpe, R. S. Wilson, Eau Claire; J. H. Knapp, Wm. Wilson, Menomonee; John Comstock, D. H. Baldwin, M. A. Fulton, Hudson; Pliny Fisk, Wm. B. Hatch, M. L. Buckly, L. T. Merrill, Daniel C. Fisk, E. P. Hatch, Walter Lamson, New York.

We learn that it is contemplated by the parties now controlling this road, to build it an early day, and that work will be commenced on both ends of the line, as soon as spring opens.—*Hudson Wis., Star.*

☞ A letter to the *Tribune*, dated Brazos, Sept. 25, 1865, says: "The railroad goes on slowly here. About seven miles of the track are now laid, and a part of that lies under water, owing to the rain. In time of a flood the track will be swept by water, and the light, sandy soil will be washed out from the ties. It will be necessary to raise the track some four feet on the flat about this point. A want of rails and ties has been the cause of the slow progress made with the road. A few vessels are now discharging these two articles, and the track will be laid faster. A shed is being put up near the water as a station house, etc., and the track has two switches; one running to the commissary store, and the other to the depot shed. The telegraph is up and at work. The line runs near and along the Rio Grande. An office is now open here for business, and, with the two offices of the express companies, lends an air of business to Brazos."

☞ The profits of quicksilver mining may be inferred from the statement, which appears to be reliable, that the New Almaden mine is now producing 5,000 flasks of quicksilver per month, worth $40 per flask, or $200,000 per month, while the cost of production is set down at not far from $50,000 the 5,000 flasks, leaving the magnificent profit of $150,000 per month.—*Mining and Scientific Press* (San Francisco).

American Railroad Journal.

Saturday, November 4, 1865.

Stock Exchange and Money Market.

The National bank system is making its way in the Southern States.

In Virginia there are 16 banking institutions with capital as follows	$1,622,000
Tennessee 7	1,000,000
North Carolina 2	100,000
Georgia 3	300,000
Alabama 8	402,000
Mississippi 1	50,000
Louisiana 2	800,000
Texas 1	100,000
Kentucky 2, recently added	280,000

We are pleased to observe this as an indication of returning confidence and prosperity. It is proper in this connection to remark, the common impression that the State Bank issues are rapidly increasing upon us is erroneous, for the fact is, that on the 1st of October the total bank note circulation was by several millions less than on the 1st of Jan. 1863, for the reason that the old State Bank issues have been generally withdrawn to give place to the new, and this is limited by law. On a former occasion we showed that the old circulation was habitually excessive in proportion to the actual means of resumption, particularly in some neighboring States. This is therefore rectified under the restrictions of the national system. The truth is, that the circulation of the new banks is now in the whole but 50 cents on the dollar of the secured issue, a much better state of things in this respect than has ever existed before in this Country.

Our late English exchanges are rejoicing at the great increase in the American trade. The following table shows the fact, with this additional circumstance however, that the value of the articles exported is 50 per cent. greater than in former years, say 1861 and previously:

EXPORTS FROM LIVERPOOL TO NEW YORK IN PACKAGES OF BRITISH MANUFACTURES.

	1861.	1862.	1863.	1864.	1865.
January	13,600	13,330	11,700	15,505	5,945
February	4,791	11,361	11,696	14,806	9,014
March ..	9,010	8,196	11,280	11,340	9,595
April ...	1,910	5,613	9,266	8,613	6,192
May	2,238	5,967	5,458	10,367	6,174
June....	1,114	6,864	5,281	12,132	9,421
July	2,386	13,000	10,453	9,188	13,975
August .	3,758	11,582	8,725	5,218	16,669
Sept....	4,040	10,237	11,429	4,213	17,659

The shipments from Liverpool to Boston show a similar increase for this autumn, and also of foreign goods transhipped from Havre steamers at Liverpool for New York and Boston.

These figures express the number of packages, chiefly consisting of manufactured articles of cotton, woollen, hardware and many other we fear of American origin like tobacco.

In looking over the lists of freights, we still find many articles which we really do not require, and which seem to be sent us as a pure speculation in a very buying market. Notwithstanding the recent decline of our National securities in London, we see they continue to bring 2 to 3 per cent. more on the continent, where no attempt at "repression" is attempted, as in England.

The question of a resumption of specie payments is beginning to be discussed more eagerly than ever. We have a very strong party forming, to favor and continue the paper currency as it is, and this party is chiefly composed of the Bank interest, which no doubt is in favor of making large profits out of the Government and the people, the latter in both cases being the real parties whose purses have to bear the attenuation. How strong it will be is not yet perceptible, but if there is one principle more than another popular in this country, it is of holding the Banks to the strict fulfillment of their engagements. And when the struggle fairly gets into Congress, there will be seen and felt a most decided determination to keep them within their legal and natural bounds. Any party which makes unredeemable paper money in time of peace, the basis of its policy will fail as it has failed before.

Thus far the Secretary of the Treasury has not wavered in his opinions, nor hesitated in his action. The public wait anxiously to see if he is as firm as he is wise.

We notice a movement in England in favor o

changing the present systems of customs and excise in that country, the ground being taken, that they are diminishing consumption and trade. It has been fully ascertained that the reduction in the *number* of dutiable articles has resulted in an increase of the revenue, a statement which almost seems a paradox, but it is nevertheless true. Nearly the whole revenue the last year was derived from six articles; malt spirits, sugar, tea, tobacco and wine, we say nearly, meaning within about twenty millions of dollars while the receipts were in the aggregate, greater by thirty millions than in the time of Sir Robert Peal, when he began his change of policy, and the number of articles subject to duty was 1,400. Another curious circumstance in which the American shippers are much interested, is the injurious delay at the British Custom Houses, which it is now attempted to remove. These difficulties are indeed worthy of being considered in our future commercial treaties with that Government. A carge of tobacco can only be stored in certain specified warehouses. If they are full the vessel must wait, or find other places approved by the Board of Customs, and thus it may be detained under heavy charges for weeks. But even when the cargo is landed, the owner must wait his turn for weighing, sampling and other official manipulations, and until these are finished, he cannot offer a hogshead or box for sale, and this delay may last from one to three months. Then again no allowance is made for damaged tobacco, though it should be as much as 50 or 75 per cent. The Custom House demands the duty on the whole or none. It cannot be landed to be rid of its moisture by drying, and so it is often sold at merely nominal prices, shipped at once to Bremen, which is a free port, there landed direct, repacked and shipped to a British port, and then actually sold at a handsome profit. The entries of goods are also very tedious and formal, the short working hours of the proper officers occasioning further delay. Corn cannot be bonded, the duty must be paid at once; coffee must submit to the delay of weighing each box or cask, which must be emptied and weighed by itself; the duties on gold and silver plate are very heavy, and so on many articles of far less intrinsic value.

On a barrel of apples there are five separate items of charges at Liverpool, amounting to the original value of the article here, and we have seen an account on an ordinary package sent to Liverpool of the following character; customs bond and entry, duty and entry, cocket and entry, dock dues, warehousing, charges, porterage, dock rent, weighing, opening for customs, examination and carriage, bills of lading, freight, insurance, policy, agency and commission. And this is what is called free trade. We are happy to say that no such ingenuity of charges is encountered by any foreign shipper to any American port, nor any such delay as we have mentioned.

The Bank of England, notwithstanding the large amount of coin it is constantly receiving from this country has found itself compelled to put up the rate of interest to 7 per cent., and more than this, that it was itself compelled to become a borrower, and to have according to the London *Daily News*, to raise a "considerable sum in the Stock Exchange or Government securities." We notice a curious speculation somewhat connected with this subject, which may really account for the anxiety the late movement of the bank created in the British Money Market. Traver's well-known and very authoritative Circular received by the last steamer, makes the following curious suggestion, that if the British shippers continue to send out goods to the United States and take bonds in return, they "will soon have a heavy drain of specie from this (that) country to pay for the raw material of which those goods are composed, as well as for the imported articles of food consumed by the operatives, whose highly paid labor has been expended upon them."

This certainly is an unexpected view of the subject, and one well worthy of consideration by our financiers and by no means impossible. Such an event would most materially assist us in the resumption of specie payments.

There has been quite a buoyancy in our own particular market. The principal railway shares have increased in favor, some of them showing considerable improvement. In the beginning of the week, the market was strong, and we perceive no good reason why it should not continue so, especially in regard to the Western companies, which are less under particular and individual control in Wall street. United States 5-20s have drooped a little in London, being sold until a recent date at 64 ex-coupons, equal to 67, but they fluctuate very little here, being as steady, if not steadier than consols in London. State bonds are firmly held, but at prices which ensure a good profit at no distant day. The Southern States when uninfluenced by repudiators always were tenacious of their credit and punctual to their engagements. Their staple was always cash and a sure reliance. The exports of cotton continue on a large scale, about 1,000 bales a day is the rate for the last few days at this port, in all about ¾ of a million of dollars.

We took occasion last week to remark on the great falling off in our exports of cereals which we attribute not so much to the want of a foreign demand, as to the enormously inflated price they bear in our paper currency market. This statement as to quantity is verified by the latest Liverpool Price Current issued to their correspondents by Bigland, Athya & Co. From this we learn that for the first half of the month of October, there were received at Liverpool from the United States, 545 bbls. of flour, and 2,867 qrs. of wheat. Last year during the same period the shipment of these same articles was 4,042 bbls., and 22,241 qrs.—a difference of about 800 per cent. in one case, and 1,000 per cent. in the other.

The news by the Damascus shows a growing improvement in American securities, and an increase of £54,000 in the bullion of the bank, which very small addition to its resources has had a wonderful influence on the good temper of the public. The sum to American financiers appears quite inconsiderable as a basis for the large operations likely to be renewed under its influence. The amount would not be considered very imposing in any respectable bank parlor in Wall street.

Gold remains at about the same figure as usual. It has risen and fallen a trifle during the week. The death of Lord Palmerston, could not be used except to a very trifling extent by the operators His probable successor is Earl Granville, who it will be remembered, succeeded Lord Palmerston for a short time in the Foreign Office in 1851.

The brokers of the Stock Exchange in this city for greater convenience, have determined to refuse all checks not drawn on institutions which are not members of the clearing house, and these are 58 in number.

The Custom House receipts in this city have amounted within a single week up to Nov. 1, to the sum of $7,679,964. This seems to justify the expectation in some well informed quarters that the total revenue for the fiscal year ending June, 1866, will be 500 millions. The balance in the Sub-Treasury on Tuesday was $57,200,121.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—State 7s Bounty Loan, 98⅝; do., 7s, 1870, 101½; Illinois Canal bonds, 1860, 98; Onio 6s, 1881, 98⅛; Brooklyn 6s, Water Loan, 96½; Chicago and Milwaukee R. R., 59; Central R. R. of New Jersey, 120; Morris and Essex R.R., 101; McGregor Western R. R., 22; Milwaukee and St. Paul 1st mort., 85; Pacific Mail scrip, 240, Mariposa int. scrip, 90@95; Central Am. Transit, 34; Brunswick Land, 12; Copake Iron, 1¼; Central Coal, 56; Spring Mt. Coal, 58; Wyoming Valley Coal, 42; Western Union Tel., 69; Corn Exchange Bank, 108; Bank of Commerce, 106; St. Nicholas Bank, 98; Central Bank, 108.

Philadelphia.—Alleghany County coupon 5s, 72⅝; Pittsburg 5s, 70; Richmond 6s, 87½; Philadelphia and Trenton R. R., 120; Union Passenger R. R., 20; 13th and 15th streets, 28; Hestonville R. R., 26½; Girard College R. R., 26½; West Philadelphia, R. R., 69; Fulton Coal, 7⅞; N. Y. and Middle Coal Fields, 7¾; Green Mt., 3¼; Clinton Coal, ¾; Big Mt., 5¼; Swatara, 2⅜; New Creek, 1¼; Mechanics Bank, 29½; Girard Bank, 55; Consolidation Bank, 39; Farmers and Mechanics Bank, 124½; Philadelphia Bank, 139; Curtin Oil, 2¼; Corn Planter, ⅛; Crescent, ⅜; Caldwell, ⅞; Dalzell, 1⅝; Duncard, ¼; Era, 2; Eldorado, ⅜; Feeder Dam, 1⅛; Hyde Farm, 1; Horse Neck, ⅜; Jersey Well, 1¼; Mingo, 2¼; Maple Shade, 6; McKean, 8; Mt. Farm, 1; Olmstead, ½; Oil Creek, Sugar Creek, 4⅛; St. Nicholas, ⅞; Sugar Valley, 1½; Story Farm, ⅜; Union Petroleum, ¼. The latest quotations are: City 6s, 87@87½; do., new, 90@90¼; State 6s, 90@90¼; do., coupon, 90½@91; do., 6s, W. L., 99@99¼; Phila., Wil. and Balt., 60⅞; Reading, 57¾@57⅞; do., 6s, 1870, 91@95; do., bonds, 91@91; do., con., 115@118; Camden and Amboy, 125@125½; Penn. R. Va. 1st mort., 98@100; do., 2d mort., 96@98; do., 3d mort., 20@30; do., guar., 96@98; Marietta and Cincinnati 7s, 1891, 85@86; Central Ohio 1st mort., 80@85; do., 3d mort., 85; do., 4th mort., 50@59; do., income 1857-'60, 34½@37¾; Western Md. bonds, 77@80; do., guar., 100@100; Maryland 6s, coupon, 1870, 100@100¼; do., Ins., 100@100; do., 1890, 99@100¼; Baltimore 6s, 1870, 98@98; do., 1873, 99¼@100; do., 1875, 98½@99; do., 1886, 100¼@100½; do., 1890, 100@100¼; do., coupon, 100@100¼; do., 5s, 1838-'70, 83@85; City Passenger R. R., 21@22; Canton Co. 42@44; Gardner, 0.50@0.50; Gas Coal, 1.00@1.50; Maryland, 0.40@0.45; North State, 0.10@0.10; Springfield, 1.25@1.40; George's Creek, 115@115; Santa Clara, 12@15; Balt. Chrome, 1.50@1.55; Bare Hill, 2.55@2.60; Atlantic Coal, 1.10@1.25; Mineral Hill, 1.10@1.15; Baltimore Coal, 100@200; Laurel Cannel Coal and Oil Co., 4.00@4.00.

McGregor Western R. W.

The shares of the McGregor Western road are now dealt in at the Stock Exchange. The line runs west from Prairie du Chien, and is under a favorable permanent (or thirteen years) traffic arrangement with the Milwaukee and Prairie du Chien Company, into whose second preference shares the mortgages are prospectively convertible at par, and with whose common shares the McGregor stock is prospectively convertible at the rate of two for one, provided that within three years after their own bonds are extinguished (in 1866) the Milwaukee and Prairie du Chien Company elect to purchase the McGregor road out and out. The new road is being built at a cost of $18,000 mortgages and $22,000 stock per mile. Fifty-one miles are now in operation and 69 miles in progress.

Phila. & Baltimore Central R. R.

This road is not yet finished to the Susquehanna river. The cars have been running for several years to Oxford, in Chester county, Pa., and the graduation is completed and the track is now being laid to Rising Sun, in Cecil county, Md., a distance of eight miles; but it is not expected to reach that station until about the end of November. Between Rising Sun and Susquehanna river but a very small amount of work has been done, and on three-fourths of the distance the ground has not been broken, and this part of the line contains some very heavy work, including the descent into river valley. The distance from Rising Sun to the river is about seven miles.

☞ An election will be held at the office of the Toledo, Peoria and Warsaw railway company, in Peoria, Ills., on the 1st of December next, to vote for approval of the consolidation of this Company with the Mississippi and Wabash Railroad Co., upon terms agreed upon between said companies, agreeable to an act to provide for the reorganization of the Logansport, Peoria and Burlington Railroad Co., approved February 14, 1863, and agreeable to an act to amend an act entitled "An act to incorporate the Mississippi and Wabash Railroad Co.," approved February 10, 1863.

☞ The Office of the Toledo, Peoria and Wabash Railway Company has been removed from 54 Wall Street, to the Scranton Buildings, No. 26 Exchange Place, second floor front.

Memphis Railroad Connections.

A letter to the *Herald*, dated Memphis, Oct. 2, 1865, says: "Four important railroads radiate from this city. The Memphis and Little Rock Railroad has not been running since the war, and was never completed. It is owned chiefly by capitalists in New York, who are taking steps to rebuild and extend the road. The Memphis and Ohio and the Mississippi and Tennessee railroads are in process of repair and in partial running order. They will be completed some time this winter, opening up to trade and communication extensive and rich districts which for years have been shut out from the world. The Memphis and Charleston Railroad is in operation to Tuscumbia, Ala., a distance of one hundred and forty-five miles, leaving a gap of twenty-one miles which is crossed by hacks carrying passengers and making regular connections. These, however, will soon give place to the railroad which is rapidly advancing to completion, when the great tide of travel will again sweep over this thoroughfare. The river business furnishes active employment to several of the finest lines of packets on Western waters. These also bear the travel of the Southwest in the absence of available railroads."

Bright & Co.

We call the attention of our readers to the card of Messrs. Bright & Co., 19 New street, and 64 Broadway, who with the best references and ample means propose to do a regular banking and commission business.

Tilford & Bodley.

This banking house, whose card is in another column, is composed of gentlemen who enter upon its business with a most favorable prestige. Mr. Bodly was formerly with Gilliss, Harney & Co., of Broad street, in this city, and Mr. Tilford is an old and well-known banker of fifteen years experience in Lexington, Kentucky, and well known among the business men of the West. The references of this house are of the best character.

Bounty Taxation.

We publish in another place a statement of the Comptroller of this State, in relation to the amount of war bounties which has to be met by the people of this State, either now, or hereafter, according to the vote they may cast at the election coming off in the present month. It is a question of immediate payment by immediate taxation, or a postponement of payment, by the payment of interest. Every reader of the Journal may decide the question for himself, having reference to his own pecuniary condition, and therefore we express no opinion on the subject.

Lawrence Railroad.

The New Castle *Courant* says the Lawrence railroad, from New Castle to Youngstown, is ready for the iron to within a short distance of Lowelville. Fifteen car loads of iron for this road have arrived, and track laying has commenced. The company expect to have the cars running to Lowelville Ohio, early in December. From that place a line of hacks will run to Youngstown—only eight miles.

Jamestown and Franklin R. R.

The Venango *Citizen* says: "We are assured that the required stock has been taken in the Jamestown and Franklin Railroad, and parties have gone to Cleveland to make the necessary arrangements there, for the completion of the road. Several hundred workmen have been advertised for, and the road, it is expected, will be completed to this place in three months at farthest."

Philadelphia and Erie Railroad.

The earnings of this road for September were $281,573 44. Of this, under the agreement with the Pennsylvania Railroad Co., its lessees, the Philadelphia and Erie Co., receive 30 per cent., amounting at this rate for the year to about one million of dollars, out of which it has to pay interest on one million of 7 per cent. bonds issued by the Sunbury and Erie Co., on five millions of 6 per cent. bonds endorsed by the Pennsylvania Railroad Co., and on three millions of 7 per cent. bonds which are being issued for finishing the road, construction of piers, etc., at Erie—making an aggregate annual interest of $580,000—leaving of the annual receipts $420,000 for dividends on the capital stock of five millions of dollars. The State holds the company's bonds for four millions of dollars, issued in payment of the State Works, which will draw interest after 1872, at which time, it is hoped, the road will have increased its annual revenues in much greater amount than this additional interest.

Railroad Earnings.—Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 3d week in Oct., 1865, were:

	1865.	1864.
Passengers	$12,132 00	$10,193 58
Freight	14,326 50	10,006 04
Mail, express & telegraph	1,250 00	1,169 58
Total	$27,708 50	$21,369 20
Total for the fiscal year commencing Jan. 1	$962,887 08	$746,338 97

The traffic of the Great Western Railway for the week ending Oct. 27, 1865, was as follows:

Passengers	$37,937 05
Freight and live stock	45,051 91
Mails and sundries	4,293 24
Total	$87,282 20
Corresponding week of 1864	61,684 38
Increase	$25,597 82

The earnings of the Michigan Central Railroad for the 3d week in Oct., 1865, were... $100,202 82
Corresponding week of previous year.. 90,013 14

Increase.... $10,189 68

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Oct., 1865, were.... $122,601 00
Corresponding week of 1864.... 87,137 00

Increase.... $35,464 00

The earnings of the Chicago and Rock Island Railroad for the third week in October, 1865, were.... $78,363 00
Corresponding week of previous year.. 79,866 00

Decrease.... $1,503 00

The earnings of the Chicago and Alton Railroad for the 3d week in Oct., 1865.... $90,927 00
Corresponding week of previous year.. 67,943 00

Increase.... $57,790 00

The earnings of the Grand Trunk Railway for the week ending Oct. 21st, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$60,905 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	82,166 00
Total	$147,107 00
Corresponding week, 1864	123,370 00
Increase	$23,737 00

The Detroit and Milwaukee Railroad traffic for the 3d week in Oct., was.... $47,853 00
Corresponding week of previous year.. 32,688 00

Increase.... $15,165 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Oct. 21, were:

	1865.	1864.
Passengers	$3,346 38	$3,535 23
Freight	20,441 45	8,867 43
Express	130 22	104 16
Mail	296 58	296 58
Total	$24,214 63	$12,803 40

Receipts from January 1 to Oct. 21:

1865	$565,328 09
1864	465,382 79
Increase	$99,945 30

Gettysburg R. R.

It is stated that an arrangement is about being made by which the Hanover Branch Railroad Company will operate the Gettysburg road.

The Maine and Provincial Railways.

While the great Canadian Inter-colonial railway is yet a measure in doubt, the connection between Maine and the lower British provinces is becoming more of a certainty every day. On both sides of the line, companies are at work on various parts of the routes. When the whole are completed there will be a continuous line between Boston and Halifax, some seven hundred miles in length, *via* Portland, Lewiston, Waterville, Bangor, Oldtown and Calais, on our side of the line, and St. Stephens, St. John, Moncton, Shediac, Pt. du Chene, Amherst, Truro and Richmond, in the Provinces. The Nova Scotia Railway, which forms the extreme eastern section of this line, will also connect with Picton, Windsor and other principal ports on the Gulf of St. Lawrence and Bay of Fundy, thus securing a western outlet for their trade at all seasons of the year. This road is already completed between Halifax and Truro, and the European and North American between St. John and Pt. du Chene on Northumberland Channel. The connection between this point and Truro is yet to be made, and also westward between St. John and Oldtown, on the Penobscot, which latter is at present the terminus of the Maine Central Road. But the connecting lines are now to be put through as fast as capital, labor and engineering skill can accomplish it.

Baltimore and Ohio R. R.

A newspaper correspondent who is traveling with the English tourists, made a trip with them the other day over the east end of the Baltimore and Ohio road. He was captivated with the scenery no less than with the wonderful energy shown by the company all through the war and since the return of peace. He alludes to the frequency with which the road changed possession, being one week within the Federal lines and the next week held by the Rebels. He notes the wrongs to which it was subjected by the enemy, who burned and blew up its great and expensive bridges, tore up its track, twisted its rails, destroyed its rolling stock, exploded its culverts, its water tanks and stations; in a word, who utterly destroyed it ever so many times so far as ability to earn money was concerned. After noting all these things, the correspondent says:

I made an effort to obtain the cost of this railway to the Government during the past five years in lives and wounds and dollars, its expense may be barely calculable. The three great rivals of the Baltimore and Ohio road to the North have enjoyed gigantic commerce all the while, but I do not think that any of these have demonstrated the powerful corporate energy of American railway people so well as this oft battered and as oft resuscitated route, which rallied at the first mention of peace, and brought home all the disbanded armies in a fortnight.

☞ During the ensuing year it is probable that an important line of railway connecting New York with St. Paul, Minn., will be near completion. This is to be accomplished by the connection of the Minnesota Central with the McGregor Western at Austin, near the State line of Iowa. Both of these roads are progressing rapidly to the point of junction, and when united will form, *via* the Chicago and North Western, and Milwaukee and Prairie du Chien, a continuous railway route to St. Paul and Minneapolis. A very large and important trade is to be opened by this and the Northwest, drawing from the valleys of the Red river of the North and the Saskatchewan, will develop resources not yet appreciated by Eastern people.

Commerce of New York.

The New York exports for the nine months from January 1st, compares as follows:

	1864.	1865.
Domestic produce	$153,851,993	$107,984,357
Foreign free goods	1,582,348	772,180
Do. (dutiable)	13,961,235	2,741,641
Specie and bullion	34,936,661	22,689,116
Total exports	$204,332,237	$134,137,294
Do. exclusive of specie.	169,395,576	111,448,178

The revenue from customs at New York compare as follows:

	1864.	1865.
In Sept	$4,084,492 84	$12,929,615 64
Previous 8 months.	52,286,437 59	59,587,543 22
Total 9 months	$56,370,930 13	$71,517,158 86

The New York imports for nine months, from January 1, compare as follows:

	1864.	1865.
Entered for consumption.	$93,411,384	$80,958,556
Entered for warehousing	85,395,103	58,146,535
Free goods	8,839,129	7,542,144
Specie and bullion	1,859,144	1,681,759
Total entered at port	$189,504,760	$148,323,994
Withdrawn fr. wareh'se	50,046,782	67,942,971

Toledo and Southwestern Trunk Railway.

We learn that a new railway organization is attracting considerable attention at the West. The line is stated to be from Goshen, Indiana, a station on the Michigan Southern and Northern Indiana Railroad, direct to Springfield, Ills. It is proposed to call the new organization the "Toledo and Southwestern Trunk Railway Company." The Chicago *Tribune*, speaking of the route destined to be occupied by this new company says:

The people of nine counties in Illinois, and six in Indiana, are determined to keep up with the improvements of the age, by the construction of a railway from Toledo, Ohio, to Springfield, Illinois. In traversing that fine agricultural and stock raising country, this road will strike the county seat of every county but one through which it passes. It will connect with the Southern Michigan Railroad, which is one of the links to connect in a direct line northeastwardly with railway lines for a distance of 850 miles.

From Springfield, Illinois, there is a road now in operation to Jefferson City, Missouri, with a determination on the part of the people in that section of the country to continue the road so as to connect with the Eastern Texas Railroad, at Sherman, on Red River, thus connecting Austin, the capital of Texas, with Montreal, Canada, in almost a direct line; and when thus finished, will be over 3,000 miles long, the most direct and longest line of railroad in the world. This enterprise is a very important one for the counties through which it runs, as there is no railroad running in the same direction nearer, on each side of the line of this road, than from thirty to seventy miles. The country will be of easy grade, and good timber for bridges and cross ties plentiful.

The officers of this road are well known by the people in the several counties in which they reside, for honesty and business qualifications, and in consequence of which the stock solicitors have met with good success in procuring stock.

☞ At a meeting held in Lowell, Mass., on the 25th ult., a motion was made and carried that an advertisement, giving notice of intention to petition the next Legislature for a charter for another railroad between Lowell and Boston, be published without unnecessary delay, to answer the requirements of the law; and a committee of five was appointed to attend to that duty, and also to investigate other matters having a bearing on the subject the meeting had under consideration.

Interest and Dividends.

The Long Island Railroad Company have declared a quarterly dividend of two per cent., payable November 1.

The Wyoming Valley Canal a dividend of 4 per cent., payable on the 6th of November, free of tax.

The Concord Railroad Company a semi-annual dividend of 4 per cent., payable Nov. 1.

The November coupons of bonds of the Indianapolis and Madison Railroad will be paid by J. and S. Ferguson, No. 65 Pine st.

Pennsylvania Canals.

The Wyoming canal, it will be remembered, suffered severely early last spring from one of the most disastrous freshets ever experienced in the Northwestern part of the State. It was, in consequence, interrupted in business up to the first week in August, and yet the active demand since for coal and iron has so quickened its business that its tolls up to Thursday of last week topped a hundred thousand dollars. The Pennsylvania Canal, formerly a part of the State Works, and a connecting link in the outlet for the trade of the Wyoming Canal, correspondingly profits from the activity of the coal, iron and lumber trade of that region of the State. The steady increase of business through the Valley of the Susquehanna renders it probable that all the canals centreing in it, the Wyoming, the West Branch, the Pennsylvania and the Susquehanna, will be enlarged, and probably, the three upper ones at least consolidated.—*Phila. Ledger, Oct.* 23.

☞ At a meeting of the Commissioners of the Washington County Railroad, held at Hagarstown, Md., on the 27th ult., Edward M. Mealey, Esq., of Hagarstown, was elected President, and J. L. Randolph, Esq., of Baltimore, appointed Chief Engineer. The meeting was adjourned to the 2d of November, at Baltimore. At this meeting it was understood that arrangements would be made, specifications, &c., prepared, and the whole line put under contract at once, and in running order early next year. It is the general impression that this company intend during the coming winter and spring to have further surveys made looking to an extension of their line west, some say to the coal fields of Western Maryland, and others that they intend to strike for the anthracite coal regions of Pennsylvania. The friends of the Western Maryland Railroad are very sanguine that this important road will also soon be ready to let.

☞ The Cape Cod Central Railroad is now completed to Brewster, and its construction to Orleans is being pushed forward with all possible despatch. A special meeting of the stockholders of this road, held in Brewster on the 28th ult., voted to accept the act of the Legislature of May 5, 1865, and authorize the directors to increase the capital stock at their discretion. Also to give the directors authority to issue additional bonds, or to mortgage the road to secure the payment of bonds, &c., as they may deem expedient.

☞ A meeting of the citizens of Dorchester Co., Md., was held at Cambridge on the 23d ult., to take measures to construct a railroad from that town to Bridgeville, and thus form a connection with the cities of the North. Addresses were made by several gentlemen, and a committee appointed to draft a charter to be presented to the Legislature. Subscriptions have already been secured to the amount of several thousand dollars. The cost, it is stated, will not exceed $850,000.

Western Maryland Railroad.

At a meeting of the recently elected directors of this company, held in Baltimore on the 26th ult., Captain Robert Irwin was re-elected president of the road for the ensuing year. John B. Boyle Esq., was also re-elected secretary and treasurer of the company and P. H. Irwin, Esq., superintendent.

Captain Irwin on being informed of his re-election, acknowledged the compliment in a few brief remarks, thanking the directors for their continued confidence. He also spoke of his earnest endeavors heretofore to extend the road through to Hagerstown, and gave full assurance that in the future, as in the past, nothing should be left undone upon his part to accomplish that most important and desirable object.

Gwynn's Falls Railroad.

A sufficient amount of the stock—fifty thousand dollars—required by the charter, having been subscribed, the corporators of this enterprise met on Saturday last, and organized by appointing Hon. John Wethered, Chairman, and J. Howard Mc Henry Esq., Secretary. On motion, G. Slothower, Esq., was chosen permanent President of the company, and the following named gentle Directors to serve for one year, viz: John Wethered, T. J. Myers, J. H. McHenry, Mr. Harris and Theodore Motte. There was an earnest and energetic spirit manifested at the meeting. Nearly or quite one hundred thousand dollars of the stock has already been subscribed. The road will cost to complete it about $250,000.—*Baltimore Sun, Oct.* 10.

☞ The following gentlemen have been elected directors of the Alexandria and Fredericksburg railroad for the ensuing year: R. W. Latham, of New York; H. G. Fant and L. P. Suit, of Richmond; J. B. Stewart and L. Huyck, of Washington; S. M. Shoemaker, of Baltimore; Alexander Hay, of Philadelphia; Julius Stahl and E. D. Burr, of New York. President, R. W. Latham; Secretary, J. B. Stewart; Treasurer, L. Huyck. It is stated that the most feasible and direct route to Fredericksburg will be immediately surveyed and put under contract.

☞ A Desmoins dispatch to the *N. Y. Tribune*, says that the Chicago and Northwestern Railroad Company are about to purchase the Decorah Branch Railroad, in Iowa, with a view to extend it northwardly from Decorah in the direction of St. Paul.

☞ The amount of income charged with income-tax in the United Kingdom in the year ending the 5th April, 1864, was £326,775,501—namely £276,514,250 in England, £27,137,918 in Scotland, £23,123,333 in Ireland.

☞ A proposition is on foot to construct a railroad in Michigan from Saginaw to the Straits of Mackinaw, which would intersect the road from Esconaba to the iron mines of Lake Superior. The contemplated link would be one hundred and thirty miles long.

☞ The Brooklyn and Rockaway Beach railroad, which starts from East New York and runs to Canarsie, where ferryboats take passengers direct to Rockaway beach, has just been completed.

☞ The survey for a railroad from Lawrence, Kansas, to Pleasant Hill has been completed. The distance is 53¼ miles, or 19 miles shorter than the route *via* Kansas City.

Pittsburg and Connellsville R. R.

Through the aid of the Baltimore and Ohio Railroad Co., the Pittsburg and Connellsville Railroad Co., are enabled at once to resume operations on the Sand Patch tunnel. A large force will without delay be placed upon the work, which will be pushed on to completion as fast as possible.

Atchison and Pike's Peak R. R.

Major Gunn, Chief Engineer of the Atchison and Pike's Peak Railroad has received a dispatch from Col. Osborne, contractor for the road, directing him to push forward the work with all possible speed, and hire all the men he could obtain, as laborers. He states that ample funds are now in possession of the company to complete the whole road.—*Atchison Champion.*

☞ The Raleigh *Standard* says that the North Carolina railroad from that point to Goldsboro' has been turned over to the stockholders, and the company now have possession of it. This places the whole line from Goldsboro' to Charlotte in the hands of the stockholders.

☞ Work has been recommenced on the Delaware and Maryland Railroad, running from Smyrna, Delaware, to Easton, Md., and a large force is now engaged in laying rails.

☞ The railroad from Chestertown, Kent Co., Md., to the Delaware Railroad, it is expected, will soon be commenced, nearly all the stock having been subscribed for.

☞ By a return just published, the population of Paris consists of 1,796,141 persons.

Pacific Mail Steamship Company's

THROUGH LINE TO

CALIFORNIA,

Carrying the United States Mail.

THE PACIFIC MAIL STEAMSHIP COMPANY will despatch on WEDNESDAY, the 1st of NOVEMBER next, at twelve o'clock, noon, from the Company's PIER, No. 42, FOOT OF CANAL STREET, North River, their NEW AND FIRST-CLASS STEAMSHIP

HENRY CHAUNCEY,

Capt. ALFRED G. GRAY,

for Aspinwall, connecting via the PANAMA RAILROAD across the Isthmus of Panama, and on the Pacific with the Company's favorite steamship

GOLDEN CITY,

for San Francisco.

The steamers of this Company will sail regularly thereafter, as above, on the 1st, 11th and 21st days of every month, except when such dates fall on Sunday, when the departure will be on the preceding Saturday. The

ATLANTIC,

Captain JEFFERSON MAURY will sail on SATURDAY, November 11th, connecting on the Pacific with the COLORADO. The

BALTIC,

Captain ROBERT H. HORNER, will sail on TUESDAY, November 21st, connecting with the SACRAMENTO.

THROUGH PASSAGE RATES,

INCLUDING RAILROAD FARE.

First Cabin, $350; Second Cabin, $250; Steerage, $125. Children between 6 and 12 years, ½ fare; children from 2 to 6 years, ¼ fare; children under 2 years, free.

Bankable funds (currency) only taken in payment.

Out of town applicants may secure passage by remitting bank drafts on New York to the Company's agent, who will send tickets by mail or express, as may be directed.

Baggage checked through in charge of baggage masters over the entire route.

100 pounds baggage allowed each adult passenger. For all over this weight 10 cents per pound must be paid to the purser on board. No merchandise nor bedding taken as baggage.

WAY PASSAGE RATES,

NEW YORK TO ASPINWALL.

First cabin, $125; second cabin, $50; Steerage, $50. Children at proportionate rates.

WAY-BAGGAGE.—On all over 100 pounds to each adult passenger three cents per pound, payable to the purser on board.

ASPINWALL TO PANAMA.

$25 in gold, and children in proportion, payable at Aspinwall.

An Experienced Surgeon assigned to each Ship, Medicines and Professional Services free of Charge!

For Passage Tickets, or further information, apply at the COMPANY'S TICKET OFFICE, on the wharf, foot of Canal Street, North River.

The Railroad Interest and Taxation.

The general government and people of the United States cannot justly charge the railroad interest with *disloyalty*, during the terrible crisis which has happily passed. With exceptions so few that they became noticeable, those in charge of our public thoroughfares were among the first and most earnest to identify themselves with the national cause, as they were to continue such until the contest came to an end. They foresaw the magnitude of the struggle, the load of taxation which it would involve, but did not, in consequence shrink from their duty as citizens and officers. At a time when an extraordinary flush of prosperity visited every industrial interest at the North, the railroads received aught but the lion's share. The prices of labor and materials advanced rapidly from day to day; but the rates charged for passenger transportation did not keep pace with the upward movement in expenses. The advance in freight charges has about kept abreast with the enhanced cost of everything else; in carrying passengers the gain is certainly not 25 per cent. *per capita*, as compared with the rates which existed before the war.

It may be alleged that if passenger fares have continued low, the fault rested with the managers themselves, who had the power to advance them. This is not true, however. The New York Central Railroad Company are compelled by the terms of their charter to charge only two cents per mile, and this is rigidly construed, albeit the two cents should be worth no more than one, as measured by the gold standard. This rate on the Central in a measure becomes the standard adopted on all the great east and west lines, which are competitors for the same business; with low *through* charges it also comes to pass that the companies are compelled to make *way* fares to correspond. Branch lines, and even the entire railroad system of the country, thus feel themselves compelled to conform more or less to the standard of the Central, though the currency should depreciate to ever so great an extent. There is no feasible means of escape from this cruel necessity of conforming to the letter of the law on transportation charges, whatever advance its spirit might justly warrant.

If we take the five great industrial interests of our country, the agricultural, the manufacturing, the mercantile, the mining, and the carrying, it will be admitted that the last has been exposed to the greatest risks and losses, the past four years, while it has been by far the least profitable. The farmer, the merchant, the miner, the manufacturer never did so well as while the war lasted, and even since its close. Their average profits have more than doubled what they were before the rebellion. Has this been the case with our railroad companies? Have those which divided annually five or six per cent. before 1860, divided ten or twelve since that date? Their business has improved, it is cheerfully admitted; but not in a degree to correspond with the general prosperity, and not at a ratio corresponding with the growth of expenses. The interest which most cordially stood by the cause of the country has fared, on the whole, the least prosperously, as far as net profits are concerned.

It is not usually taken into consideration that dividends are not paid in gold, but in currency, which reduces the amount on their face nearly a full third. In reality, a ten per cent. dividend today is not so good, as far as respects its purchasing power, as one of seven per cent. was, only five years ago.

Look at the manner in which high taxes and high prices everywhere bear down upon this great interest. The rails used in laying the superstructure cost double their former price. If imported, a tariff duty is levied nearly twice as high as formerly, added to which is the difference between specie and currency, in reckoning the rate of exchange. If made at home, they are taxed, first, as pig, next as bar iron, to say nothing of miners' and manufacturers' licenses. The assessor levies upon the material used in making locomotives, as pig iron, as bar iron, as wheels, axles, boilers, rivets, tubes, smoke-stacks, lamps, and finally a duty of six per cent. upon the finished machine. It has been estimated that at one time the taxes paid upon a single first-class locomotive amounted to $5,000, or fully 20 per cent. of the whole cost. As the several manufacturers through whose hands it passed, charged a higher sum than they paid as internal revenue, to make up for trouble and advancing money, it is believed the sum stated above was not in excess of the truth. Even at the present time, the aggregate imposition on an engine of the kind is not far from $2,500, a rate which is unknown in the most heavily taxed country in Europe.

We might go over all other parts of the equipment, passenger and freight cars, in particular, with the same result. But as if these visitations were too light or infrequent, the law imposes a further tax of 2½ per cent. on gross receipts, and a further tax of five per cent. upon all dividends; while the individuals have still to pay a heavy income tax upon what remains. Even the repairing of engines is made to contribute no inconsiderable sum.

Without being disposed to complain, we submit that the tax-gatherer is too ubiquitous a person altogether. There is no escape from his visits, his inspections or his decisions. In the case of corporations like railroad companies, "the uttermost farthing" is both obtainable and obtained.

It is understood that Congress will address itself at an early day to re-casting our whole system of taxation, which was devised to meet a state of affairs happily no longer existing. When this vast subject is taken up, we trust the railroad interest,

second to none other in usefulness and importance, whether during war or peace, will be largely relieved from the too onerous burthens now imposed on it. The reduction of our national armaments has proceeded at so rapid a rate as to warrant the belief that a revenue of $400,000,000 a year, after the close of 1865, will not only suffice for all purposes, but provide quite a decent contribution to the sinking fund for the extinguishment of the principal of our national debt. With the much greater perfection of our government machinery, making every tax-payer contribute his full quota, it is certain that very liberal reductions can safely be made, without imperiling the credit, or crippling the strength of the Federal government.

Chicago and Northwestern Railway.

The earnings of this road for the years ending May 31, 1864 and 1865 have been as follows:

	1863–'64.	1864–'65.
From passengers	$1,221,819 32	$2,167,901 77
" freight	3,198,419 62	4,448,598 57
" express	54,972 48	90,045 97
" mail	62,551 94	67,885 91
" miscellaneous	49,044 04	46,317 53
	$4,681,807 40	$6,820,749 75

The expenses of 1864–'65 were:

Repairs of engines	$505,028 10	
" cars	548,891 42	
" buildings	72,660 56	
" fences	20,213 16

Miscellaneous	31,721 51	
Exp. N. Y. office	10,624 66	
		4,295,472 86
Earnings less operating expenses		$2,525,276 86
State, Co. & town taxes.	$168,119 91	
Government tax, 2½ per cent. on gross earnings	157,769 07	
		325,888 98
Balance		$2,199,387 91
Interest and sinking fund on bonds	$750,470 00	
Dividend on preferred stock, Dec. 1, 1864	372,872 15	
Rents of leased roads	397,115 98	
		1,520,458 13
Surplus, May 31, 1865		$678,929 98

The operating expenses are 62.98 per cent. of gross earnings; including state, county and town taxes, they are 65.43 per cent.; and including Government tax, 67.75 per cent. The total expenditures, including operating expenses, taxes, rent of leased roads, interest on bonds, and dividends on preferred stock, amount to $6,141,819 97.

The second dividend of 3½ per cent. on the preferred stock, then outstanding, was paid on the 20th of June, and therefore is not included in the above statement. It amounted to $447,846; which deducted from the above surplus, still leaves a surplus of $231,083 78, which is equal to nearly 2 per cent on the present amount of common stock of the company.

The different lines now operated by the Chicago and North Western Railway Company are: Dixon Air Line (Chicago to Mississippi River), 138 miles; Freeport Line, (Junction to Freeport,) 91 miles; Madison Line, (Belvidere to Madison) 68 miles; Elgin and State Line road, (Elgin to Richmond, including branch from main line) 35 miles; Kenosha and Rockford Line, (Kenosha to Rockford,) 73 miles; Green Bay Line, (Chicago to Green Bay) 242 miles; Chicago, Iowa and Nebraska railroad (Mississippi river to Cedar Rapids) perpetually leased, 82 miles; Peninsula Line (Escanaba to Iron mines), 70 miles; Cedar Rapids and Missouri River Railroad (Cedar Rapids to Boonsboro') perpetually leased, 122 miles.

The lines not yet built are: Green Bay to Escanaba, to connect the Green Bay and Peninsula lines, 110 miles; and Boonsboro' to Missouri River, to connect with Union Pacific Railroad, 180 miles.

The company own 154 locomotives: 79 first class and 15 second class passenger cars; 83 caboose, 75 baggage and mail, 2,000 box, 611 platform, 109 cattle, and 53 coal cars; also 214 iron ore cars on Peninsula division—making a total of 3,289 cars.

The earnings of this company's roads for the past fiscal year, ending May 31, 1865, exceeded, it will be seen those of the previous year, $2,188,942 35; being 45.69 per cent. increase. The earnings for the first four months of the present year (June to September inclusive) show a still further increase over the same months of last year of $930,083, being 61.62 per cent., making the earnings of these four months more than twice the amount earned in the same months but two years since, and without any material additional earnings from new, additional or extended lines of road. A comparative statement of monthly earnings for the past and preceding years, and to the close of October of the present year will be found on page 1077 of our present issue.

There is every reason to expect a continuance of an important increase of earnings throughout the ensuing year; and with the addition from time to time of adequate machinery, and with ordinary crops in the country, the earnings of their roads must go on increasing largely for years to come.

Since the close of the fiscal year on the 1st of June last, the floating debt then existing, as shown in the annexed statement, has been substantially paid from surplus earnings over current operating expenses accrued interest on bonds, etc.

Since the consolidation with the Galena company, in June, 1864, the common stock of the company has been increased $1,150,458 52, viz: amount issued and agreed to be issued in exchange for the stock of the Peninsula Railroad Company, $1,000,000; amount issued in settlement of claims against the old Chicago, St. Paul and Fond du Lac Railroad Company in accordance with the plan of re-organization of 1859, $150,458 52.

The preferred stock has also been increased $4,564,248, viz: amount issued and agreed to be issued in exchange for the stock of the Peninsula Railroad Company $1,000,000; amount issued for the purchase of 12,741½ shares, out of 22,500 shares of the stock of the Chicago and Milwaukie and Chicago Railway Company, $1,372,000; amount issued at par in exchange for the stock of the Beloit and Madison Railroad Company, at 80 per cent., $32,248; amount issued for additional equipment, permanent improvements, and additional working capital, $2,160,000.

The amount of common stock issued is stated at $12,773,421 18; to be issued, $387,500—total, $13,160,921 18. The amount of preferred stock issued is $12,396,019 79; to be issued, $598,700—total, $12,994,719 79. Total common and preferred stock, $26,155,640 97.

The funded debt of the company amounts to $12,020,482 87. A full and comprehensive statement of these bonds, giving the amount of each class, date of maturity, rate of interest, and when and where payable, may be found on pages 1078, 1079 and 1080, of our present issue.

The preferred sinking fund bonds are secured by a first mortgage on road and equipment from Chicago to Oshkosh, 193 miles. The general first mortgage bonds are a lien, next to preferred sinking fund, and funded coupon bonds, on road and equipment from Chicago to Oshkosh. The funded coupon bonds, issued for first six coupons from general first mortgage bonds, (funded that earnings might be applied to increased equipment,) are secured by mortgage lien next to the preferred sinking fund bonds, on road from Chicago to Oshkosh. The Appleton Extension bonds are a first lien on the road from Oshkosh to a point 23 miles north of Oshkosh, and on 76,000 acres of land received from the U. S. Government. The Green Bay Extension bonds are a first mortgage lien on road from north end of Appleton Extension to Green Bay, about 26 miles, and on 76,000 acres of land received from U. S. Government. The Flagg Trust bonds are secured by mortgage on depot grounds in Chicago. The equipment bonds are a first mortgage lien on locomotives and cars purchased with the said bonds. The consolidated sinking fund bonds are secured by a mortgage on all the different lines of road and equipment of the company in the States of Illinois and Wisconsin, subject to prior liens. The mortgage provides for an issue of $2,000,000, with the right to increase $500,000 for the purpose of equipment, after February 1, 1866, making $2,500,000; and also provides that the company may at any time make further issues of this class of bonds for the purpose of exchanging them for any of the prior bonds of the company, dollar for dollar. The first $2,000,000 of these bonds are convertible into the preferred stock of the company, at par, at the option of the holder, at any time before the first day of May, 1870.

The first mortgage bonds of the Galena and Chicago Union Railroad Company, are secured by a first mortgage on road and equipment from Chicago to Mississippi River, near Fulton, 138 miles; from Junction to Freeport, 91 miles; and from Belvidere to Wisconsin State Line, at Beloit, 20 miles—in all 249 miles. The second mortgage on same road and equipment as above described. The Mississippi River Bridge bonds are secured

by lien on the net earnings of the Galena Division, after the payment of interest and sinking funds on the first and second mortgage bonds. The bonds issued for the purchase of the Elgin and State Line Railroad are secured upon the net earnings of the Galena Division after the payment of interest, and sinking funds on the first and second mortgage, and Mississippi River Bridge bonds.

The first mortgage bonds of the Peninsula Railroad Company of Michigan are a first mortgage lien on Peninsula Division from Escanaba to Negaunee and extensions to iron mines, about 70 miles, and on the lands received from the United States and the State of Michigan in aid of building said road. The mortgage provides for an issue of $1,200,000.

BALANCE SHEET, May 31, 1865.

Old construction.		
Cost of road and property in accordance with terms of consolidation between the G. & C. U. R. R. Co., the C. & N. W. R. Co. and the Peninsula R. R. Co. of Michigan.		$34,870,931 98
New construct'n since June 1, 1864.		
Right of way and depot grounds	$31,642 85	
Buildings and improvement of depot grounds	350,478 67	
Fencing	26,168 42

Treasurer.—GEORGE P. LEE.

Assistant Secretary.—JOSEPH B. REDFIELD.

George L. Dunlap, General Superintendent.

James H. Howe, General Solicitor.

E. B. Talcott, Chief Engineer.

Wm. H. Ferry, Acting Director of Galena Division.

H. H. Boody, Transfer Agent in New York.

☞ We are informed that the State Commissioners appointed by Pennsylvania and New Jersey have agreed upon a site for the Lehigh Navigation Company's Railroad bridge across the Delaware River at Easton; the spot chosen is north of and near to the Lehigh Valley Railroad Company's bridge. This new bridge, it is said, will be built forthwith, to connect the Lehigh Canal Company's Railroad with the Central Railroad of New Jersey—the short and direct route to New York—and also with the Morris and Essex Railroad. The Lehigh Canal Company will also build a railroad bridge across the Lehigh at Allentown, to connect their road with the East Pennsylvania Railroad, and also with the Allentown and Norristown Railroad when built. The Lehigh Canal Company intend to tie their iron line to all the railroads which approach and intersect the Lehigh Valley.—*U. S. R. R. and Mining Register.*

Journal of Railroad Law.

ASSIGNABILITY OF BOND—ASSIGNMENT IN BLANK, NEGOTIABLE.

In the case of Sarah Brainard, *vs.* The New York and Harlem Railroad Company, the action was brought to recover the amount of a sealed bond for $1,000, with interest coupons annexed, issued by the defendants, and payable to Edward Bement as his assigns. The bond was underwritten: "For value received I assign this obligation to ———— Witness my hand and seal this 18th day of June, 1851.

"E. Bement." (Seal.)

The bond thus underwritten was purchased by the plaintiff in the market.

The cause was tried on the 28th day of May 1862, before Mr. Justice Monell, and a Jury.

The only defence made upon the trial was that the bond was a speciality, and that the fact of its being assigned in blank did not make it negotiable by delivery, and that some connection must be shown between the payee and the plaintiff.

The court over-ruled this objection, and directed the jury to find a verdict for plaintiff for $1,057 76, subject to the opinion of the court at General Term.

The following opinion was given at General Term by

BARBOUR, J.—The general rule in regard to the transfer of sealed obligations of corporations as well as those of government, has been much relaxed of late years. Thus we find in Wookey *vs.* Pole, (4 B. and Ald., 1,) an exchequer bill, to blank, was held to be payable to the holder; and in Georgia *vs.* Mielville, (3 B. and Cres., 45) a like decision was made as to a bond of the Prussian Government payable to whomever should be the holder. It passed from hand to hand like exchequer bills. Ch. J. Abbott said it was precisely analogous to a bank note payable to bearer or to a bill of exchequer indorsed in blank. In our own courts, bonds of states and corporations, payable with coupons annexed, to the bearer, have repeatedly been held to be negotiable instruments of which the title would pass by mere delivery. (State of Illinois *vs.* Delafield, 8 Paige 527; S. C. in Ct. of Errors, 2 Hill, 159; Fisher *vs.* Morris, Canal Co., 3 Am. Law Reg., Gould *vs.* Town of Sterling 1 Am. L. Reg. [N. S.] 290). In the case of White *vs.* The Vt. & Mass. R. R. Co., (21 How., U. S. R., 575,) bonds had been issued by the company, payable in blank, the name of the payee being inserted; and the plaintiff before suit brought, filled the blank with his own name. Justice Nelson in delivering the opinion of the court: "As to the negotiability of this class of securities when shown to be intended that they should possess this character by the form in which they are issued, and mode of giving them circulation. We think the usage and practice of the companies themselves and of the capitalists, and business men of the country dealing in them, as well as the repeated decisions or recognitions of no principle by courts and judges of the highest respectability, have settled the question." * * "Until the plaintiff chose to fill up the blank, he is to be regarded as holding the bonds as bearer and held them in this character till made payable to himself or order." So, too, in Mechanics' Bk. *vs.* N. Y. and N. Haven R. R. Co., (reported in 4 Daer, 480,) where an assignment of stock, and, in the same instrument, a power of attorney to transfer were executed in blank as to the name of the transferee and attorney, it was held that the holder of the certificate had the right to fill the blank with his own name. In the court of appeals, Judge Comstock said: "It is common to deal in this manner in the stock of corporate companies; and I do not say that any rule of law or of public policy is violated by it. The dealers unquestionably acquires an equitable title to the stock of his vender." (p. 579.) This decision overrules that in Hibble White *vs.* McMarine (6 Mees and Wels., 200,) as does White *vs.* Hoyle, in Exchequer Chamber, (18 Com. R. R., 373.)

We see no distinction, in principle, between the two American cases last cited and that now under consideration. Aside from judicial determinations in other cases. We cannot ignore the fact that bonds of railroad, and other companies, issued and payable, or assigned in blank, are daily transferred and passed from hand to hand here by mere delivery, to the amount of millions. This much we are bound to know of the current commercial transactions of the country in which we live. Considering this fact, and the obligation in this case is of the same general character as the bonds thus circulating in the market, it must be presumed that the company designed that the title should pass by delivery alone; or in other words, that they should be negotiable by delivery; and it intended by his assignment in blank to accomplish the same object; and it follows that, under the decisions last mentioned, the defendants are legally liable to the holder of the bond. Even if this were otherwise, however. We should have no hesitation in holding that the plaintiff, who has, in good faith, purchased the paper in open market, where the payee named therein must have permitted it to be placed, stands in equity, in the place of such payee, and is equitably entitled to all his remedies as against the obligors.

The plaintiff is therefore entitled to a judgment upon the verdict.

Chicago and Northwestern Railway.

We have received the Sixth Annual Report of this company, now operating the most extensive system of railroads in this country, composed of various consolidated interests having a common commercial purpose. The total length of all the railway lines now owned and operated by this company is 930 miles, viz: the lines owned by the Chicago and Northwestern railway company before the consolidation, 315 miles; the lines owned and leased, contributed by the Galena and Chicago Union railroad company, 545 miles; and the road contributed to the company's lines by the Peninsula railroad company, 70 miles. The report is very lengthy, and is sub-divided into three distinct parts—the first, giving a history and description of the Galena and Chicago Union railroad; the second, the history and character of the Chicago and Northwestern railway company, previous to its consolidation with the Galena company; and third, the history of the Peninsula railroad. We give below the first portion of this interesting statement, to be continued from week to week until completed. The financial statements are given in another portion of this week's issue:

In presenting their first report of the Chicago and North Western Railway Company as now consolidated, the Board of Directors think proper, in order that the stock and bondholders of the company, and all parties interested, may more fully understand and appreciate the origin and exact extent and character of the lines of road now included in, and owned in fee, by the present consolidated Chicago and North Western Railway Company, or operated by it under lease, preliminarily to present a brief history and description of the roads, property and interests of this company, as now organized and conducted. The map accompanying this report will show the location, direction and connections of this company's lines of road.

Before proceeding with this history and description, however, the Board would remark, that under the provisions of the articles of consolidation executed between the Chicago and North Western Railway Company and the Galena and Chicago Union Railroad Company, on the 2d of June, 1864, the fiscal year of the consolidated road was made to terminate on the first day of June in each year thereafter. Previous to said consolidation, the fiscal year of the Chicago and North Western Railway Company terminated on the first day of April, and that of the Galena and Chicago Union Railroad Company on the first day of January in each year; and the annual reports of the respective companies were ordinarily published some two or three months subsequent to the close of the fiscal year, and as soon thereafter as the accounts could be conveniently made up.

The change made by virtue of the consolidation of June 2d, 1864, fixing the terminus of the fiscal year thereafter on the first of June, together with the enlarged operations of the company under its new organization, and its partially changed and quite extended system of accounts, necessarily required a longer period to arrange and adjust them than will hereafter be necessary; and has contributed to the lapse of time between the close of the first fiscal year and this first report of the consolidated company.

And the Board also think proper further to state, that the principal reasons for adopting the name of the "Chicago and North Western Railway Company," instead of the pioneer name of the "Galena and Chicago Union Railroad Company," at the time of consolidation, will be apparent, when it is understood that the town of Galena is not situated on any portion of either of the consolidated roads; that the name selected is pertinent, descriptive and sufficiently comprehensive, and broad enough to include the large territory now penetrated by these united roads; that the adoption of it involved no change of books and blanks; and that, between the two cardinal points of the compass "North" and "West" from Chicago, there are no other roads, leading out of that city, except those entirely or chiefly represented by this company.

On the 16th of January, 1836, the "Galena and Chicago Union Railroad Company" was incorporated by the State of Illinois, with power to construct a railroad from Chicago to Galena, and with power to construct, maintain and use such other lateral route or routes of road as said company might deem advantageous, expedient and necessary. And the said corporation was further authorized to unite (the word "consolidate" not having at that time been applied to railroads) with any other railroad company already incorporated, or which might be incorporated, on such terms as might be agreed upon by the directors of said companies so uniting; and also to construct such other and lateral routes as might be necessary to connect them, that is, these united roads, with any other railroad route or routes which might be deemed expedient.

Under this charter, the Galena and Chicago Union Railroad Company, in 1847, commenced the construction of its present line of road from Chicago, *via* Elgin, Belvidere and Rockford, to Freeport, and by February, 1850, had completed its first 42 miles from Chicago to Elgin, and thereafter extended that line of its road to Rockford

and to Freeport, from whence it yielded its right of construction to Galena to the "Illinois Central Railroad," and unfortunately lost thereby the control of the direction of the business of the Mississippi River at Dunleith and Galena.

Soon after completing the road to Freeport, the error in losing the control of the Mississippi River business, by surrendering it to the "Illinois Central Railroad," became so apparent, and the Mississippi River connection so important, that the company sought a remedy and relief in the construction of another line of road, as authorized under their charter, from the Junction, so called, about 80 miles west of Chicago, on a line due west through Geneva and Dixon to the Mississippi River at Fulton, now commonly called the "Dixon Air Line," and an air line it almost literally is, reducing the distance from Chicago to the Mississippi River, on this now much the most important line of road, then owned by the Galena Company, to less than 138 miles.

While constructing this air line road, the Galena Company thought proper to consolidate with the Mississippi and Rock River Junction Railroad Company, which latter Company was incorporated by the State of Illinois on the 15th of February, 1851, and its charter amended by an act approved June 21st, 1852, and again on the 28th of February, 1854, and whose charter contained powers at that time desirable to possess, including ample powers of consolidation.

By an act of the Legislature of the State of Illinois, approved February 25th, 1854, the Galena and Chicago Union Railroad Company was authorized to connect its (air line) road by lease, purchase or consolidation, with any railroad extending to the Mississippi River at or near Fulton. Under these powers, and under the general law of the State of Illinois authorizing railroad consolidations, the Galena and Chicago Union Railroad Company and the Mississippi and Rock River Junction Railroad Company did, on the 9th of January, 1855, unite and consolidate their roads, under the name of the "Galena and Chicago Union Railroad Company."

Under said consolidation, the said air line road was constructed and completed to Fulton aforesaid; and thereafter, by an act of the Legislature of the State of Illinois approved February 15th, 1855, the said articles of agreement and consolidation, so made and executed between said companies, were not only sanctioned, confirmed and approved, but it was especially declared in said act, that henceforward all the immunities, franchises and privileges theretofore granted to either of said companies should be united and consolidated in the one consolidated company, and the capital stock of said companies should be blended in one capital stock.

Under the powers possessed by the Mississippi and Rock River Junction Railroad Company, which powers were, by the act of February 15th, 1855, declared to be conferred upon the consolidated "Galena and Chicago Union Railroad Company," the last named company acquired and exercised a right which it did not otherwise possess, to increase its capital stock, and also the right "to consolidate its stock and franchises with the stock and franchises of any other railroad company."

After completing its air line of road to the Mississippi at Fulton, and on or about July 3d, 1862, the Galena Company obtained a perpetual lease of the franchises of the "Albany Bridge Company," having the right to maintain a ferry or build a bridge across the Mississippi River, from a point near Fulton, to Clinton, in the State of Iowa; and also a lease of the "Chicago, Iowa and Nebraska Railroad," extending west from Clinton, on the west bank of the Mississippi River, to Cedar Rapids, Iowa, a distance of 82 miles, and also a lease of the "Cedar Rapids and Missouri River Railroad," the line of which extends westward from Cedar Rapids to the Missouri River opposite Omaha, and opposite the "Union Pacific Railroad," commencing at Omaha.

But a small portion of the "Cedar Rapids and Missouri River Railroad," however, was constructed at the time of making the said lease; the lessors have since extended this road west to Boonsboro', on the east bank of the Des Moines River, about 122 miles west of Cedar Rapids, about 204 miles west of the Mississippi River, at Clinton, and leaving but about 130 miles of road to be constructed, to complete the line from Chicago to a connection with the Union Pacific Railroad on the Missouri River at Omaha.

These leased roads and ferry were operated by the Galena Company from and after the date of said leases.

Just previous to the consolidation of the Galena Company with the "Chicago and North Western Railway Company" in June, 1864, said Galena Company had commenced the construction of a bridge over the Mississippi River at Clinton, which bridge has since been completed by this company, and is the second bridge built over that river below St. Paul, the bridge at Rock Island being the first.

The extension of the Cedar Rapids and Missouri River Railroad to Boonesboro', and to the abundant coal-fields on the Des Moines River in that vicinity, is a matter of great value and importance to this company in the economical operation of this entire line of road, running through a country so rich in productions and so destitute of wood.

This company now enjoys in this direction a continuous and almost air line of road, running due west through an extraordinarily rich and fertile country, from Chicago to Boonesboro', about 342 miles.

The "Cedar Rapids and Missouri River Railroad Company" have now under consideration the prompt extension of their line of road from Boonesboro' to the Missouri River, at the point of connection with the "Union Pacific Railroad," and we may now confidently hope for the early extension of this route of road by the "Union Pacific Railroad Company" up the valley of the Platte River, and on a line scarcely less directly west, to and beyond Denver and the rich gold-fields of Colorado, making much the shortest line of road that is contemplated, or can probably ever be built, from the east to Colorado and the Pacific, near the same parallel of latitude.

The lessors of these Iowa leased roads build them, and all extensions of them, at their own cost, and when constructed according to the terms of the lease, and accepted by this company as the lessee, they are equipped, maintained and operated by this company perpetually thereafter.

The lease of the Chicago, Iowa and Nebraska Railroad, 82 miles long, is at fixed rates, not of themselves considered favorable, but by virtue of the lease the entire traffic of this road and of the "Cedar Rapids and Missouri River Railroad," and all extensions of it, are for all future time secured to this company's road from Chicago to Fulton, 138 miles.

The lease of the Cedar Rapids and Missouri River Railroad from Cedar Rapids to the Missouri River, of which 122 miles are in operation, is perpetual also, but the rent is only fixed for three years from the time of acceptance of the different portions of the road as they are from time to time constructed, and the lease provides for an equitable adjustment and division of earnings between the lessor and the lessee after the expiration of three years; such equitable division to be ascertained and established by proper and impartial arbitrators. This lease may, therefore, be fairly considered as desirable of itself, and is important as a feeder to this company's road from Chicago to Fulton, and also as a connecting link with the Union Pacific Railroad.

The entire distance of this line of road from Chicago to its junction with the Union Pacific Railroad at Omaha, on the west side of the Missouri River, will be less, it will be seen, when completed, than 500 miles; and all of which, except about 130 miles, as has been before stated, is already constructed and in operation.

While treating on this part of the Chicago and North Western Railway Company's line of road, it may be pertinent to add, that the Union Pacific Railroad, beginning at Omaha (the western terminus of this company's air line road,) and extending thence to and up the broad valley of the Platte River, over an almost perfect plain for some five or six hundred miles, to the extensive mineral deposits of Colorado, and thence through the gold and silver regions of Utah, Nevada and California to the Pacific coast, has already commenced the work of construction at Omaha; has near a hundred miles of road-bed, more or less, under process of grading, the first forty miles of which, from Omaha to the valley of the Platte, is far advanced toward completion; has about six miles of track already laid; has engines, cars, ties, bridge-timber and machinery on hand and accumulating; has iron rails on hand at Omaha for about fifty to sixty miles of track, and expects to complete one hundred miles, extending to the vicinity of the "Loup Fork," and a little beyond it, by the 1st June next, and to progress annually and more rapidly to Denver and beyond thereafter.

There would seem to be no good reason why this Union Pacific Railroad, aided by its large subsidy from Government, and its extensive grant of public lands, should not be extended well toward Denver about as soon as the road across Iowa, under lease to this company, can be extended to it.

The Central Pacific Railroad Company of California, (whose line of road extends from the navigable waters of the Pacific at the City of Sacramento, east, across the Sierra Nevada Mountains, to Virginia City, and beyond, until it meets the Union Pacific Railroad of the Atlantic slope,) in a recent report, announced the completion of their road to Clipper Gap, forty-four miles from Sacramento, and state that twelve miles more will be opened by the 15th of September, 1865, and that they expect to open a further section of twenty-two miles, to Dutch Flats, by the 1st of April next, sixty-eight miles from Sacramento, and by a year from this time they hope to complete to Crystal Lake, twenty miles further, and within fifteen miles of the summit of the Sierra Nevada Mountains.

They further propose to commence the construction of their road down the eastern slope of the Sierra Nevada before completing the heavy work near the mountain top; carting the iron rails past the unfinished portion, and thus expediting the extension of their road.

The President of the road states in his report, that the road may be extended to Salt Lake by the summer of 1868, and expresses the hope that he shall there meet the Pacific road from the Atlantic side of the mountains.

This company have extensive means besides the large Government subsidy which they receive for the prosecution of their work.

Should the progress of the Union Pacific Railroad on the eastern side equal that proposed for the western slope of the Rocky Mountains, the public would in a short period of time be agreeably surprised at the completion of the greatest and most important national work, both politically and financially, now before the country.

With the construction of this road through the extensive gold and silver regions of this country, which it is to traverse, will begin a new era of more intense and extended enterprise perhaps than any that has ever preceded it, and resulting in an annually increasing development and production of gold and silver, probably many times exceeding all that has, as yet, ever been produced; the effect of which upon the traffic and business of all Western roads, in connection with the Pacific road, will of itself be likely to be such as severely to test their capacity.

The buoyant effect of the increased production of coin to follow the completion of the Pacific road, will be likely also to give a spring of increased and extended action to the business transactions of the country, enlarging values and operations, and adding materially to the general prosperity of all undertakings.

Resuming the history and further description of the Galena and Chicago Union Railroad Company, we add, that previous to 1854 the said company

constructed and completed the branch road from Belvidere to Beloit, a distance of about twenty-one miles, calling it the Beloit Branch; and in the year 1854 they entered into a contract or lease with the Beloit and Madison Railroad Company, extending from Beloit to Madison, the capital of Wisconsin, a distance of forty-seven miles.

This company, although materially aided by the company, failed to complete its line, was sold out, re-organized and subsequently leased to the Galena Company in perpetuity, which, as its principal creditor, held a majority of its stock under the new organization.

A new first and only mortgage was made, after re-organization, and $400,000 of bonds were issued under it, to provide funds for the completion of the Beloit and Madison road, most of which bonds were guaranteed by the Galena Company, and with the proceeds of which, together with a stock subscription, the road was completed about September 1st, 1864, and was previously thereto operated by the Galena Company, so far as completed, and until the consolidation of June 2d, 1864, when its management and further completion came under the control and direction of this company.

At the time of consolidation aforesaid, the Galena Company held and owned all the stock of the Madison and Beloit Railroad Company except about $115,000, upon which it was bound to pay (if earned by the company, in accordance with the terms of the lease) a dividend of not exceeding six per cent. per annum.

The lease also bound the company to equip and maintain the road permanently. The $115,000 of stock of this road not owned by the Galena Company was distributed, generally in small amounts, along the line of the road, and among some two to three hundred stockholders.

This small interest, not exceeding nominally $115,000, held by others, made it necessary to maintain an efficient organization of the Beloit and Madison Company, and a separate set of accounts, at an expense and trouble approximating the sum of the limited six per cent. dividend upon all the stock not held by this company.

As the Galena Company held a majority of the stock, and had guaranteed nearly all the outstanding bonds of the Beloit and Madison Company, (which guarantee now rests upon this company as its successor,) it became desirable to retire this outstanding $115,000 of stock, to avoid further continuance of a separate organization and accounts.

With a view to effect this object, this company proposed to issue its preferred stock at par in exchange for the outstanding Beloit and Madison stock at eighty cents on the dollar. Nearly half of said outstanding stock has already been exchanged in this way, and it is desirable that the balance be thus exchanged.

The Galena Company, also, some time prior to 1857, became identified with the construction of the "Fox River Valley Railroad," and became unavoidably to some extent large holders of its bonds, and they also became the lessees of said road,

Subsequently said road was sold and re-organized, and the Galena Company became the owners of it, holding all its stock, and issuing their six per cent. bonds to the extent of $189,000 in payment of all claims of others against said road, leaving the road itself, at that time, free of all incumbrance, other than for its stock held by the Galena Company.

The name of this road, at the time of the re-organization, was changed to that of the "Elgin and State Line Railroad." It extends from Elgin, northerly, to Richmond, near the north line of the State of Illinois.

It is about 33 miles in length, and, by the consolidation of the Chicago and Northwestern Railway Company with the Galena Company, is now the property of, and is controlled and operated by this company.

The Galena and Chicago Union Railroad Company, also some years since purchased the entire rights and franchises of the St. Charles and Mississippi Air Line Railroad Company, including all its road and track then constructed, and its right of way and depot grounds, paying a large price for the same.

Only about nine miles of this road, from the south branch of the Chicago River to Harlem, on the Galena road, was ever constructed, and this the Galena used chiefly as a connecting track with other roads in the City of Chicago.

That part of this St. Charles and Mississippi Air Line Railroad, between the western limits of the City of Chicago and Harlem, has been removed by this company since its consolidation with the Galena, and a new track, commencing near the west line of the City of Chicago, at the present western terminus of this St. Charles road, and extending north parallel with, and a little west of and outside of the western limits of the city, to the main track of the Galena road, has been constructed, making a shorter and more convenient connection with other roads than formerly existed by way of Harlem; and when this connecting track shall be extended still further north to the track of the original Chicago and Northwestern Railway, now the "Wisconsin Division" of the present Chicago and Northwestern Railway, and to the track of the Chicago and Milwaukee Railway Company, it will form a very complete and desirable outside connection between all the railroads of the city.

This completes the history and description of the Galena and Chicago Union Railroad Company up to the time of its consolidation with the Chicago and Northwestern Railway Company, at which time the said Galena Company comprised the following lines and lengths of road, to wit:

1st. The original "Galena and Chicago" line, extending from Chicago, *via* Junction, Elgin, Belvidere and Rockford, to Freeport	121 miles.
2d. The Dixon Air Line, extending from the Junction, 30 miles west of Chicago, due west, through Geneva to Dixon, and to Fulton on the Mississippi River; and to the east end of the bridge over the Mississippi, near two miles below Fulton	108 "
3d. The Beloit Branch, from Belvidere to Beloit, about	21 "
4th. The St. Charles Air Line, extending, at the time of consolidation, from the South Branch of the Chicago River, in Chicago, to Harlem, about	9 "
5th. The Elgin and State Line Railroad, extending from Elgin north to Richmond, near the State Line of Wisconsin, about	33 "
Add the branch or arm from the old main line to Elgin, over	2 "
Making in all	294 miles.

The double track from Chicago to the Junction (30 miles) is only counted as 30 miles in the above statement, the second track not being taken into account.

In addition to the above 294 miles of road owned by the Galena and Chicago Union Railroad Company previous to its consolidation with this company, that company was, as has been hereinbefore stated, the perpetual lessee of the Chicago, Iowa and Nebraska R.R., about	82 miles.
Also, of the Cedar Rapids and Missouri River Railroad, of which there is now in operation	122 "
And said Galena Company was also perpetual lessee of the Beloit and Madison Railroad	47 "
Making a total of leased roads operated by the said Galena Company, equal to	251 miles.

Less, however, about 24 miles from Nevada to Boonesboro', which has been constructed and put in operation since the consolidation of June 24, 1864.

Total number of miles of road owned by the Galena Company at the time of consolidation	294 miles.
Total number of miles of leased roads operated by the Galena Company at the time of the consolidation	227 "
Add to this the extension of 24 miles of leased road from Nevada to Boonesboro', since consolidation	24 "
	545 miles.

Making a total of 545 miles of road contributed by the Galena and Chicago Union Railroad Company, as owner and lessee, to the Chicago and Northwestern Railway Company, without counting the second track, of 30 miles, from Chicago to the Junction.

For convenience in operation, the line of road from Clinton to Cedar Rapids and Boonesboro', is now designated as the "Iowa Division."

The line from Chicago, *via* Dixon to Fulton, and Clinton, and from the Junction, *via* Belvidere and Rockford, to Freeport, and the Elgin and State Line road, are designated as the "Galena Division."

And the Beloit Branch, from Belvidere to Beloit, and the leased road from Beloit to Madison, are now known as the "Madison Division" of the Chicago and Northwestern Railway Company.

And it may be as well to add here, that the main line of the old Northwestern Company, from Chicago to Green Bay, 242 miles, is now called the "Wisconsin Division," and the line from Kenosha to Rockford, 73 miles, is now called the "Kenosha Division," and the Peninsula Railroad of Michigan is now called the "Peninsula Division" of the present consolidated Chicago and Northwestern Railway Company.

(To be Continued.)

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st Oct., inclusive, during the years 1864 and 1865, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1864	920,100	13,026,000	8,930,700	1,837,100
1865	650,700	6,707,800	14,397,200	2,864,900
Dec.	269,400	6,613,200	*5,466,500	*1,027,800

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 1,533,040 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of Oct., in the years indicated:

Canal opened—	1863. May 1.	1864. April 30.	1865. May 1.
Flour, bbls	1,071,200	920,100	650,700
Wheat, bush	16,356,600	13,026,000	6,707,800
Corn, bush	20,813,500	8,930,700	14,397,400
Barley, bush	1,679,800	1,837,100	2,874,000
Oats, bush	7,905,100	8,872,900	8,071,300
Rye, bush	353,700	503,200	642,600
Malt, bush	.....	.....	444,900
Beef, bbls	10,000	6,850	8,503
Pork, bbls	228,390	56,500	15,050
Lard, lbs	3,501,500	561,500	1,278,100
Butter, lbs	1,891,300	404,800	386,400
Cheese, lbs	18,689,900	1,896,800	1,991,400
Wool, lbs	5,250,800	1,393,700	9,915,000
	253,200	1,101,700	527,600

Work has recently been commenced upon the track for another street railway, in avenue B. The line will convey passengers from Fulton ferry through New Bowery, East Broadway, Clinton street and avenue B to Fourteenth street. The railroad is the property of the Dry Dock Railroad Company, and the management propose having the cars running by the middle of December next, or the first of January next.

The foregoing is a correct statement of the public debt, as appears from the books, Treasurer's returns and requisitions in the department on the 31st of Oct., 1865.

HUGH McCULLOCH,
Secretary of the Treasury.

☞ We record with great satisfaction the following favorable statement with regard to the financial condition of the State of Pennsylvania: The debt was reduced some $800,000 during the last year, and a large sum is still available and applicable to its liquidation. In addition to this, the State has paid some $800,000 of military claims, $200,000 for transportation, $1,800,000 of direct tax, and $750,000 for militia called out under an order of the President. It is a most remarkable record that Pennsylvania, with all her generosity and immense expenditures to sustain the Government and defend herself, has less debt to-day than before the war.

Aggregate of debt bearing coin interest			$1,161,137,691 80	Coin interest	$67,670,340 50	

The Minnesota Valley Railroad.

The first locomotive and cars for the Minnesota Valley Railroad are now at La Crosse. This is the old Root River road and leaves the Mississippi river at La Crescent. It will be in operation some eighteen to twenty miles this winter. It penetrates a rich and productive region, and will add to the business of the St. Paul road very materially during the next winter.—*Milwaukie Wis.*

The National Debt.

The following is the detailed official statement of the public debt, just issued by Hon. HUGH McCULLOCH, Secretary of the Treasury:

FEDERAL AND STATE SECURITIES.

DESCRIPTION OF SECURITIES.	Amounts outstanding, Oct. 31, 1865.	Interest. Rate.	Interest. Periods.	WHEN DUE.	Market Price.

American Railroad Journal.

Saturday, November 11, 1865.

Stock Exchange and Money Market.

The report of the Secretary of the Treasury, as to the condition of the public indebtedness, reached us last week as we were going to press, and of course too late to permit us to make any comment upon it. It is, however, universally admitted to be of a most satisfactory character. In fact, each monthly statement grows better and better. It appears that the total debt has decreased since 30th September, $4,092,967 31, and $16,834,812, since 31st August last, and this would make the rate of decrease per annum, as it is even now going on, $101,008,872. The total of the annual interest is $138,938,079, of which $67,670,341 is payable in gold, and $71,267,788 in paper or lawful money in that form. By contraction and funding, the legal tender issues have been reduced about forty-four millions of dollars, leaving instead of $678,126,940 in circulation $633,709,581, the reduction having been made at the rate of ten millions per week and upwards for the previous four weeks. If this reduction was possible of continuance, it would take but a little more than a year to retire the whole Government currency.

We have not thus far seen that this contraction has done any harm to the Government or people. It has not even affected by sympathy or relation the price of gold, or of the necessaries of life. On the contrary, the former has actually advanced in the face of the contraction, which was about 13 per cent. of the whole amount afloat, and which according to the accepted theories, should have caused something of a corresponding decline in the premium. The other interesting facts in the Secretary's statement are as follows: The currency interest has decreased four millions in the temporary 5 per cent. loan, twelve millions in the temporary 6 per cent., seven millions in the certificates of indebtedness, and forty-four millions on the compound interest notes; this last, the effect of the late funding operation.

Against all these important and decisive advantages, we have to offset the addition of $1,400,000 of interest to be added to the annual public charge, which is, however, more than equalized and compensated for by the gains and reductions already stated.

Steady reductions are also being made by the various departments; and we give great credit to the Secretary of the Navy for having set an example of retrenchment, which we hope will be imitated by his colleagues. The annual expenditure of the Navy is now on the basis of but $30,000,000, instead of $139,000,000 as it was a year ago. The probable reduction by the War department will probably be equally satisfactory; and we expect its financial wants will be lessened by the reduction of the army to a very great extent; while its immediate resources from the sale of vast quantities of property no longer wanted or available, will be increased. As an example, it is stated on good authority, that it has sold of its railway material, cars, locomotives, &c., upwards of two hundred millions of dollars, which turned over to the Treasury will be an important aid. A curious circumstance connected with this is, that the purchasers of this rolling stock have been principally Southern railway companies, who have been liberally dealt with on short credits; and this very property has brought the Government, on an average full 20 per cent. more than it cost it. We consider this a mark of excellent management on the part of the Government agents who have had the business in charge.

The question of when and how the resumption of specie payments is to take place, is yet warmly discussed. The very best and ablest arguments in favor of delaying it, which we have seen, are to be found in a late number of the Cincinnati *Gazette*, always an ably conducted journal. Yet they fail to convince us.

It is contended, if we return to a specie standard, that while we shall have to pay just as much of taxes as before, we shall have less money to do it with, and this will lead to the embarrassment not only of the tax payers, but the Govern-

ment itself. This is the strongest argument put forth, and the only one which requires consideration. Instead of paying a dollar of tax with 60 or 70 cents, we shall have in fact to pay it in a dollar of gold or silver.

But against the inconvenience and loss, we are justly entitled to make a set off; viz: that we shall be better able to pay this, because we shall save from 1 to near 300 per cent. on articles indispensable to our comfort, if not existence. And all incomes, wages, &c., paid in redeemable currency at the specie standard, will be three times better able to meet taxation than now.

Those only who can possibly suffer are speculators, or persons incurring large debts, and making large contracts in paper, which they will have to pay hereafter in specie. We see no reason why such persons should be protected at the cost of all others. Prudence dictates that such transactions should not be encouraged. Those who make them will be, and are the authors of their own misfortune. If in their anxiety to make great and rapid fortunes at the expense of the consumers, and by making them pay three or four times as much as the purchased article ever was worth, or is really worth now, they prefer the reign of inflation and irredeemable paper, they are operating on a false, unfair, nay an iniquitous basis; and we shall have no pity for them if they break down in the attempt. The enormous gains now made in various kinds of business are in defiance of sound, commercial and financial principles, nay more, of sound morals.

Our first wish is to have the National credit placed on an impregnable basis; and this is that of paying what it has pledged itself to do. When the banks of the country can no longer plead the example of the Government for the non-performance of their promises to pay, but shall be compelled in return for the valuable privileges they enjoy, and out of which they are now coining money on a large scale, we shall then have a sound currency, stability and substantial wealth, instead of being subject to the whims of speculation and the vicissitudes of the hour. And with the contraction of the currency, what is left in circulation, of which there will always be enough, will be proportionably increased in power, a fact which seems to escape attention.

We may liken this to the case of the celebrated Books of the Sibylls. When a Roman King offered to purchase the nine volumes of these prophecies, the price deterred him from making the purchase. When he returned, for the purpose of obtaining them, he found that three of them had been destroyed, but the price demanded was the same. Returning a second time, he found three more had been destroyed and yet as much value was set on the remainder as on the original number, and at this valuation he then took them. So of paper money, the less in quantity, the more valuable it becomes. When it is at par with gold it is gold. At present, it is at some considerable distance from that equality; and if in the ordinary transactions of life, men should be as regardless of their promises as are the banks, if everyman now could sign a note and by law force others to take it, whether it was ever to be paid or not, we imagine we should see a social uproar of a very marked character, with very bad results all round. Why such tenderness should be shown to these institutions to the material injury of the people at large, so as to exempt them from their solemn contracts, and yet hold every body else to theirs, indicates a paralysis in the morals and sensibilities of the nation. We shall never come again to specie payments and honesty of dealing until we reason correctly on this subject. And in the meantime, the industry of the country and the labor of the country must submit to be pressed down by the prices of the necessaries of life which are ranging from 2 to 300 per cent. above their real value. Worse than this, we aver of our own knowledge that some articles required in all households, and of very great necessity, manufactured of a metal that has not diminished in quantity, which when our currency was at par brought but $18 per hundred, are now held and sold at $132 the same quantity, and people have to pay the price. There are hundreds of such instances. *Ex uno disce omnes.* It seems to us as we think of all this, that it is almost a crime to advocate the continuance of a system which is producing this state of things.

Our stock market has again witnessed one of its peculiar disturbances, a corner, out of which quite a number of persons have withdrawn with considerable difficulty, and pretty extensive losses. The Milwaukee and Prairie du Chien Railway has for some years been in a difficult position, with a small capital, half as much more bonded debt, very fair earnings but no dividends, and just in such a position as to tempt speculation to look upon it with wishful eyes. Its history has been an exciting one. Its quotations have been so low as to make the purchase of its shares an easy job, if a combination could be formed that would not cheat each other, or some great capitalist, was able to carry a few millions without feeling the weight. That time arrived a few days since. The stock was secured, and then all the contracts taken to deliver that could be obtained. There being no stock to deliver, the sellers found the nominal price rising rapidly up to 225, when its usual quotation had been about 68. Of course there was but one course left for the parties thus caught; viz., to pay, compromise or break. Already enormous sums have been lost and won. The players at this game are but repeating the scenes which have frequently before this, made men rich or poor in a few hours. While for these professional gamblers in stock we have not the least sympathy, we would take this occasion to warn our readers against staking a single dollar against players, where the dice are loaded and in their hands.

Railway shares generally are improving, and in some of them occur large transactions. The foreign news, of no great importance to us if we look at it understandingly, was used to bear the market, but the demand was too great, too general to stop the tendency to a rise. So animated was the demand that on Tuesday, Government gold bearing stocks were dull and scarcely noticed. State bonds, however, were steady and some of the Western, as Tennessee and Missouri, improving.

The 5-20's, though declined in London at the last dates to 64, stood at 70 and 71 at some points on the continent. Mr. Lanier's explanation of their real and permanent value to the holders there, seems to have exercised a just influence. We repeat, that if the New York speculators want to make money, all they have to do, is to run up these 5-20s to 15, 20 or 30 here in Wall street, and the price will rise abroad to the same level beyond all question. The tone of the New York market in this particular now gives the tone abroad.

The export of cotton the past few days continues on a large scale; for the week ending Tuesday, the 7th, about 17,000 bales were shipped from this port to Europe, and the direct clearances from New Orleans and Mobile are on the increase. This is a very favorable condition of affairs. If the foreign dealers will not take our cereals or provisions, they cannot refuse our cotton.

A private letter from Washington informs us that the Secretary of the Treasury has begun the preparation of his annual report, and is giving it his entire attention.

Exchange is dull, and the ordinary bills on remitted produce are sold below par. Money is quite easy.

We notice the following arrivals of specie the last week at this port, from Vera Cruz $9,000; Nassau $1,800; and Port au Prince $35,000.

The exports from this port for the week ending November 7th exclusive of specie, were $6,127,156.

The balance in the Sub-Treasury on Tuesday was $56,845,571 27.

The receipts from Internal revenue during the month of October amounted to $30,457,285, and the total since July 1, is $124,178,408.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Satterlee & Co.

This house, doing a large business as bankers and brokers, besides being engaged in the ordinary transactions incident to such a house, have some specialities of their own. Three members of the house belong to the regular stock board, two belong to the Gold Exchange, and three to the Petroleum and Mining Exchange, of which Mr. L. Satterlee is President. They also publish gratuitously a monthly circular which has already reached the 243d number. The house claims to have peculiar advantages and great stability, having passed unharmed through all the revulsions of the Money Market. They obtain the best prices for their customers, audit and settle accounts for country merchants, look after their sales, balances and city business, pay interest on average deposits, procure agencies for cotton dealers and manufacturers, and have established a new and convenient place of business at 70 Broadway, running through to 15 New street, with entrances on both streets.

Branch of the Pana Railroad.

A meeting has very recently been held at White Plains, Sangamon Co., Illinois, at which it was unanimously resolved to raise $20,000 to stock the Springfield and Beardstown Branch of the Pana Railroad. The sum of $75,000 is expected to be raised in the county, to secure the object, which is to have a road through it from north to west reaching the Illinois River, which is expected to increase largely its business and wealth. The funds are to be raised on bonds payable in 20 years.

Central Ohio Railroad.

At a meeting of the stockholders of this road held at Zanesville, Ohio, last week, the rights and franchises of the old organization were conveyed to the new, by a vote representing over two-thirds of the stock of the old organization. Hon. H. J. Jewett was re-elected President, and Messrs. John King, Jr., Walter B. Brooks, Joseph H. Riemen, Joseph W. Jenkins and James Harvey, of Baltimore, are among those chosen as the Board of Directors.

☞ The Vermont Legislature has passed an act, ratifying the decree of the chancellor authorizing the managers and receivers of the Vermont Central and Vermont and Canada railroads to borrow $700,000 on ten years 8 per cent bonds. The property and income of the roads are to be pledged as security for the bonds.

Interest and Dividends.

The Pennsylvania Railroad Company have declared its usual semi-annual dividend of 5 per cent., clear of taxes, payable on the 30th instant.

The Northern Central Railway Company has declared a dividend of 2 per cent., clear of National and State taxes, for the quarter ending September 30th, payable on the 25th inst.

The Sandusky, Dayton and Cincinnati Railroad, preferred stock, (formerly Mad River and Lake Erie,) has declared a semi-annual dividend of 8 per cent., $1.50 per share, payable on demand.

Titusville and Union Railroad.

The building of the Titusville and Union Railroad has become a certainty. Arrangements are now completed so that the various interests are to be consolidated, and a [third rail] road will be built from Union to Titusville and thence to Pithole City, and the broad gauge rail will be added to the Philadelphia and Erie road from Union Mills to Erie, thus bringing all those interests to Erie and forming an outlet for the oil country to all parts of the country. The work is to be under contract immediately, and to be completed within one hundred days.

The Cleveland and Erie Railroad Company have resolved to relay their Twelfth street track, and connect their road directly with the Anthracite Coal and Iron Company's Road and the harbor of Erie.—*Erie City Dis. Oct.* 28

Oswego and Rome Railroad.

The last rail on this road was laid in Oswego on the 8th inst. It is the intention to run passenger trains in two or three weeks.

Labor.

While we are surprised at the large and sudden aggregation of capital going on around us, and concentrating in the hands of particular classes, we must not forget the respect which is due to labor, the real foundation of all permanent wealth, and how it may be encouraged and sustained. In this country especially, where its success has been owing to its unceasing industry, carefully and honorably applied, if there is one interest more than other which should be cherished it is that of labor.

An English writer philosophizing on the subject, says "A laborer cannot have too many wants." He should desire "good food, good clothing, a cleanly and comfortable house, and education for his children."

The man who fixes his eyes on these objects has certainly the best motives to induce him to apply himself. We rejoice to say that, however short of this success the British laborer has fallen in this country, no industrious and honest man can fail to realize his hopes. The wages of labor have always been remunerative in the United States, and to this fact we owe the immense immigration we have witnessed during the last half century. "Happy is the country," says the same authority, "in which the natural price of labor is highest." That eulogium is justly ours.

At present, however, labor is seriously affected by the price of commodities. If the necessaries of life are cheap, even low money wages will maintain the laborer in comfort; if they become dearer, we quote again from the same authority, "he will not improve his condition, but remain where he was." Now we fear this is our present case, for though wages, owing to our inflated currency are nominally higher than ever, yet the prices of the necessaries of life are in the same exaggerated proportion. And worse than this,

capitalists for the same cause are indisposed to enlarge their operations for the employment of labor, in permanent investments connected with the soil; for the more they expend at high prices, the greater will be their loss on a return to a metallic and universal standard. The late war furnished for a time counteracting effects to those of the currency to a very considerable extent. Large bodies of men entered the army and navy for the sake of bettering their condition by the attainment of large bounties and good pay, clothing and personal support. But that inducement has ceased with the war, and we have now a large body of men unemployed who have not settled down into their former or any regular employment, and possibly never will. So that everywhere we hear the most urgent appeals to the Government, and its officials who have any patronage for salaried employment. This state of things is working against production, and we may yet find it telling against our rapid increase in wealth and resources as in former years. It was this consideration which induced us at the close of the war to suggest that large bodies of our disbanded soldiers, with their own consent and with adequate remuneration in land and money, should be forthwith employed in the immediate and rapid construction of the Union Pacific Railroad, by whom the work might be pushed at once to an early completion, and the country through which it is to pass become rapidly settled and populated.

If legislation is not too late to accomplish this end, we might hope that Congress would authorize the company which is so skillfully working on the Grand Trunk, to employ under suitable restrictions as many laborers as they could place along the whole line, and issue the bonds already promised on the sections of lines when finished, *in proportion to the numbers of laborers employed.* This proportion could be adjusted with perfect accuracy and would secure the early completion of this important work, which in our judgment is to effect greater changes in our trade and prosperity than any other of American origin.

There are many curious problems in regard to labor and wages which have attracted the attention of the best minds, so also the principles affecting wages, their rise and fall, the supply and demand, and those also which operate on men's minds in the choice of their pursuits. Again the natural price and the market price has been thoughtfully discussed and examined. These have a direct bearing on population and production and are full of results, which the political economist cannot overlook. In this country as we have already stated, we have hitherto been on the right side. Labor has been honorable and prosperous, and we cannot estimate its importance too highly. There has nevertheless been a marked desire shown by too many Americans, to seek pursuits which are those of the brain rather than the hands. Thus we see the learned professions everywhere sought with avidity, often without the necessary and indispensable qualifications.

On the other hand, it is a remarkable fact that those persons who have not shunned labor, especially agricultural or mechanical, have not fallen behind in the role of life. Everywhere we see them rising to the highest distinctions due their strength of character, their independence of false standards, and their industry. At this moment we have at the head of the nation a man whom we esteem and admire, and all Europe now acknowledges to be "a statesman," (we quote the words from a leading English journal hitherto the reverse of friendly,) who for years maintained himself by the humblest and most unpretending labor. And this is what we recommend, labor first; honor and distinction are sure to follow its honest success.

Catawissa Railroad.

The directors of the Catawissa Railroad, on Friday last, conferred the lease of that road to the Atlantic and Great Western Railroad. for the consideration of $365,000, instead of $320,000 per annum as previously announced. On Monday next, the lease will be presented to the consideration of the stockholders. The contract bears date November 1, 1865, and is signed by the proper officers. Possession of the road is to be given on December 1, 1865, and the term of the lease is 999 years. The lessees furnish all motive and other power, cars, &c., and run the road at their own expense, giving the Catawissa $1,000 per day, which is over 8 per cent. on the preferred stock, and 35 per cent. arrearages due, as well as 8 per cent. on the common stock.—*Philadelphia Press.*

Railroad Earnings--Monthly.

The following is a statement of the business done by the Illinois Central Railroad for the month of October, 1865:

LAND DEPARTMENT.

Acres Construction Lands Sold	7,288.06 for	$85,075 01
Acres Int. Fund Lands sold	302.84 for	4,766 25
Acres Free Lands sold	1,543.68 for	19,689 42
Total sales during month of Oct., 1865	9,134.58 for	$108,530 68
To which add Town Lot Sales		1,384 98
Total of all	9,134.58 for	$109,915 66
Cash collected in October		$209,625 38

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$229,029 05
do.	Freight	372,461 51
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	10,000 00
Total Receipts in month of Oct., 1865		$621,848 89
Total Receipts in month of Oct., 1864		661,390 96

The earnings of the Chicago and Northwestern Railroad in Oct., 1865, were $921,886 06
Same period last year 729,759 13

Increase $192,126 93

The earnings of the Michigan Central Railroad for the month of Oct, 1865, were $490,693 94
Corresponding month of previous year 410,802 08

Increase $79,891 86

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of October, 1865, were $521,636 00
Corresponding month of previous year 407,107 00

Increase $114,529 00

The earnings of the Marietta and Cincinnati Railroad for the month of Oct., 1865. $117,604 30
Corresponding month of previous year 93,545 83

Increase $24,058 47

The earnings of the Chicago and Alton Railroad for Oct., 1865, were $355,075 00
Sept., 1864 320,879 00

Increase $34,196 00

Railroad Earnings.--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 4th week in Oct., 1865, were:

	1865.	1864.
Passengers	$18,777 65	$13,626 99
Freight	19,716 40	13,854 02
Mail, express & telegraph	1,538 45	1,219 37
Total	$40,032 50	$28,600 38
Total for the fiscal year commencing Jan. 1.	$1,029,919 58	$774,934 35

The traffic of the Great Western Railway for the week ending Nov. 3, 1865, was as follows:

Passengers	$37,272 84
Freight and live stock	40,537 29
Mails and sundries	3,041 75
Total	$80,851 88
Corresponding week of 1864	59,167 39
Increase	$21,684 48

The earnings of the Chicago and Alton Railroad for the 4th week in Oct., 1865. $85,753 00
Corresponding week of previous year 77,643 00

Increase $8,110 00

The earnings of the Grand Trunk Railway for the week ending Oct. 28th, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$56,458 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	86,899 00
Total	$147,393 00
Corresponding week, 1864	117,042 00
Increase	$30,351 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Oct. 31, were:

	1865.	1864.
Passengers	$4,503 88	$4,095 30
Freight	19,381 82	16,062 56
Express	273 22	104 16
Mail	296 58	296 58
Total	$24,455 50	$20,558 60

Receipts from January 1 to Oct. 31:

1865	$589,783 59
1864	485,941 39
Increase	$103,842 20

Railroads in Tennessee.

The following is an extract from the Message of the Governor, recently delivered to the Legislature:

The financial condition of the State demands the early and prompt attention of the General Assembly. While I have every confidence in the ability of the great State of Tennessee to meet her liabilities, and of the disposition of her people to have them met, action on your part—prompt and intelligent action—is called for. The condition of our finances will appear from the reports of the Comptroller and Treasurer, which give the details. The State debt now due and to be provided for at once, as reported by the Comptroller, is $1,213,719 66. This amount of money must be raised, and the credit of the State sustained. How this sum is to be raised I leave it to your wisdom to determine.

The Comptroller's report will further disclose to you that there is now due on the railroad bonds loaned to the different railroad companies in the State, $3,769,509. This is the interest now due upon the bonds indorsed by the State for the railroad companies, amounting to $16,211,000. For this debt the State is ultimately liable upon the failure of the companies. But these companies are able to pay their interest debts, and should be required to do so at once. They can as well ex-

tend their credit to meet their pressing liabilities as for the State to do so for their benefit, with her already heavy obligations weighing upon her.

Most of the railroads in the State having been turned over to the companies respectively owning them, are being repaired and run by said companies. They have been turned over by the Government on terms liberal and advantageous. The road from this city to Chattanooga, and from that city to the Virginia line, a distance of four hundred miles, owned by three companies, is, as a general thing, in splendid order; much of the track has been relaid, the embankments well dressed, and the cuts well ditched and drained. The best bridge near the Virginia line is nearly finished and the connection with the East complete. Upon the roads in Middle and West Tennessee repairs are progressing rapidly, and the indications are that the companies have a profitable business before them, as there is a large amount of travel and a large demand for freight as the country becomes quiet and business is resumed. As a general thing I may say these companies have reorganized upon a loyal basis and are controlled by Union men. Especially is this true of East Tennessee. The Edgefield and Kentucky, and the Louisville, Clarksville and Memphis roads have been placed in the hands of receivers as the law directs. They are in the hands of reliable and energetic men, and I have all confidence that they will be managed to advantage.

Since the above, the Governor has sent a special Message to the Legislature in reference to the railroads of the State, in which he says:

In my late message I advised that the railroad companies of the State be required to pay their interest on debts due upon bonds issued and indorsed for their benefit. I further advised you that there is now due on railroad bonds loaned to the different railroad companies in the State $3,769,509. This is the interest now due upon the bonds indorsed by the State for the railroad companies, amounting to $16,211,000. This is a subject of vital importance to the people of the State, and since the issuance of my message I have given it much consideration, and have availed myself of the best sources of information.

I am now satisfied that it will be utterly impossible for most of the companies to pay the interest on the endorsed bonds of the State, and the roads will pass into the hands of receivers unless the State provides for the payment of the interest now due. In a word, if the payment of this interest is not provided for, nearly every road in the State will go under. The first effect of this will be to sweep from the thousands of stockholders all they have expended in building these roads. Should the State attempt to run them there will be extravagance, waste, swindling and general corruption, and the State will have to issue several millions of bonds in that event, or tax the people beyond endurance to raise the money to meet this interest and to put these roads in order. If the State should sell these roads they would be purchased by a combination of speculators from abroad, who will manage them for their own benefit, without any regard for the honest and public spirited people who built them.

They would sell for less than half their real value, and finally leave the State to pay the bonds, or a larger part of them, which result is the most that can happen to the State if the roads are left in the hands of the companies.

What then is the policy to adopt, and how shall the State meet the issue?

I respectfully suggest that the State issue three or four millions more of bonds, to run six, seven, eight and ten years, the first payment of the interest to commence in July next. Let them be given in payment of interests now due, upon condition that they are taken at par. If the Legislature shall think proper, let them be sold on similar conditions and the proceeds applied to the payment of the interest on all outstanding bonds, and let there be a further lien in favor of the State on each road for the sum paid for its benefit.

The first effect of this will be to bring the bonds of the State up to par value immediately, and to place the credit and integrity of the State above suspicion. Our people are honest, and will submit to taxation almost beyond endurance rather than be disgraced by the brand of repudiation. The second effect, however, would be to relieve the people of the heavy taxation now imposed on them, and hereafter to be imposed on them, to meet the interest for which the State is liable. In the future, when the people recover from the devastations of war, they can pay two dollars easier than they can one at present. The third effect will be to save the railroads to the stockholders.

They can and will meet the current interest as it arises, but they cannot meet it and the back interest. They can also, in the end, pay off the bonds as they mature, or beforehand, by setting apart so much of a sinking fund with which to buy in their bonds. Finally, it will save the State from all appearance of repudiation. For if the State now refuses to pay the interest due upon her bonds, which have been indorsed by her, and sold upon her credit, it will be called repudiation, let her motives be what they may. The credit of the State will be gone, and gone forever, and this must not be allowed. Let us maintain our credit, honor and integrity at all hazards.

While upon the subject of railroads, allow me to say that a law should at once be enacted, providing for the punishment of any and all parties conducting railroads in this State, enjoying the credit of the State, who are discriminating in freights so as to favor the cities of other States, to the prejudice and injury of the large towns of our State. Such abuses should be met by prompt legislation.

There is, in the future, a wonderful prosperity before us, when our people and roads can pay off the State debt, with scarcely an effort, provided we have the necessary legislation now, in this their hour of need. Give the roads time, aid them now, and in the end the State will not lose a dollar. These are not only my views, but the views of every intelligent man with whom I have conversed.

Use of Peat for Fuel.

A trial of peat as fuel was recently made on the Charlotte Branch of the New York Central Railroad. Engine 205 was fired up a little after noon, run down to the depot and used to make up the lake train, and at three o'clock started for Charlotte. The run to Charlotte and back with the regular train was made on time with no difficulty, a strong and even head of steam being kept up. Mr. David Upton, the master mechanic of this division, acted as engineer on this occasion, and expressed himself quite satisfied with the result of the experiment. The peat used in this trial was from the extensive bed near Albion, opened the present season. The amount consumed was not definitely ascertained, but it was perhaps a little more than half a ton.—*Rochester Union.*

☞ The receipts into the Maryland State Treasury from the capitation tax on the Washington Branch of the Baltimore and Ohio Railroad during the fiscal year ending September 30, 1865, were $218,934 32. This is over $30,000 in excess of any previous year. Since the close of the fiscal year Mr. Garrett has also paid $253,208 06 additional, on account of said capitation tax, making the entire receipts into the Treasury from this source since September 30, 1864, $472,142 98. The finances of the State would exhibit a highly favorable condition, were it not for the heavy drafts upon the Comptroller for the payment of bounties to soldiers. The amount already paid out is about three millions of dollars, and it is estimated that one million dollars additional will be required to pay existing bounty claims.

Baraboo Valley Railroad.

Alexander Mitchell, President of the Milwaukee and St. Paul Railway Company, writes to Gen. A. W. Starks, that the company is now in a condition to consider the construction of a Railway to Baraboo, and will do so, either from a point five miles west of Portage City, or from Sun Prairie *via* Merrimack. We are familiar with that region, and feel sure that a road to the Baraboo Valley will *pay.*—*Mil. Wis.*

St. Paul and Pacific Railroad.

We understand from the officers of this company that instructions have been received from New York to place at once the grading of forty miles of the line west of Minneapolis under contract. That portion of the line between Minneapolis and Wayzata, a distance of fourteen miles and a half, has already been let to responsible parties, who are bound by their contract to finish the road bed ready for the iron, by or before June 1st, 1866. A large party of engineers are now locating the line between Wayzata and the crossing of Crow river. Six miles of this work will be ready to let early next week, and will at once be placed under contract. The contractors already have a large force at work, and it is the intention of the company to have the work pushed on with all possible despatch. The iron for twenty miles of track will be in St. Paul immediately after the opening of navigation next spring, and will be at once laid down and the road placed in operation to Lake Minnetonka early next summer.—*St. Paul Pioneer.*

☞ The building of a railroad along the Mediterranean coast has been interrupted in the passage of the line through the principality of Monaco, in consequence of the exorbitant pretensions of the prince, who demands an indemnity of eight million francs for a strip of about two and a half miles of land. The company is now making surveys to see whether by means of a tunnel the territory of Monaco cannot be avoided.

☞ We learn that the Lehigh Coal and Navigation Company have let the construction of their new railroad bridge across the Lehigh, at this place, to Messrs. Reilly & McGran. The bridge will extend from the foot of Fourth street diagonally across the Lehigh to a point near the red house, on the other side, and will run about six feet above the iron work of the county bridge. The work will be commenced immediately. The bridge across the Lehigh, at Bethlehem, which is to connect the new road with the North Pennsylvania Railroad, which is being built by Messrs. Cortright & Butz, is being pushed forward with vigor. —*Easton Sentinel, Nov.* 2.

☞ The sale of the Clinton Line Extension Railroad, from Hudson to Tiffin, O., took place at Cleveland on the 4th inst. This was one of the great railroad schemes of some years ago, that collapsed in the financial crisis of 1857. Considsiderable work was done on the road before its failure.

☞ The revenue of the Government from all sources (including customs) during the first quarter (ending September 30,) of the current fiscal year, amounted $148,000,000, equal to a yearly aggregate of $592,000,000.

☞ The total yield of gold in Nova Scotia for the financial year ending September 30, 1865, was 24,907 oz. 05 dwts. 22 qrs. The yield for the previous year was 18,744 oz. 02 dwts. 12 qrs.

☞ Mr. William F. Grinnell, of the firm of Grinnell & Nevers, has been admitted a member of the New York Stock Exchange.

☞ Canada has 2,410 miles of railroad in operation, costing, with equipments, $106,036,908.

☞ The firm of Stimson, Fronk & Co., is dissolved, Mr. Fronk retiring, after a successful connection with the house, and leaving the affairs of the old firm to be closed by the remaining partners, who will continue the business under the style of H. C. Stimson & Co.

☞ Track laying is now going on in the Western Pacific Railroad from San Jose towards Stockton, in California.

ROLLED SEAMLESS BRASS TUBES.

For Locomotives, Steam Boilers, Sugar Pans, Feed Pipes, &c., &c. These Tubes are made tapering or perfect bore, the latter of most accurate gauge, answering for Oil Wells and all other kinds of Pumps. They can be bent into any shape required without fear of splitting.

Manufactured by the

Solid Emery Vulcanite.

WE are now manufacturing wheels of this remarkable substance for cutting, grinding and polishing metals, that will outwear hundreds of the kind commonly used, and will do a much greater amount of work in the same time, and more efficiently. All interested can see them in operation at our warehouse, or circulars describing them will be furnished by mail.

NEW YORK BELTING AND PACKING Co.,

Nos. 37 and 38 Park Row, New York.

MACHINE BELTING,

STEAM PACKING, ENGINE HOSE.

THE superiority of these articles, manufactured of vulcanized rubber, is established. Every belt will be warranted superior to leather, at one-third less price. The Steam Packing is made in every variety, and warranted to stand 300 degs. of heat. The Hose never needs oiling, and is warranted to stand any required pressure; together with all varieties of rubber adapted to mechanical purposes. Directions, prices, &c., can be obtained by mail or otherwise at our warehouse.

NEW YORK BELTING AND PACKING CO.,

JOHN H. CHEEVER, Treasurer,

Withdrawal of Legal Tenders without the Necessity of Funding.—First Step towards Resumption of Specie Payments.

The necessity of a return to specie payments is admitted on all hands to be clear and undeniable. No permanent prosperity can be expected in this country, in its financial or commercial transactions until we return to the universal standard of nations, and have as good money in circulation as they have and of the same established value.

A country that expects to trade with a specie paying foreign nation, with paper as its only currency will have about as good a chance of fair play, as an African tribe that circulates cowries for money, would have in attempting to exchange them for sovereigns. The difficulty that occurs is not with the proposition to resume specie payments but when and how. And the subject already has drawn out the ablest theorists and the most practical men to the discussion of the subject.

Certainly these writers should be encouraged to express their opinions, for we have yet no policy as declared to be that of the Treasury Department, and there is no knowing what views Congress may take of the matter. We therefore place before our readers a communication on the subject, of a very novel and original character, which proposes to get rid of our legal tenders without the necessity of funding or taxation, and which it seems to effect without injustice to any one. But our readers will examine it for themselves.

For the Railroad Journal.

PLAN TO WITHDRAW THE LEGAL TENDERS WITHOUT FUNDING.

The Secretary of the Treasury has had placed before him, a proposition for the withdrawal of the legal tender currency from circulation, without the necessity of funding a single dollar of it, thus effecting a return to specie payments, and the saving of twenty five millions of annual interest to the nation by the operation.

The Southern States will require a large number of new banks, and it will be impossible to refuse them a fair share under the National System. It is proposed that by suitable legislation of Congress the deposit to be made for the security of their issues, shall be instead of Government bonds, *greenbacks* to the required amount, these to be sealed up and held as such security by the Treasury Department. By this process about two hundred millions of currency will be withdrawn. This will be no injury to these institutions, for it is the same thing to them whether they buy bonds in the market as they would have now to do, or pay the price of them directly into the Treasury.

The plan embraces another operation. To require also by act of Congress that all the National Banks now in operation, having their issues secured by Government bonds, to pay into the Treasury the amount thereof in greenbacks, and receive back their bonds to do what they please with them. Their issues at present are about $200,000,000. The legal tenders so exchanged for the bonds, to be sealed up and held by the Treasury also. In this way the whole or nearly the whole of the Government currency may be withdrawn from circulation, and if deemed best, at stated periods of 3, 6, 9, and 12 months, so as to make the change a gradual and convenient one. In this way the currency can be retired without funding or creating an additional debt bearing interest.

The effect on the holders of these Bonds is expected to be advantageous to them; for now under the possibility of the issue of 3 or 400 millions of new bonds to fund the outstanding legal tenders, their price is affected in the market and a decline will follow, here and in Europe. On the contrary, if the legal tenders are disposed of in the way proposed, no more bonds need be issued, and the price will be greatly enhanced. Thus the Banks paying legal tenders into the treasury, and receiving back their bonds will have the benefit of a rise expected to be very considerable.

The National Banks will then have the entire circulation of the country to themselves, with the benefits they now enjoy by act of congress, and will also be compelled to maintain their issues at par.

In case any institution fails, then the Government can issue bonds at a low rate of interest to the extent of the greenbacks, deposited with it by the defaulting institution. But the probabilities are held to be that the Government being no longer a competitor for the circulation, these Banks will have great prosperity, and even if their circulation should extend under the new arrangement to five hundred millions, the amount of paper per capita of the population would be about $17 per head only, much less than it is now and yet sufficient for all the wants of a sound business.

This brief statement gives an idea of the proposed plan, which is ingenious to say the least of it.

***

This plan is met with the following objection by an eminent financier, to whom we understand it has been submitted:

"That if the banks were compelled to make such a deposit, they would gain nothing by their circulation, and of course would cease to circulate notes, unless the Government should pay interest on the greenbacks, in which event it would not be a gainer by the operation. A Bank of course would gain nothing by depositing one dollar of currency to obtain another. It is considered a sufficient hardship by the Banks that they are compelled to deposit interest bearing bonds to an amount by 10 per cent. beyond the notes which they receive."

With all due deference to the source from which this objection comes, we do not see it as a valid one. The Banks do receive on the bonds to be returned to them interest in gold, and as long as they hold them they will continue to receive it. Their capital, or means, or circulation would not be diminished one cent by the operation. On the contrary they would have the control of 10 per cent. of those bonds of which they are now deprived by the Government.

The deposit of greenbacks instead of bonds would give them the right to issue as many, or rather more notes than they are now permitted to issue. Then again the rise in the value of these bonds would be large, just as soon as it was evident no more funding of Government notes was to take place.

The only objection of force we can imagine is this, and it is a plausible one. That the Banks in depositing greenbacks instead of bonds, will lose the interest on the deposit. But it must be remembered on the other hand, that they can issue their own notes therefor and lend them at 7 per cent. to the full amount of the deposit; next that they can dispose of the returned bonds, and employ the proceeds as capital, and also which is conclusive, as the Government by the transaction becomes the *guarantor* of their circulation, and is no *longer a borrower*, there is no good reason why it should pay interest to the Banks for holding sufficient indemnity from them to pay their bill holders. Banks practically or theoretically hold specie enough to redeem their circulation, but no one pays them interest on it.

The whole argument may therefore be put in a nut shell. The Government may very properly require indemnity from the National Banks against the issue of their bills, and not using, borrowing or employing it, but merely holding it unemployed, cannot justly be required to pay interest upon it. On the contrary the Banks having the right to issue their own notes to a corresponding amount, would not be subjected to any actual loss from the non-use of the indemnity so deposited.

On the whole then we consider the plan the best which has yet been proposed.

Lexington and Big Sandy Railroad.

It cannot be long before the city of Louisville shall ply its influence in favor of the completion of the Lexington and Big Sandy Railroad; so that, simultaneously with the completion of the Virginia Central line *via* Covington and Charleston to the Ohio River at or near the mouth of the Big Sandy, there may be opened east from the Ohio River at Louisville, *via* Lexington, Charleston, Staunton, to Washington and the East, a continuous unbroken route, just as there is from the Ohio River at Cincinnati a continuous unbrokon route *via* Marietta, Parkersburg, Cumberland, to Baltimore and points east.

The completion of a railroad from Lexington to the Big Sandy, there to intersect the Virginia Central line extended to the Ohio River, would also open to Louisville a connection east with the new railroad which it is certain will be built from Charleston, on the Big Kanawha, on a route about midway between the Ohio River and the Allegheny Mountains, across the central counties of West Virginia, to the Baltimore and Ohio Railroad, or its branch, near Grafton.

The great Southern mail route *via* Lynchburg, Knoxville, to the Mississippi at Memphis, has given Memphis great notoriety and distinction. And to place herself prominently before the country, Louisville must make herself the Ohio River terminus of a great Eastern route *via* Lexington, which shall fork at Charleston, at Staunton, and at Gordonsville.—*U. S. R. R. & Mining Reg.*

Louisville and Frankfort and Lexington and Frankfort Railroads.

The receipts from the joint operations of these roads during the fiscal years ending June 30, 1864 and 1865, have been as follows:

	1863–'64.	1864–'65.
From passengers	$196,373 15	$287,091 54
" Governm't troops	80,268 68	87,894 05
" freights	128,147 20	150,919 28
" Governm'nt stores	14,781 57	53,826 84
" mail	8,705 66	9,400 00
" express	7,680 39	10,383 15
" telegraph	1,193 72	1,832 92
" miscellaneous	1,590 10	8,177 55
	$439,340 47	$609,525 33
Expenses, viz:		
Conducting transportation	$70,397 00	
Motive power	114,567 99	
Maintenance of way	144,758 56	
" cars	58,682 73	
General expenses	22,780 28	
	411,186 56	
Net operating receipts	$198,338 77	
Reconstruction of locomotives, cars, etc., destroyed by rebels	$33,314 26	
Increase of materials	11,797 07	
	45,111 33	
Balance paid to individual companies	$153,227 44	

Compared with the previous year, the gross earnings of 1864–'65, show an increase of $170,184 86; with an increase in expenses of $176,577 67.

The gross and net earnings and expenses of the joint roads for the past six years have been as follows:

	Gross Earnings.	Operating Expenses.	Net Earnings.
1859–'60	$390,377	$211,234	$179,143
1860–'61	354,855	212,907	141,948
1861–'62	258,237	169,022	89,215
1862–'63	322,229	188,272	133,957
1863–'64	439,340	234,609	204,731
1864–'65	609,525	411,186	198,339

Lexington and Frankfort Railroad.

The proportion of gross and net earnings and expenses applicable to this road is as follows:

	1863–'64.	1864–'65.
Gross earnings	$135,987 49	$188,463 22
Operating expenses	43,504 84	124,689 52
Net earnings	$62,482 65	$63,773 70

The receipts from all sources during the year, including $31,645 90 from previous year, were $221,122 50; and the expenditures were:

Transportation expenses, as above	$124,689 52
Reconstruction	10,277 80
Interest	1,337 63
Dividends, 7 per cent.	37,915 90
Sinking fund	9,000 00
Joint stock company account	7,159 79
Suspense account	356 24
Balance to credit, profit and loss	30,385 62
	$221,122 50

Two dividends, in all amounting to seven per cent., have been paid, and $9,000 have been appropriated to the sinking fund account. Sixteen of the bonds maturing in 1869, have been paid from resources of sinking fund and retired, and the amount credited to stock profits, which is a fund for future stock dividends. Two houses and lots adjoining the depot have been sold, and real estate credited by the amount.

Although the earnings of the road have largely increased, the expenditures have increased in an equal ratio, so that the net earnings remain about equal to those of the last year.

In 1864 two dividends of two per cent. each were declared. Contingent fund was credited with $5,000, sinking fund with $7,000, and the balance, after payment of taxes and interest, carried to the credit of profit and loss. The $11,000 of debt which matured July, 1, 1864, was paid out of the sinking fund, and the stock profits credited with the amount thus retired.

The following statement will show the cost, earnings, expenses and net earnings of this road for the years ending June 30:

	Cost.	Earnings.	Expenses.	Net
1860	642,702	120,324	66,051	54,273
1861	643,421	108,944	65,677	43,267
1862	649,089	78,985	52,191	26,974
1863	650,250	99,320	45,965	53,355
1864	652,275	135,987	73,505	62,482

" State and Municipal	12,248 90
Reconstruction	23,036 46
Joint stock account	13,826 41
Increase of materials	8,157 55
Joint stock company account	123,492 00
L. & J. Co. Ag. Ass. stock	3,500 00
Cash	49,141 96
	$628,510 18

Two cash dividends of three per cent. each

have been declared during the year. A dividend of four per cent. was declared in June, 1864—none having previously been declared during that year.

In the cash on hand are twenty of the bonds of the company, maturing January 1, 1867, which have been paid, but are held as cash.

The gross receipts have materially increased over those of last year, while the net profits are about the same. The item of State taxes shows a large increase over the previous year, from the fact that several years' taxes on the capital stock are included in that item.

The bonded debt of the company has been reduced $20,000 by retiring twenty bonds of the company, due July 1, 1865.

The following statement will show the cost, earnings, expenses and net earnings of this road for the years ending June 30—

	Cost.	Earnings.	Expenses.	Net.
1860 ..	$1,502,095	$270,053	$145,183	$124,870

The equipment of the entire line consists of: 14 locomotives, 13 passenger, 5 baggage, and 214, freight, stock, platform, etc., cars. Total mileage of engines, 236,061. Tons of freight carried 58,-259; do., carried one mile, 3,445,402. Passengers carried, 231,855. Total mileage of passengers, 7,258,019.

Atlantic and Great Western Railway.

The following statement in reference to the recent reported arrangement between this company and the Morris and Essex and Catawissa Railroad Companies, is from the Cincinnati *Gazette*. It says:

All influence in the Erie board prevents any arrangement with the Atlantic and Great Western that would tend to array against them the Lake Shore Company. It is also stated that the ownership of the Erie propellers, by one of the directors of that road, was a prominent cause of the disagreement. However this may be, it is a fact that although the Erie road receives ten passengers at Salamanca to the one it receives at Dunkirk, the managers afford better facilities to the Lake Shore than to the Atlantic and Great Western.

A step was taken to secure an independent road to New York for the Atlantic and Great Western. To this end negotiations were opened for the purchase or lease of the Morris and Essex and Catawissa roads. We are able to state, on the highest authority, that the Morris and Essex road was bought outright, and the Catawissa leased for 999 years, by the Atlantic interests. The arrangements have all been made and concluded and the papers signed. But there is still a gap of one hundred and thirty miles between the Atlantic and Great Western and the terminus of the Catawissa road. This it is determined to build at once, and a charter has been secured for that purpose. The link completed, the Atlantic and Great Western will have a continuous broad gauge road, under one management, from Cincinnati to New York, saving in distance one hundred and twenty miles, as compared with the route *via* Salamanca, and being the same as that *via* Steubenville, Pittsburg and Allentown.

We are also able to state that the English capitalists decided, before leaving New York, to make no investments at present west of Cincinnati, but to concentrate their means upon the Great Western and Atlantic road, so as to carry the broad gauge through to the seaboard with as little delay as possible, and make the entire line in all its appointments the most thorough and magnificent road in the world.

Morris and Essex Railroad.

It is reported that the Morris and Essex Railroad has been leased to the association of British capitalists, represented by Sir Morton Peto, whose object it is by this means to complete their direct chain of railway communication between New York and the West—thus reducing the distance to St. Louis by about one hundred and forty miles. It is said that by the terms of the lease, which is perpetual, the British capitalists undertake to complete all the improvements contemplated by the Morris and Essex Railroad Company, making it a first class road, with double track, extending entirely across the State, from the North river to the Delaware, with extensive improvements at Hoboken, costing not less than $100,000. The enterprise will altogether cost them several millions of dollars. The rights and property of the several shareholders are not to be impaired, but will continue to be managed by their own board of directors, and they are guaranteed about ten per cent. revenue on the present capital stock, with the possibility of an increase above that in case the net earnings render it practicable. The connecting roads pass through the richest agricultural regions of New Jersey, Pennsylvania and Ohio, and with its advantage over other lines as to distance the projectors of the line hope to carry the great bulk of travel between the far West and Atlantic seaboard.—*Trenton (N. J.) Am.*

Pittsburg and Erie Railroad.

We learn from a reliable source that an arrangement is about being closed between the Erie and Pittsburg and the Jamestown and Franklin Railroad Companies for the immediate extension of the Erie and Pittsburg road from Newcastle (its present terminus) to Pittsburg. The parties in interest intend laying the project before the citizens of Pittsburg in a short time, and if they meet with the encouragement and success they feel confident they will in that quarter, the construction of the road will be beyond a doubt.

The Jamestown and Franklin road is now completed within eight miles of Franklin, and will be finished in April to Franklin. By the proposed extension Erie City and Pittsburg will have an unbroken road to Franklin and the oil regions, and it will give the citizens of Pittsburg what they so much need, a new and independent outlet to the lakes and the northwest on the shortest line now projected, and upon the completion of the Jamestown and Ashtabula road, now in course of construction, and which will be finished early next summer, a direct line to Cleveland.—*Erie Dispatch.*

☞ A large and influential meeting was held in Boston on the 13th inst., in favor of the immediate construction of the Northern Pacific Railroad. Speeches were made by ex-Gov. Curry of Oregon, and ex-Gov. Fuller of Utah.

Mississippi and Missouri Railroad.

A letter to the Chicago *Tribune*, dated Des Moines, October 30, says:

What I telegraphed you a few days since as a rumor, that the Rock Island Company was negotiating for the purchase of the Mississippi and Missouri road, proves to have been a fact. It is said that, if the purchase is completed, the road will be pushed on to the Missouri at once. It is apparent to close observers, and doubtless well known to "insiders," that the temporary suspension of the Missouri and Mississippi road has not been the result of a want of means. A very important question was first to be settled. The connections of a railroad running in any direction on a thoroughfare of trade are of vital importance. The Western terminus of the great Pacific road is an important point to gain. That is now virtually settled, and after putting several matters together, which I am not at liberty now to state, I think I am justified in saying that this city will become an important point on the Pacific road, if not even the terminus itself. Less than three months will, I think, determine the matter.

Lehigh Valley Railroad.

Contracts for the construction of the extension of this road from White Haven to Luzerne have been awarded to Messrs. F. J. T. Collins and Dillon & Co., which will give that corporation a continuous line of rail from Wilkesbarre to Easton. The new road will enter the valley at Warrier's Run, and thence by an easy grade descend to some point within the borough limits suitable for the erection of a depot. The construction of the road is to be proceeded with as hastily as possible.

The award of contracts for the building of the extension of the Lehigh and Susquehanna Railroad, between White Haven and Penn Haven has also been made, which will conclude the line of that road from Luzerne to Easton with the finishing of the link already under contract. "When these rival lines are completed," says the Luzerne *Union*, "which will be most probably in the course of a year or a little more, the immense coal deposits of the Wyoming Valley will have thrown open to them, through ample and cheap means of transportation, the markets of the two great commercial emporiums of the United States."

Buffalo and Oil Creek Railroad.

The organization of this company having been fully completed at the last meeting of the Directors by the election of Mayor Fargo of Buffalo, as President of the road, and M. P. Bemis of this village, as Treasurer and Managing Director, the work of surveying and locating the road has commenced in earnest. At present three parties of engineers are in the field at work, all under the charge of Mr. Trew, the Engineer in Chief of the road. Each party commenced their line at the foot of the street in this village. Each line is being run with a view of being ready for adoption and setting the men at work as soon as the directors can be called together after completion, so that there will be no further delay. Indeed, on the line from this place north to the summit men could be set at work at once, if it was desirable, but as the work is very light it would not expedite matters in the least.—*Mayaville Sentinel.*

☞ The traffic receipts of the Philadelphia and Reading Railroad for August, 1865, were $1,-121,205, against $1,170,241 in August, 1864—a decrease of $59,036. The total net profit for nine months ending August 31, 1865, were $2,663,284, against $2,925,639 in the corresponding period of the previous year—a decrease of $262,355.

☞ The St. Stephen's Branch Railway is progressing favorably.

Chicago and Northwestern Railway.

(Continued from Page 1074.)

History and character of that part of this company's railway, known, previous to consolidation with the Galena Company, as the "Chicago and Northwestern Railway Company."

Soon after the commencement of the construction of the Galena road, in 1847, the officers of that company visited Janesville, Mineral Point, and other places in Wisconsin, soliciting aid and co-operation in their efforts, and proposing branches and extensions of their line of road, from the line between Chicago and Galena, then in process of construction to Beloit, Janesville, Madison and beyond, being substantially the same lateral route subsequently adopted and now occupied by the Chicago and Northwestern Railway.

Incited by these offers and promises of co-operation, the people of Wisconsin, living upon the line of the route of road above suggested, were prompted to procure an act incorporating the Madison and Beloit Railroad Company of Wisconsin, which act was approved August 19th, 1848.

Under this act, and the several acts amendatory thereof, containing full and ample powers, said company was authorized to construct and operate a railroad from Beloit, or from any other point on the north line of the State of Illinois, *via* Janesville, Madison and La Crosse, to a point on the Mississippi River, at the line of the territory, now State of Minnesota, near St. Paul, and also from Janesville to Fond du Lac. And by an act of the Legislature of the State of Wisconsin, approved February 9th, 1850, the name of the Madison and Beloit Railroad Company was changed to that of the Rock River Valley Union Railroad Company, and its powers extended.

The officers of this company repeatedly sought interviews with the Galena Company, for the purpose of securing the proposed co-operation of that company in the construction of the proposed branch or lateral line of road from the Galena and Chicago line, then in process of construction, to the State line of Wisconsin, there to connect with the said Madison and Beloit or Rock River Valley Company of Wisconsin.

Becoming, finally, displeased with the result of these interviews, the officers of the Wisconsin Company sought and obtained, from the Legislature of the State of Illinois, an act, approved February 12th, 1851, incorporating the Illinois and Wisconsin Railroad Company, with powers under the said act, and the several acts amendatory thereof, to construct and operate a railroad from the City of Chicago to the north line of the State of Illinois, and to unite and consolidate with any railroad company then incorporated, or which might be thereafter incorporated in the State of Wisconsin; and the work of construction upon this line of road, from Chicago northwest to the State line of Wisconsin, was commenced.

By a subsequent act of the State of Wisconsin, approved March 10th, 1855, the said Illinois and Wisconsin Railroad Company and the said Rock River Valley Union Railroad Company were authorized to consolidate the stock, property and franchises of the two corporations, and to take such corporate name as the Board of Directors of said consolidated corporation might select, and all the powers, franchises and immunities possessed by either of said corporations were granted to the consolidated corporation.

On the 30th March, 1855, the consolidation of these two roads was perfected, and all the powers, property and franchises of the two corporations thereupon became vested in the consolidated corporation thereby created, and called the Chicago, St. Paul and Fond du Lac Railroad Company.

The object and desire of the Chicago, St. Paul and Fond du Lac Railroad Company from the beginning was the extension of their line of road from Janesville northwest, *via* Madison and La Crosse, to St. Paul, and from Janesville north along the valley of Rock River to Fond du Lac, and to the great iron and copper regions of Lake Superior.

Application was made to Congress for a grant of lands in aid of both these lines of road, which grant, chiefly through the efforts of the Chicago, St. Paul and Fond du Lac Railroad Company, was obtained in June, 1856, at which time Congress granted six sections (3,840 acres) per mile to the State of Wisconsin, to be used in aid of the construction of those lines of road.

An extra session of the Legislature of the State of Wisconsin was called in September or October, 1856, at which a contest arose between different railroad companies seeking to have these lands conferred upon them by the State.

The result was, that the lands upon the northwestern line were given by the State to the La Crosse and Milwaukee Railroad Company, and the lands upon the northern line, from Fond du Lac to the north line of the State, in the direction of Lake Superior, were granted by the State to the Wisconsin and Superior Railroad Company, a corporation created at that session of the Legislature of the State of Wisconsin, by an act approved October 11th, 1856, thus depriving the Chicago, St. Paul and Fond du Lac Railroad Company of the grant of lands mainly if not wholly obtained by their efforts, and granted in aid of the lines adopted and then in process of construction by said company.

The charter of the Wisconsin and Superior Railroad Company, which contained very broad, general, detailed and extraordinary powers, and which authorized the construction of a railroad from the City of Fond du Lac to the north line of the State of Wisconsin, and a branch from the main line to some point on the Michigan State line, also authorized the consolidation of the rights and franchises of the Wisconsin and Superior Railroad Company with any railroad company in the State of Michigan; and by the general railroad law of the State of Michigan, any railroad company of that State was authorized to consolidate its stock and franchises with any other railroad company in or out of said State, forming together a continuous line.

By virtue of an act of the Legislature of Wisconsin, approved February 12, and amended February 28, 1857, the Wisconsin and Superior Railroad Company and the consolidated corporation called the Chicago, St. Paul and Fond du Lac Railroad Company were authorized to consolidate their rights, property, land and franchises, under the name of the corporation last mentioned, with all the powers and franchises possessed by either of said corporations; and on the 5th day of March, 1857, the said corporations were so consolidated, retaining the name of the Chicago, St. Paul and Fond du Lac Railroad Company, and all the lands granted by Congress to the State of Wisconsin, and by the State of Wisconsin to the Wisconsin and Superior Railroad Company, were, by this consolidation, secured to the Chicago, St. Paul and Fond du Lac Railroad Company.

In June, 1856, Congress also granted lands to the State of Michigan in aid of a road from Marquette, on Lake Superior, southerly to the State line of Wisconsin, and also from Ontonagon, on Lake Superior, to the said State line of Wisconsin, in contemplation of the connection of these roads at the State line with the northern line of road of the Chicago, St. Paul and Fond du Lac Railroad Company.

Subsequently railroad companies were organized from Marquette to the State line, and from Ontonagon to the State line of Wisconsin, with a view to a union and consolidation with the Chicago, St. Paul and Fond du Lac Railroad Company; and the grants of public land to the State of Michigan to aid in the construction of these roads were conferred upon them, and they were consolidated with the Chicago, St. Paul and Fond du Lac Railroad Company, forming with it a complete line of road from Chicago to Marquette and the great Iron Mountain regions of Lake Superior, and the extensive copper regions in its vicinity.

The great financial revulsion of 1857, which prostrated so many railroads in the country in process of construction, carried down with it and suspended for a time all further progress of the Chicago, St. Paul and Fond du Lac Railroad Company.

In consequence of the financial misfortunes of the Chicago, St. Paul and Fond du Lac Railroad Company in 1857, the consolidation of the Marquette and Ontonagon Railroads with said company were defeated, and the public lands conferred upon those companies reverted to the State of Michigan.

In February, 1859, at a meeting held in New York of the bondholders, stockholders and creditors of the Chicago, St. Paul and Fond du Lac Railroad Company, a plan for the re-organization, extension and ultimate completion of that company's road was agreed upon; which plan provided for a sale of said road, under both its outstanding mortgage deeds of trust; for the purchase of the same by the duly appointed agents of the bondholders of the said company, provided they could make a satisfactory purchase of the said road at the proposed sale thereof.

Legislation was applied for in order to carry into effect this proposed plan of re-organization, and by an act of the Legislature of the State of Illinois, approved February 19th, 1859, and an act of the Legislature of the State of Wisconsin, approved March 14th, 1859, and by a general law of said State of Wisconsin, approved October 10th, 1856, such person or persons as might become the purchasers of the road and property of the said Chicago, St. Paul and Fond du Lac Railroad Company, at any sale thereof, under any mortgage or deed of trust, theretofore executed by it, were authorized to organize a corporation, under such name as they might elect, with all the powers, rights and franchises theretofore possessed by said corporation, under and by virtue of all existing laws and charters of both Illinois and Wisconsin.

On the 2d of June, 1859, in pursuance of these laws and powers, agents of the bondholders purchased the entire road and property of the Chicago, St. Paul and Fond du Lac Railroad Company, at a sale of the same on that day, had in pursuance of foreclosure of the aforesaid deeds of trust.

Said agents proceeded immediately to the further execution of the trust reposed in them, and on the 6th day of June, 1859, organized a corporation, under the more comprehensive and desirable name of the "Chicago and Northwestern Railway Company," having all the powers, rights and franchises theretofore possessed by the Chicago, St. Paul and Fond du Lac Railroad Company, or by any of the railroads of the States of Illinois or Wisconsin previously consolidated into it, including the full power to consolidate its stock, franchises and property with the stock, franchises and property of any other railroad company with which its line of road might connect or intersect, in the States of Illinois, Wisconsin and Michigan respectively; and the law of Illinois of February 19th, 1859, specially conferred upon this company the right to exercise and enjoy, in the State of Illinois, all the rights, powers, privileges and franchises theretofore granted by the States of Wisconsin or Michigan to the Chicago, St. Paul and Fond du Lac Railroad Company.

The Chicago and Northwestern Railway Company was authorized by a law of Wisconsin, approved April 10th, 1861, to locate the line of its road, or a branch thereof, by the way of Fort Howard or Green Bay, northerly to the north line of the State at the Menominee River, still retaining its grants of lands on the original line to aid in the construction of this changed line.

And by an act of said State, approved March 8th, 1862, was further authorized to locate, construct and operate a line of road to the Michigan State line, and this act expressly confers all the rights, privileges, powers and authority contained in the charter of said Chicago and North Western Railway Company, or in the charter of the Chicago, St. Paul and Fond du Lac Railroad Company, or in the charter of the Wisconsin and Superior Railroad Company, upon the Chicago and North

Western Railway Company; and the said Chicago and North Western Railway Company was declared to be the successor to all the rights and franchises of the said railroad companies.

By an act of the Legislature of the State of Illinois, approved February 13, 1863, the Chicago and North Western Railway Company was recognised as an existing corporation; and it and every other railroad company with which it might connect or intersect were respectively authorized to make running connections with each other, and to consolidate their respective stocks and property in such manner and upon such terms as might be agreed upon between said companies.

Supported and authorized by all these manifold charters and varied powers, and often repeated enactments of the States of Illinois, Wisconsin and of Michigan, the Chicago and North Western Railway Company entered upon its renewed corporate existence under the before mentioned reorganization of June 2d, 1859.

In accordance with the provisions of its plan of re-organization, as agreed upon by bondholders, stockholders and creditors in February, 1859, a general seven per cent. first mortgage was created upon the Chicago and North Western line of railway from Chicago to Oshkosh, 194 miles, to secure $3,600,000 of general first mortgage bonds, to be issued to the holders of outstanding first mortgage bonds of the old Chicago, St. Paul and Fond du Lac Railroad Company in exchange for said old bonds, and the interest accrued thereon; and $1,250,000 preferred sinking fund bonds were issued to pay and remove special existing incumbrances, and to be disposed of at their par value in money to subscribers for them under provisions of the said plan of re-organization, and were also secured in priority by said first mortgage.

A second six per cent. mortgage was also issued, to secure $2,000,000 of six per cent. second mortgage bonds.

These latter bonds, (subsequently exchanged for preferred stock,) together with about 150,000 acres of land, acquired by the company under grants of Congress for portions of the road already constructed, were used and disposed of in exchange for about $3,000,000 of outstanding eight per cent. land grant bonds of the old Fond du Lac Company, and upon which land grant bonds some $800,000 of interest had accumulated.

The plan also authorized the organizing committee, in their discretion, within a time, and in a manner fixed and limited, to cause stock of the new company to be issued at par in payment of such debts of the old company as they should think just and equitable, at seventy-five cents for the dollar of said debts; and further authorized them to cause the stock of the new company to be issued at par in exchange for stock of the old company, at sixty cents on the dollar of said old stock.

The plan further required that the holders of the bonds of the old company should subscribe for and take the new sinking fund bonds at par to the extent of ten per cent. of the old bonds held by them, on receiving new bonds in exchange for said old bonds. This provision of the plan furnished the new company with about $600,000 in money, with which they constructed, in the summer and fall of 1859, fifty-seven miles of road, from Janesville to Minnesota Junction, which completed their entire line from Chicago to Oshkosh, 194 miles.

From this relation it will be seen that the stock and bond capital of the said Chicago and North Western Railway Company did not represent any actual cost and disbursement of money by said new company, but constitnted an amount which was then considered to represent the actual and in part prospective value of the road and property of the company; and which was equitably distributed among the bond and stockholders and creditors of the old Chicago, St. Paul and Fond du Lac Railroad Company, and which amounted to a sum much larger than it would have then cost to build the road from Chicago to Oshkosh.

It was because of this large amount of representative capital, issued by the Chicago and North Western Railway Company, at the time and subsequent to its re-organization, that the additional common stock was issued to the stockholders of the Galena Company at the time of the Chicago and North Western Railway Company's consolidation with it, in order to equalize the interests of the owners of the two companies in the consolidated roads.

In the fall of 1860 and early in 1861 the Chicago and North Western Railway Company extended its line of road from Oshkosh to Appleton, over twenty miles, at a very low cost, issuing but $184,000 of Appleton Extension seven per cent. first mortgage bonds, and some $30,000 of the common stock of the company, in exchange at par for Appleton and Neenah bonds, to cover the cost of its construction.

In 1862 the Chicago and North Western Railway Company issued $300,000 of Green Bay Extension seven per cent. first mortgage bonds, and about $65,000 of its common stock in exchange, at par, for bonds of Brown County and the town of Fort Howard, at Green Bay, with the proceeds of which bonds and stock it constructed and extended its line of road from Appleton to Green Bay, about twenty-eight miles.

The Appleton and Green Bay Extension bonds, issued as above mentioned, were secured respectively upon the portion of road for the construction of which they were issued, and upon the portion of public lands granted to the company in aid of such constructions, which lands, amounting to a little more than 200,000 acres, are still held by the company in security for said bonds.

In addition to the general grant of lands conferred upon the said company in aid of the construction of its line of road from Fond du Lac to Green Bay, and to the northerly line of the State of Wisconsin, Congress made a special grant of eighty acres of land, out of its Fort Howard reservation, for the depot grounds of this company at Green Bay, which grant, from its favorable location, large water-front and ample dimensions, is of great value and convenience to the company.

The length of the said company's road from Chicago, *via* Fond du Lac and Appleton, to Green Bay, is 242 miles.

In the summer of 1863 the "Kenosha, Rockford and Rock Island Railroad Company," with its road recently completed and in operation from Kenosha, on Lake Michigan, to Rockford, (one of the most important towns and stations on the Galena road,) about seventy-three miles in length, and diagonally crossing the Chicago and North Western Railway at Harvard, about sixty miles northwest from Chicago, and which was at that time in competition with the Galena, and a valuable feeder to the business of the North Western Road from Rockford and in that direction, became embarrassed, and parties controlling its securities were desirous of disposing of them to the Galena Company, or to the Chicago and North Western Company, carrying with them the control of that road.

To have, at that time, allowed that control to pass into the hands of the Galena Company would have deprived the Chicago and North Western Railway of a very considerable source of revenue, derived through its connection with this road. An arrangement was, therefore, made, whereby several large holders of these securities, and such capitalists as could be induced to purchase them in the interest of the North Western Railway Company, associated themselves to purchase and reorganize the Kenosha Railroad, embracing nearly all the first mortgage bonds.

A foreclosure sale of the road having taken place, and a re-organization being effected, a consolidation was made in accordance with the provisions of the laws of the States of Illinois and Wisconsin.

It had been originally proposed that bonds of the Chicago and North Western Railway Company, secured by a mortgage upon the Kenosha line, and to be called the "Chicago and North Western Railway Kenosha Extension bonds," should be issued to an amount, which, at the market value of similar securities of the company, would re-imburse the cost to the new parties, of the bonds, purchased by them, and that the old holders should accept bonds at the same rate, so that these new Kenosha Extension bonds would be disposed of in payment for the Kenosha road at cost, at a better rate than the whole issue could be sold at in the market, and the line would then cost this company about $800,000 in its Kenosha Extension bonds, at par, or less than $11,000 per mile, in bonds, at par.

But instead of issuing said Kenosha bonds, it was subsequently agreed (and by this company thought to be much more desirable) to issue $1,400,000 of the common stock of this company, then considered equivalent to the cost of said road to the owners thereof, in full consideration for this 73 miles of new and well-ironed road, and for its equipment, consisting of six engines and 100 cars, and including also an amount of about $150,000, surplus of cash assets, resulting to this company in the transaction.

The advantages of this arrangement, in its financial aspects, to this company, and the actual present cost of this road to the company, after deducting the $150,000 in money above mentioned, and the present value of the six engines and 100 cars acquired with it, from that cost, can be readily ascertained by those interested, from the data here given.

The subsequent consolidation between the Galena and the North Western Companies materially lessened the importance of this road to the consolidated company.

The preceding account of the North Western Railway brings its history down to the period of consolidation with the Galena and Chicago Union Railroad Company, June 2d, 1864, except so far as relates to its preliminary action, in connection with the Peninsula Railroad Company, which is referred to hereafter, in the history of that road.

At the time of consolidation with the Galena on the 2d of June, 1864, the Chicago and North Western Railway comprised the following lines and length of roads, to wit:

Its main line, or "Wisconsin Division," as now called, extending from Chicago, *via* Janesville, Fond du Lac, Oshkosh and Appleton to Green Bay	242 miles.
Its "Kenosha Division," extending from the town of Kenosha, on Lake Michigan, to its junction at Rockford, on the Rock River, with the old Galena Road	73 "
Total length of railroad line owned by Chicago and North Western Railway at the time of consolidation with the Galena, as aforesaid	315 "
To which add the lines of road owned by the Galena at the time of consolidation	294 "
Length of Galena leased lines of road at the time of consolidation	227 "
Galena extension of leased roads since consolidation	24 "
Total length of roads owned and leased at the time of consolidation	860 miles.

(To be Continued.)

☞ The Sacrameto *Union* says the Central Pacific Railroad Company have four powerful freight locomotives now on the way to California, called Utah, Nevada, Humboldt and Truckee, and have four more in process of construction at the East, in addition to the one in San Francisco, which is nearly completed. Orders have been sent East for four others. When all these come to hand the company will have twenty locomotives ready for work. They are thus preparing for the next season's business, which will undoubtedly be very large, as the road is far enough up the mountains to secure the over mountain freight, and will be still farther eastward by the commencement of travel in the spring.

Stock Exchange and Money Market.

It is a sad spectacle this of seeing the producers of this country using all their ingenuity, skill and industry to make money out of consumers, by holding back their enormous surplus of production, and our foreign commerce neglected to a very great degree for the advantage of exorbitant profits at home. The cause, however, is clear enough. It is our paper money increasing every week by Banks which do not pretend to redeem their currency, and are disposed to prevent its redemption as far as we are able to understand, by appeals to the public fears.

The effort making to prolong the return to specie payments, is no more nor less than an attempt to secure to our cotton and woollen manufacturers, a hundred per cent. per annum on their capital, and from 12 to 100 per cent. dividends on bank issues, this last being the reported profit of the Western Bank in Philadelphia. It seeks to fill the country, nothwithstanding, with foreign goods, for which gold is exported as the cheapest commodity in this market. How long the country can stand these operations we leave it for the political economists to determine, if they can. And yet, at this very moment, we learn from a foreign commercial journal, the *Shipping Gazette*, that dear meat and dear bread are now the rule in England; and that a rise in their cost is anticipated for want of the customary supplies from this country. The same journal informs us that the average price of wheat in England is 41s. 11d. pr. qr., against 38s. and 9d. in 1864; the best wheats at Mark Lane, however, being as high as 48s., and the best old 58s. The reliance for supplies is now entirely on France and Germany, the Baltic marts being about to close for the season. The same journal continues thus:

"A large influx of food from America would alone keep down the quotations here. But how are we to obtain additional supplies whilst prices at New York are much higher than at Liverpool or Mark-lane? It is well known that nearly everything in daily use and consumption in the State is unusually high in price. This arises from the enormous amount of paper money still in circulation; and so long as the people have the means of payment, so long will all commodities command rates above the level of ordinary seasons. Much stress has been laid upon the stated determination of the American Government to fund the whole of their note currency. Such a step, although it would increase the demands upon the Treasury in the shape of dividends, would, no doubt, reduce the price of many commodities, especially wheat and flour, and enable the speculators in produce to forward additional supplies of grain to this country. Still, it is not very clear that the consequent downward movement in price would be so great as to secure large profits to the American houses. But fine wheats here at 60s. per quarter, and fine flour at 30s. to 32s. per barrel, would open up a good profit to those engaged in the trade in the States."

And yet our paper currency prevents any export of our cereals, though such places as Chicago and Milwaukee are literally crammed to overflowing with grain, flour and provisions. What the results are, are thus stated in the same journal.

"The latest advices from New York bring higher quotations for most kinds of produce, and we are informed that "prices are so high that the importation of French flour is not improbable." In currency, flour was held at 8 dollars 20 cents to 16 dollars per barrel; and wheat, 1 dollar 75 cents to 2 dollars 50 cents per bushel. These absurdly high prices are not the result of scarcity, but of a determination on the part of the growers —who hold large amounts in currency—to regulate the future course of the markets. How long they will be enabled to command present rates, must depend upon the Government itself. High rates for food, however, must entail a certain amount of loss to the consumers, and the present inflated currency—the great support of trade—must increase the exports of gold to Europe."

Thus foreign dealers can see what we will not see. Nothing but the unceasing remonstrances of consumers, and the working classes especially, are likely to produce any effect on our system which is surely one of the worst we can continue to follow. It is no consolation to know that certain classes of business men are accumulating fortunes by millions. All this money is taken out of the pockets of the population who are not so

fortunate. What these men gain other men lose. Brokerage, commissions, and enormous profits are made, after all, indirectly, if not directly, out of the laboring and working classes. And we may see this going on in England when there are 30,766 proprietors of land to only 605,349 farmers, and the number of these is decreasing; while in France, the number of the proprietors is larger and more extended, viz.; 9,310,412, and the farmers are in number 4,540,643, and most of these are also proprietors.

The permanent financial resources of France are thus within herself, and therefore more reliable than those of England, and with the further advantage of less public debt, notwithstanding it has gone through so many revolutions, and been engaged in so many expensive wars. One of its remarkable features is its adherence to a specie basis under the most disastrous circumstances.

We again recur to the currency question, as being at present the great topic of the day. The press teems with projects for its reduction, but as yet we have seen no plan that has attracted much attention. That of Mr. McCulloch seems to be a funding of the amount, between five and six hundred millions. The putting of this amount of stock on the market, will glut it, both in this country and abroad, to such an extent as to depreciate its price and value; an apprehension the effects of which are already visible. We are therefore attracted by a proposition published in another column, which seems to obviate the difficulty. This calls upon the National Banks to take up their deposit bonds by substituting greenbacks in their place, which is simply a conversion of securities without the loss of principal, and yet equally protects the bill holder. It is quite probable the Banks may object to the plan, and for this one reason, that if the Government withdraws its currency, and is thus able to resume specie payments, the Banks will have to follow the example. But they of course will prefer irredeemable paper, and enormous dividends, to coming back to first principles, however sound, and however advantageous to the whole country. We hope the plan will be fully discussed, and, if practicable, be adopted.

We notice that foreign exchange has again gone considerably below par; and yet specie, though not on a very large scale, continues to go out. We presume this latter is the effect of special advices from parties abroad, who wish to realize in the manner so dear to British merchants and the Bank of England. Bills have been sold down to 7½ within the past week being full 2 per cent. below par, the loss of the 2 per cent., being probably fully compensated for by the sight and touch of our eagles.

Governments are still dull, owing it is believed to the overtrading of the country banks, who have found themselves cramped by their extensive operations without regard to their reserves of legal tender. We constantly hear of transactions, so largely extended as even to involve the risk of being unable to pay ordinary checks when presented by their customers. To recover their counter facilities they have been compelled in many instances to force sales of such stocks as they had been speculating in.

Of the market we may say generally, that it is heavy. All prudent people keep out of danger just now, as they feel that some very important changes may take place, and lawsuits with brokers for broken margins are not the pleasantest kind of transactions. Another cause for the present dullness in this particular is the fact, that there is just now a tendency to a fall in prices in dry goods and cotton fabrics particularly. It is said that every pound of raw cotton worked up into the usual domestics, has netted the Eastern manufacturer a clear dollar, and that this profit has induced such activity as to overdo the market. Certain it is, there has been a sensible decline, so much so, that to save their stocks on hand for better prices, of which there is really no certainty, large amounts of 7-30s and other currency, and gold interest securities have been forced off.

Meantime the receipts into the Treasury continue large. The internal revenue from the 1st of July last, to the 11th of November, has amounted to $137,865,382 43, or more than a million a day. On Monday, the 13th, they were for that day alone $1,274,608 72. At this rate, the income for the year would be upwards of $300,000,000. It seems as if the affairs of the Treasury were growing better every day; and it is curious to notice, that the numerous articles in the foreign newspapers received by the last steamer, on the subject of American Finance, admit unreservedly that our resources and sound judgment in managing them are only equalled by the alacrity and good feeling with which our people meet the taxation imposed upon them.

The railway interest remains pretty much as it was. The effect of new corners has checked investments, and even purchases for speculation; for there is now no telling where a man may land who embarks with unknown parties on this sea of speculation. And to make the matter worse, even in the most popular companies we hear constantly of disagreements, alleged frauds, secret arrangements, and much confusion generally. Meanwhile the roads themselves are doing well in spite of all these managerial difficulties, and are paying good dividends.

The greatest movement by capital in this direction is the arrangement of the Atlantic and Great Western; which, unable to effect a proper system of transportation with the Erie, has at length determined on an independent line of its own, and has come into the possession of the Morris and Essex and Catawissa lines, and by filling up a small gap, will shorten the route to the cities of Cleveland and Cincinnati by 127 miles. This is indeed a very bold and decisive movement, characteristic of the company and its enterprising direction.

The total amount of gold in our City Banks and Sub-Treasury on the 1st Nov., was $44,556,593. Its fluctuations in price since 1st of January last, may be seen by a glance at the following table:

	Highest.	Lowest.		Highest.	Lowest.
Jan	234½	198	June	143⅜	135⅞
Feb.	218	196⅞	July	147	138
March	201	148⅛	Aug.	144¾	140⅜
April	160	144	Sept.	145	142⅝
May	145¼	128½	Oct.	149	144⅛

Money is easy at 7 per cent. for unquestionable names and good securities, but the rate is higher where there is any doubt.

The bonds issued to the Central Pacific Railroad Company, bearing 6 per cent. are to be received as security for circulation by the National Banks at the limit of 80 per cent.

It cannot be denied that considerable anxiety pervades the public mind in relation to the financial problem.

We notice the arrival during the past week of 7 packages of specie from Curacoa, amount not stated; $33,075 from Havana, in addition to the large amounts per Ocean Queen from California and $40,000 by the Persia.

The exports, exclusive of specie, from the port of New York for the week ending Nov. 13th, were $6,415,566, against $3,298,161 in 1864, and $2,311,932 in 1863. Total since Jan. 1, $141,942,898; same time in 1864, $191,158,462; in 1863, $151,324,367.

The balance in the Sub-Treasury on Tuesday was $58,323,425 11.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—State 6s, 1873, 97¼ do., 7s Bounty Loan, 99⅞; American Gold, 147¼; U. S. 5-20s, 1865, 99¾; City 6s, 1887, 97; Brooklyn 6s Water Loan, 95; Milwaukee and St. Paul, pref., 70; Joliet and Chicago R. R., 91; McGregor Western, 26; Hartford and New Haven, 165; Spring Mt. Great Western (Ca.) Railway.

The annual meeting of the shareholders of this company was held in London on the 11th ult. The directors' report and the accounts declaring a dividend of two per cent., free of income tax, were presented, and after some discussion, unanimously adopted. The agreement with the Atlantic and Great Western Railway (Buffalo Extension) whereby the Great Western undertakes to work the Erie and Niagara Railway for one year, and secures the right of working its traffic over the latter road for twenty years on terms to be agreed upon, was formally confirmed.

Columbia Mining Co. Railway.

This company has just finished the construction of a railway 4½ miles, in length, from its iron mines in Ancram to Boston Four corners, where it intersects the Harlem Road. Its business is the transportation of iron ore from its valuable mines, for which there is a large demand at $5 to $6 per ton. Mr. P. P. Dickinson is President and Engineer of the company.

☞ The stockholders of the Catawissa Railroad Company have unanimously confirmed the lease of that road to the Atlantic and Great Western Railway Company. By the contract and lease the Atlantic and Great Western Railway Company is to take possession of the Catawissa road on the 1st of December next, for a period of nine hundred and ninety-nine years. The lessees agree to pay to the Catawissa Company $365,000 per annum, in monthly instalments. This is equal to eight per cent. upon the capital of the company after maintaining its organization.

☞ Silas Seymour, Esq., has been appointed Chief, and Charles B. Morse Assistant Engineer of the Alexandria and Fredericksburg Railroad. The engineer's corps will commence the survey of this road in a few days. It is proposed to run two trial lines—one by the river, the other direct to Fredericksburg from Alexandria. As soon as the location of the line is determined upon the construction of the road will be put under contract. Books for the subscription of capital stock have been opened in Alexandria, Richmond and Fredericksburg.

☞ The Tennessee Legislature has passed a bill authorizing the Governor to issue new bonds for the railroads of the State to the extent of the State endowments; also for the funding of the State debt as it matures, together with the interest in part due or to become due on the 1st of January, 1866, by the issue of new bonds.

☞ A survey for a new railroad is now in progress, commencing at Pierceville, on the Ohio and Mississippi Railroad, and intersecting the Atlantic and Great Western road at Hamilton, thus saving about thirty miles of distance.

Piedmont R. R.

A called meeting of the stockholders of this company was held in Danville, Va., on the 1st inst., at which the following officers were chosen for the ensuing year:

President.—A. S. Buford.

Directors.—J. M. Morehead, Greensboro', N. C.; John Wilkes, Charlotte, N. C.; A. Y. Stokes J. D. Harvey, F. Stearns, Richmond; Wm. T. Sutherlin, Danville; Wood Bouldin, Charlotte, Va.; John R. Edmunds, Halifax, Va.

Mr. John T. Watson, of Danville, was appointed by the Directory, Treasurer of the company.

Authority was conferred on the directory to leave the franchises of the road for one year to the Richmond and Danville Railroad Company so that the two roads may be run under the management of the same officers, thus saving the expense of a separate organization.

Central Pacific Railroad.

San Francisco, Nov. 8.—Governor Low and other commissioners appointed by the Government to examine the recently completed portion of the Pacific Railroad, extending from Newcastle to Colfax, 23 miles, have approved of the same and forwarded their report to Washington. When the report is endorsed by the Government, the company will be entitled to $1,100,000 in Government bonds. The company announce that the bulk of the work to Dutch Flat, nearly 80 miles from Sacramento, will be completed by December.

☞ We learn from the Cumberland *Union*, of 4th inst., that active operations on the Cumberland connection of the Pittsburg and Connellsville Railroad are about to commence. The contractor for the Sand Patch Tunnel, John Humbird, Esq., of that city, will at once put a large force upon that section of the road.

☞ Two civil engineers in the employ of the International Contract Company, viz: Mr. Beatty, and Mr. H. G. C. Ketchum, arrived at Halifax by the last steamer, to commence the survey and final location of the line of railway from Truro to Moncton.

☞ Messrs. Pierce & Blaisdell, contractors for the construction of the Western Railway Extension, were expected to arrive at St. John to commence operations on the 7th inst.

☞ The Nova Scotia Government have completed a contract with Messrs. Harris & Smith on behalf of Messrs. George Knight & Co., an eminent firm of British capitalists for the completion of eighty-five miles of railway to Annapolis within two years from May next.

☞ It is expected that trains will be run the entire length of the Memphis and Tennessee Railroad by the 1st of December. The Tallahatchee Bridge will not be completed, but arrangements for the transfer of freight will be made.

☞ A dispatch from Cincinnati states that the Ohio and Mississippi Railroad Company have commenced a suit against the Indianapolis and Cincinnati Railroad Co. for damages, amounting to over one million and five hundred thousand dollars, for breaking the contract existing between the two roads, whereby the latter use track of the former from Cincinnati to Lawrenceburg.

Railroad Earnings--Monthly.

The earnings of the Pittsburgh, Fort Wayne and Chicago Railway for the month of October, compared with the same period last year, have been as follows:

	1864.	1865.
From freight	$388,098 91	$470,006 35
" passengers	289,690 56	306,633 97
" express matter	5,200 00	13,562 60
" mails	7,825 00	7,825 00
" rent of railway	7,083 33	7,083 33
" miscellaneous	3,453 77	2,271 06
Total	$701,351 57	$807,382 31

Earnings from Jan. 1, to Oct. 31:

1865	$7,107,819 94
1864	5,514,827 54
Increase	$1,592,992 40

The earnings of the Atlantic and Great Western Railway for the month of Oct., 1865, were $719,911 00
Corrresponding period of previous year 396,847 00
Increase $323,064 00

The receipts of the New Brunswick and Canada Railway in October, 1865, were $5,000 14; in October 1864, $3,160 11—increase, 1,840 03.

The earnings of the Chicago and Milwaukee Railway for the month of Oct.1865,were.$89,012 00
Corresponding months of prev. year... 78,881 00
Increase $10,131 00

The earnings of the St. Louis, Alton and Terre Haute Railroad for the month of Oct., 1865, were $222,924 00
Corresponding month of previous year 204,785 00
Increase $18,139 00

The earnings of the Erie Railway for the month of Oct., 1865, were $1,406,387 00
Corresponding month last year 1,222,568 00
Increase $183,819 00

The earnings of the Cleveland and Pittsburg Railroad for the month of October, 1865 were $223,846 39
Corresponding period of prev. year .. 248,292 66
Decrease $24,446 27

The earnings of the Milwaukee and Prairie du Chien Railway for the month of Oct., 1865, were $310,594 69
Corresponding month of previous year 178,526 07
Increase $132,068 62

Railroad Earnings.--Weekly.

The earnings of the Chicago and Northwestern Railway for the first week in November, 1865, were $174,606 75
Corresponding week of previous year. 165,475 04
Increase $9,131 71

The earnings of the Michigan Central Railroad for the 1st week in Nov., 1865, were..$104,130 16
Corresponding week of previous year.. 87,479 75
Increase $16,650 41

The traffic of the Great Western Railway for the week ending Nov. 10, 1865, was as follows:

Passengers	$36,218 65
Freight and live stock	43,370 55
Mails and sundries	3,059 32
Total	$82,648 52
Corresponding week of 1864	52,013 06
Increase	$30,635 45

The earnings of the Chicago and Alton Railroad for the 1st week in Nov., 1865....$69,802 00
Corresponding week of previous year.. 69,565 00
Increase $237 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Nov., 1865, were $118,777 00
Corresponding week of 1864 94,935 00
Increase $23,842 00

The earnings of the Grand Trunk Railway for the week ending Nov. 4th, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$56,679 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	80,731 00
Total	$141,446 00
Corresponding week, 1864	116,850 00
Increase	$24,596 00

The earnings of the Marietta and Cincinnati Railroad for the 1st week in Nov., 1865, were:

	1865.	1864.
Passengers	$9,420 10	$8,135 80
Freight	15,940 10	11,621 96
Mail, express & telegraph	1,175 00	1,084 48
Total	$26,535 20	$20,842 24
Total for the fiscal year commencing Jan. 1.	$1,029,454 78	$857,158 76

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Nov. 7, were:

	1865.	1864.
Passengers	$3,482 27	$3,554 00
Freight	9,980 97	9,713 48
Express	130 22	104 16
Mail	296 58	296 58
Total	$13,840 04	$13,668 22

Receipts from January 1 to Nov. 7:

1865	$603,623 63
1864	499,609 61
Increase	$104,014 02

The earnings of the Chicago and Rock Island Railroad for the first week in November, 1865, were $67,383 00
Corresponding week of previous year.. 96,359 00
Decrease $28,976 00

Hempfield Railroad.

It is to be hoped, now that the war is over, that some of our enterprising capitalists will take the matter in hand and complete the Hempfield Railroad to Pittsburgh or Greensburg. A great portion of the road is already graded between Washington and Pittsburgh, and it would not require a very heavy outlay of money to finish the road and place it in a proper condition for the running of trains. If the road is completed to Pittsburgh, it will be the shortest and most direct route and could not fail to attract a great majority of Eastern travelers. During the coming year a bridge will be built across the river at Bellair, thus connecting the Central Ohio with the Baltimore and Ohio Road. Should the Hempfield Road be completed we would enjoy the advantage of two direct routes to the East. The completion of the road could not fail to result beneficially to Wheelings's interest.—*Wheeling Register.*

☞ The extension of the track of the Pennsylvania Railroad from Philadelphia Gas Works to a point on the Delaware, near the Old Point House, is nearly completed.

Milwaukee City Taxes.

The following is the Comptroller's estimate of City taxes for the year 1865:

For interest and sinking fund on readjustment bonds	$57,976 57
For general city purposes	27,477 05
For dredging the Milwaukee and Menomone Rivers	9,960 43
For reconstruction of bridges	8,998 73
For school purposes	18,051 60
Total for city purposes	$117,464 38
For general ward purposes	59,991 54
For special ward purposes	8,242 63
Total	$185,698 55

The valuation of real and personal property for the year 1865, is as follows:

Real estate	$10,623,378 99
Personal property	3,115,145 36
Total	$13,738,524 35

Journal of Railroad Law.

COLLISION.—MUTUAL NEGLIGENCE, WHAT IS?

This action was brought by the plaintiffs, Rufus K. Delafield and Gecrge Baxter against The Union Ferry Company of Brooklyn, to recover damages done to their canal boat, which was run into by a ferry boat of the defendants, in the port of New York, in January, 1857. The canal boat had been taking in a cargo at the end of the pier on the southerly side of the defendants' ferry slip. She had completed loading at the close of the afternoon, and was lying across the end of the pier. The captain immediately after the ferry boat left the slip, commenced to haul his boat across the slip to a berth on the northerly side of pier 36.

The following facts were clearly established. Each ferry boat was making three trips an hour. The captain of the canal boat knew that the ferry boats were passing to and fro regularly, and that a ferry boat was soon expected to return, and that vigilance and industry on his part were necessary to enable the canal boat to be drawn across the slip before the ferry boat would return. There was no evidence that those in command of the ferry boat had knowledge or reason to suppose that the canal boat was being hauled, or would be attempted to be hauled across the slip while the ferry boat was passing from the Brooklyn to the New York side.

The captain of the canal boat stated that he saw the ferry boat when she left the Brooklyn side, and of course, knew that she was approaching. But there was no evidence given to show that the men in charge of the ferry boat, had their attention been directed to the fact, when she started from the Brooklyn side, could have seen the canal boat. The men in charge of the ferry boat, testified that they did not see the canal boat until within a short distance—two or three boat lengths—when it was too late to avoid the collision. The ferry boat had lights, but the canal boat showed none. At the close of the evidence the defendants moved to dismiss the complaint, on the ground that there was no evidence of carelessness or negligence on the part of the defendants, and that the evidence showed negligence on the part of the plaintiffs contributing to the injury.

The Court denied the motion, whereupon the defendants excepted.

The Court instructed the jury, among other

things to inquire whether there was any negligence in the management of the canal boat which contributed to produce the injury? "And if there was fault or negligence on his part, in that regard, which contributed to produce the injury, then the plaintiffs cannot recover, even though you should find that there was some negligence on the part of the managers of the ferry boat.

"In short to justify you in finding a verdict for the plaintiff, you must be satisfied that the collision was produced by the negligence of the managers of the ferry boat, without any negligence on the part of the captain of the canal boat, which tended to produce the injury."

The jury rendered a verdict in favor of the plaintiffs for a sum of $2,070 26.

The defendants appealed to General Term when the following decision was given by

MONCRIEF, J.—The law it is conceded by the learned counsel for the respective parties, is well settled that in an action like the present, claiming damages for injuries received as alleged, by the negligence, &c., of a defendant, it must appear that the result complained of was not in the slightest degree occasioned or contributed toward by the complainant. If it be true that in any degree both parties concurred in the want of care, it must necessarily follow that the accident cannot justly be said to have arisen from the negligence of one or the other solely, and of course an action cannot be maintained by either party upon the ground that his adversary caused the damage. (Wilds *vs.* Hudson River R. R. Co., 24 W. Y. R., 430; Ernst *vs.* same, 24 How. Pr., 97; 8 Com. Bench, N. S., 568, 572.) The application of this plain principle requires the plaintiffs in this action to establish that the damages they have sustained not only arose from negligence on the part of the defendants, for such is the distinct averment in their complaint, but also assuming that fact to have been proven with sufficient clearness to be submitted to the jury, that the plaintiffs themselves were without fault. The proof of want of due care and caution on the part of the plaintiffs, it seems to me, is most abundantly shown throughout the case. As owners of the canal boat, they or their servants and agents knew of the existence of the ferry, and had ocular demonstration of the frequent, uninterrupted, regular trips of the ferry boats. Their boat had no light; the attempt was made to haul their canal boat by hand from one dock to the other at dusk or after dark without notice to the defendants' servants of their intention, with full knowledge of the tide being against them while hauling the canal boat, and that their act might be attended with some delay. (Steves *vs.* The Oswego and Syracuse R. R. Co., 18 N. Y. R., 422, 426, 427.) It was an unusual step to take at the time of its attempt. No prudent man having just regard for his property, would take such a risk under circumstances requiring no haste; and in case of an exigency, reasonable caution would have led him to make known his intention to cross the entrance to the ferry.

Having finished the loading of their canal boat about half past four or five, and at a period of the year when it becomes dark about the latter hour, the boat then lying bow out, at the side of a pier, the plaintiffs made the attempt "a little before or after five," perhaps to change position and get into line with the opposite pier to which it was intended the canal boat was to be hauled and fastened. How long a time it required to execute this necessary preliminary movement, or at what time the canal boat began her journey across the mouth of the ferry slip, does not appear by any testimony on the part of the plaintiffs; the evidence on the part of the defendants clearly shows the time of the accident to have been about 7 o'clock. As the canal boat commenced hauling across the slip immediately after a ferry boat went out of the slip and was within 15 or 20 feet of being out of danger of collision before being struck, it is plain that the plaintiffs began to haul their boat long after dark, against the tide and floating ice, at the risk of having their hawser break and casting adrift, knowing the constant plying to and fro of the ferry boats, without a light on board and without the slightest intimation to the defendants. The captain of the canal boat had full knowledge that at best it was a most hazardous experiment; his testimony clearly establishes this fact. A verdict finding that such conduct was not wanting in due care and prudence, and was not contributive to the injury which happened, in my opinion is plainly against evidence and should be set aside. As it appears that the defendants asked the learned Chief Justice to dismiss the complaint upon the ground now presented as the reason for reversing the judgment a new trial should be directed with costs to abide the event of the action. (Brown *vs.* Bradshaw, 1 Duer., 199, 206; Goodyear *vs.* Ogden, 4 Hill, 104; Wright *vs.* Orient Mut. Ins. Co., 6 Bosw., 269, 280.)

☞ At a meeting of the residents of the town of Paris, N. Y., held at Clayville on the 10th inst., a petition was prepared to be forwarded to the Legislature praying that body to enact a law, authorizing the town of Paris to subscribe the sum of $160,000 in aid of the construction of a railroad from the city of Utica, southerly through said town. The petition was signed by a large number of the tax payers present.

☞ The Ottawa and Prescott Railway of Canada is to be sold. It will probably go into the hands of the principal creditors—the Ebbvale Iron Company. It is supposed that this road will be of great importance when the seat of Government shall be fairly located at Ottawa.

☞ The argument in the case of the Connellsville and Southern Pennsylvania Railroad Company *vs.* the Pittsburg and Connellsville Railroad Company, will be heard before Judges Grier and McCandless, of the United States Circuit Court, in Philadelphia, on the 24th inst.

☞ A bill has been introduced into the Missouri Legislature, according to the recommendation of Gov. Fletcher, authorizing such a change in the gauge of the railways of that State, as will enable them to operate in conjunction with roads out of the State without change of cars.

☞ At the annual meeting of the Atlantic Mail Steamship Company held on the 9th inst., the following gentlemen were elected directors for the ensuing year: D. B. Allen, L. G. Wheeler, Jr., Jas. H. Banker, C. K. Garrison, and T. F. Secor.

Summit Tunnel.

The Central Pacific Railroad Company of California have concluded to pass the Summit of the Sierra Nevadas with a tunnel about fifteen hundred feet long, as thereby the line can be kept down about one hundred feet lower. Charles Crocker has gone to the Summit to locate and arrange for the construction of laborers' camps at each end of the proposed tunnel. Work on the tunnel will be commenced immediately, and prosecuted day and night, with three shifts of workmen, until completed. It will take about one year to finish it, by which time the company expect to have the iron horse there ready to pass through.—*Sacramento Union.*

☞ The following gentlemen have been elected directors of the Utica and Black River Railroad for the ensuing year: John Thorn, Robert L. Kennedy, H. A. Munsell, John Butterfield, Martin Hart, James Sayre, Edmund A. Graham, Isaac Maynard, A. J. Williams, Chas. Miller, Silas D. Childs, Russell Wheeler, Thos. Foster. President, John Thorn; Treasurer, Isaac Maynard; Secretary, Martin Hart. It was unanimously voted to increase the capital stock of the company to $1,500,000.

☞ The Central Pacific Railroad Company have been laying their plans for the operations of the year 1866. The surveys which have been in progress this Summer have developed a better line over the mountains than was anticipated, and the Directors, after a full consideration of the work before them, have concluded that they can and will lay the track to the Truckee River next year. They have given the necessary orders to effect that object. If successful, it will be a great feat in railroad building.

☞ The value of property in Philadelphia upon which the tax rate for the coming year will be fixed is as follows, viz: Real estate, $159,590,142; furniture, $2,483,645; horses and cows, $570,147; carriages, $187,895—total, $162,831,829. The valuation of real estate in 1864 was $155,980,917; the increase in value in one year is therefore $3,609,225.

☞ The first sod was turned at St. John, N. B., on the 10th inst., on the line of the European and North American Railway for the extension from St. John to Bangor.

☞ The total population of Massachusetts, according to the recent returns of the census takers, is 1,267,329; in 1860 it was 1,231,066—an increase of 36,263. The number of legal voters in 1857 was 211,309; in 1865, 246,087—an increase of 34,728.

☞ ALBERT FINK, Esq., has been appointed General Superintendent of the Louisville and Nashville Railroad vice B. Marshel, Esq., resigned.

☞ The Whitewater Valley Railroad is being extended to Brookville, Ind., where it will connect with the Indiana Central.

Interest and Dividends.

The Northern (N. H.) Railroad Company have declared a dividend of $3 per share net, payable Dec. 1.

The Pacific Mail Steamship Company has declared a dividend of five per cent. out of the net earnings of the quarter ending October 31, payable on the 22d inst.

☞ It is proposed to extend the Warwick Valley Railroad to Water Gap, on the Delaware River, a distance of forty miles, which, with the Boston, Hartford and Erie road, would furnish an air line railroad from Boston to Philadelphia, *via* Newburg, and open the immense mineral resources of Northern New Jersey. It would cost something over half a million of dollars.

ROLLED SEAMLESS BRASS TUBES.

For Locomotives, Steam Boilers, Sugar Pans, Feed Pipes, &c., &c. These Tubes are made tapering or perfect bore, the latter of most accurate gauge, answering for Oil Wells and all other kinds of Pumps. They can be bent into any shape required without fear of splitting.

Manufactured by the

Solid Emery Vulcanite.

WE are now manufacturing wheels of this remarkable substance for cutting, grinding and polishing metals, that will outwear hundreds of the kind commonly used, and will do a much greater amount of work in the same time, and more efficiently. All interested can see them in operation at our warehouse, or circulars describing them will be furnished by mail.

NEW YORK BELTING AND PACKING Co.,
Nos. 37 and 38 Park Row, New York.

MACHINE BELTING,

STEAM PACKING, ENGINE HOSE.

THE superiority of these articles, manufactured of vulcanized rubber, is established. Every belt will be warranted superior to leather, at one-third less price. The Steam Packing is made in every variety, and warranted to stand 300 degs. of heat. The Hose never needs oiling, and is warranted to stand any required pressure; together with all varieties of rubber adapted to mechanical purposes. Directions, prices, &c., can be obtained by mail or otherwise at our warehouse.

NEW YORK BELTING AND PACKING CO.,

The Extension of the Railway System our Political Security.

If we should depend entirely for our future on the personal influence and good conduct of our politicians, even the best and greatest of them, we should yet tremble for the republic. These men are continually seeking to inflame the public mind in one way or another, and will rarely permit any measure to have a fair trial, nor are they willing to make any concession to effect harmony, but in fact consider the United States their own property, their private theatre, their stage of action. The greatness of our territory, the immensity of our resources, the extent of our commerce and the vastness of our production, they consider only as appropriate and incidental to their own personal advancement, so that we are kept in a continual turmoil by agitators, who strut their hour, fill the air with their clamor, and then pass away to make room for others who have crowded them off the stage.

The truth is, this country is growing so large, that to govern it well will henceforth be a difficult effort. When our states were few and our boundaries compact, when we saw the Ocean for one of them, the northern lakes for another, the gulf for the third and the Mississippi, the almost impassible fourth, the management of our National affairs was comparatively easy. Our army and navy were small, our commerce was moderate, our revenue sufficient for our expenses, and a surplus besides, and no taxation whatever. It is not necessary to show the immense difference that now exists in all these respects.

Our western boundary is removed to the shores of the Pacific. In the most desirable direction, within the healthiest most fertile and most enjoyable parallels of latitude our great Empire is extending itself, creating new states at every moment's pause. We neither seek a new northern boundary mid perpetual cold, nor a new southern one in the burning regions beyond the gulf, the home of mental lassitude and imbecility, under the perpetual influence of fever, mingled with its occasional delirium and unnatural fury.

The original Union had physical geography on its side in a most remarkable manner. Our chains of mountains did not divide the States, but ran through them in the right direction from North to South, in fact assimilating them in a great many respects, and holding them together as by a chain. Our greatest rivers have their heads in the North, their mouths in the South, thus making their utility and navigation common property and a common heritage. The Ocean divided us from the turbulent, unquiet, despotic and dangerous nations of the old world. Into this paradise entered the same bad spirit which once disturbed heaven. Ambition disguising its real objects, attempted a final disruption of a country, than which none had been more prosperous or happy. That danger has passed away leaving behind it the most painful wounds and scars.

We shall have no more rebellions, if any separation ever takes place it will be by peaceable measures, by negotiations and the force of seperate and irreconcilable commercial interests, and from the difficulty of governing well so vast an Empire. This is the only thing those who come after us will have any cause to fear. And this may be anticipated and prevented, not by harangues from orators, nor the teachings of books, nor the resolutions of congress but by the continued and extending construction of railways. This is the remedy which Providence has put into our hands and we must use it. Let the Union Pacific be finished without any unnecessary delay. Let the Government not only aid it by instalments of credit, but let it be given at once and on the largest scale, that it may do its work in two years instead of twenty. Let every commercial centre between the Atlantic and Pacific States be made a terminus for auxiliary branches, so that the whole United States may be passed over by travelers in any direction within five days. We shall then be on a perfect equality as to means of transportation from West to East, East to West, North to South and South to North. The vast field of industry and enterprise will be held in common, and we shall be able to direct in time of foreign aggresion the whole mighty power of the State wherever necessary in its most crushing form.

Such interests as will then arise and on so grand a scale will make separation hereafter impossible. There can be hereafter no antagonism of interests, but a perfect amalgamation of them. The turbulence of individuals, the narrow local prejudices of communities, the treason of conspirators will then have no more effect, than a pebble thrown into the Ocean, and we may look at least for the complete realization of those splendid prophecies which were uttered by the bards of our revolution, when seeing the final result of its grand struggle. "Time's greatest triumph is her last."

The immediate material irresistible agent is the Railway. We have seen what the system has done for us already both in peace and war, in the former, building up cities and states, in the latter aiding the movements of our armies in the repossession of our territory. What will it be when we shall see on the map of our great Western interior and beyond the mountains, lines as numerous as those on the maps of the Atlantic and North Western States, when the chartographer will stud it with points denoting cities and towns, rich, populous and flourishing, with more than Golcondas, or Potosis pouring forth their treasures and loading the trains, when the most precious and

costly fabrics of the Orient, its choicest products, its spices, gums, herbs and fruits, shall be exchanged at all these points over thousands of miles of new railways, and placed cheaply in the hands of our own people there for the first time.

Let the politicans then speculate as they may about our future destiny. We care not what they think. Give us the railways now making their progress to the Pacific, with as much speed as possible, let them extend their net work rapidly in every direction, and we may bid defiance to all human opposition, a practice of unity and grandeur such as has never yet been seen in the Book of Time.

It is a most gratifying circumstance to the writer of these remarks to add, that the sentiments embodied in them find a corresponding sympathy in California to their full extent; that in that state the immediate construction of the Union Pacific Railroad, is the general and deep desire of the people there, that it is the universal topic, the summing up of all conversations, the ultimate of their best hopes, and their conviction that its moral and political tendencies are anticipated in the keenest manner, the theme not only of men of intellect and of business but becoming that of the most profound and eloquent of their pulpit orators.

Cleveland, Fort Wayne and Chicago R. R.

We are glad to learn that our prominent business men and capitalists, in connection with parties from Chicago and New York, of large means and well known financial experience, are now taking active and determined measures to revive the work upon our old and long-cherished line of road, between the cities of Cleveland and Chicago. And we believe that the time has now come when the great tide of trade and travel between these two important railroad centres, not only demonstrates clearly that this new line will prove a financial success beyond all question, but demands that it be speedily built, in order to meet the present, as well as future necessity, for this kind of travel.

It is determined, we understand, to first complete that part of the line between this city and the city of Fort Wayne, distance one hundred and two miles, and known as the Middle Division, passing through the counties of Seneca, Hancock, Putnam and Paulding, in this State, and Allen, in the State of Indiana, by which a connection with Chicago and Cleveland will be at once secured, with a large and profitable local traffic in timber, lumber and agricultural products, from the rich fields and forests pierced by this line.

Upon this division the grading has been done, and entirely paid for, as well as the right of way; and it only remains for our people to extend a liberal hand towards the parties who are now moving in this work to secure the completion of this division of the road in twelve months.

A large meeting was held by our citizens on Tuesday evening of last week, to take steps towards raising subscriptions to the first mortgage bonds of the company, and which subscriptions are to be paid when the iron is laid down, and the work secured to the subscribers. We are informed that one hundred thousand dollars and upward have been already subscribed to this object in our city, with a promise of a large increase in the country. On the line west of this, we are advised that two thousand dollars per mile has been promised towards the expense of procuring ties and laying down the iron; and in a few days this subscription will be taken by parties appointed to canvass the line, and we are assured that the iron rails, spikes, chairs, &c., for twenty-five miles of the line will be secured and furnished on the ground this winter, if the parties meet with a liberality they expect and desire from the people who are directly interested in the enterprise.

Our business men and farmers are very deeply interested in having this road pushed forward to completion, at the very earliest possible moment; and as the Directors of the road offer an unquestionable security, by a mortgage upon the road and entire property of the company in payment of the subscriptions, we trust that all who possibly can, will not only feel it a duty, but a pleasure to contribute to the success of this great work.—*Tiffin (O.) Advertiser.*

North Missouri Railroad.

The earnings and expenses of this road for the years ending March 1, 1864 and 1865, have been as follows:

Earnings:	1864.	1865.
From passengers	$283,698 59	$441,409 85
" freight	283,894 80	483,589 03
" mails	21,209 14	25,500 00
	$588,802 53	$950,498 88
Expenses, viz:		
Repairs of road	$79,021 02	$93,094 54
" bridges	3,472 04	8,733 09
" buildings	11,690 39	16,427 07
" engines	41,231 03	56,981 03
" cars	26,627 80	65,026 40
" tools, etc	823 00	2,631 21
Officers, agents, etc	51,372 42	63,154 79
Conductors, etc	22,971 95	28,195 21
Enginemen, etc	18,157 21	26,472 24
Watchmen, etc	21,280 80	33,874 97
Fuel	42,326 31	71,401 01
Water supply	6,274 43	14,943 66
Oil and waste	5,984 14	9,813 57
Loss and damage	11,153 06	35,725 45
Government tax	8,057 04	17,430 36
Station expenses	4,324 19	8,071 41
Miscellaneous	65,244 74	88,645 01
	$420,733 32	$640,641 02
Net earnings	$168,069 21	$309,857 86

The gross and net earnings and expenses for the three last years have been as follows:

	Gross earnings.	Operating expenses.	Net earnings.
1862–'63	$462,205 15	$314,949 42	$147,255 73
1863–'64	588,802 53	420,733 32	168,069 21
1864–'65	950,498 88	640,641 02	309,857 86

The net earnings of 1864 exceed those of 1863 by $21,213 84, while the net earnings of 1865 show an increase over those of 1864 of $141,788 65. The President in his report says:

As the directory so recently made an elaborate report to the Governor and Legislature of the State of Missouri, with which you and the public are familiar, it seems unnecessary at this time to enumerate the facts contained in that report. It is referred to, however, as a part of this, to be preserved among the records of the company as made specially to the stockholders. Suffice it to say, that upon that report the legislature at its last session passed an act, which released the first lien of the State on this road for the $4,350,000 of state bonds which has been loaned to this company, and authorized it to give a first lien for six millions of dollars to enable the company to construct a bridge over the Missouri river at St. Charles, to extend its Main Line to the State of of Iowa, and to build a West Branch of its road from Moberly (a point about twenty-two miles south of Macon) to St. Joseph, or to any point on the Missouri river south of St. Joseph. The first lien to secure said six millions of dollars covers the one hundred and seventy miles of road already completed and stocked with cars and engines, and also the bridge over the Missouri river, and that portion of the Main Line and West Branch which are to be built.

The six millions of dollars are to be applied as follows: $500,000 to the construction of a bridge over the Missouri river at St. Charles, which, according to the estimates of competent engineers, will accomplish the object; $1,500,000 to extending the road from Macon City to the Iowa line. It is sixty-eight miles from Macon City (the point to which the road is now completed) to the Iowa line. Twelve and three-quarters of a mile of this portion of the road is graded. The grading of the whole line, including bridges, culverts, right of way, and everything to make the road ready for the ties, iron, and rolling stock, will not exceed five thousand dollars to the mile. It is believed that the one million and a half of bonds applicable to the construction of this portion of the road will be ample to accomplish the object. Four millions are made applicable to the construction of the West Branch from Moberly to St. Joseph, or any point on the Missouri river south of St. Joseph that the company may elect.

With the aid of counties along the line of the West Branch, and the subscription of the city and county of Leavenworth, which will in the aggregate amount to one million of dollars, we believe we shall have means enough to reach Leavenworth or Weston, where we will connect with what is called the Platte Country Railroad which extends to St. Joseph, thence on to Savannah, in Andrew county, and is expected to be completed to the Iowa State line; or we may conclude to abandon the Leavenworth subscription, and run our road direct to Kansas city, and from thence direct to St. Joseph; or we may conclude to run the West Branch to Richmond, which is made a point by law, and thence direct to St. Joseph through Clinton county. A great deal, in this respect, will depend on the action of Leavenworth city and county. If the same liberal, confiding spirit characterizes the future that has the past in their dealings with this company, there will be a strong disposition to go to that point; but should this course be changed, and exactions made, and obstacles thrown in the way by this and other points, they may be disappointed in getting the road. Without any aid from Leavenworth city and county we shall be able to complete to Kansas City; and it may be that we shall conclude to run only to Kansas city, as the Weston and Atchison and Atchison and St. Joseph roads are compelled to build to Kansas city within three years. Future developments may change the present expectations of the directory as to the point to which the road will be run after it reaches a point at or opposite Richmond, in Ray county.

We feel that we can safely give assurance to the stockholders that our means will enable us to build the bridge over the Missouri river at St. Charles, extend the road to the Iowa State line, and build the West Branch to Kansas city, Leavenworth, or such point on the Missouri river as events shall demonstrate to be for the best interests of the company.

When these three works are carried out, it is our opinion that we shall be able to earn enough money to enable us to pay the interest on the $6,000,000 loaned to us by the recent act of the legislature, and to pay the interest on the $4,350,000 of State bonds that now have, instead of the first, a second lien on the road.

We do not desire to raise hopes that will not be realized, but we feel that we may not be too sanguine when we express to you the opinion, that within five years from the completion of these works—all of which should be completed in less than five years—we shall be able to earn enough to pay the interest on the first and second mortgage bonds on it, and also pay something in the way of dividends to the liberal and enterprising stockholders through whose means, as a basis, this great work has been accomplished.

We had the misfortune, during the months of September and October of 1864, to have two trains of cars burned by Bill Anderson's murderous band, and by those acting in concert with him, seven of our depots were burned and some engines injured. We lost a full month's business, besides the decrease in business for some time by persons being intimidated from shipping or travelling on the road. It is hardly probable that $150,000 would cover our total losses occasioned by this destruction of our trains and depots.

Notwithstanding our losses in this way, our net earnings for the fiscal year from the 1st of March,

1864, to and including the 28th day of February, 1865, were $309,857 86. This result is not attributable to any sudden influx of Government business, or from any other extraordinary cause. The war has had the effect to diminish instead of increasing our earnings. The products of the country that would have been shipped by our road have to a great extent been consumed by the armies of one side or the other, and many farms have remained untilled and unproductive; whilst the merchants have bought most scantily to supply the country, for fear of being robbed by the guerrillas; thus the war has diminished instead of having increased our business.

From the beginning of the war to the 1st of September, 1864, our total Government earnings were $189,288 03. We have earned since (still unadjusted) about $50,000, making a total of $239,288 03.

In the same time the Pacific Railroad has earned from the Government about $2,000,000, the Hannibal and St. Joseph has earned about $2,000,000, and the St. Louis and Iron Mountain Road about $600,000.

We do not anticipate that the next fiscal year will show as large net earnings as the past, as many farms are uncultivated, and there will neither be the labor to produce nor the money to purchase needed supplies. The year following that, however, we look for a very material increase in our business, especially if war should cease in our State.

The State is now free from slavery, and when war shall no longer exist we may reasonably expect a large emigration of free white labor into Northern Missouri. Our soil is much better and much cheaper than lands which are not equal in productiveness nor so favorably situated as to climate, and must attract population and capital when the time arrives that they will be safe from molestation in our State.

A comparative statement is submitted, among the exhibits in the Appendix, of the revenue of the Board for the last three years, showing the earnings of every month in each year:

T'l receipts for the fiscal yr.	1862–'3.	$484,188 75
" " "	1863–'4.	694,240 17
" " "	1864–'5.	1,013,043 95

This certainly, under all the circumstances of the case before stated, presents a most gratifying prospect for the future of the company.

The annual interest on the present $4,350,000 of State bonds is $261,000. It will be seen that our net earnings last year would more than have paid this sum, as they were $309,857 86. We have been compelled in the past to use our surplus earnings to add to our rolling stock and to complete our road, which was unfinished when our subscriptions and State credit were exhausted. No one should doubt either the intention of the State or the Road to pay every one of the bonds issued for the benefit of this company, with the interest thereon. The sole object which the State had in postponing her first lien, and taking a second lien for the $4,350,000, was to secure to the city of St. Louis and the State railroad connections with the railroad system of the State of Iowa; to give an independent line of the Hannibal and St. Joseph Road to Kansas city, Leavenworth, and St. Joseph; to connect with all of the great Pacific Railroads projected from the Missouri river to the Pacific coast, and to bridge the Missouri river; whereby the State of Missouri and the North Missouri Railroad Company would both the sooner be made able to pay the interest on the $4,350,000. It is unreasonable to suppose that the legislation of last session will not have this effect.

Those who shall have the future management of the road have a bright future before them if they shall be able to negotiate the six millions of bonds; and it seems to us, with the basis they have, there should be no difficulty in finding a market for them at par. The merchants and property holders of St. Louis are too deeply interested in the extension of this road to Iowa, and the building of the West Branch, to let these bonds go begging for a market. They are worth par, and should not be sold for less.

The company own 23 locomotives; 17 passenger, 2 mail, 4 baggage, 76 combination, 59 stock, 56 box, 57 flat and 20 hand cars.

Miles run by engines in 1865, 480,186, at a cost per mile of 26.86 cents; against 395,419 miles in 1864, at a cost per mile of 22.06 cents—showing an increase in mileage of 64,767; and in cost per mile of 4.80 cents.

The total number of coupon tickets sold in 1865, were 16,503; against 7,233 in 1864—showing an increase of 9,270 passengers.

The total number of tons of freight carried in 1865, were 23,299; against 83,868 in 1864—showing a decrease of 39,431 tons in 1865.

GENERAL BALANCE SHEET.

President.—ISAAC H. STURGEON.

Directors.—Henry S. Reed, John O'F. Farrar, Josiah Fogg, Henry Overstolz, Elias W. Fox, Benjamin O'Fallon, Isaac H. Sturgeon, John Orrick, Frederick Morsey, James H. Robinson, John P. Clark, James S. Rollins, Norborn B. Coates.

Vice President.—JOHN O'F. FARRAR.

Chief Engineer.—J. B. MOULTON.

Ass't Superintendent.—JAMES A. FELPS.

Master Mechanic.—EDMUND TAYLOR.

Treasurer.—CHARLES TAUSSIG.

☞ The friends of the New Castle and Franklin Railroad, are making arrangements to secure its construction, now that the Jamestown and Franklin road is to be finished forthwith. The route will be from New Castle *via* Mercer to Blonnsville, where it will intersect the Jamestown and Franklin road.

☞ All the wire, necessary materials, &c., for the completion of the Russo-American Telegraph *via* Behring Straits have been contracted for in Paris, and will shortly be shipped to this country.

☞ The Government has restored the Winchester (Va.) and Potomac Railroad to the old company, with all the rolling stock. A long credit is given.

Morris and Essex Railroad.

The Morris and Essex Railroad is now fairly open from the Delaware to the Hudson River. On Wednesday night the first coal train passed the whole length of the road, and will probably be followed by others immediately. It is contemplated to commence running, at an early day, through passenger trains from Phillipsburg to Hoboken; but the arrangements are not as yet completed. A late train will be run to South Orange in a week or two, in order to accommodate those who wish to attend the places of amusement in New York.

Lehigh Valley Railroad.

The Lehigh Valley Railroad Company, in order to procure funds for the extension of the road to the Wyoming Valley, give notice that the stockholders of the company shall be entitled to subscribe at par for 20 per cent. additional to the stock standing in their names respectively on the 1st of December next, and each fractional share will be entitled to subscribe to one full share. The payments are $5 per share down, and $5 per share each succeeding 15th of the month until the whole is paid.

Illinois Southern Railroad.

At a meeting of the residents on the line of this road, held at Cairo on the 12th inst., it was stated that fifty miles had been graded, and the ties on the ground and paid for. Over $40,000 had been expended, and the indebtedness is but $25,000 to $30,000. A committee was appointed to fix the amount of subscriptions, with power to call further meetings.

Ottawa and Prescott Railway.

This road was sold by public auction at Toronto on the 14th inst., to satisfy the claim of the Ebbwvale Iron Co. It was bought in for the holders of the first mortgage bonds for $50,000. It is believed that the road will be worked as it has been for the past twelve months, in connection with the Grand Trunk, as it is for the obvious interest of the new proprietors as well as of the citizens of Montreal that this should be done.

☞ At the recent meeting of the Directors of the Atlantic Mail Steamship Company, Mr. D. B. Allen was elected President, Samuel Barton Treasurer, and Franklin Allen Secretary.

☞ The Richmond *Enquirer* says that at a meeting of the Board of Directors of the Richmond and Danville Railroad Company, a few days ago, it was resolved to substitute white for negro labor, wherever employed upon that road. The transition will be as gradual as the circumstances will permit.

☞ The York River railroad company have resolved to borrow $300,000 to reconstruct their road from Richmond to West Point, Va.

☞ The Minnesota Central Railroad was formally opened to Faribault on the 16th inst. The Minnesota Valley Road is now open from Mendota to Shakopee.

☞ The Allegheny Valley Railroad will be completed to the mouth of Mahoning by the 1st of January next.

Chicago and Northwestern Railway.

(Continued from Page 1097.)

History of the Peninsula Railroad.

As has been already observed, it was always a part of the original plan and desire of the Chicago and North Western Railway Company to reach the business, trade and travel of the important and growing mineral regions of Lake Superior, and the board of directors scarcely failed in their annual reports, for years past, to urge upon the attention of their stockholders the importance of securing that trade and traffic.

In the extension of the road to Green Bay this object was prominent.

The enlarged operations of the copper and iron mines of Lake Superior for the last few years, and their promise of still greater increase of business in the future, was beginning to attract the attention of railroad parties not in the interests of this company, so seriously that it became important to secure, without delay, this business to the long line of railroad of this company, already extending from Chicago to Green Bay, 242 miles; and it became apparent, also, that unless, at least, that portion of the line of road between Little Bay de Noquet, on Green Bay, now called "Escanaba," and the Iron Mines was secured and built in the interests of the Chicago and Northwestern Railway Company, it would be constructed by others having adverse interests and connections, threatening ultimately to entirely deprive the Chicago and Northwestern Railway Company of its valuable Lake Superior business, now so perfectly secured to it by the Peninsula Railway, besides otherwise materially and injuriously affecting it.

The Northwestern Railway Company having, about that time, with considerable effort, completed its line of road to Green Bay, the board hesitated in regard to immediate proposals for further efforts, by the company, in that direction.

Capitalists, in the main unconnected with the Chicago and Northwestern Railway Company, were appealed to, to furnish the funds and build a road across the Upper Peninsula of Michigan, as of itself a desirable investment. The appeal was successful, and the result was the prompt construction of the "Peninsula Railroad of Michigan," commenced in 1863 and opened in December, 1864, by a company duly organized under the general laws of that State; said road extending from Escanaba, on Green Bay, to nearly all the great iron mines of Lake Superior, and connecting at the Jackson Mine with the railroad from Marquette to the mines, thus making a through line to Lake Superior.

The length of the Peninsula Road, from the harbor and ore-docks at Escanaba to the great Jackson mine at Negaunee, and to its juntion with the Marquette Road at that point, is about 62 miles, and its extension from that point to the end of the Peninsula Road, at the Cleveland Iron Mountain and the New York Company's mines, is about three miles further.

Branches from the main line to some five or six other mines recently opened, and to the neighborhood of others proposed to be opened, amount in all to about five miles more of track, making the entire length of the Peninsula Road extension and branches full 70 miles, besides several miles of side track, including ore-dock tracks at Escanaba.

The large ore-dock at Escanaba, 32 feet high, 37 feet wide and a quarter of a mile long, constructed for receiving and holding some 20,000 to 30,000 tons of ore in pockets, at a time, and for shuting it thence into the holds of ships without re-handling, seems a perfect success, and great saving of time and money in shipping ores, and offers superior inducements to shippers over anything of the kind known to be in use elsewhere. Its cost was very considerable, near $200,000; but its efficiency and economy, in the expense of handling and shipping ores, is very satisfactory, and the facilities it furnishes invites shippers, and insures business and ample returns.

The ample, perfectly safe, deep and desirable harbor for ships at Escanaba, with its easy, unobstructed, broad and liberal entrance, also greatly attracts shippers and purchasers of iron ores to that point. Vessels can make nearly or quite two trips from Cleveland or Buffalo to Escanaba in the time required to make one to Marquette, on Lake Superior, the only point heretofore from which iron ore was shipped. The season for shipping is also much longer from Escanaba, and the St. Mary's River and canal are avoided by going there, and large vessels can load much heavier and deeper at Escanaba.

The engines and cars for this road were contracted for just previous to the great rise in these articles during the war, on very favorable terms; the contracts for construction were let favorably also; but labor became so high and inefficient, and the difficulties of construction through such an entire wilderness as the road traverses, being greater than was anticipated, considerable extra expense was incurred before the road was finally opened in December, 1864.

The length of the through line from Escanaba, on Green Bay, to Marquette, on Lake Superior, is about seventy-five miles—sixty-two miles of which is over the Peninsula Railroad, from Escanaba to its junction with the Marquette Road, at the Jackson Iron Mines, at the village of Negaunee, and thence thirteen miles over the Marquette and Bay de Noquet Railroad to Marquette, on Lake Superior.

The securities on the Peninsula Road rose rapidly, with the increase in value of the equipment materials and work which had already been provided, and were in brisk demand for near a year before its completion, the stock reaching eighty and ninety cents for the dollar, and the bonds were sought for and sold at par. There was danger that they might pass into the hands of holders having interests adverse to the Northwestern, and again expose that Company to the hazard of losing the benefits of a close connection with it, as the key to the Lake Superior business, so important to the long line of road already extended in that direction.

Efforts were made from time to time by the Northwestern, previous to its consolidation with the Galena, to secure a permanent connection or consolidation with this road, but were unsuccessful, the owners of it then being indisposed except at too high rates.

Meanwhile, at the annual meeting, at the time of consolidation between the Galena and Northwestern Railroads, in June, 1864, authority was conferred upon the Board of Directors by the stockholders to consolidate with the Peninsula, if terms acceptable could be obtained.

Subsequently better terms were obtained, and in October, 1864, after the consolidation between the Galena and Northwestern, a consolidation was effected with the Peninsula Railroad Company, by an exchange of one-half share of the common stock and one-half share of the preferred stock of this company, for one full share of the stock of the Peninsula Railroad Company.

The agreement of consolidation contained a provision, however, in accordance with the law of the State of Wisconsin, approved March 26th, 1864, authorizing this company to create and issue different classes of preferred and special stock, under which provision holders of Peninsula Railroad stock might, if they elected so to do, continue to hold their Peninsula stock, and receive any dividends thereon which might be declared from the special earnings of that road, instead of exchanging it in the manner above stated; and a portion of the Peninsula stockholders still continue to hold their stock, preferring to rely upon the earnings of that road for dividends upon it, rather than upon the general earnings of the consolidated company.

Some months previous to the opening of the Peninsula Railroad from Escanaba to the Iron Mines, repeated efforts were made and branch roads offered to induce the Sault St. Mary Canal Mineral Land Company, who held a large body of superior, heavily timbered mineral lands, containing valuable iron ores, and situate at and near the northern termini of the Peninsula Railroad, to open and work their iron mines, or to lease them to others who would open and work them. That company, however, declined either to work or lease them, but, finally, determined to sell them in a body.

It was of great importance to the business of the Peninsula Railroad that these mines should be promptly and amply developed; and just before its completion, parties engaged in the production or manufacture of iron in various parts of the United States, and others, were induced to make the purchase of these mineral lands.

Large expenses were immediately incurred by the new owners in the development of these new mines, in which great progress has already been and is still being made.

Branches of the Peninsula Railroad have been extended to these new mines, and they are so situated that the only outlet for their ores to market is over the Peninsula Road, to which their supply of iron ores for transportation will hereafter be large, constituting, no doubt, one of the main sources of the business of that road.

The temporary paralysis which the close of the war produced in the iron trade, prevented the "Peninsula Division" of the Chicago and Northwestern Railway Company from opening the present season with the amount of local business anticipated. Latterly, however, it has been occupied to the extent of the capacity of its machinery in the transportation of iron ore, and promises to be so occupied to the close of navigation.

A line of steamboats is established between Green Bay and Escanaba, adding, in connection with the Peninsula Road, large numbers of through passengers and business, both ways, to this company's line between Green Bay and Chicago, and promising in the future all that was ever expected from this connection.

A matter of great value and importance, in connection with this Peninsula road, is the grants to it (and to an extension of it south to the Michigan State line at the Menominee River, in the direction of Green Bay, about sixty miles) by Congress and by the State of Michigan together, of about a million of acres of land, if the same can be found, in alternate sections, of Government lands and in lands of the State, within twenty miles of either side of the line of said road.

The old grant of six sections, 3,840 acres to the mile, to the Chicago and Northwestern Railway Company, in aid of the extension of its line of road from Green Bay, northerly, to the State line of Michigan, at the said Menominee River, (about fifty miles,) and to its point of connection there with the Peninsula road, is still extant and valid, and both these grants were extended at the last session of Congress for five years, from June, 1866, within which time, aided by these lands, this company no doubt can, if it shall think proper to do so, readily and easily construct this only remaining connecting link from Green Bay, *via* the Menominee River, to Escanaba, about 110 miles, from the proceeds of bonds to be secured upon it, and of stock subscriptions and donations that will be made along the line of it.

With this link in, this company has no controlling necessity for any further construction in the perfection of the system and plans upon which it is now so firmly established and based, and which can hardly fail to secure to it so great a future.

As regards the value of these million of acres of lands granted to the Peninsula Railroad, and some 200,000 acres more granted in aid of the line from Green Bay to its connection with the Peninsula line of road at Menominee, (in all about 1,200,000 acres of land,) and as to the value of the wood upon these lands for lumber, and especially for charcoal iron purposes, and as to the increased business, certain to result to these roads, from the large manufacture of charcoal iron from the wood upon these and other lands in the Lake Superior iron region, this Board respectfully refer to the able and interesting letter of Dr. R. H. Lamborn, Secretary of the American Iron and Steel Association, to the editor of the *New York Tribune*, upon the "*advantages of the Lake Supeaior region for producing charcoal pig*," a

copy of which letter is appended to the back of this report.

This company have recently sold near 4,000 acres of these Peninsula Railroad lands for charcoal iron purposes for $5, in hand, per acre; a like rate for all would produce $6,000,000, enough to pay the entire cost of the Peninsula Railroad, and the cost of constructing the connecting link from Green Bay to Escanaba.

No such result is counted upon, however, although ultimately by no means impossible to happen.

Add the length of road contributed to this company's lines, by the Peninsula Railroad Company	70	miles.
To the lines owned and leased, contributed by the Galena Company	545	"
And to the lines owned by the Chicago and Nothwestern Railway Company before consolidation	315	"
And we have the total of the lines of railway now owned and operated by this company, to wit:	930	miles.
The longest continuous line of railway now operated by this company is from Chicago to Boonesboro', Iowa	342	miles.
And the next longest from Chicago to Green Bay	242	"
And the next from Chicago, or rather from "Junction," 80 miles west of Chicago, to Freeport	91	"
Or, if counted from Chicago, 121 miles. This line has branches from it to Elgin, over two miles in length, and from Elgin to the State line, 33 miles	35	"
Also, from Belvidere to Beloit, 21 miles, and from Beloit to Madison, 47 miles.	68	"
Add the "Peninsula Division,"	70	"
The "Kenosha and Rockford Division,"	73	"
And the St. Charles at time of consolidation	9	"
And we have again	930	miles.

Thus it will be seen, that as all these lines, except for the present, the Peninsula, not yet connected, except by steamboats, start from and converge to their one great centre at Chicago, they are not of unwieldy length, but comparatively very compact and manageable from that one point, and with unusual facilities for aiding, assisting and supporting each other, by the convenient, economical and profitable interchange, transfer and use of their cars, engines, materials and supplies from one road to the other as most wanted, and by the like convenient and economical transfer of all traffic as desired from any one of their connecting lines of road to another, and to all connecting lines of other roads.

The long continued, unwise and injurious competition which existed between the Galena and the Northwestern Railroads at their several points of contact, and which seemed to be chronic, and not likely to terminate, and which induced the companies to give too much of their time and attention to the control or construction of inferior, rival and illegitimate lines, naturally gave rise to proposals for the combination of these lines as the only certain and permanent remedy for the loss of earnings and increase of expenses resulting from the senseless but apparently unavoidable competition which existed.

Stockholders of both roads were consulted in large numbers, and very generally and cordially consented to and approved of a consolidation, in the manner and on the terms on which it was effected and carried out on the 2d of June, 1864, by and with the consent and under the direction of a majority of all the stockholders of both companies at the time, and which consolidation has since been further ratified and confirmed by nearly all the stockholders of both companies, and by the Legislature of the State of Illinois, by an act of that Legislature passed and approved February 15, 1865, which act not only recognizes and confirms the consolidation of the Galena and Northwestern Railroads, but also declares that "the Chicago and Northwestern Railway Company, as now consolidated, may have and exercise all the powers heretofore conferred by this *or any other State* upon the Chicago and Northwestern Railway Company, and the Galena and Chicago Union Railroad Company, or any other company consolidated with it."

All of the original 60,284 shares of Galena stock have now been exchanged, except 1,882 shares, and of that number 472 shares have assented to the consolidation, leaving but 1,410 shares which have not fully consented and approved it, and many of these, held by heirs, trustees and foreigners, have not been in a condition to do so.

The advantages thus far resulting from this consolidation are all that were anticipated.

By it the management has been improved—the uses of the engines and cars extended—and the earnings of the road largely increased—and the ability of the company to transfer their engines and cars to the different lines of the road, where they are most required, has proved a great benefit to its interests.

The general facilities of the consolidated roads in the way of connections with all other roads terminating in Chicago, for the interchange and transfer of freight, cars and engines, and for the general interchange of all business transactions with those roads, have been increased and economized by the consolidation; and as soon as the company can establish one general central depot and passenger house for the accommodation of its different lines of road, the business of them all can be conducted there with the ease of one road, and with a very large reduction in the expense of management incurred by these lines previous to consolidation.

Another advantage resulting to the company from consolidation is in their ability to establish more equitable tariffs, at the different points and stations on their lines of road, much to the satisfaction of all, except such stations as were previously points of extreme competition, and which stations were often from that cause enabled, previous to consolidation, to get their transportation at cost, or less than cost, to the roads carrying it.

The increased earnings of these roads since consolidation, and in part resulting from it, clearly indicate its wisdom, and the management are perfectly confident that when they shall have perfected their new organizations, and appointments, and economical plans for the conduct of the business of these united roads, and as soon as labor and material shall return to fair prices, they shall be enabled, if supplied with an equipment sufficient to do the business offering, to reduce their tariff on freight and passengers to a very moderate rate, and furnish increased facilities for trade and travel to all the country and people doing business with them, to their entire satisfaction, and yet be able to make full and regular payments of interest and dividends to all their bond and stockholders for all future time, so far as can now be foreseen.

(To be Continued.)

☞ The inauguration of the Chalco Railway, extending from the City of Mexico to the village of Chalco, a distance of 36 miles, was celebrated on the 13th ult. The Emperor and Empress were present. Bishop Carpena bestowed his blessing on the engine, and the Imperial Austrian band discoursed the music.

☞ The Tennessee Legislature has passed a bill authorizing the Governor to issue new bonds for the railroads of the State to the extent of the State endorsement; also for the funding of the State debt as it matures, together with the interest due or to become due on the 1st of January, 1866, by the issue of new bonds.

☞ The Whitewater Valley Railroad will be finished to Brookeville, forty-three miles distant from Cincinnati, by January 1, 1866.

Colorado and Clear Creek Railroad.

We have had an opportunity recently of learning some facts in regard to the survey by Messrs. Mersereau & Reynolds, Engineers, of the route for a railroad between Black Hawk and Golden City, which prove that it is altogether feasible and that its construction will not exceed a price on which the business of the road, even for this short distance, will not afford a fair interest on the capital required.

The entire distance, as per the survey from Golden City to Black Hawk Point, near the post office, is 19.21 miles, which is about three miles less than it was generally supposed, and requires three tunnels amounting in the aggregate to 2,425 feet, and four bridges, the total length of which is 280 feet, the sections divided as follows:

From Golden City there is a grade of 82 feet per mile for 1½ miles, where the first tunnel is reached, which is to be 950 feet in length. The next plane of two miles is at a grade of 105 feet to the mile, and is followed by one of 5⅓ miles at a grade of 122 feet per mile. On this plane there are two tunnels about one-fourth of a mile apart, one of 925 feet and the other 550 feet in length. For about two miles on this plane the elevation of the road bed is from 50 to 100 feet above the creek level, making that portion of the route, including the two tunnels, by far the most expensive portion of the road. After passing the last tunnel on the same plane the grade line is about 20 feet above the level of the creek.

Two and one-fourth miles from the last tunnel the creek is bridged twice, each bridge 100 feet span, to avoid the construction of a tunnel 600 feet in length. The bridges are to be 20 feet above the creek, and the grade only 68 feet per mile. For the distance of two miles, from the point of crossing the creek, the cost of construction will be comparatively light, but there is heavy work from thence one-fourth of a mile to the junction of north and south forks of Clear Creek. The total distance from Golden City to this point is eleven miles and four-fifths of a mile.

At the junction the north fork is crossed by a bridge of 40 feet span, at an elevation of 35 feet above the creek, commencing a grade of 153 feet per mile for a plane of 6.82 miles in length; thence running on the west bank of the north fork a distance of 2¾ miles, where the line crosses the creek on a bridge of 40 feet span and 40 feet above the creek bed, the grade line there being from 35 to 40 feet above the creek to 1¾ miles beyond the last bridge, where it reaches the creek bottom; thence along the creek bottom to Black Hawk Point, a distance of 3¼ miles.

The maximum grade per mile on South Clear Creek is 120 feet; the maximum grade on North Fork is 150 feet per mile.

All the material for the structure of the road bed ready for the iron, is found on the line of the road in abundance and of good quality, and at the present extraordinary high price of labor the whole construction, including iron, depots, engine houses, etc., can be made for a sum not to exceed $100,000 per mile.—*Colorado Miners' Register, October* 17.

New York Central Railroad.

At the monthly meeting of the Directors of the New York Central Railroad Company, held at Albany on the 16th inst., the resignation of Hon. John V. L. Pruyn, Treasurer of the company, was received and accepted, and Mr. Edmund D. Worcester, who has for several years ably filled the position of assistant Treasurer, was elected Treasurer, and Mr. Robert L. Banks, the present Secretary, was elected Secretary and assistant Treasurer.

☞ We learn from Vera Cruz that the Emperor has just authorized the construction of a new road from Mexico to Tacubaya, to the company, Knight, Smith & Co., now engaged in building up the road between Vera Cruz and Mexico.

American Railroad Journal.

Saturday, November 25, 1865.

Stock Exchange and Money Market.

While we have had great cause to complain of the treatment this country has received at the hands of British sympathisers during the rebellion; there however, have been those, especially among the British press, who have never for a moment wavered in their belief of the justice of our cause, or of our ultimate triumph. The same generous and confiding faith is now given to our financial as it was to our military success. Thus we notice in a very late number of the London *Star*, a paragraph on the subject of the present measures of the Treasury department, the steps taken by Mr. McCulloch to restore value to our currency, and of the War and Navy departments to return to a peace expenditure. It says:

"These facts indicate a prudent and a pacific Government; and they demonstrate that the confidence is not misplaced which holds that the United States, both Government and people, are animated by high and pure principles, determined to maintain financial integrity. With an inconvertible paper currency, prices are necessarily inflated, but the resumption of specie payments, which it is Mr. McCulloch's policy to adopt as quickly as possible, will be accomplished with comparatively little inconvenience. The Americans will certainly *not be so long over it as we were*, while their vast natural resources will enable them to accomplish it with infinitely fewer losses. These things will tend to encourage European investments in American railroads, especially in those connecting the West with the East and with the sea."

These friendly remarks from the *Star* we may accept as genuine; but we have great reason to distrust any compliments coming from those other journals who used their whole influence for the destruction of our credit, an important step towards the destruction of our country. The truth is that the admissions even now made abroad by the *Times*, *Herald* and other papers of that stamp, that we are again an undivided nation, and that our resources are equal to every call upon them, are most reluctantly made, and by no means come from a convinced enemy, or a magnanimous one. On the contrary, there was never a deadlier foe to our institutions, than the spirit which inspires these foreign journals, that chronicles our return to unity and greatness with more secret anguish, that seeks every opportunity more quickly for disparaging everything American, and even now is doing all it can and dare to impair public confidence in our securities on the Bourses of Europe. We know these people thoroughly, and the animus which governs them, and it is folly on our part to think that forbearance, generosity and kindness make the least impression upon them. An American policy, is the only one which can compel even common justice from that quarter.

Among capitalists and monied men the principal subject of interest just now is the forthcoming budget of the Secretary of the Treasury. He has a large debt before him to contemplate, a large and redundant currency to interfere with the wholesome action of the laws of trade and commerce, but happily a splendid revenue to fall back upon, and an enthusiastic American feeling to rely upon, which grandly welcomes taxation, however severe, when it is to restore the country to its normal condition in the financial world. This country full of gold and silver does not believe that promises to pay in irredeemable paper are real money, and it will hail the efforts of the Treasury to make those promises worth what they appear to be and formerly really were, as good as gold itself.

It is understood that Mr. McCulloch sees two methods at his disposal with regard to the currency, either to fund it, or reduce it gradually by employing the surplus of the national receipts. These are certainly the obvious methods which a banker would employ for this purpose; but we maintain there is yet another far more decisive, and that is, to require that all the banks yet to be created shall deposit greenbacks as security for their own currency, a very simple and straightforward measure which would remove perhaps some 200 millions of legal tender out of circulation and keep them out for half a century at least.

And we also see no impropriety in requiring all the banks who have deposited bonds to withdraw them and deposit greenbacks in their place. This done, in the course of a twelvemonth, would give them ample time to do it in, appease the clamorous speculators in paper prices and values, and by one single stroke lift the country back into its place as a specie paying nation. We see no reason why our legislation shall continue any longer to be exclusively favorable to our banks, why one class of interests should be secured 12 per cent. interest any longer by law, while all other classes are left to take care of themselves. The plea of necessity no longer exists, the Government is not now a borrower, and need not make any further unequal concessions for the use of money. Whether this proposition is now regarded or not, it is very certain that the attention of Congress should be called to it, as one of the most conclusive measures as yet proposed to restore prosperity to this country.

This plan which we know has been respectfully submitted to the Secretary, is met as far we can learn with but one objection at present, that "it might create trouble in the money market, and be likely to embarrass the Banks to a greater degree than the process of funding directly by the Government."

This is nothing more nor less than saying that the interests of the Banks must be consulted in preference to those of the Country; that the institutions making 12 per cent. per annum by means of legislation alone, must be protected, though the labor, and industry, and consumption of the country are prostrated to the earth, and that we must continue to pay 2, 3, 4, 5 and even 600 per cent. for articles of necessity, in order that the money market shall keep up its inflated volume, till the speculators have time to secure their millions.

This is the only question after all. Is the whole financial policy of the country to turn on the interests of banks and brokers, to the permanent injury of producers and consumers? Against such a policy we shall continue to protest. We further think that the policy of funding the legal tenders will defeat itself. We doubt if they can be funded. We doubt whether those holding them, will part with the advantage of holding them as ready money, for any securities at 5 or 6 per cent. when they can get them now at par or nearly par. On the contrary, at the bare attempt to fund 5 or 600 millions, the price will go down so fast as to make the loan a dead weight in the market.

All the leading journals of Boston, New York, Philadelphia, and Baltimore are for decisive and vigorous measures to be undertaken at once, because we are better prepared for them than we shall be a few years hence; and if there are any exceptions to be found among these journals, they are those who have ventured upon large private speculations, and wish to get safely out of them before a return to specie payments is possible. The motive is therefore apparent enough. The hunting up and display of worm eaten precedents from English history is entirely out of place.

Twenty-five years of floundering in the financial policy of that country, are no guide for us who live a century in a year.

Our local market has been much affected the past ten or twelve days by the arrangements for, and the celebration of the reception of Gen. Grant, and by a severe North East storm which came with unusual severity, and raged both on land and water. Almost every business man in the city had something to do with the former, giving it a preference for several days to other engagements. And a rain storm of several days' duration or even a single day always has a perceptible effect upon Wall street. It is a curious fact, that the operations there are affected by rain storms, and there are some persons who, expecting a decline on such occasions, take advantage of them, knowing that the next day of sunshine will ensure them a profit. There is quite a class of capitalists who will not turn out on rainy days, and their absence makes a sensible difference in the street. All the daily papers noticed this declining tendency. Gold has been dull and fallen off. It is said the operators in this article are not much encouraged. Just when they get the premium up 1 or 1½ per cent., they find the Government selling against them, and they are quite disheartened. They alledge also that the gold note system works against them, as it gives the Treasury a large excess of deposits, and opportunity to place this excess on the street without difficulty or hazard. If this is their real opinion we may expect them to submit to a further reduction in the premium. Exchange still rules considerably below par and is dull at that. One reason for this is the continuation of our exports on an increasing scale. Money is in fair supply at 7 per cent. Government bonds are pressed for sale and close heavy. Abroad at the last advices they had stiffened and brought 64 stg. The balance in the Sub-Treasury on Wednesday was $64,374,229 94.

The exports, exclusive of specie, from the port of New York for the week ending Nov. 20th, were $5,022,750, against $4,845,104 in 1864, and $2,309,288 in 1863. Total since Jan. 1, $146,965,558; same time in 1864, $196,623,556; in 1863, $158,633,655.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

A New Railroad Project.

We are glad to see that the community, and especially railroad men, are awaking to a sense of the value of short lines. Of late years the projects of *air-lines*, as they were called, or in other words, the shortest distance between two points has been a matter of ridicule even with sensible men. But a larger experience in railway management and a growing competition has served to convince them that other things being equal, that road is the best which is the shortest. In short lines there is not only a saving in cost of construction and in expense of maintenance, but also in *time*. A new railway is in contemplation between Cleveland and Chicago, called THE CLEVELAND, FORT WAYNE AND CHICAGO RAILROAD, which it is claimed will be some twenty-five miles shorter than any line in existence between those cities. This projected road runs *in an air-line* from Cleveland to Tiffin, 78 miles, thence to Fort Wayne, 102 miles, and thence by an independent line to Chicago, 150 miles. It is also in contemplation to extend the line from Fort Wayne westward to connect with the Chicago and Rock Island Railroad at Morris; the leading idea of the plan being *to connect by a due East and West Grand Trunk road the railways of the Atlantic States with the eastern terminus on the Missouri River of the great highway to the Pacific.* That portion of the line lying between Tiffin and Fort Wayne, belonged formerly to the Tiffin and Fort Wayne Railroad Company, but has been sold to the Cleveland, Fort Wayne and Chicago Railroad Company. It is graded, bridged and ready for the iron, and twenty-five miles of it, forming a link between the Fremont and Indiana Railroad and the Dayton and Michigan Railroad, is under contract to be speedily completed—the iron having been already shipped. The company has leased twenty-seven miles of the Fremont and Indiana Railroad, through which connection is made with the Cleveland and Toledo Railroad at Fremont; so that a portion of this new road will soon be in active operation.

Through Line to California touching at Mexican Ports.

We publish elsewhere the advertisement of a new line of steamers from this port to Aspinwall three times a month, composed of splendid vessels, connecting at Panama with steamers for South Pacific ports, and those bound up the coast to San Francisco, touching at Acapulco. We especially recommend this line to the public, and especially the Henry Chauncey, belonging to it, as a new and most elegant vessel of great speed and admirable accommodations.

☞ We invite attention to the advertisement of MESSRS. BULKLEY & MCNEILL, Consulting Engineers, 57 Broadway, N. Y. Mr. Bulkley has been engaged for several years in the practical designing of machinery, at two of the largest machine shops of the city. For the past year has been Inspector of steam machinery being constructed for the Government.

Mr. McNeill, served an apprenticeship at Whitworth's shop in England, and has also had practical mechanical experience in Philadelphia, Pa., and Lynchburg, Va.

The Eaton and Hamilton Railroad.

The affairs of this company as we learn from the Cincinnati *Gazette*, are about to be placed on a new and favorable footing. Two years since the creditors and stockholders proposed to capitalize its liabilities and reorganize under the laws of Ohio. Under a decree for the sale of the road in 1849, some measures of relief became necessary. A convention of the parties in interest has proposed the following plan, viz., the company to issue $500,000 in 7 per cent. bonds, to mature 30 years after date secured by mortgage on the railroad property and franchises, with which bonds its debts are to be paid, including $150,000 to the city of Cincinnati. A majority of the several individual interests has assented to the proposition, and the City Council have it now before them for consideration. The $150,000 are all that is left to be paid to the city for its advances of a million to several companies, and by its adoption the Eaton and Hamilton Company will be relieved of nearly half a million of its liabilities, and the operation will be advantageous to all parties. The company justly bears a high character for probity, and its reorganizalion is deservedly approved by the public.

☞ Alvah Crocker and several other Fitchburg capitalists have purchased the water power of the upper locks and canals on the Connecticut river at Montague, together with several farms. They propose to rebuild the dam at Turner's Falls, and to build a railroad to Grout's Corner, to connect with the Vermont and Massachusetts and New London Northern railroads. It is the intention of the company to develop the water power and build up a manufacturing city.

☞ The South Carolina Railroad is now open to Hopkin's Station, some ten miles from Columbia, and is in order on the Augusta branch, sixteen miles this side of Branchville. The bridge over the Edisto will soon be completed.

Another Railroad to the Mississippi.

The "American Central Railway Company," which was organized in 1856 to build a road from Fort Wayne, Ind., to New Boston, Ill., on the Mississippi river, about sixty miles below Rock Island, has recently been consolidated with the Pittsburg, Fort Wayne and Chicago Railroad.

About a hundred miles of the road is now graded from New Boston eastward to this side of Lacon, in Mashall county; the work was interrupted by the financial crash of 1857; but is now certain to go ahead. Under the consolidation recently effected Hon. John S. Thompson, Judge of the Tenth Judicial District of this State, who is President of the original corporation, left for England a few days since, to negotiate for the purchase the iron for the entire road from the Mississippi to the Indiana State line, and it is anticipated that the work will be vigorously resumed early next spring, and that it will be so far completed eastward from New Boston as to intersect with the Chicago, Burlington and Quincy Railroad at Galva some time next year. The road will also cross the Chicago, Alton and St. Louis Railroad, twenty miles east of Lacon to which point it is already graded.—*Chicago Journal.*

Central Pacific Railroad.

The Sacramento *Union* says that S. S. Montague, Engineer of the Pacific Railroad, has just returned from the summit of the Sierras, which point he visited for the purpose of starting the work on the summit tunnel. This tunnel will be 1,750 feet, or about the third of a mile long, twenty-six feet wide and twenty feet high. The excavation will be sufficiently wide for a double track. The entire work runs through solid granite. It is expected that a year and a half will be required to complete it. The work was started by Montague at both ends. This tunnel is not level, but descends to the east at the rate of ninety feet to the mile. The summit is about fifty miles east of Colfax. Thirteen miles of the road between Colfax and Dutch Flat will be graded by the first of January. It is expected that the summit will be reached before the tunnel is completed, and that a temporary track will be laid over it for the purpose of facilitating the work on the eastern slope.

Central Ohio Railroad.

The new organization of the Central Ohio Railroad Company has elected the following directors: H. J. Jewett, Daniel Applegate, S. R. Hosmer, John King, Jr., Walter B. Brooks, Joseph H. Rieman, Joseph W. Jenkins, James Harvey, Simeon Gebhart, John H. Heaton, Wm. Dennison, Jos. R. Swan, and Wm. H. Clement. Officers for the ensuing year: H. J. Jewett, President; Daniel Applegate, Treasurer; Wm. Wing, Secretary; and D. W. Caldwell, Superintendent.

☞ A convention was held at Jackson, Michigan, on the 31st ult., for the purpose of promoting the extension of the Grand Trunk Railway *via* that city to Chicago. Articles of association were drawn up, and commissioners appointed to solicit subscriptions to the stock of the proposed company, the capital of $3,000,000. The length of the road to be built is estimated at two hundred and eighteen miles.

☞ Andrew Jamieson, Esq., of Alexandria, Va., has been unanimously elected president of the Orange and Alexandria Railroad Company; and Geo. D. Fowle, of New York; Philip Quigley, of Delaware, and Robt. H. Miller, of Alexandria, directors on the part of the private stock. The three State directors are yet to be appointed by the Governor.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Northwestern Railway for the second week in November, 1865, were.....$177,417 20
Corresponding week of previous year. 146,551 90

Increase.....$30,865 30

The earnings of the Michigan Central Railroad for the 2d week in Nov., 1865, were..$104,136 38
Corresponding week of previous year.. 88,659 88

Increase.....$15,476 50

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Nov., 1865, were.....$113,532 00
Corresponding week of 1864 ..... 93,211 00

Increase.....$20,321 00

The earnings of the Grand Trunk Railway for the week ending Nov. 11th, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$56,528 00
Express, freight, mails and sundries..	4,036 00
Freight and live stock	89,473 00
Total	$150,037 00
Corresponding week, 1864	106,219 00
Increase	$43,818 00

The earnings of the Marietta and Cincinnati Railroad for the 2d week in Nov., 1865, were:

	1865.	1864.
Passengers	$9,336 45	$9,407 24
Freight	16,117 25	10,650 80
Mail, express & telegraph	1,175 00	1,084 48
Total	$26,628 70	$21,142 02
Total for the fiscal year commencing Jan. 1.	$1,056,083 48	$878,300 78

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Nov. 14, were:

	1865.	1864.
Passengers	$3,206 52	$2,743 78
Freight	10,888 25	9,480 39
Express	130 22	104 16
Mail	296 58	296 58
Total	$14,521 57	$12,624 86

Receipts from January 1 to Nov. 14:

1865	$618,145 20
1864	512,234 47
Increase	$105,910 73

The traffic of the Great Western Railway for the week ending Nov. 17, 1865, was as follows:

Passengers	$34,287 03
Freight and live stock	43,519 66
Mails and sundries	3,229 91
Total	$81,036 60
Corresponding week of 1864	56,195 16
Increase	$24,841 43

☞ The Atlantic and Great Western Railway is to be connected with the Ohio and Mississippi Railroad by a short line extending from Hamilton to Pierceville; passing the Indianapolis and Cincinnati Railroad near Sunman, and the Whitewater river near Harrison. A saving of 30 miles in distance will be made. The surveys are now in progress.

☞ The St. Louis, Jacksonville and Chicago Railroad, passing through the counties of Jersey, Green and Madison, Illinois, has just been completed.

Railroad Earnings--Monthly.

The earnings of the Ohio and Mississippi Railroad line from Cincinnati to St. Louis for September were:

	1865.	1864.
Eastern division	$206,004 63	$195,451 24
Western "	144,343 40	136,948 83
Total	$350,348 03	$332,400 07
Increase of 1865 over 1864		17,947 96

Comparative earnings from Jan. 1, to Sept. 31:

	1865.	1864.
Eastern division	$1,601,427 23	$1,420,310 72
Western "	1,122,088 64	990,566 90
Total.	$2,723,515 87	$2,410,877 62
Increase of 1865 over 1864		$312,638 25

Journal of Railroad Law.

DAMAGES FOR BREACH OF CONTRACT.—DELAY IN TRANSPORTATION.

The action of Hamilton *vs.* McPherson was brought by the plaintiffs, against the defendants John McPherson and others, as common carriers for damages for injury to a quantity of oats, caused by their heating and becoming mouldy, during the months of June and July 1851, in consequence of the failure of the defendants to transport them from Perth, in Canada, to Oswego, within the time required by their contract.

The defendants' counsel requested the Judge to charge that the defendants were not liable to respond in damages for the injury sustained by the oats while they were at Perth, and before they came to the possession of the defendants. The judge refused so to charge, but instructed the jury on this point, "that the defendants were liable to respond for any damage the oats sustained, after the defendants should have entered upon the performance of the contract. To the refusal and to the charge on this point the defendants' counsel excepted.

The jury found a verdict in favor of the plaintiffs for seven hundred and thirty dollars; for which amount, with costs, a judgment was entered against the defendants, which has reversed on appeal by the defendants to the general term, and a new trial ordered. From this judgment the plaintiffs brought the present appeal, with a stipulation that if the judgment appealed from shall be affirmed judgment absolute may be entered against them.

The following opinion was delivered by SELDON, J. A good cause of action was shown on the part of the plaintiffs against the defendants, for neglecting to proceed with reasonable diligence in forwarding the oats after the notice which they received on the 27th day of May, and the only question which the case presents relates to the amount of damages for which the defendants are responsible.

The rule applicable to such cases has been briefly and accurately stated by Mr. Powell, as follows: "Damages for breaches of contract are only those which are incidental to and directly caused by, the breach, and may reasonably be presumed to have entered into contemplation of the parties; and not speculative profits, or accidental or consequential losses," (Powell on Ev. ch. 21 § 54, p. 2165; Hadley *vs.* Baxendale, 9, Wels. H. and G. 341; Griffin *vs.* Colver, 16 N. Y., Rep. 494, 5: Code Nap. § 1150, 1151; Mayne on Dam. 15). I think the instructions given to the jury in this case, which were excepted to, cannot be reconciled to this rule. The damages to the oats, from heating, were not "incidental to, or directly caused by," the delay in moving them. The delay if proper care had been bestowed upon the oats, would not have resulted in their injury. The direct cause of injury therefore was the want of care. The necessity for extra care arose from the delay, and the expenses attending such necessary care, if it had been bestowed, would have been the direct result of the defendants breach of contract. For such expenses they would have been answerable, but were not answerable for the damages which resulted from the failure to bestow that care. The law, for wise reasons, imposes upon a party subjected to injury from a breach of contract, the active duty of making reasonable exertions to render the injury as light as possible. Public interest and sound morality accord with the law in demanding this, and of the injured party, through negligence or wilfulness, allows the damages to be unnecessarily enhanced, the increased loss justly falls upon him. (Miller *vs.* Mariners' Church 7 Greenleaf, 51; Shannon *vs.* Comstock, 21 Wend. 461; Heckschor *vs.* McCrea, 24 id. 309; Clark *vs.* Marsiglia, 1 Denio, 317; Spencer *vs.* Halstead, id. 606; Laker *vs.* Damon, 17, Peck, 284.)

If the injury to the oats had been the necessary consequence of the delay, and the contract had been entered into by the defendants in view of that consequence, in case of their failure in performance, (Hadley *vs.* Baxendale, 9 Exch. supra.) they would have been responsible for such injury because it would have been the direct result of their breach of contract. The case then would have been parallel to that of the failure of a railroad company to take milk or vegetables to market in accordance with previous contract, and other like cases suggested by Mr. Justice Mullen in his dissenting opinion in this case. In such cases, however, the injured parties could recover nothing for damages, which by reasonable diligence on their part, could have been presented.

(Miller *vs.* Mariners' Church supra.)

The burden of proving that the damages which have been sustained in such cases could have been prevented, unquestionably rests upon the party guilty of the breach of contract. (Cartigan *vs.* The M, and H. R. R. Co., 2 Denio 609.) As I understand the case, such proof was made by the defendants here; but whether the fact was conclusively proved or not, there was sufficient evidence to call for the submission of that question to the jury, which was taken from their consideration by the positive instruction of the judge, that the defendants "were liable to respond for any damage the oats sustained after the defendants should have entered upon the performance of the contract."

It is not material to inquire whether the duty of taking care of the oats rested upon the plaintiffs, who were the owners, or upon McDonald & Hall, who were the custodians of them. It is sufficient for the present case that it rested upon the defendants. No responsibility in this respect attached to the defendants, until they took possession of the property.

The judgment of the Special Term was properly reversed, and final judgment must be rendered against the plaintiffs in pursuance of their stipulation.

Denio Ch. J. and Davies, Wright, Emott and Marion Justices concuring.

Ordered accordingly.

Railway Sentiment in California.

We have on a former occasion alluded to the feeling which now pervades California, with regard to the speedy completion of the Union Pacific Railroad. This feeling is not comprehended in the Atlantic States. We have here such vast and immediate outlets for our commerce, such facilities of water communication, such short distances comparatively to traverse to foreign markets, that we cannot so readily or naturally understand the anxiety of the Californian on this subject. Nor do we do them full credit for their present exertions in this direction. The whole movements of these people, the governing idea, the basis of their future operations, and the foundation of their hopes for increased prosperity are part and parcel of this great idea. Whatever disadvantages they labor under, whatever defects they perceive in their present social condition, are in their unanimous judgment to be connected by the effects of the Union Pacific Railroad. We find this well stated in a recent letter in the Springfield *Republican*, written by its accomplished editor, Mr. Bowles, who has recently visited the Pacific coast and made the overland journey with Mr. Colfax. He says:

"In all these matters, to which I have devoted this letter—society, manners, morals, education, religion—the great want, the great reformer, is the Pacific Railroad. These, as much as mines and commerce, await the vivifying and elevating influence of that great instrumentality. Every discussion of the interests and the needs of this half of our continent ends here. All life on the coast is a circle leading to that. Everybody here sees this, realizes it, far more painfully than you possibly can in the East."

What is remarkable is that this conviction has found its way into the pulpit, and so profound is it, that the most celebrated divines do not hesitate to look forward to the completion of this work as a great moral and social agent, and the enterprise itself as one of their best allies. To give our readers some idea of the extent to which this opinion prevails among religious men, we give the following extract from a *sermon* recently delivered at San Francisco, by the Rev. Mr. Stebbins. We cannot do better than to quote what he said on this subject at length. It is a most philosophical and eloquent appeal, and should not be lost on those who on this side of the continent wish well to our faithful and patriotic brethren on the Pacific Coast:

"The primeval command to 'replenish and subdue' the earth, is promulgated anew to us on these outer borders of the world. We, upon this coast, need, above all material advantage, as the condition of a noble social life and progress, an unbroken and swift communication by railway and magnetic circuit with the places which we still fondly call our home. *The social effect of such relations would be unspeakable in giving permanence and quiet to society.* This longing, that comes like the sigh of the night wind over the habitations of men, would be hushed. When the continental railway and the ocean line to China shall be complete, the London cosmopolite will make the circuit of the globe in ninety days, and we shall be nourished by the blood of the heart of the world. Intelligence will be increased, society liberalized by intercourse, and extemporaneous adventure driven out by better industries, as in the olden time the temple of God was cleared of moneychangers by the presence of a superior spirit. Men have been attracted here by the dangerous and corrupting passion for gold. The inherent tendencies to barbarism in that adventure can be overcome and neutralized only by assimilation with the best forms of society, and bringing these distant places into close proximity with civilization, that the whole world may be tributary of its best things.

"It is not wise for us to flatter ourselves with false appearances or expectations. The bare historic fact is, that no fine state of human society has ever existed over gold mines. And the only ground of expectation we have that society here will prove an exception to the general law, is that the compensating influences of a beneficent Government and swift communication with the world of mankind will give us the laws, the manners and the religion which no gold-producing country has ever been able to make for itself. Man, here on these shores, contends not merely with the unreclaimed powers of nature, as the pioneer of New England or the Mississippi Valley but nature herself is dishonest. She bribes and corrupts him, and plays a trick on all his being. She sneers at his industry, makes his business a joke, and his word a lie. *The world must be imported here to make nature honest, and outwit her secret arts.* Nothing can save us from Spanish decline and Mexico littleness but communication with the world; that rapid and sure intercourse with human society, which assimilates the interests and the life of mankind. And I make this moral predicament concerning the growth and prosperity of our State: That the powers which have made her prosperous thus far have done the best, and that no great impulse of human affairs, having breadth and height and depth of permanent, untiring progress, can be felt here until the great highways are opened over sea and land; and the world, the many-sided world of industries and arts, and commerce and literature, is imported to us. The primeval command comes to us with the augmented authority of our providential vocation, and is reiterated to us in original sublimity of moral law, from every mountain summit which nature raises up as a barrier to our assimilation with the nation and mankind. It is only by the introduction of new powers that we can conserve those we have. *Compared with this all other questions for us are idle.* And the people of California can make no better investment of their time, their talents, their money, or their public spirit—and I would that I could persuade you to believe it and quit, all your lesser contradictions—than in turning all the powers of the State to overcome the barriers which lie between her and the nation's hearthstone, between her and the heart of the world.

"Human society is made for religion:—for the ends and aims which religion suggests. Whatever promotes the assimilation of mankind, whatever brings nations and people into communion, thus supplementing each other in the completeness of humanity, is a step in the advancing kingdom of God. This earth is a musical instrument not yet fully strung. When every coast shall be peopled, every mountain barrier overcome, every abyss spanned, and the peoples of the earth shall flow together as in prophetic vision to the mountain of the Lord's house, and harmony of common good shall persuade the lion and the lamb; when laws shall be greater than conflict, and order than violence; when manners shall enrobe the races as a garment of beauty, and religion conserve society as virtue conserves the soul—then this earth shall give its sound in harmony with the infinite intelligence, and the providential purpose shall gleam from every summit as the beacon lights of mankind."

☞ The Baltimore and Ohio Railroad Company, says the Washington *Star*, have "decided not to come direct to Washington and Georgetown in laying down the branch railroad from the Point of Rocks, but propose to make a connection with the Washington branch at either Bladensburg or Laurel."

Indiana State Debt.

At the opening of an extra session of the Indiana Legislature, on the 14th inst., Governor Morton stated that the amount of the public debt of the State, consisting of two and a half and five per cent. registered stocks, is $7,418,960 50. Of this amount $5,342,500 is five per cent., and $2,076,460 50 is two and a half per cent. stock; that is, stocks upon which interest is paid at these rates. After a lengthy review of the condition resources and liabilities of the State in view of the debt, the Governor concludes that, while the State is not bound to pay the principal of this debt on the 19th day of January, 1866, or be considered in default, yet that it is not at liberty to postpone the payment of it indefinitely; that to do so would be to violate the fair construction o the certificate itself and the explicit understanding that existed in the Legislatures of 1846 and 1847 and in the convention of 1850, as shown by their several enactments and debates; but that she is bound to make provision to pay the debt within such reasonable time after the twenty years as may comport with the original understanding of the parties, the ability and condition of the State as left by the war, the faithful performance of her contracts and the preservation of her good name. The message continues, that if the trust funds of the State could be invested in her own stocks it would greatly cheapen and simplify her financial system, and restore to its administration that public confidence the absence of which has long been felt. Should the assets of the sinking fund be converted into the State public debt, as the Governor, has suggested, the whole debt of the State left outstanding in the hands of her creditors to be provided for might be thus stated:

Two and a half five per cent. stock	$3,386,080 38
War loan bonds	438,000 00
Vincennes University bonds	66,685 00
Floating debt, estimated at	100,000 00
Total debt	$3,990,765 38

Railroad Extension.

We understand that the contract has been let to Mr. C. F. Harvey of Chocolate, for building a railroad from Marquette junction to Chocolate, on Lake Superior, a few miles from Marquette; to be completed by the 1st of June next. This is an extension of the Peninsula Railroad, which will straighten the route from Escanaba to Marquette, and save the change of cars. This is a matter of great importance, not only to the Lake Superior country but to all doing business in that region. All freight now has to be transferred from the P. R. R. to the Bay de Noquet and Marquette Railroad, which latter road has sufficient business to employ all its rolling stock without taking the trade from the bay shore to Marquette. The new road will as we have said before, straighten the route, and cut off many miles of the distance.—*Green Bay Advocate.*

☞ The officers of the Mississippi and Tennessee Railroad, recently elected are: F. M. White, President; Minor Merryweather, Secretary and Treasurer; Miles Merryweather, Chief Engineer; O. T. Livermore, General Superintendent.

☞ The first engine of the Southern Minnesota Railroad is at the La Crosse depot, awaiting to be transported to its destination.

☞ All the stock of the Kent county (Md.) railroad has been taken.

BULKLEY & McNEILL,

CONSULTING ENGINEERS,

NATIONAL BUILDINGS,

57 Broadway, New York.

THE undersigned having established themselves in this City, and opened an office as above, would respectfully inform their friends, and those who may require their services, that they are prepared to furnish designs, specifications and working drawings for marine and stationary machinery of every description.

Those having mechanical designs which they wish elaborated, are invited to consult with the above, who will give professional advice, and if required furnish drawings, and estimate on the value of such inventions.

The undersigned also offer their services as general agents for the purchase and sale of all kinds of machinery.

Their experience in this country and in Europe in the practical designing of machinery, and the possession of designs, and detail drawings from approved European and American Workshops, render them confident of conducting satisfactorily any business that may be entrusted to their care.

6m47 HENRY W. BULKLEY,
THOMAS E. McNEILL.

OFFICE OF THE NEW YORK CENTRAL R. R. Co.,
ALBANY, November 1st, 1865.

THE ANNUAL ELECTION FOR DIRECTORS OF this Company, and for three Inspectors of the next Election, will be held at the Office of the Company, in the Exchange, in the City of Albany, on the second Wednesday (the thirteenth) of December next. The polls will be opened at eleven o'clock in the forenoon, and will continue open for two hours thereafter.

By order of the Board of Directors,
6t44 ROBERT L. BANKS, Secretary.

To Railroad Companies or Contractors.

THE Advertiser has several Steam Excavators, with Cars, and all the material adapted for speedily executing heavy excavations, filling of trestle work, or loading trains with material for gravelling.

Any persons having such work to do will please address, with particulars, Box 366, Clinton, Mass. 6m-35

THE

CLEVELAND, FT. WAYNE & CHICAGO RAILROAD COMPANY,

OFFER FOR SUBSCRIPTION

1,000 FIRST AND ONLY

7 Per Cent. Mortgage Bonds,

OF 1,000 DOLLARS EACH,

On the Middle Division of their Road, running from Tiffin, Ohio, to Fort Wayne, Indiana, a distance of 102 miles.

—o—

The right of way all secured—grading done and ready for the iron. The Company have purchased the iron for 25 miles, a large portion of which has been shipped; the construction is now going on.

The work is contracted to responsible parties, who take half cash and half in the Bonds of the Company in payment.

Subscribers to this Loan will not be bound to pay their subscriptions—only as fast as the iron is laid. When twenty-five miles is completed, then one-fourth part of this subscription shall become due and payable; the Bonds to be delivered as fast as payment is made, and so on until 102 miles is all completed.

Further information may be obtained upon application at the office of

American Railroad Journal.

New York, Saturday, December 2, 1865.

East India Railways.

We have from time to time given in the JOURNAL an account of the progress of the Railway system in India, showing that it was planned on a most extensive scale, and is in successful operation. It became evident to the British Government years ago, that if India was to be turned to good commercial account, a better method of transporting its valuable products to the sea, than by bullock carts must be provided. The cost of this transportation generally added 100 per cent to the original value of the articles. It was under this condition of affairs that English capital was induced to enter upon this distant field, and to construct lines of railways in that country. Lord Dalhousie Governor General of India an enlightened man, gave the idea his cordial and yet prudent support, sanctioning no projects which did not offer a reasonable prospect of fair dividends to the shareholders. Governmental aid was accorded to a certain but considerable extent, on the most favorable terms with certain checks on the companies, which on former occasions we have fully explained. Other advantages were afforded them. All the ground required for construction was given them free of cost except through large towns. There was no parliamentary jobbing necessary, there were no law expenses, no opposition to encounter or buy off, no vested interests to fear, and no lawyers or consulting counsel to receive extravagant fees. Of course one-half the preliminary difficulties were entirely avoided, and a large amount of expenditure saved at the start. The result has been most favorable. It is not fifteen years since the first locomotive was sent from London to Bombay, and about thirteen, that the first section of railway was opened from Bombay to Tauna a distance of twenty miles. In 1869–'70 the whole of the grand trunk lines will be fully completed. The extent of these lines in the aggregate is five thousand miles, constructed at a cost of £77,000,000 or about $385,000,000. There will then be uninterrupted railway communication from Calcutta in the South East to Mooltan and Peshawar in the North West, to the frontier. Also from Bombay on the West coast to Madras on the Eastern coast, across the peninsula, also from Bombay to Surat through all the great cotton districts up into Central India, meeting the line from Calcutta. Thus a traveler may proceed from Bombay to Peshawar at the extreme North West of the frontier, come back in a diagonal line by Delhi, Caunpore, Allahabad, through Bengal south easterly to Calcutta crossing the Peninsula; thence if he chooses, back and across to Madras, and all by railway. So that in fact the East India Railway system includes three long and distinct lines, crossing Hindostan at such distances apart, as to give opportunity to construct interior and tributary lines, connecting with these great trunks to any desired extent, and securing a variety of markets and access to the Ocean on the East or West coasts, and the three great marts of Calcutta, Madras and Bombay.

The plan is certain by a very magnificent one, and thus far both in the present results and in the future, promises all and more than was anticipated. But a very few links in these lines remain to be completed; already the traffic is large and remunerative, and the growth and production of cotton have been secured on an unusual scale, as may be seen by the exports of that article to Europe within the last two years.

To the American Engineer, this statement is suggestive. If the British Government has determined that the great peninsula varying in width, from 600 to 1,500 miles could not be accommodated by one line, but has traversed it with three, one of them longer than the Union Pacific, it is plain to be seen that to a similar result, we ourselves will have to come at no distant day. The two cities of Calcutta and Bombay, on opposite coasts bear no comparison whatever in wealth or importance to New York, or Boston, and San Francisco, and the intermediate territories of India in the one, can bear no comparison with those which lie between the Atlantic and Pacific. There are no mining countries on the East India lines, and but a tithe of the variety of useful products of the soil to which our own line will give an outlet. Certainly therefore we may expect that instead of a single line as now being constructed there are those living who will see within 20 years, more than one line to the Pacific coast. What has been done in India in a hot and unhealthy climate among a half civilized people in fifteen years, can certainly be accomplished here by the intensified moral, physical, mental and financial force of our own wonderful race.

Utica and Black River Railroad Extension.

At the meeting of the Committee from the Board of Directors of this road, and the Committee appointed at the Lowville meeting, held in Utica on the 16th ult., to confer relative to an extension of the Utica and Black River Railroad, the following arrangement was agreed upon:

The old Board agree to construct their road, on their own account, from its present terminus, at Boonville, either to Lyons' Falls or to Turin, ten miles this way, and put the whole road, with all its rolling stock, depots, machine shops, tools and machinery, into the new company as capital at $1,500,000. The location of the terminus of the road at Lyons' Falls or Turin is to depend upon the location of the road this way, through Lewis County. They further agree, if ratified by a full Board, and the people of Lewis and Jefferson will subscribe enough to procure the right of way, grade, lay the ties and make the road bed, ready to receive the iron, that they will mortgage the whole road, old and new, if necessary, to purchase the iron and lay the rail.

The Committee, on the part of the people, ac-

cepted these propositions as satisfactory, and assured the directors that an earnest effort should be made to raise the necessary subscription along the route, to fit the road bed for the iron.

From $15,000 to $18,000 a mile it was estimated would be required for the object. The route selected, price of labor, material, &c., might of course vary this sum. The Advisory Director from Jefferson and Lewis will be received into the councils of the old Board, and a new Director hereafter so often as $200,000 of new stock is subscribed. Dividends also will be paid new stockholders as fast as sections of ten miles or so of the road is made ready for use.

The subject of a route for the proposed road was discussed at the meeting, and dismissed with the idea that that route will be selected which backs up its desire with the largest amount of funds, although the subject of grades, curves, general expenses, &c., will be considered.

Sandusky, Mansfield and Newark Railroad.

The earnings and expenses of this road for the years ending December 31st, 1863 and 1864, have been as follows:

Earnings:	1863.	1864.
From passengers	$120,878 39	$185,126 85
" freight	131,186 23	174,915 13
" mails, exp., etc.	20,137 80	22,765 53
	$272,202 42	$382,807 51
Expenses, viz :		
Repairs of engines	$14,582 72	$34,680 72
" cars	18,898 98	50,362 82
" track	57,860 12	57,157 13
Train expenses	25,036 56	37,500 07
Station "	22,526 99	24,806 08
Shop "	3,658 66	7,126 94
Fuel	16,343 88	21,561 34
Oil and waste	2,727 63	6,570 20
Salaries, etc	18,283 11	24,377 57
	$179,918 65	$282,142 87
Less paid toward change of gauge included in the above expenses		88,823 24
	$179,918 65	$193,319 63
Net earnings	$92,283 77	$189,487 38

Compared with the previous year the gross earnings of 1864 show an increase of $110,605 09; with an increase in operating expenses of $13,400 98—making the increase in net earnings $97,204 11.

The change of gauge of track was made in nine days, commencing on the 5th and ending on the 14th of March. For nine months subsequent to that date the earnings were $307,209 80—an increase over the corresponding period of the previous year of $82,269 96; the average monthly earnings being $34,134 43, against $19,530 60, the average monthly earnings for the same months for seven years prior to 1864.

Tables are given showing the benefit derived from the business of the Baltimore and Chicago Line, over which the freight began to move about the middle of December, 1863, and the largely increased earnings since the change of gauge.

The extraordinary expenses above referred to, consist mostly of the charges to which the company were subjected in changing the track and machinery from 5 feet 4 in. to 4 feet 9½ inches, and in putting in connecting tracks with other roads.

The expense of changing the gauge of the locomotives greatly exceeded the original estimates, from the fact that the boilers and furnaces were too wide to be used in rebuilding, and new ones had necessarily to be supplied.

The gauge of the passenger, baggage, mail and hand cars has also been changed.

Four new locomotives had been supplied of the new gauge by the Rogers' Locomotive and Machine Works. With these and the old locomotives belonging to the company, the road is well supplied with motive power. Not less than two passenger and fifty freight cars were required to be added to the rolling stock. The report says:

The domestic bond debt at the last annual meeting had been reduced to $9,100, since which time all has been paid except $2,000. Of this last sum the payment of $1,500 has been suspended by legal proceedings commenced by an attaching creditor against his debtor, making the company a party.

Since the last annual meeting a contract has been entered into between the Cleveland and Toledo Railroad Company and this company, to establish the line for the transportation of freight and passengers between Baltimore and Washington on the east, and Chicago on the west, by way of Toledo, Monroeville, Newark and Bellair; which contract adopts for its terms and conditions the basis, substantially, of the contract made between the other companies whose roads compose the line, referred to in the last annual report.

In July last the Board of Directors in anticipation of the payment of the coupons that fell due on the first day of January, 1865, passed an order to fund all the coupons that matured prior to that date.

The resolution authorized new seven per cent. coupon bonds, constituting the "Funded Bond Debt," to be prepared and executed to an amount equal to the said past due coupons, and interest thereon at seven per cent., to be computed from the time of their maturity to the first day of January, 1865, payable at the Continental Bank, in the City of New York, on the first day of July, 1875; the coupons to be made payable at the same place on the first days of January and July, yearly.

Mr. C. F. Timpson, Cashier of the Continental Bank, New York, was appointed a Trustee, and to exchange the bonds for the over due coupons, with authority to hold said coupons, the lien of which, under the mortgage, was to remain in full force in his hands, as collateral security for the payment of the bonds thus exchanged, and in case of default in the payment of the "Funded Bonds" then, after thirty days, the default still continuing, the bonds to be delivered to the company and the coupons returned to the owner.

The Funded Bonds have been duly executed, and the Trustee at last dates had completed the funding of $1,190,000 out of $1,290,000. The funded and original bonds will amount to about $2,020,000.

The condition of the company both in respect to its finances and its business prospects is encouraging.

Quite recently passenger trains have been put on the route to run in connection with the Baltimore and Chicago line, and though this project is yet too much of an experiment to justify us in speaking positively, we are already beginning to feel the favorable influence of it on our passenger business, and it is believed it will increase as the country becomes more free from disturbances. Our general passenger business has been good.

When the road shall be completed from Steubenville to Pittsburg, it will contribute to increase the business of this company, both in freight and passengers, in connection with the route by Newark, between Pittsburg and the Lakes.

The character of the freight traffic promises to be much more stable than when the bulk of it consisted of a few articles raised along the line. The earnings hereafter will be more equally distributed and full employment given to our equipment and employees throughout the year.

Although the business prospects of the company remain, to some extent, to be tested by experiment, enough is already known to justify the expectation that the change of gauge will materially change the character of the enterprise, and that the freight business which may be done by the company for the year 1865 will be limited only by its ability to do it.

Our financial condition will appear from the following statement. The company has paid off some $10,000 of old liabilities, has paid for the four new locomotives, rebuilt three on the present gauge and made considerable progress in rebuilding two more, has purchased and paid for material for rebuilding locomotives and cars to the amount of $18,323 20, now on hand; has purchased lots and grounds and put in connecting tracks with other roads; altered 162 freight, passenger, mail and baggage cars from the old to the new gange, paid $10,000 for ten new freight cars, and built twenty one more in our own shops; has expended $10,591 in building new water stations, renewing bridges and in supplying wood in excess of the amount on hand last year; newly ballasted six miles of track, and graded and laid with iron, one and a quarter mile of new track at Newark, to overcome sharp curves and steep grades—all which expenditures have been met by the ordinary earnings of the year and the means on hand at the commencement of the year.

In the meantime the road bed has been well kept up, the machinery kept in good order, and money enough reserved from the earnings to pay the interest that fell due on the first day of January, 1865, leaving $11,171 95 in the Treasury.

After all that has been done, however, much remains to be done. The wants of the company increase with its business. Shop room and shop machinery, locomotive sheds, and greater yard and wharf capacity, are much needed at Sandusky, but these must be postponed.

Yet it cannot be expected that the earnings of the road will be sufficient to pay running expenses and the interest on $2,020,000 of bonds, and also to pay the expense of rebuilding the locomotives and build the cars above recommended to be supplied.

However desirable it may be to keep the debt of the company within present limits, it would not be good economy to forego the use of all of the old locomotives, some of which are partially rebuilt, or of the above number of freight and passenger cars, so much needed, in order to avoid the expense necessary to provide them.

This subject has engaged the anxious consideration of the Directors, and they have concluded to recommend a new issue of 7 per cent. income bonds not exceeding $100,000 to be used for these purposes.

PROFIT AND LOSS ACCOUNT, Dec. 31st, 1864.

Balance January 1, 1864	$405,904 08
Earnings, as above	382,807 51
Interest account, 1864	557 57
Freight suspense account	266 81
	$789,535 97

CONTRA.

Expense account, as above stated	$282,142 87
Taxes 1863, and part 1864	9,145 17
Internal revenue taxes, 1864	8,248 01
Special expense account	1,224 95
Grain suspense account	1,768 92
Attorneys fees, costs of suit, etc	110 00
Car mileage, balance	18 71
Balance to new account	486,877 84
	$789,535 97

The number of passengers carried in 1863 was 137,608, of which 1,799 were through, and 135,809 way; in 1864, 189,646, of which 9,372 were through, and 180,274 way—showing an increase in 1864 of 52,037. The number of tons of freight carried in 1863 was 63,358; in 1864, 77,672½—an increase of 10,320 tons.

The receipts from all sources during the year,

including $19,677 20 from previous year, were $447,680 85; and the disbursements were:

Redemption of bonds	$7,808 77
Interest and taxes	18,752 67
Real estate	1,344 00
New locomotives	31,154 70
New track at Newark	6,291 60
Bills payable	12,500 00
Vermilye & Co. (deposited)	44,300 92
Expenses	312,551 51
Miscellaneous	1,804 73
Cash on hand, Dec. 31, 1864	11,171 95
	$447,680 85

The company have 7 locomotives; 8 passenger, 8 baggage, 2 caboose, 20 stock, 119 box, grain and merchandise, 40 platform, 22 hand and 7 ditching cars. Miles run by locomotives, 209,-011.

President.—C. L. BOALT.

Directors.—C. L. Boalt, John Gardiner, Wm. P. Chapman, John W. Sprague, Samuel M. Robinson, Robert McComb, H. P. Warden, James Lyon and Jerome Buckingham.

Superintendent.—JAMES H. STEWART.

Treasurer.—WM. P. CHAPMAN.

Master Mechanic.—THOS. HOGG.

Richmond, Fredericksburg and Potomac Railroad.

A meeting of the stockholders of this company was held at Richmond, on the 15th ult., when the following officers were re-elected, viz: P. V. Daniel, Jr., president; J. B. Winston, treasurer. Directors on the part of the stockholders—G. A. Myers, Esq., Dr. R. W. Haxall, Dr. Charles S. Mills and Elihu Chauncey, Esq. On the part of the Commonwealth—Andrew Johnston.

The annual report shows that the income of the company during the six months ending the 31st of March 1865, was $585,663, while its expenses during the same period were $484,785, leaving a net revenue of $100,878, all in Confederate States currency, the only currency then in use; that the income earned during the succeeding six months in United States currency has only about equaled the expenses of the same period—the income amounting to $69,441, and the expenses to $69,531—unavoidably resulting from the destruction of the bridges on the road during the war, and the necessity of rebuilding them.

The bridges over the Rappahannock and Accocuk Run are now permanent structures of the best material. To procure the means to repair the road the directory found it necessary and expedient to borrow the sum of $100,000 and to issue therefor the company's obligations at their par value, bearing 3 per cent. interest, payable on the 1st of July, 1867, and secured by a pledge of the net revenues of the company until paid or provided for.

The income during the months of August and September amounted to $41,925, although until the 23d of September the road was not completed. The income for the past month of October exceeded $30,000 and such is the increase of travel and freight over this road, that it will be impossible to accommodate it without additional cars and engines of greater power, for procuring which arrangements have been made. The increase arises, too, during the existence of a competition wholly unprecedented. The roadway, machinery and other equipments of the company are in excellent condition.

Perkiomen Railroad.

The corps of engineers under the direction and supervision of S. W. Mifflin, principal, and Col. S. Wright, assistant, finished their labors on the 8th ult., in thoroughly examining the country, and making a survey in running the line of this proposed road. The following description of the route is from the Norristown, Pa. *Register*:

"Commencing at a point on the Reading Railroad near Pawling's bridge, and running up and crossing the Schuylkill near the Ferry below Brower's Locks; from thence along the west side of the Perkiomen, crossing the Reading Turnpike about 100 yards distance from the Perkiomen bridge; following the west side of the Perkiomen to within one-fourth of a mile of Hunsberger's bridge; there crossing and following the Macoby creek, and passing through Pennsburg to the Hosensack valley; thence along the valley to the Lehigh or South mountain, passing through the mountain by tunneling at Leibert's Gap; from thence along the Lehigh (Creek) Valley, crossing the East Penn. Railroad near Emmaus; and from thence passing on and very favorably connecting with the Auburn road, connecting with the Reading and Pottsville road below Pottsville, making a direct line of road from Pottsville as well as from the Lehigh Valley road through to Philadelphia, opening an avenue of trade equal to any other in Eastern Pennsylvania."

The length of the proposed road is about 40 miles. The *Register* says that the "engineers have returned to their proper quarters for the purpose of making out their final report with the instructions from the Reading Railroad Company to commence locating the road as soon as possible."

Railroad to Point of Rocks.

There have been many speculations and conjectures as to the course which the Baltimore and Ohio Railroad Company will pursue in making the connection from the Point of Rocks to Washington. The engineers have been engaged for several weeks in this neighborhood in running experimental lines, and we suppose the board of Directors, on their report, will determine the line. They have crossed Rock Creek at several places; the last, and, as we have heard, the most feasible, just above Veirs' Mill, about two miles and a half from Rockville. The nearest point of approach to the village is about half a mile off, on the farm of Mr. S. M. Lyddane.—*Rockville Sentinel.*

☞ The Utica *Observer* says that the track on the Whitesboro Street Railroad is going down towards Whitesboro at a rapid rate. Columbia street has been "laid out," and the workmen are now engaged on Whitesboro street.

☞ A double track is to be laid on the Norwich and Worcester Railroad from Fisherville to Worcester, the amount of business on this road demanding this improvement.

Virginia Central Railroad.

The stockholders of this road held their annual meeting in Richmond on the 23d ult. Col. Fontaine, the president, made his annual report. It gives an interesting account of the labors performed in repairing and reconstructing the road which is now open to Washington, the United Strtes mails and the freights of the Adams Express Company being transported over it. The credit of the company is unimpaired, its earnings large, and its prospects highly flattering. A resolution was adopted asking authority from the legislature to make a loan of $300,000. Gen. Wm's. C. Wickham was elected president by a majority of 300 votes.

The Sturgeon Bay Canal.

This is a proposed route between Lake Michigan and Sturgeon Bay across the portage of 1½ miles, to shorten the distance for vessels between Green Bay and Milwaukee 200 miles at an expense of half a million of dollars, including a break water at the Lake outlet. One hundred vessels per annum enter Green Bay every season, and are much exposed to the danger of being wrecked. These transport 150 millions of feet of lumber. At the approaching session of Congress assistance by a grant of public lands will be asked for this meritorious project and should be granted.

Atlantic and Great Western Railway.

At a meeting of the directors of the Atlantic and Great Western Railway Company (consolidated) held at Meadville on the 5th of October, it was *Resolved*, That there be, and hereby is, established a principal office of this corporation at Kent, Ohio, on the line of the railway in that State; and a principal office at Meadville, in Pennsylvania, on the line of said railway in Pennsylvania; and a principal office at Jamestown, in New York, on said line; also an office at the City of Buffalo, N. Y., and an office at the city of New York; and that the Secretary give public notice hereof, as required by law.

☞ A decision has been rendered in the Court of Appeals, in the case of the corporation of this city against the Third-avenue Railroad Company, for the recovery of license fees and penalties. The Third-avenue and one or two other companies made an agreement with the corporation when the roads were constructed to pay the license fee then allowed by law. In 1858, the corporation imposed a fee of $50 on each company, which the Third-avenue Company refused to pay. The decison rendered by the Court of Appeals declares that the original agreement is binding, and that no additional license fee can be exacted.

☞ The Illinois and Michigan Canal closed last week. The water will be drained off and work commenced in deepening the canal, so as to draw water from Lake Michigan into the Illinois and Mississippi rivers. The canal will be deepened from 9 to 14 feet for a distance of 28 miles.

☞ At a meeting recently held at Leavenworth, Kansas, resolutions were passed in favor of building the Leavenworth, Lawrence and Galveston Railroad, and for the immediate construction of a railroad bridge across the Kansas River at that point.

Chicago and Northwestern Railway.

History of the Peninsula Railroad.

(Continued from Page 1121.)

To carry out and perfect the plans of this company for securing greater certainty of earnings, and more economy in the management of their roads, to the mutual advantage of the people using them and the parties owning them, and not with any blind and stupid desire of impossible monopoly, as has been sometimes maliciously or ignorantly asserted, the Board of Directors found it necessary to secure a controlling interest in the stock of the Chicago and Milwaukie road, the only remaining line in competition with the roads of this company, in order to secure to that road and to the roads of this company fair earnings, and to prevent the possibility of such an unwise and injurious competition as had previously existed between the Galena and Northwestern roads.

To effect this successfully, it was of course necessary that it should not be made public, even to the extent of any general previous consultation with stockholders.

After due consideration, the Board, becoming fully satisfied of the advantages and necessity of this movement, reluctantly assumed the responsibility to advise it, in the belief that their duty to those they represented required it of them.

An exchange of the stocks of this company for a majority of the stock of the Chicago and Milwaukie Company was thereafter effected on the terms hereinafter set forth.

Thus promptly to secure a majority of the stock of that road naturally involved some extra cost, a trifling consideration, however, in comparison with the advantages to result therefrom to the roads of this company, and to the stock of the Chicago and Milwaukie Company, in greater certainty of earnings, secured and otherwise.

Had this company failed in effecting this protection against undue competition, and had the undue competition apprehended with the Chicago and Milwaukie road, in connection with the Milwaukie and St. Paul Railroad, now forming with it a continuous line to the Mississippi at La Crosse, occurred, this company might have felt obliged, in self-defence and protection, and in order to secure a connection with the Upper Mississippi, an object and end which in that case would have become necessary and indispensable to their business and prosperity, to construct a line of road, already carefully surveyed and estimated, from Madison to the Mississippi River at Winona, above La Crosse, at an expense of about $6,000,000; and thus creating three lines of road to the Upper Mississippi, at great additional cost to this company, and seriously affecting unfavorably the Milwaukie and St. Paul and the Milwaukie and Prairie du Chien roads, which roads are as yet fully equal to all the business of that region, and which roads, with proper running relations and connections with the roads of this company, (which it is hoped may, ere long, be permanently established and agreed upon,) can, with this company, largely profit by the organization and plans of this company as now established.

The new direct route would have had certain advantages for local business, and being some 40 miles shorter than the present route, would have had great superiority in commanding the through business. On the other hand, the very high cost of materials and labor was a grave objection to undertaking, at present, new construction on a large scale, and made it cheaper and safer to seek protection from excessive competition by a good investment, which would harmonize existing lines at a fifth of the cost of constructing a new one at the present time.

Under these circumstances, the prospect of triumphant success in competition was resigned for the wiser and more prudent policy of liberal co-operation.

The various chartered rights and franchises of this company, as now consolidated and organized, are ample, liberal and perpetual; and are free from injurious or damaging restrictions.

These consolidations and changes, necessary to secure the present very desirable and efficient organization, now enjoyed by this company, were not for a time sufficiently comprehended by all, to prevent some alarm on the part of those who did not fully understand their objects, or were induced to give too much heed to stock jobbing misrepresentation in regard to them, or who were unnecessarily alarmed at the term "consolidation."

Experience should have long since taught all, what measure of consideration stock-speculating street rumors were entitled to; and the numerous past and constantly recurring consolidations of railroad and other corporations all over the country, and which are now so well understood, and so generally conceded to be desirable, advantageous and necessary, ought to have long ago quieted any alarm on that score.

The first great leading example of railroad consolidations was the New York Central Railroad, which corporation now includes not less than ten or a dozen original different railroad companies, some of which were utterly worthless as sources of income previous to consolidation; all of which are, by consolidation, made valuable and highly appreciated income-paying property.

The great New York and Erie Railroad was never a reliable dividend paying road, until after its absorption into itself of the various railroads leading from it to New York, (Jersey City,) to Buffalo and elsewhere.

The Pittsburg, Fort Wayne and Chicago Railway, now paying full interest upon all its securities, and ten per cent. dividends upon all its stock, and with a large surplus of net earnings beyond, with which it is constantly perfecting itself, and adding to its machinery and facilities for doing business, is largely indebted for its great prosperity and success to the consolidation and reorganization into it of the several original comparatively inferior and non-dividend paying companies which now compose it. The same is eminently the case with the now largely profitable and paying Chicago, Alton and St. Louis Railroad.

The great Pennsylvania Central Railroad, now comprising, perhaps, the most extensive combination of railroad lines under one control in the country, is indebted, in good part, for its present great prosperity, and for the enormous earnings upon its main line of nearly $40,000 per mile per annum, to the business secured to it by the control, direct and indirect, of its various extensions and lateral routes.

The Chicago, Burlington and Quincy Railroad, through its series of consolidations, purchases and construction, has made itself one of the largest earning and best paying roads in the country.

There is every reason to believe that the great strength of position and security for future usefulness, earnings and profits, resulting and to result from the consolidations of this company, will produce effects as beneficial to it as those which have resulted from consolidations to other railroad companies.

In the commencement of railroad construction in this country, and for years thereafter, most railroads had their origin in local causes, and were mainly indebted for their construction to the convenience of them as a means of communication between important towns and points, not far distant from each other, and without much reference to their importance as great through lines and thoroughfares, which, by consolidation and extension, many of them have since become.

A careful study and examination into the security and strength of the position, relations, property and privileges of this company, the directions of its lines of road, and the extensive, productive and rapidly growing region of country included within, and extending beyond them, ought to convince the most sceptical, of the great and certain advantages which have been, with so much labor and devotion of time, at length secured to it, and which, so soon as the appointments and equipments of this company's roads shall equal the business offering to be done upon them, will insure such permanent and satisfactory results to all its stock and bondholders.

In the circular (or Fifth Annual Report) of the Board of Directors of the Chicago and Northwestern Railway Company, issued to its stock and bondholders, in June, 1864, immediately after its consolidation with the Galena Company, the urgent necessity for at least one thousand additional cars, and fifty locomotive engines, was strongly presented; and it was also stated, "that the continued and rapid increase of the population, productions and general business of the Northwest was such as to overtax its railroad thoroughfares, which were daily becoming less and less able to do the business offering, until the difficulty had become a grave one, urgently demanding relief to the farming and business interests of the country traversed by these thoroughfare roads." And the Board of Directors also stated, in the circular referred to, "that immediate action would be taken by them, and no proper efforts within their control would be spared to provide, at the earliest day possible, the means to equip the roads of this company to the extent that the business upon them, and the interests of the company and country, so imperiously demanded."

That large additional equipment was at that time peremptorily required, and must in some way be positively provided, was sufficiently, if not painfully, apparent to all acquainted with the existing pressure of business upon the roads of the company, and the necessities of the people doing it.

After deliberation, the Board decided to order a certain amount of machinery, cars and engines, and to make certain improvements in their roads, buildings and business conveniences, which their new relations, increasing traffic, and the safety of their valuable machinery and engines called for; the means for which to be provided from earnings, in part, and from issues, to a limited extent, if found necessary, of stock and bonds of the company.

As the season progressed, the necessity for a still greater number of cars and engines increased, and it was also found that the condition of the "Galena Division" especially required more new ties and iron, and greater repairs of track, water stations, cars, engines, &c., than was anticipated. This, added to high prices of labor and material, contributed to increase expenses quite beyond estimates, and led to the necessity of providing for them, in part, at a time of very considerable stringency in the money market and at considerable sacrifice; much more than all of which, however, was compensated for by the low prices at which by early contracts, engines, &c., were obtained, and by the increased and still increasing earnings, resulting from the larger equipment thus acquired; quite all of which equipment was found to be absolutely necessary to enable the company to market all the products accumulating along their lines of road.

The measures taken to provide, and subsequently, under the unfavorable circumstances which arose, to pay for this additional equipment, machinery, &c., and which the Board found it necessary to adopt, were equally indispensable to the protection and preservation of the interests and welfare of this company.

Notwithstanding the large increase of equipment, secured during the past year, this company is still in great need of at least five hundred further and additional cars. A much greater number and additional engines could at this time be fully and profitably employed, and the prospect of the continuance of an enlarged business throughout the year is at present very encouraging.

Every month, since the first of June last, our earnings would have been increased from fifty to one hundred and fifty thousand dollars per month, and probably some months to a still greater sum, by additional machinery, sufficient to earn that increased sum; and the only reason why the earnings of September, October and even November, of this year, will fall short of a million and more per month, if they do fail to reach that amount, will be because our present equipment is

insufficient and incapable of earning more than it now does.

After the payment of the existing floating debt of this company, the largely increasing surplus earnings of its roads will provide for a very considerable additional number of cars and engines, without interfering with the payment of interest upon bonds and dividends upon preferred stock, but will not be at all sufficient or equal to the supply of equipments required for the ensuing year.

The difficulties which this condition of things present are entitled to serious consideration.

No further improvements or increase of equipment, by means of a further increase of the capital stock or floating debt of the company, will hereafter be made, however desirable or urgent the necessity for it may become, this Board having firmly resolved that it will not hereafter tolerate the continued existence of a floating debt, nor further increase its capital stock, in conducting the operations of this company, as it is now constituted.

The necessities of the company, notwithstanding, are such, that the directors feel compelled, not only because of the increased traffic of its roads, but because of the demand of the people upon the lines of them, to proceed to the construction of a large number of additional cars and engines within the ensuing year, and to provide the means to pay for them from the sales of bonds, from surplus earnings, and from other sources than a temporary or floating debt.

The position which this company now occupies, with so large a district of country dependent upon it for railway facilities, makes it not only proper and profitable, but politic and necessary, to supply equipment in reasonable time, sufficient to move the accumulating and increasing traffic upon its several lines of road, and dependent upon them for transportation, and this the Board of Directors purpose to do.

At the repeated suggestions and request of very intelligent holders of this company's securities, and with a view to benefit and improve the character and value of its various issues and denominations of outstanding bonds, resulting from the several consolidations made with other roads—from the Appleton and the Green Bay Extensions—the purchase of the Elgin and State Line Railroad, and the construction of the bridge over the Mississippi River, and also to provide means for further equipment and completion, the company, during the past winter, prepared a mortgage upon all its lines of road within the States of Illinois and Wisconsin, and upon all their depot grounds, buildings, equipment, machinery, &c., to secure the "Consolidated Sinking Fund Bonds," of this company, and providing as follows, to wit:

That such bonds shall be for one thousand dollars each, and shall become payable on the 1st day of February, 1915, and shall bear interest at the rate of seven per cent. per annum, payable in the city of New York quarter-yearly, on the first days of February, May, August and November; that the issue for equipment and improvements shall be limited to $2,000,000, until February, 1866, after which it may be increased by $500,000; that all further issues shall be only in substitution of bonds now outstanding, as specified in the said deed of trust, and secured by prior liens; that the issue for such substitution shall not exceed at any time the par amount of the bonds for which they may be substituted, nor in all the aggregate of the present bonds outstanding February 1, 1865; and that such issues for the purposes of substitution shall only be made in case the company shall hereafter deem it expedient to make such substitution, and on such terms and conditions as this company shall deem advantageous to itself; the intention being, to make on this occasion a provision so comprehensive as to enable the company at any time hereafter, when it may seem advantageous and may be assented to by the holders, to absorb the present outstanding bonds in a single class of securities upon the whole property having fifty years to run, and amounting in all to about $20,000 per mile, on a line now making a gross annual earning of sixty per cent. of the whole bonded debt, with a sinking fund adequate to redeem the whole before they shall become due. The first $2,000,000 of these bonds are convertible into the preferred stock of this company at par, at the option of the holder, at any time before the first day of May, 1870.

A portion of this first issue of $2,000,000 of bonds provided for in this mortgage, over and above the amount of bonds proposed to be issued in exchange for the present various outstanding bonds of this company to be retired by such exchange, have already been disposed of to meet the wants of the company, as shown in the financial statement hereinafter presented.

The operations of the roads of this company through the past year, and for many years previous, have been conducted successfully, orderly, with a commendable spirit on the part of its employees, and remarkably free from accident and its attendant expenses. Its passenger trains of cars and engines are not excelled in quality, safety or comfort, and the regular and exact time which they make have eminently secured the travel and confidence of the public.

The legal proceedings instituted at Chicago against this company by certain parties, believed to be for stock jobbing and other equally unworthy purposes, but professing to aim to dissolve the consolidation made between the Galena and Northwestern Roads, after nearly all of the issues and exchanges of stock involved in that transaction had been made, however it may have originated or been prompted by personal feeling, mistaken impressions, or from want of proper information or otherwise, could not, even had success been possible, ever resulted, under the circumstances of the case, in anything more than a temporarily injurious effect upon the market value of the stock and securities of the company, and was not persisted in, therefore, after information as to the facts, except with a knowledge that evil only and not good must result.

The spirit that could thus unhappily prompt such action, or become an accessory after the fact, with the knowledge that injury to the numerous and unoffending stockholders by a temporary, but, nevertheless, mischievous depreciation of the market value of the stock of so large a corporation, could be the only consequence of such action, is not to be envied. It is not to such spirits, certainly, that the country is indebted for its growth and prosperity, or for the promotion of the happiness of its people, in the manifold blessings conferred upon them by all great public constructions and improvements.

Railroads in Iowa.

In 1864 Iowa had 816 miles of railway completed and their gross earnings that year were $2,533,710. The State Treasurer thinks their earnings for 1865 will be increased fifty per cent. During the past year several of the roads have been slightly extended, and nearly all are making arrangements to go forward with them vigorously next spring. The Burlington and Missouri River road is now bridging the Des Moines near Ottumwa. The Des Moines Valley road, has its track nearly completed to Monroe. The Dubuque and Sioux City road is open to Akley. The Pella, Newton and Marshaltown road, B. F. Roberts, President, of which a preliminary survey has been made. The Iowa Central, David Morgan, President, extending from the southern line of the State, by way of Centreville, Albia, Eddyville, Oskaloosa, Montezuma, Toledo and Cedar Falls to the northern line of the State—designed to connect on the south with the North Missouri road, and on the north with the St. Paul and Southern Minnesota—a large portion of the route has been surveyed, and the contracts let for grading several sections immediately south of Cedar Falls. The St. Louis and Cedar Rapids road, Mr. Angle, President, running from the Southern State line to Cedar Rapids by way of Bloomfield, Ottumwa and Sigourney, with efforts being made to deflect it to Iowa City and one or two other important points; this being also intended to connect with the North Missouri at the State line. There is another proposed route from Keokuk to Dubuque *via* Mt. Pleasant, Columbus City, Muscatine, Tipton and Anamosa. There is also another road projected, and we believe it is now sharing the general revival, running east and west through the southern tier of counties by way of Keosaqua, Bloomfield, Centreville, etc. And also on the Missouri slope, an important line from Council Bluffs to St. Jo., Mo.—*Burlington Hawkeye.*

New Railroad to the Oil Regions.

At a meeting of the Managers of the Pennsylvania and Philadelphia and Erie Railroad Companies in this city yesterday, the details of a contract were agreed upon with Miller & Courtright, two experienced contractors, to construct a railroad from Irving to Oil City, a distance of fifty-three miles, and three miles of siding, and to furnish the same with locomotives and cars; the whole to be completed with the equipments in all of May, 1866—or in about five months from this time—equal to about eleven miles per month. The parties are already negotiating for the iron at New York. The necessary means are to be realized by the issue of $1,300,000 of 7 per cent. bonds by the Warren and Franklin Railroad Company endorsed by both the Pennsylvania and the Philadelphia and Erie Railroad Companies. This proposed road will be an entirely new outlet for the oil production of our State, and, as may naturally be inferred, the parties engaged in making it expect large advantages from it. The oil product from the regions which it opens is estimated at from 5,000 to 7,000 barrels per day, and will require an equipment of from nine hundred to one thousand cars. Each car carries some sixty barrels, the freight on which from Oil City to its junction with the Philadelphia and Erie road, is one dollar per barrel. From these movements over one comparatively small link of railroad, some idea may be formed of the importance of this new Pennsylvania staple. In this connection, on the authority of an officer of the company, we state that the Pennsylvania Railroad Company have now on the Philadelphia and Erie Railroad 300 cars, that cannot reach the oil region at Titusville by way of Corry, so jammed is that road with business. This new source of wealth will bring immense sums of money into a region of the State that has heretofore been esteemed the least valuable portion of our Commonwealth, and will beside add largely to the profits of existing railway improvements.—*Phila. Ledger Nov.* 24.

☞ A road is being constructed from Manheim to Lancaster, Penn, called the Hammercreek Gap and Lancaster road. It is to be extended from Manheim northward through Hammercreek Gap to Pinegrove, and ultimately from Lancaster southward to Newcastle, Delaware, where coal can be shipped during any season of the year.

☞ We understand that Mr. Joseph S. Gitt will commence surveying next week, a route for a railroad between Wrightsville, this county, and New Oxford, Adams County, to connect at the former place with the roads running to New York, and to be extended from the latter place to the West and Southwest.—*Hanover (Pa.) Citizen.*

☞ The people of Nunda have held a meeting to consider the subject of the extension of the Genesee Valley Railroad from Mt. Morris southward.

☞ The Louisville *Journal* states that the Memphis and Charleston Railroad is again open for travel, and that connections are made at Grand Junction with the road to New Orleans.

☞ The Canal Commissioners have resolved to close the canals of this State on the 12th of December.

American Railroad Journal.

Saturday, December 2, 1865.

Stock Exchange and Money Market.

There is evidently a panic in the movements of the money market. The street is dull, and expectation stands on tip toe for something to turn up which may make profitable differences, either one way or the other.

The rumors of difficulties on the Rio Grande, a possible rupture with France, and the uncertainty of the character of the forthcoming report of the Secretary of the Treasury, give employment to the imaginations of the timid, or screw up the courage of those who delight in operations which may be styled extra hazardous, but if successful are immensely profitable. In this city a large failure is considered respectable, and a stepping-stone to restored credit, if a settlement can only be promptly made, no matter whether it is a compromise, or a temporary seclusion from the usual business haunts. So that the present moment of doubt about the future is in fact one element on which great operations are likely to hinge. The loan market has been rather close, and inactive. Notwithstanding the immense amount of paper afloat, it seems that capital is concentrated into such few hands, that a tight market can be easily brought about, when that state of things is essential to speculation. It is also said that the money markets of the interior are somewhat stringent, which fact may be easily accounted for by another, that produce has been held back in enormous quantities for a further rise in prices, in the hope that there will be no attempt to correct the inflation of the currency for several years to come, an opinion which is assiduously kept alive by several leading journals, and expressed by interested parties who see in contraction the demolition of their present *Chateaux en Espagne*.

For ourselves we see but one way out of our present position, and that is contraction. When a paper dollar is as good as the silver dollar it professes to represent, we shall then know where we are and what we are worth; when promises to pay shall be words of truth, when commerce shall have something more of reciprocity than it has now, when we shall have a foreign market for our cereals and provisions, and when profits shall be made in the world's market by natural methods, instead of extortion and enormous charges realised among ourselves, we shall return to a substituted prosperity. It is in this present uncertainty of things we see Governments dull, drooping and declining. Indeed under the supposition that the funded debt is to be increased by hundreds of millions for the purpose of retiring the legal tenders, the compound interest notes and outstanding certificates of indebtedness, a further decline may be expected. Already a foreign journal usually favorable to this country, announces that further funding will be the "death knell" of American credit. We indeed do not believe it will be practicable to place 300 or 400 millions more of 5 or 6 per cents on the domestic or foreign markets at anything like par. As much of these has been absorbed in our opinion, as they will bear. If we are to return to a safe financial condition, it must be by some other process than increased funding; as either by an actual cancellation of notes with the surplus receipts of the revenue, or positive alteration of the National Bank system, which shall make it the ally of Government rather than its rival. We have on several late occasions alluded to this idea, and we reiterate it, having as yet not met with a single sound objection. It is to compel all the new national Banks to deposit greenbacks instead of bonds in the Treasury as security for their issues. It will not take a dollar more from their means than they are now obliged to pay out. Why they should take the round about way of buying bonds to deposit instead of the money itself, we do not understand. To be sure it is a pleasanter idea to them, to get 12 per cent. on their capital under the present arrangement, than to be put on an equality with all other capital. But the Government can no longer afford this privilege. The people are now paying from 15 to 18 millions of interest to these banks, and at the same time giving them exclusive privileges to make money on

one and the same deposit, and by the issue of their own notes as much more. This arrangement was excusable during the war, when we had to get money in the best way we could; but the times are changed, and we are changed with them. The Government is no longer in pursuit of loans, and the system is now inapplicable and unjust. It has a right to have a security from the new Banks in any shape deemed the simplest and most convenient, and the deposit of greenbacks insisted upon will effect the needed contraction of currency, without costing the people one cent.

We have recently read many elaborate articles in relation to this vexed question, but none of them are conclusive. A leading Boston paper says "that the long bonds of the Government are not wanted by investers either at home or abroad, and are now thrown by business men in large quantities upon the market."

The recent communication of S. M. Stilwell, Esq., in the *Herald*, has also attracted our attention, Mr. Stilwell writes thoughtfully and confidently on the subject; and yet if we understand him correctly, he inclines to the continuance of the paper system without recurring at all to specie as its basis, and trusts to the well known theory of supply and demand as a cure for all our disorders. Now the fact is that until we adopt the system of cowries or wampum with which the Africans and our own Indians have resorted to as a substitute for money, we cannot get rid of the universal standard of gold and silver, unless we refuse to trade with all foreign nations, and shut up our ports. The nations of the civilized world may be compared to a company of traders, recognising a particular standard of value by which they will buy or sell. If we do not conform to it, we must step out out of the market.

And as to the supply and demand theory, it is contradicted by every day's experience. There is often a demand without a supply, and a supply without a demand. There is at this moment a demand for gold; it is worth nearly 50 per cent. in other articles above its normal and comparative value of former years. Does the supply come in to meet this demand? We think not, on the contrary, gold is leaving us in constant and large currents for England and France, where there is no particular demand for it. The truth is, it takes time to find out a demand, and time to furnish a supply, a work of calculation and experience; and often the result is, that the supply when obtained breaks down the market and destroys all demand. If it were not for this, consumers would be eternally at the mercy of the producers.

But let us take another remarkable example which contradicts the theory. It is well known that the price of meat has nearly doubled recently in England. It has been attributed to the cattle plague. Travers' Circular of the 11th inst., says, it is ascertained that the number of animals that have perished from the Rinderpest in that country, and have been slaughtered on account of it is 1,600, but the importation of foreign animals for the last nine months has been three times the amount of that sacrificed through the plague, viz: oxen, bulls and cows, 46,576; calves, 4,666; sheep and lambs, 184,891; swine, 32,662. Practically, therefore, there has been no demand by two-thirds of this number. Here has been an enormous supply without any corresponding demand, and yet prices have not declined, but are on the increase, notwithstanding. The excess in the importations for 1865, as compared with those of 1864, is very large also. The theory does not seem to have worked at all in this case. So that in fact there has been a large supply without any real demand; and the excess of importations of animals greatly above that of former years has not reduced the price of meat in England. Certainly if the theory is infallible this result could not have been justly expected.

As long as the world says they require gold and silver as money, and no security in its place that cannot be turned into these, we shall have to comply with this usage and requirement; and we cannot by any ingenuity of paper, one kind pledged for another, escape the responsibility of the gold and silver basis without general insolvency. The sooner we look this squarely in the face the sooner we shall have a healthy financial state of things, and not before.

The imports and exports for the last month from this port show a heavy balance in gold values in favor of this country, viz:

Exports of merchandize	$16,115,960
Exports of coin	2,023,101
	$18,139,061
Value of cotton from Southern ports, 67,386 bales	$10,026,280
Do. from New York of all exports of products	18,130,061
	$28,165,341
Balance in our favor in gold	$4,034,602

Foreign exchange is not very active nor very profitable. The exports of cotton have by the restoration of the Union taken their former commercial routes, and tell heavily in our favor. And although the product has fallen off, the advance in price has in a measure made up the difference Between 1st May and 1st November, we have received from the Southern ports 742,776 bales; and since the 1st of November several thousand more to be yet largely increased, as we learn from the old stocks on hand. The currency value of the 6 months receipts was $148,555,200. At 40 cents a pound, a million of bales bring as much money as four millions at previous low prices; so that for the present the short supply is fully made up by the enhanced price. We have always considered this cotton product as the key to the lock in our foreign exchanges; and it is being turned most effectually even now. At the same time the price is sure to lead to an extended cultivation for the next year, for the temptation of profits is enormous. A writer in the Baltimore *American* asserts, that out of a pound of cotton five yards of ordinary muslin are manufactured. On this calculation he contends that the article might now be furnished at 17 cents a yard, or 85 cents per pound, for the cotton when manufactured into muslin. Instead of that it is charged to the consumer at $2.50 per lb., when manufactured here. We may therefore see at once what inflation of the currency is doing for these cotton manufacturers, and not wonder that the English manufacturer is glutting our markets at lower prices, and making large profits at the same time. Such instances as these in all manufactures propped up by our present system, should open the eyes of the people to the fact that they are men working on the treadmill to grind out fortunes for particular classes.

This calculation does not include the value of exports from other ports, and therefore is not entirely complete; but shows the tendency of trade within the last 30 days, and that the cotton supply is our chief anchor at which the National vessel is riding with every chance of weathering the financial storm.

Governments are now pressed for sale considerably under par, and the tendency is downwards owing to the impression that the funded debt is to be increased by the proposed contraction of the legal tender circulation. As we have we think most clearly shown that contraction on a large scale may be safely effected by a different process, we hope it will be adopted.

The last bank statement is considered favorable. The legal tender reserves have increased two millions, the deposits about the same, but the loans have increased over $600,000, and the specie has decreased about $106,000.

The only real cause of disturbance at present is the Mexican question. We certainly think we are not called upon at present to go into another costly war for any abstract question, especially when the Southern States have not fully come back into the Union. There is a better way than war to aid the Mexican republicans, and this is to give them all the money by subscribing to their loans, they require to help them in the struggle. This is our cheapest and most effective method.

Exchange in London and Paris is not active, and the price is still below par for most of the transactions.

Railway securities are improving and more in request.

The balance in the Sub-Treasury on Wednesday was $72,258,179 97.

The exports, exclusive of specie, from the port of New York for the week ending Nov. 27th, were $3,840,220, against $1,880,303 in 1864, and $3,251,634 in 1863. Total since Jan. 1, $150,805,778; same time in 1864, $198,503,869; in 1863, $156,885,289.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Michigan Southern and Northern Indiana Railroad.

The following particulars of the settlement of a long pending legal controversey between this company and its Guaranteed Shareholders are published, as on authority, and will doubtless be received with satisfaction by all the interests concerned:

"Under authority given by a resolution of the Board of Directors of the Michigan Southern and Northern Indiana Railroad Company, on the 20th of September last, the Finance Committee is settling with the holders of the guaranteed stock as follows: In settlement of all claims for back dividends, the holders receive forty per centum in common stock. On the conversion of the guaranteed stock that has been thus settled and assented into common stock, the company give one share of common stock and thirty-five dollars in cash, for each share of guaranteed stock surrendered. Thus the holder of 100 shares of guaranteed stock gets in exchange therefor 140 shares of common stock, and $3,500 cash. All settlements and conversions to be made prior to the 15th day of January next. Nearly one-half of the guaranteed stock has up to this date been so assented, converted and canceled."

☞ S. M. Craver has resigned the position of Assistant Superintendent of the Rensselaer and Saratoga Railroad, to accept the position of agent of the New York Accidental Insurance Company.

American Files.

These useful, or rather indispensable tools in the mechanic arts, have hitherto been principally imported from Sheffield, the fabric of such shops as Butcher's, Wing's, Greaves & Sons, Moss & Gamble's, and Fisher & Co's. We have now an American article made by the Whipple Manufacturing Co., which has been thoroughly tested and compared with the foreign manufacture, and been awarded gold and silver medals for its excellence in all respects, by the American Institute of N. Y. and the Mechanics Association of Massachusetts. The works of this company are at Ballard Vale, Mass., having more than a million of dollars capital, and employ 800 operatives. The office in this city is at 53 Beekman street, of which Geo. E. Learned is in charge. See advertisement.

Practical Good Will towards the South.

We publish in another place the card of Messrs. Goodman & Merrill, 36 New street, General Commission Merchants, whose business is of a peculiar and most useful charucter. It is fully explained in their Circular, and is of the following description. They propose specially to act as cotton factors and agents for the purchase, sale and lease of cotton plantations, and the purchase of railway equipments and supplies. Their plan is a large and liberal one, and they offer opportunities of great value to northern capitalists to make money readily and certainly; while the transactions to be engaged in will be highly beneficial to the south and the country at large. The Circular gives the following estimate of the results of an operation of the kind proposed, notwithstanding the difficulties which have intervened, and it is well worthy of notice:

"The expenses of a cotton estate during the year have been about $30,000; the cotton produced about 600 bales, valued at $130,000. Deduct $30,000 for expenses, and $10,000 for losses and contingencies, and we have $90,000 as the net result. This estate made before the war, when entirely cultivated, more than 1,200 bales of cotton, and 15,000 bushels of corn. But this year the cultivation was made under many adverse circumstances. The war existed, and guerilla raids were frequent and destructive. Partial inundation also occurred from breaks and cuts in the levees. Indeed, a more remarkable concurrence of adverse circumstances could hardly be imagined, and yet the result is as above given."

We have no doubt of the facts as stated, and trust they will have the effect of attracting the attention of northern capitalists.

Syracuse and Newburg Railroad.

A meeting was held in Syracuse on the 22d ult., to further the project of a railroad from Syracuse to Newburg, on the Hudson River. Delegations were present from Oswego, Fulton, Cazenovia and other places. Speeches were made by D. C. Littlejohn, Senator Wolcott and others. It was announced that the town of De Rayter had pledged $300,000, and other towns $150,000 each. A committee of seven was appointed to confer with the committees already appointed by other localities, to carry out the object sought to be attained.

☞ The Kansas City *Journal* says work on the Cameron Railroad, connecting Kansas City with the Hannibal and St. Joseph road, after a suspension of four and a half years by the war, is to be speedily recommenced and the road completed at the earliest possible time.

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 3d week in Nov., 1865, were..$106,290 00
Corresponding week of previous year.. 96,573 00

Increase..... $9,717 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Nov., 1865, were.....$114,278 00
Corresponding week of 1864 ..... 102,020 00

Increase..... $12,258 00

The earnings of the Grand Trunk Railway for the week ending Nov. 18th, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$51,252 00
Express, freight, mails and sundries..	4,036 00
Freight and live stock	85,151 00
Total	$140,439 00
Corresponding week, 1864	119,833 00
Increase	$20,606 00

The earnings of the Chicago and Rock Island Railroad for the third week in November, 1865, were $72,063 00
Corresponding week of previous year.. 86,797 00

Decrease..... $14,734 00

The earnings of the Marietta and Cincinnati Railroad for the 3d week in Nov., 1865, were:

	1865.	1864.
Passengers	$8,266 80	$8,687 74
Freight	15,330 40	12,319 20
Mail, express & telegraph	1,175 00	1,084 48
Total	$24,772 20	$22,091 42
Total for the fiscal year commencing Jan. 1.	$1,080,855 68	$900,392 20

The earnings of the Chicago and Northwestern Railway for the third week in November, 1865, were.....$184,927 67
Corresponding week of previous year. 180,381 49

Increase..... $4,546 18

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Nov. 21, were:

	1865.	1864.
Passengers	$3,172 91	$3,173 23
Freight	11,494 08	10,234 22
Express	130 22	104 16
Mail	296 58	296 58
Total	$15,093 79	$13,808 19

Receipts from January 1 to Nov. 21:
1865 .....$633,238 99
1864 ..... 526,042 66

Increase..... $107,196 33

The traffic of the Great Western Railway for the week ending Nov. 24, 1865, was as follows:

Passengers	$34,202 19
Freight and live stock	38,329 95
Mails and sundries	2,937 23
Total	$75,469 37
Corresponding week of 1864	56,440 21
Increase	$19,029 15

☞ We learn from the Richmond *Inquirer* that the Seaboard and Roanoke Railroad is open to Suffolk. It has been built beyond Suffolk about 10 miles. This will decrease the staging to the extent of eleven miles. Work is progressing on the Weldon bridge. Passengers are transferred across the Roanoke at the ferry.

Railroad Earnings--Monthly.

The earnings of the Sandusky, Mansfield and Newark Railroad for September and October 1864 and 1865, have been as follows:

	1865.	1865.
September	$43,309 12	$40,924 69
October	42,774 84	25,853 96
	$86,083 96	$76,778 65
Increase	$9,305 31	

The earnings of the Ohio and Mississippi Railroad line from Cincinnati to St. Louis for October were:

	1865.	1864.
Eastern division	$219,099 11	$163,467 56
Western "	153,518 47	114,538 48
Total	$372,617 58	$278,006 04
Increase of 1865 over 1864		94,611 54

Comparative earnings from Jan. 1, to Oct. 31:

	1865.	1864.
Eastern division	$1,820,526 34	$1,583,778 28
Western "	1,275,607 11	1,105,105 38
Total	$3,096,133 45	$2,688,883 66
Increase of 1865 over 1864		$407,249 79

The earnings of the Housatonic Railroad for the month of Oct., 1865, were.....$46,232 04
Corresponding period of previous year. 37,290 76

Increase..... $8,941 28

The earnings of the North Pennsylvania Railroad for the month of Oct., 1865, were..$83,299 59
Corresponding month of previous year. 62,814 92

Increase.....$20,484 67

The earnings of the Chicago and Milwaukee Railway for the quarter ending September, 1865, were $300,372 08; against $227,970 21 in 1864—gain, $72,401 87. The earnings for October were $85,391 62.

Journal of Railroad Law.

LIABILITY OF COMMON CARRIER, WHEN CEASES, AND THAT OF WAREHOUSEMAN BEGINS.—EFFECT OF REFUSAL OF CONSIGNEE TO RECEIVE FREIGHT.

The action of Hathorn *vs.* Ely, in the Court of Appeals of this State was brought to recover freight for carrying flour and oats in canal boats, from Elmira to the city of New York, in the fall of 1853.

The plaintiff received the flour and oats (950 barrels of flour, and 543 bushels of oats,) on board of his two canal boats at Elmira, for which he executed and delivered to the original defendant, Anson C. Ely, two receipts, acknowledging the receipt of those articles in good order, and promising to deliver them in like good order to Jones & Ferguson, New York, at the rate of sixty cents per barrel, freight, on flour, and ten cents per bushel on oats; and each receipt concluded as follows: "And I do agree to let the above flour remain on board ninety days after its arrival in New York, without extra charge."

The defense interposed was, that the plaintiff did not deliver the flour in good order, but that it was injured before delivery, through the plaintiff's negligence, to an amount exceeding the amount of the freight.

The referee, before whom the cause was tried, found that the plaintiff transported the flour and oats to New York where they arrived safely and in good order, in the boats on board which they were shipped, on the 24th of November, 1853. That on the 28th of November the plaintiff informed the consignees, Jones & Ferguson, of the arrival of the boats, that the flour and oats were ready to be delivered, and where the boats lay; which was at pier No. 7 East River, a usual place for discharging such freight. The consignees were also requested to take off the flour. They replied that they had not heard from the defendant and had no authority to receive it, but were daily expecting to hear from him. This request was repeated on several days, and finally J. & F. were urged to receive the flour, or to make some arrangement in regard to it, as the harbormaster refused to allow the boats to remain longer in the slip; to which they made the same answer as before. The flour could have been delivered in one day, if there had been any one to receive it. On the 1st of December the boats were pushed out of said pier by persons acting under the direction of the harbormaster, who alleged that they had remained as long without unloading as the rules of the harbor allowed. The plaintiff immediately went in pursuit of a steam tug, to tow the boats to a place of safety which he procured; but in the meantime one of the boats had been struck by another vessel and injured, so as to cause her to leak badly. She was towed to another dock and the cargo removed and placed upon the dock with all reasonable dispatch, from which place it was taken by Jones & Ferguson at the defendant's request. The flour was wet and damaged by the leaking of the boat, in consequence of the collision, to the amount of $976 75. Such damage was not caused by any negligence, or by want of due care and diligence on the part of the plaintiff. The defendant did not give any instructions as to the delivery of the flour, or whether he would elect to have it remain on the boats, until after the boats had been ordered out of the slip by the harbormaster.

The referee found as matter of law, that the defendant was to have the privilege, if he desired it, of leaving the flour on board the boat, as a warehouse, for the space of ninety days after her arrival in New York; that the plaintiff was not to wait for his freight, nor to remain subject to the stringent liability of a common carrier during that period; that the freight was carried, and the liability of the plaintiff as a common carrier was discharged, as soon as he had arrived in the port of New York, had reported his arrival to the consignees, and waited a reasonable time to deliver his cargo, or to receive the instructions of the defendant, whether he would or would not leave the flour on board. That as the consignees had declined for several days to receive the flour, the plaintiff became the mere depositary, or bailee of the same for the defendant, and was so at the time when the damage was done, and as such bailee liable only for gross negligence. He rejected the defendant's claim for damages, and held that the plaintiff was entitled to recover the freight, and judgment was entered accordingly.

The defendant excepted to the report, and on appeal to the Supreme Court, at general term, the judgment was affirmed, and the defendant brought the present appeal. Since the appeal the original defendant had died, and the administratrix of his estate had been substituted as defendant in his place, by order of this Court.

The following opinion was given by SELDEN, J.—If this case were to be decided by the rules which determine the ordinary duty of common carriers, when consignees refuse or neglect to re-

ceive goods, there could be no doubt that the plaintiff's responsibility as a carrier remained at the time when the flour was injured, and he would be held liable for such injury, though it happened without his fault. The refusal of consignees to receive goods, authorizes the carrier to relieve himself from the stringent liability which he is under as such, by depositing the goods in some suitable warehouse, if any such can be found, or by making some equivalent disposition of them for the use of the owner. Occupying the position of carrier merely, his responsibility as such continues until this is done. (20 N. Y. Rep., 259.) But it would not be a reasonable construction of the contract upon which the plaintiff received the flour, to hold that he was to remain an insurer of its safety for ninety days after the duty of carrying it should be completed; in case the owner elected to have it remain that length of time upon the boats. Its fair interpretation is, that when the duty of carrying should terminate an election by the owner to postpone the delivery for ninety days, would convert the carrier into a mere bailee. When therefore, the flour reached its destination in good order, and a delivery was tendered to the consignees, their refusal to receive it put an end to the plaintiff's responsibility as carrier, and from that time he held it as the bailee of the owner. He had a right to treat the refusal of the consignees as equivalent to an election on the part of the owner to have the flour remain on the boats during the ninety days; although he might in the absence of an express election have relieved himself from all responsibility, by placing it in store. Whether the plaintiff held the flour in pursuance of his contract, to allow it to "remain on board ninety days," or as waiting the election of the defendant whether it should so remain, he was required to exercise ordinary care only in its protection, and was not liable for an injury to it which occurred without fault on his part.

The judgment of the Supreme Court should be affirmed.

All the judges concurring.

Hempfield Railroad.

The annual meeting of the stockholders of this company was held at Washington, Pa., on the 20th ult., at which the following gentlemen were elected directors for the ensuing year: C. M. Reed, W. McKennan, Jos. Henderson, S. Brady, Thos. Sweeney, Jas. C. Clark and Jas. C. Acheson. The Pittsburg *Chronicle* says: "There were 11,303 votes cast, which is almost twice as large a vote as that cast last year. There was an evident determination on the part of the Directors to do something towards the completion of the road, and the increased attendance of the stockholders indicated that they are awakening to a sense of the importance of the matter. It has been estimated that it will cost four million dollars to complete the road to Greensburg and connect it with the Pennsylvania Central; about two millions dollars to complete it to Pittsburg, and between two and three millions to complete it to Uniontown and connect it with the Connellsville road. Should the road be completed to either one of these points it will be one of the most direct routes for Eastern travel. It is expected another meeting of stockholders will be held, when the matter will be fully discussed."

Toledo Wabash and Western R. R.

Mr. E. A. Chapin, late superintendent of the New York and Harlem railroad, has been appointed superintendent of the Western Division of the Toledo, Wabash and Western railroad, extending from Springfield to the Mississippi River. His office will be at Springfield, Ills. Mr. T. L. Knapp has charge of the Middle Division, from Lafayette to Springfield, with his office at Lafayette. Mr. J. E. Baker is superintendent of the Eastern Division from Toledo to Lafayette, with his office at the latter place. Mr. B. Andrews, is assistant superintendent of the Keokuk branch, and will have charge under Mr. Chapin, of the road between Clayton and Keokuk.

☞ Gen. J. R. Curtis of Iowa, William Prescott Smith of Baltimore, and J. H. Simpson of the Engineer Corps have been appointed by President Johnson commissioners of the Kansas branch of the Pacific Railroad.

READ THE FOLLOWING LETTER:

American Institute, New York, Oct. 18, 1865. Wm. P. Pierce, Esq., President Whipple File Manufacturing Co.

Dear Sir,—I have the pleasure of handing to you, with this, the samples of Files as tested by me as one of the judges in connection with the Thirty-Sixth Annual Exhibition of the American Institute. You will notice in addition to those furnished by the Whipple File Manufacturing Company, which I understand are made from steel of their own production, that two of the most celebrated English makers are represented, namely, Messrs. Greaves & Sons and Messrs. Moss & Gamble, and it affords me much satisfaction to state that after having given the samples an equal and impartial test I find those presented by the Whipple File Manufacturing Co., to be fully equal if not superior, to the English, and in confirmation of my opinion, I refer parties interested to accompanying samples, which are one 12 in. half round bastard by Messrs. Greaves & Sons, one 12 in. half round bastard by Messrs. Moss & Gamble, one 13 in. half round bastard by the Whipple File Manufacturing Company.

With the results of this test in view I can see no reason why we need look to England for our supply of Files, either on account of superior quality of steel or excellence in workmanship.

Very respectfully,
(Signed) R. C. McDougall,
Engineer and Machinist.

BULKLEY & McNEILL,

CONSULTING ENGINEERS,

NATIONAL BUILDINGS,

57 Broadway, New York.

THE undersigned having established themselves in this City, and opened an office as above, would respectfully inform their friends, and those who may require their services, that they are prepared to furnish designs, specifications and working drawings for marine and stationary machinery of every description.

Those having mechanical designs which they wish elaborated, are invited to consult with the above, who will give professional advice, and if required furnish drawings, and estimate on the value of such inventions.

The undersigned also offer their services as general agents for the purchase and sale of all kinds of machinery.

Their experience in this country and in Europe in the practical designing of machinery, and the possession of designs, and detail drawings from approved European and American Workshops, render them confident of conducting satisfactorily any business that may be entrusted to their care.

HENRY W. BULKLEY,
4t47 THOMAS E. MCNEILL.

Departures of 1st and 21st connect at Panama with steamers for SOUTH PACIFIC PORTS. Those of 1st touch at MANZANILLO.

Through Passage Rates, in Currency.

	First Cabin.	Second Cabin.	Steerage
On steamers	$345	$235	$100

Panama Railroad ticket invariable $25 additional, in currency.

A discount of ONE-FIFTH from steamers' rates allowed to 2d Cabin and Steerage passengers with families.

One hundred Pounds of Baggage allowed each adult. Baggage-masters accompany baggage through, and attend to ladies and children without male protectors. Baggage received on the dock the day before sailing from steamcoats, railroads and passengers, who prefer to send down early.

An experienced Surgeon on board. Medicines and attendance free.

A steamer will be placed on the line January 1st, 1866, to run from NEW ORLEANS to ASPINWALL, via HAVANA.

For Passage Tickets or further information apply at the Company's ticket office, on the wharf foot of Canal Street, North River.

New York, Saturday, December 9, 1865.

The Tunneling of Mount Cenis.

We find in a late number of the *New York Herald* a very interesting letter from a foreign correspondent, giving a graphic account of the works now going on in the great Alpine Tunnel which is to afford place for the continuation of the French and Italian system of railways. It may be well to observe in this connection, that while this work is being carried on under favorable and promising circumstances, a railway of American design is being constructed to pass across the mountain by a line of zig-zags, as has been successfully attempted in various parts of Pennsylvania, the completion of which will answer a good purpose until the tunnel line can be substituted.

Also that another tunnel on an equally grand scale is projected to penetrate the celebrated mountain of St. Gothard to connect the railways of Italy and Switzerland. Estimates and plans for this object have been published by Mr. Koller, an engineer of reputation, who is now in Florence on this business, with great hopes of success

Our readers may imagine themselves looking at a map, at the northeast corner of which comes down diagonally a railway from Paris and terminating at St. Michel. Then a small stream called the Arc running up from the foot and gorge of Mt. Cenis, from east to west, and passing St. Michel and the railway terminus. Then on this stream about half way, another town or village called Tourneaux, and between this and the river Dora some miles distant, and running from west to east, and emptying into the Po, its course being in a parallel line at some distance and to the left of the range of Mt. Cenis, are the mountain heights which are to be overcome by the tunnel, which is about half way between the Col de Trevus and the Col de Laroue, at the point called and laid down as the Grand Vallon. This point is 11,000 feet above the level of the sea, and is the apex of the range between Fourneaux and the Bardonneche. So it is in fact not Mt. Cenis which is to be tunneled, but a point some distance from it. On the river Dora is a place called Susa, which is the terminus of the railway from Turin.

The work was commenced in 1858 with the ordinary means of the pickaxe, bar and gunpowder; but in 1861 only 724 metres had been accomplished, a metre being about 39 inches English. Not until 1863, on the Savoy side, were 921 metres cut. At this time the cession of Savoy to France, one of the schemes of Louis Napoleon, was effected, and his financial aid secured. The total cost of the tunnel was then estimated at 65 millions of francs, and France agreed to pay one half of this cost, and 500,000 francs additional for 20 years to come, reducing the time for completion from 25 years to 15. Other provisional concessions were made on stipulations not necessary to mention here.

To fix accurately the line or axis of the tunnel very elaborate calculations were made and are believed to be perfect, as appears from mathematical tests.

To carry on the work with greater rapidity the old system of cutting was changed to that known as an atmospheric power, or in other words compressed air, which was to have the double effect of driving the boring machine and purify the air within the tunnel, which it was impossible to ventilate by the usual process of vertical shafts through the mountain. This effective agent was obtained by turning a mountain torrent into a reservoir which there compressed the air into one-sixth of its bulk, equal in power to 5½ atmospheres or a pressure of 82½ lbs. to the square inch, a very large power as our readers will at once perceive. This power was conveyed to the boring machines through a pipe or conduit of iron 8 inches in diameter, in sections of 8 feet, covered by india-rubber to make the connections tight. This pipe was partly laid underground for the ⅛ of a mile from the reservoir and upon the tops of stone pillars, when like a huge serpent it crawled into the mouth of the tunnel.

Flaxible tubes being then joined to the tunnel end of the conduit, whence they were carried along the sides of the excavation to the perforating machines themselves.

"It is much more easy to describe the action of the perforating machine and its effect upon the rock than to explain its delicate and complicated organism. Indeed, without diagrams, it will be impossible to convey more than a general idea of the manner in which the compressed air—brought through iron tubes a distance of a mile and a half—sets and keeps these machines in motion. Upon the "*affusto*," which bears the same relation to the perforator that the carriage does to the gun, nine perforators are mounted—each being entirely separate and distinct from the other. In the operation of these it was necessary to combine three automatic movements to imitate hand labor—percussion, rotation and progress. The blow which drives the drill against the opposing rock is given by a piston, to which the drill is fixed, and which oscillates with extreme rapidity. In its upward and downward, or rather forward and backward movement, the piston alternately opens and shuts valves which let in and out the compressed air. The posterior section of the piston being larger than the anterior section, to which the drill is attached, and the pressure of the air being in direct ratio to the surface upon which it bears, it results from this fact that in the forward movement the blow given by the drill is much more powerful than the returning one. The force given to the advancing piston is one of a hundred and ninety pounds, and the piston is driven forward from one hundred and eighty to two hundred times a minute, the effect being of course the same as though a weight of one hundred and ninety pounds were allowed to fall two hundred times a minute upon a drill. In this manner the machine imitates the movement of percussion given in hand labor, and by a very complicated

the drill, which is advanced and pushed into the rock by a spring behind the perforator which pushes it forward.

piece of machinery a rotary motion is given to

"Upon the *affusto* are mounted nine perforators, each one, as I have before stated, independent of the other; and they are placed in different parts of the *affusto*, some above and some on a level with the rocky floor, and upon either side, so as to attack the surface of seven square metres, in which they are required to work, at the same time. Each one of the perforators does the work of twenty stout laborers. The series of operations comprised between the attack of the rock and the removal of the debris caused by the explosion is called a *reprise*, which is effected in three different operations—drilling the holes in the rock, charging and exploding it, and the removal of the stone. In six hours' work of the perforators the surface of the rock is riddled with from ninety to a hundred holes of about thirty-five inches in depth and from an inch and a half to nearly three inches in diameter, the largest ones in the centre and the smallest about the circumference. This being completed, the *affusto* is wheeled back a distance of about a hundred yards, and with all the workmen protected behind two heavy doors of oak. The miners then turn in and take possession of the gallery, exploding first the centre drills, for the purpose of blowing out a large piece of rock, and then the smaller ones, at each explosion running and securing themselves behind the *affusto*. As soon as an explosion takes place a stream of compressed air is let loose, which dilutes and purifies the foul atmosphere caused by the explosion, and drives it towards the entrance of the tunnel. The charging and explosion of the mine occupies three hours, and the rocks which are broken by the explosion into small blocks are thrown into wagons, and in two hours the space is cleared out and ready for a fresh attack. A new set of workmen comes in, the *affusto* is wheeled back, and the perforators again set to work upon their persistent, hard and irresistible arguments against the solid ribs of this mighty mountain. And so this continues, without interruption, summer and winter; week days and Sundays, night and day; the only two holidays in the year being Easter Sunday and Christmas. The workmen, of whom there are two thousand employed on each side of the tunnel, are divided into three reliefs, working eight hours a day and resting sixteen. The common laborers receive but three francs, or about sixty cents a day, while the miners and more expert and important workmen receive from four to six. Two *reprises* a day are usually made."

The wear and tear of the material are enormous. The hard quartz offers great resistance to the drills at the end of the flexible tubes, which drills have to be continually repointed and tempered. They have a rotary motion, are directed by a workman and each make 200 strokes per minute. It is calculated that 2,000 of these drills will be used up before the work is completed. Each perforator does the work of three men, and it is expected that as the rock changes from quartz to gypsum, the advance will increase to 10 feet per day.

The actual extent of the excavation now made on the right hand side is about 2,389 yards, and on the left or Italian side 3,158 yards. The entire length of the tunnel is 12,220 metres, or 7.59 miles. Its completion is confidently expected in 1870, one half of which is now cut.

The workmen are lighted by gas, and plentifully supplied with fresh air, and working at very low wages. The holes made in the rocks are drilled in such away as to be easily charged with gunpowder when the masses inside the perforators or the core are easily blown out.

The enterprise, one of the most daring and successful in the history of modern engineering, owes its origin to Charles Albert, of Sardinia in 1842; and has made its way against all doubts and opposition. From this abbreviated description the contractors and friends of the great Hoosac Tunnel may derive some valuable hints.

Boston and Maine Railroad.

The earnings and expenses of this road for the years ending May 31, 1864 and 1865 have been as follows:

Earnings.	1864.	1865.
From passengers....	$687,347 45	$824,700 97

Renewal of rail.....	26,171 20	48,852 12
	$635,031 20	$928,800 91
Net earnings $481,899 10		$367,167 94
Tax on dividends and surplus.....		18,664 53
Leaving a surplus of		$348,503 41

Compared with 1864 the gross earnings of 1865 show an increase of $179,038 03; with an increase in expenses of $293,769 71—making a decrease in net earnings of $114,731 16. The gross earnings of 1864 exceeded those of 1863 by $170,950 78; the net earnings were $31,597 14 larger.

The Dover and Winnepisseogee Railroad (formerly Cochecho), is operated by this company under a business contract for the term of 50 years from November 1, 1863, at an annual rental of $29,000, payable semi-annually. The rolling stock, consisting of 3 locomotives, 6 passenger and baggage, 49 freight and 5 hand cars, were purchased at a cost of $40,075.

The total amount paid on account of the Charles River draw accident has been $47,217 86, of which, $20,249 09 was paid in 1863 and $26,968 77 in 1864. No further increase is anticipated.

Construction account was increased $70,746 19 in 1863–'64; and in 1864–'65 $38,092 45. It now stands at $4,389,651 28. The capital account remains the same as last year, viz: $4,076,974 52.

The undivided earnings account, increased last year by the surplus of $116,315 91, and this year by $20,047 41, now stands at $858,659 47. This amount is properly a balance of accounts; the capital stock and liabilities being less than the cost of the road, equipment, and other assets, by this amount.

The receipts of the Portland, Saco and Portsmouth railroad continue to be large. This company's share for the year ending May 31, 1864 was $32,500; and for the past year $30,000, which was paid during the first six months of the year; in the latter half nothing was paid, all surplus being absorbed in a large purchase of land for depot purposes in the city of Portland, which it was thought judicious to make. The trial balance shows that an account of improvements is kept, and the Boston and Maine and Eastern railroads duly credited for surplus earnings retained.

The equipment of the road consists of: 37 locomotives, 63 passenger, 19 baggage, and 766 cars for freight, etc. Miles run by passenger trains 470,707; by freight trains, 243,484; by gravel trains 7,624; by extras trains, 12,785—total 734,600; an increase over the previous year of 40,790. Number of passenger carried 2,658,385; do. carried one mile, 38,920,812, an increase of 4,947,317. Tons of merchandise carried 275,149; do., carried one mile, 9,046,959, increase 666,546.

Finances of South Carolina.

The following is an abstract of the financial condition of this State, made up from the Comptroller's report.

The State has indorsed the following railroad bonds. On bonds issued by the Louisville, Cincinnati and Charleston Railroad Company, as follows:

Payable in Charleston	£60,000
Payable in London	389,000
	£450,000

Or, at par, about $2,000,000.

The interest on the foregoing bonds is payable semi-annually by coupons on the first days of each January and July—the rate of interest being five per cent. per annum. Each semi-annual

coupon on the £500 bonds is for £12.10, and on the £250 bonds is for £6.5.

The annual interest is £22,550 at $4 44.4—equal to $100,000, of which there is payable in Charleston, without exchange, £3,025, or $13,444 44, and in London, with exchange, £19,475, or $86,555 56.

Beside the above, the State guaranteed or indorsed the bonds of the following railroad companies:

Charleston and Savannah	$505,000
Northeastern	92,000
Laurens	75,000
Spartanburgh and Union	350,000
Greenville and Columbia	700,000

The funded debt of the State stands as follows:

Three per cent. State stock	$38,636 60
Six per cent. stock (Fire Loan)	315,150 35
Five per cent. bonds, (Fire Loan,) payable in London	484,444 51
Six per cent. bonds, Blue Ridge Railroad	1,000,000 00
Six per cent. bonds, Blue Ridge Railroad	310,000 00
Six per cent. bonds, New State-house	500,000 00
Six per cent. bonds, New State-house	1,775,000 00
Six per cent. bonds, Military Def'ce	239,200 00
Seven per cent. bonds, Military Defence	191,150 00
Seven per cent. bonds, Military Defence	296,780 00
Seven per cent. bonds, Military Defence	1,514,710 00
Total debt	$6,668,080 46

The principal of this debt is redeemable at various periods, extending from 1860 to 1890.

Portland, Saco and Portsmouth Railroad.

The receipts and expenditures of this road for the fiscal years ending May 31, 1864 and 1865, have been as follows:

Earnings.	1864.	1865.
From passengers	$240,439 82	$311,732 57
" freight	95,493 91	123,283 03
" expresses	4,041 80	4,475 55
" mails	7,837 44	7,837 44
" sundries	3,039 82	2,893 01
	$350,852 79	$450,221 60
Expenses, viz:		
Maintenance of way	$46,233 16	$56,126 62
Locomotive power	40,914 42	62,689 76
Train expenses	20,164 63	29,159 63
Office establishment	11,555 19	13,691 91
Station expenses	22,615 02	26,481 57
Taxes, insurance, etc	9,282 40	14,835 88
Machine shop	1,966 58	569 08
Credit renewal account	10,000 00	10,000 00
	$162,731 40	$213,454 45

Apparent surplus May 31, 1865		$145,914 55

The road and equipment has been kept in horough repair, and in good running condition in every particular. About 8,000 new sleepers were laid last year, and 110 tons of iron rails with the improved chair. Slight repairs only were made on the depots. Two locomotives have been added to the stock; one a second hand engine, in perfect repair, and one new passenger engine built at the Portland Company's works. Five new platform and five new box cars have been added to the rolling stock. About 350 tons of new iron rails will be required this year. Of 17,000 sleepers contracted for, 9,000 had been delivered.

The equipment of the road consists of: 12 locomotives, 2 passenger, 2 baggage, 56 platform, 60 box, 2 stone and 10 hand cars. Miles run by engines, 161,056. Passengers carried, 344,710.

Atlantic and Great Western Railway.

The Pittsburg *Gazette* thus explains how the Atlantic and Great Western Railway Company are going to make use of the Morris and Essex Railroad in getting to the West:

"The Morris and Essex Railroad extends from the Hudson to the Delaware; the Catawissa road from the Delaware to the Susquehanna; and to continue the chain on from the western terminus of the Catawissa road to the Alleghany, the charter of the Lewisburg, Centre and Spruce Creek Company will first be used. This latter company obtained a charter last winter to connect with any company in Northumberland County, and to make their western terminus at Bellefonte. From Bellefonte is the Snow Shoe Railway to Phillipsburg; from Phillipsburg another route is secured to Clearfield, and from Clearfield another to Franklin on the Alleghany River. From this point a connection can easily be obtained with the Atlantic and Great Western Railway, already constructed, thus giving an entire new route from the West to New York, independent of the Erie and all other roads, and entirely under the control of the Atlantic and Great Western Company.

From what point or under what charter a branch road can be extended from this line to Pittsburg, by this company, we are not able to say; but we may rest assured that this main line will be built; and that we can have, if we will, a connection with it, thus giving us a new and altogether independent line to both Philadelphia and New York, the Catawissa road having several connections with lines running to Philadelphia.

Tobacco.—Statistics of the Trade.

At a general convention of the manufacturers of tobacco held in this city a short time since, for the purpose of obtaining the removal of the present tax on the raw material, some important information as to the statistics of the trade were presented. The following are the figures:

From the 1st of July, 1864, to the 30th of June, 1865, the receipts at the Department in Washington were, from—

Cheroots	$47,990 27
Cigarettes (all kinds)	14,944 95
Cigars, including $380,654 47 accruing from the act which took effect Sept. 1, 1862	3,021,457 94
Snuff	283,351 92
Plug tobacco (all kinds)	4,093,977 61
Fine cut chewing	1,834,261 67
Steam smoking	516,827 36
Smoking (all kinds)	1,563,250 87
Tobacco twisted by hand	7,802 77
Total from tobacco	$8,016,119 78
Total from all sources	$11,383,864 86

The whole number of cigars returned during the year was $516,687,021, and in the order following:

Tax.	
$3	346,145,696
$8	138,592,375
$15	25,800,200
$25	2,937,800
$40	235,550
$10	2,375,400

The whole number of pounds tobacco returned were:

	Tax a lb.	Pounds.	
Plug cavendish, &c.	35c.	10,306,664	
Plug cavendish	40c.	1,216,612	11,523,276
Fine cut chewing	35c.	4,415,364	
Fine cut chewing	40c.	722,210	5,137,574
Smoking	25c.	4,708,339	
Smoking	35c.	1,103,330	
Smoking	15c.	2,445,515	9,257,184
T'b'co twist'd by hand	30c.	26,009	
Snuff	35@40c.	708,379	
Total			26,652,422

In the year preceding the cigars returned were 492,780,700; chewing tobacco, 39,180,634 lbs; smoking tobacco, 24,191,792 lbs; snuff, 1,204,671 lbs. It will have been noticed that there were 23,306,321 more cigars returned during the last than in the previous year. But it will also have been observed that the decrease in the returns of chewing tobacco of all kinds was 22,493,775 lbs; smoking tobacco of all kinds, 14,934,608 lbs; snuff, 496,292 lbs.

It would appear from other statements made at the convention, that the present tax on the article offers great inducements for frauds on the revenues, that the trade is depressed, and that a removal of the tax from the manufactured to the raw material, will increase the revenue and protect the honest manufacturer.

☞ H. M. DRANE, Esq., has been elected President of the Wilmington and Manchester Railroad Company, and resolutions have been adopted authorizing the reissue of bonds funding or capitalizing the interest now due. The President and Directors are authorized to raise funds by loan to thoroughly equip and put in running order the road of this line to Charleston.

☞ The Toledo, Peoria and Warsaw and the Mississippi and Wabash railroads have been consolidated by an unanimous vote of the stock holders.

Baltimore and Ohio Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 22d ult., Hon. John P. Kennedy was chosen chairman, and J. I. Atkinson, Esq., Secretary. John W. Garrett, Esq., President of the company, stated, on behalf of the Directors, whilst unable to submit the annual reports for 1864 and 1865—in consequence of the still unadjusted condition of the accounts of the company with the Government—that he now presented, on behalf of the Board, the annual report for the year ending September 30, 1863. He added that the progress in the adjustment of the accounts for those years was such that he trusted, in the course of a few months, those reports could also be prepared, and that hereafter the annual reports could be regularly made.

The Secretary then read the annual report for the year ending September 30, 1863, as follows:

OFFICE OF THE BALTIMORE AND OHIO R. R. Co.,
BALTIMORE, September 13, 1865.

The stockholders of the Baltimore and Ohio Railroad Company are aware of the protracted difficulties connected with the war, and the delays in the adjustment of the accounts with the Government, which precluded the President and Directors of the company from submitting the usual statement of its affairs and condition for the preceding year at the annual meeting held on the 16th day of November, 1863. Those difficulties continued, so as to prevent an accurate presentation of the revenue accounts and condition of the company until a recent period.

The Board at length have the satisfaction of making their report for the fiscal year terminating September 30, 1863, accompanied by full reports from the Treasury, transportation, road and machinery departments. These reports embrace much matter of peculiar and marked interest, showing, in addition to the usual statistics, the continued and immense destruction of the tracks, bridges, equipment, stations and other property of the company, with the particulars of the reconstruction, as far as accomplished, and of the working operations of the road.

Extensive portions of the Main Stem and Parkersburg Branch were occupied by the confederate armies at different periods—in the aggregate nearly one-half of the fiscal year. Frequent raids, skirmishes and great battles occurred upon and in the immediate vicinity of the road.

After each invasion, regardless of the magnitude of the destruction and its losses, the company continued to act with vigor and rapidity in restoring to use any part of the road upon which military protection could be obtained. Thus every mile of the road, east or west, however extensively damaged, was constantly reconstructed and furnished for the necessities and convenience of the public, whenever covered or occupied by the forces of the Government. By the unflinching pursuit of this policy the regions traversed by the line were aided, supplied and protected to the greatest practicable extent, the employees retained in service, and the revenues of the company materially enhanced.

The freshets and floods upon the route were unusually frequent, and extraordinary in volume and duration, adding largely to the complications and difficulties in effecting satisfactory results in working the road.

Under such varied embarrassments it is gratifying that by vigorous and persistent efforts, and a careful maintenance of the principles of management and general economy previously adopted, the company have been enabled to secure the financial results which are shown in the statements appended.

I.—OF THE MAIN STEM.

The gross earnings of the main stem have been $6,509,945 06, exceeding those of the preceding year, $2,028,086 08, and those of the fiscal year 1861, $3,298,519 36.

The expenses of working and keeping the road and machinery in repair amounted to $1,965,847 41, being 30.19 per cent. upon the earnings, showing a decrease of 1.65 per cent. compared with the previous year, and of 13.12 per cent. compared with the fiscal year of 1861.

The repeated invasions of the territory traversed by the Baltimore and Ohio road, resulting in protracted hostile occupation of the line, precluded the company from effecting many requisite repairs, and delayed the restoration of numerous important bridges and other structures. It is proper, therefore, to repeat the remark made in regard to the business of the preceding year as equally applicable to the present, viz: "A large amount of repairs that should have been made, and the expenses of which would have legitimately attached to this fiscal year, could not be accomplished. The financial results should, therefore, be regarded as subject to the modifications of necessary expenditures to restore and maintain the damaged equipment and property of the company."

The following analytic statement is given, in order to furnish particulars of the expenses in comparison with the two preceding years:

MAIN STEM.

Comparative Statement of the Earnings and Working Expenses for the fiscal years 1861, 1862 *and* 1863.

	1861.	1862.	1863
Earnings	$3,211,422.70	$4,481,158.93	$6,509,945.06
Working expenses—			
General expenses	20,743.40	21,001 00	40,739.66
Losses by accidents	6,790.99	4,659 64	11,197.04
Exp. of transporta'n	416,837.97	436,660.22	485,251.85
Repairs of railway	465,074.19	311,134.10	364,354.64
" water sta'ns.	3,918.16	14,728.39	23,186.59
" depots	26,964.86	30,903.83	71,941.27
" bridges	42,612.53	140,031.53	126,949.42
" telegraphs	2,595.73	4,759.24	5,927.32
" stationary machinery	17,466.01	11,901.92	21,101.38
Watching Cuts	22,819 99	19,018.65	25,5?2 90
Watching tunnels	1,225.80	500.70	716 00
Watching bridges	7,819.85	5,159 20	5,467.00
Pumping water	7,601.92	5,488.84	7,995.64
Repairs of locomot's.	138,005.79	157,017.63	304,184.95
" dump cars	1,407.90	2,715.14	4,469 57
" pass. cars	25,601.14	28,222.25	43 757.45
" burden cars	77,493 38	124,580.42	270,112.66
Cleaning engines and cars	23,238.00	18,752.13	27,544.88
Contingent expenses of mach'y depart.	1,206 93	1,825.62	1,864.81
Fuel	71,519.26	79,813 90	108,782.25
Preparing fuel and filling tenders	9,9?9.17	8,292.08	13,352.16
	$1,591,094 91	$1,427,205.85	$1,965,847.41

It is shown that the earnings, in comparison with the fiscal year 1862, have increased $2,028,086 08, and the working expenses $538,641 58, making a comparative increase of the net profits of the Main Stem of $1,489,444 50. As compared with the fiscal year 1861, the increase of earnings being $3,298,519 36, and the increase of working expenses $574,752 50, the increase of net profits amount to $2,723,766 86.

During the fiscal year the sinking fund for the redemption of the city loan increased to $859,965 24, showing a gain of $47,300 52. The investments for the redemption of the mortgage debts increased $211,551 21. Additional advances to the Northwestern Virginia Railroad Company, after crediting all earnings received, namely, for payment of interest and for expenditures in improving the condition of the road, amounted to $209,010 71.

A semi-annual cash dividend of three per cent. upon the capital stock was paid on 31st March, 1863.*

In accordance with the resolution adopted by the Board on the 11th March, 1863, the company entered into an arrangement with the Central Ohio Railroad for the reorganization of that company. The resolution was determined upon by an almost unanimous vote of the Board. Its execution, however, was temporarily interrupted by an injunction issued by the Circuit Court for Baltimore City, on the day of the session of the Board, to which allusion has been already made. The question of the right of the company to take the course upon which the Board had resolved was fully argued before the courts, and the power of the company to pursue the policy which it had wisely adopted was fully sustained.

The agreement—the full particulars of which have been heretofore published for the information of the stockholders—resulted in an investment by this company during the year, in the first mortgage bonds of the Central Ohio Railroad Company, of $1,223,982 88. A portion of that agreement is quoted, for the purpose of attracting renewed attention to the intimate relations and important permanent advantages secured for the city of Baltimore and the Baltimore and Ohio Railroad Company with the Central Ohio Railroad Company, and the extensive regions bordering upon and connected with that road, viz:

* * * "In consideration of which agreement and undertaking on the part of the said Baltimore and Ohio Railroad Company, the said party of the second part hereby agrees that the passengers and freight passing over the Central Ohio Railroad shall, so far as the same can be controlled by the officers or agents of said company, be directed exclusively over the Baltimore and Ohio Railroad, that no agreement shall be made with any competing company to the detriment of the Baltimore and Ohio Railroad Company, and that the Central Ohio Railroad Company will pro-rate with the Baltimore and Ohio Railroad Company in a manner satisfactory to the latter on all through rates; and that, while it gives to the said Baltimore and Ohio Railroad Company the full benefit of the local rates of the Central Ohio Railroad, it will at no time use them to its prejudice, but as far as practicable and lawful, and it can do without unnecessary injury to its own road, will use them for the advantage of the Baltimore and Ohio Railroad Company; and that it will at all times, in all rates which it may establish, recognize in a manner satisfactory to the Baltimore and Ohio Railroad Company the geographical advantages claimed by it in favor of the city of Baltimore over the cities of New York and Philadelphia."

A resolution having been adopted to cancel the mortgage bonds of the company accumulated and held in the sinking fund for the redemption of the mortgage debts and to deduct the same from the respective mortgage loans, it will be noted that the liabilities of the company, as compared with the statement of the liabilities and assets on 30th September, 1862, have been reduced namely:

By mortgage bonds given for iron, the entire amount of which was held in said sinking fund		$453,333 32
By bonds of loan, redeemable in	1867.	39,916 22
" " "	1875.	43,500 00
" " "	1880.	24,000 00
" " "	1885.	108,500 00
Making the total of		$669,249 54

Whilst deciding upon this action, a further resolution has been adopted, by which the equivalent of the aggregate amount annually of the principal and interest, which would accrue under the former system, shall continue to be appropriated for the reduction and payment of the mortgage debts. Such reductions will hereafter appear in the direct decrease of liabilities upon the respective loans on which payments shall be thus made.

The balances of cash in the Treasury on 30th September, 1863, was $233,338 71, after deducting $161,146 25 for payment of interest on the city loan and on the bonds of the company, which matured on the 1st of October, 1863.

II.—OF THE WASHINGTON BRANCH.

The earnings for the year were $703,123 59, showing a decrease of $75,293 08 compared with the previous year, and an increase of $264,983 90 compared with 1861. The expenditures charged amounted to $273,238 32, being for improvements,

*NOTE.—The fall dividend for this year was not paid until the 26th of October, 1863, and, therefore, does not appear in the accounts of this fiscal year.

repairs of depots, bridges, water stations and railway, and for pumping water.

As stated in previous reports, the "system was adopted by which the earnings are equitably divided upon a basis requiring all the expenses connected with transportation, the repair and use of machinery, and of the shops and stations of the company in Baltimore, to be paid by the Main Stem—the expenses of the road department alone being charged to this road."

Extensive improvements and large expenditures were made in the reconstruction of the track between Laurel and Washington. The superstructure of this portion of the road consisted of a 40 pound rail laid upon a continuous string piece of wood keyed into notched cross-ties. This track, which was not deemed desirable for the increased business, was replaced by a 60-pound T rail laid upon first-class white oak cross ties, and ballasted chiefly with stone from quarries on the Patapsco river, near the Relay House. This important work was successfully accomplished by the road department without interference with the large business then transacted, and without accidents.

The entire line from the Relay House to Washington, at the close of the year, had been placed in excellent condition. Work upon the second track was also commenced.

Unprecedented freshets occurred, which destroyed the culvert near Hanover and the large stone arch bridge at Laurel. Arrangements were promptly made for the construction of a heavy stone arch at Hanover, and the foundation prepared for a new and superior permanent iron bridge at Laurel.

The partial expenditures charged, deducted from the revenue stated, produced the net sum of $429,890 27, showing a decreased gain, compared with the preceding year, of $194,698 65 and an increased gain of $108,165 92 compared with 1861.

A dividend of 4½ per cent. was paid on the 31st of March, 1863, for the half year terminating on that date.*

III.—OF THE NORTHWESTERN VIRGINIA RAILROAD.

The earnings of this road for the fiscal year amounted to $446,220 86, and the working expenses to $404,095 07.

The exhibit is accompanied by the remark that "in consequence of the incompleted condition of this road, considerable sums which, from the difficulty of accurate adjustment, appear in the statement charged as repairs, properly belong to construction."

The cost of restoring the bridge destroyed by the enemy, with other losses connected with the hostile occupation of various portions of the line, and the large increase of new iron required for the repair of the road, are embraced in the expenses—no charges having been made to the construction account. The large ratio of working expenses is thus explained.

Until the tunnels upon this road are permanently arched, the embankments widened, and the sloping of the cuts further improved, extraordinary expenditures in working the road must continue.

The earnings were $82,198 67 greater than for the previous year, whilst the expenses increased $137,424 20, making a decreased comparative net result of $55,225 63.

The ratio of working expenses to the earnings was—

For 1858.....	$102 13	For 1861.....	$88 41
1859.....	82 55	1862.....	73 25
1860.....	72 28	1863.....	90 55

GENERAL REMARKS.

The aggregate earnings, working expenses, and net results of the Main Stem, Washington Branch, and Northwestern Virginia Railroad for the fiscal year have been, viz:

	Earnings.	Expenses.	Net Earns.
Main Stem.....	$6,509,946 06	$1,965,847 41	$4,544,097 65
Wash'gton Br. R.	703,123 59	273,233 32	429,890 27
N. W. Va. R. R.	446,220 86	404,095 07	42 125 79
Totals.....	$7,659,289 51	$2,643,175 80	$5,016,113 71

During the year 241,385 new cross-ties, and 6,647 tons of new rails were placed in the track of the Main Stem—more than the equivalent of 70 miles of track having been thus relaid.

The singular success and safety with which the large transportation of passengers and freight was conducted, under the circumstances surrounding the company, gave renewed evidence of the fidelity, vigor, skill and courage of the officers and men in each department of the service, for which the Board again, with pleasure, tender their acknowledgements.

By order of the Board.

JOHN W. GARRETT, President.

After the reading of the report, no other business being presented, the stockholders' meeting adjourned for the election of Directors to serve for the ensuing twelve months.

Messrs. John P. Kennedy, Miles White, and William J. Albern acted as judges, and, on counting the ballot, the following gentlemen were found to be unanimously re-elected by a vote of 34,050 shares, viz: Johns Hopkins, Samuel W. Smith, Francis Burns, William A. Hack, John Spear Nicholas, John Gregg, C. Oliver O Donnell, James Harvey, William Heald, Galloway Cheston, William W. Taylor, Samuel Kirby.

* NOTE.—The fall dividend for this year was not paid until the 16th of October, 1863, and, therefore, does not appear in the accounts of this fiscal year.

"Railroad Interest and Taxation."

EDITOR OF AMERICAN RAILROAD JOURNAL.

Sir:—Your remarks in your issue of November 11th, upon the above, strike me as just. The railroads have received few favors from the Government and their "interest" has certainly not been "protected," as others have, by the *Tariff*. As it is probable there will be a revision of the present one, it would seem desirable that the interest be represented by competent men in Washington, when the subject is under debate by a committee of the house.

Great irregularities affecting several classes exist in the document, owing probably to want of information on the part of the drawers rather than to design. This can no doubt be remedied if parties interested will take the trouble to call attention to the facts.

The railroad men should do it for their branch.

One leading feature is the encouragement given to the use of inferior material by under discrimination against the best.

It is well understood that railroad companies *ought* to use the best of everything; it is only a question of *ability to do so.*

Their are peculiar features in the case which remove the subject beyond the ordinary arguments of Protection or Free Trade; which if properly presented, I think, would induce members of all grades of opinion upon these points to unite in conceding all possible.

In the first place, there is the direct interest every man, woman and child in the country has in the question of *safety of life and person* on the railroads.

2d. The interest which the great branches of industry, agriculture, manufacture, commerce and mining, have in the proper conduction of them; they being absolutely necessary to their prosecution and development.

3d, It is a *public* rather than a private interest. That this is so, is proved by the fact that many of the European Railroads are owned and run by the *State;* and the subject of doing so is now being agitated in England.

It may therefore with good show of reason be claimed, that goods imported expressly for it, and fit for no other use; should be *free of duty* the same as Government importations.

There would be little fear of many of the roads making too much money; and if a few should, it would doubtless be spent in improvements of which the public would get the benefit.

The stock of material is low, the roads need a large amount to put them in proper order, they could get it—i. e. pay for it, none too soon if they could obtain it free of duty.

At any rate the *extra* inducement in addition to first cost, to use inferior should be removed.

Native manufacturers are of course entitled to consideration, and it is to the interest of the companies to patronize them as much as possible; but many of the articles required, they do not make *at all*, and cannot *of any* in quantity required for years to come.

The railroads and the public want them *now*.

NEW YORK, Dec. 5, 1865. PROGRESS.

Crop Statistics for 1865.

The Agricultural Department at Washington furnishes the following summary of the crops for 1865, compared with 1864:

	1865.	1864.
Wheat, bushels.....	148,522,829	160,695,823
Rye, "	19,543,905	19,872,975
Barley, "	11,391,286	10,632,178
Oats, "	225,252,295	176,690,064
Corn, "	704,427,853	530,581,403
Buckwheat "	18,331,019	18,700,540
Potatoes "	101,032,095	96,256,888
Total bushels ..	1,228,501,282	1,013,429,871
Hay, tons.....	23,528,740	18,116,751
Tobacco, pounds ...	185,316,953	197,468,229

The wheat crop of 1865 is very deficient in quality. The August report estimated the deficiency in quantity and quality at $26,241,698 bushels. The above table places the decrease in quantity alone at 12,172,944 bushels. The quality of the corn crop never was surpassed. That of the other crops is believed to be an average. The number of bushels in 1865 exceeds those of 1864 by 215,071,411.

☞ Surveys are now being made to the village of Saratoga Springs for a direct route to Boston by way of Hoosac Tunnel. The design undoubtedly is to connect with the Adirondack Railroad, and thence on to Ogdensburg—thus furnishing the shortest route between the great lakes and Boston. Energetic efforts are being made to complete the laying of twenty-five miles of the track on the Saratoga and Adirondack Railroad by the first of January, in accordance with the act passed at the last session of the Legislature. Should the attempt succeed, further legislation will probably be unnecessary.—*Saratogian.*

☞ We learn from the Harrisburg *Telegraph* that the railroad surveys which are about to be made from Milton, on the West branch of the Susquehanna, to Franklin, on the Allegheny river, under the chief direction of T. W. Kennard, Esq., the engineer and representative of the British capitalists, have been placed in charge of the following staff: Col. James Worrall, Consulting Engineer; W. Milnor Roberts and Col. P. Jarrett, of Pennsylvania, and Major Tom S. Rubidge of Canada, Associate Engineers of the Western, Middle and Eastern Divisions, respectively.

Railroads and Canals of New Jersey.

An abstract Statement of their finances, etc., for the year ending December 31st, 1864.

Chicago and Northwestern Railroad.

The Chicago *Times* says a contract has been concluded for the completion of the Chicago and Northwestern Railroad, including a bridge across the Missouri, on or before January 1st, 1868. The contractors agree to build the road, and receive their compensation in the shape of an annual rental for a number of years.

The National Debt.

The following is the detailed official statement of the public debt, just issued by Hon. HUGH McCULLOCH, Secretary of the Treasury:

DEBT ON WHICH INTEREST HAS CEASED.

Authorizing Acts.	Character of Issues.	Amount Outstanding.
Sept. 9, 1850.	B'ds, Texas Indemn'y	$726.000 00
July 17, 1861.	Notes, three years...	260.500 00
April 15, 1842	Bonds	81.268 68
Prior to 1857.	Treasury notes	104,511 64
Dec. 23, 1857.	Treasury notes	8,800 00
Dec. 17, 1860.	Treasury notes	600 00
Mar. 2, 1861.	Treasury notes	4,600 00
July 17, 1862.	Tempor'y loan coin.	1,200 00
Ag. of debt on which int. has ceased.		$1,187,480 32

DEBT BEARING NO INTEREST.

Authorizing Acts.	Amount Outstanding.
July 17, Aug. 5, 1861, and Feb. 12, 1862, U. S. notes.....	$60,000,000 00
Less amount withdrawn	59,607,930 00
Amount outstanding	392,070 00
Feb. 25, July 11, 1862, and Jan. 17, 1863, U. S. notes.....	398,189,124 00
Total	$398,581,194 00
Issued in redemption of temporary loan, U. S. notes.....	49,300,202 00
Less amount withdrawn.....	21,140,000 00
Balance.....	$28,160,202 00
July 17, 1862, fractional currency	8,545 351 64
Mar. 3, 1863, fractional currency.	17,559,845 56
Total fractional.....	$26,105,197 20
March 3, 1863, gold cer. of deposit.	7,200,440 00
Total	$460,047,033 20
Suspended requisitions	509,231 00
Total	$460,556,264 20
Amount in Treasury, coin	$47,224,379 10
Amount in Treasury, currency...	44,587,141 57
Total	$91,811,520 67
Aggregate of debt not bearing int.	$368,744,743 53

RECAPITULATION.

	Amt. Outstanding.	Interest.
Debt bearing interest in coin.	$1,167,169,941 80	$68,032,275 50
Debt bearing interest in lawful money ..	1,177,531,149 10	70,864,679 79
Debt on which int. has ceas'd	1,187,480 32	.....
Debt bearing no interest	368,744,743 53	.....
Total ..	$2,714,633,314 75	$138,896,955 29

LEGAL TENDER NOTES IN CIRCULATION.

One and two years' 5 per cent. notes.	$32,536,901
United States notes, old issue	392,070
United States notes, new issue	426,349,326
Compound int. notes, Act of June 30, 1864.....	167,012,141
Total	$626,290,438

The foregoing is a correct statement of the public debt, as appears from the books, Treasurer's returns and requisitions in the department on the 30th of Nov., 1865.

HUGH McCULLOCH,
Secretary of the Treasury.

Albany and Susquehanna Railroad.

This road has been graded as far as Unadilla, and it is thought cars will run to that place this season. The track is now being laid between Oneonta and Otego. The machine shops, we understand, are to be located at Colliersville, the centre of the line of road, and destined to be an important railroad centre, if the road from Rome and Utica to Rondout and Newburg is built, as it seems probable.

☞ The Montreal *Gazette* says that the taxes in Vancouver's Island amount to $200 annual tax per head.

DEBT BEARING INTEREST IN LAWFUL MONEY.

Authorizing Acts.	Character of Issue.	Rate of Interest.	Amount Outstanding.	When Redeemable or Payable.	Interest.	When Payable.

American Railroad Journal.

Saturday, December 9, 1865.

Stock Exchange and Money Market.

The past week has brought with it many interesting events for the consideration of financial writers. The present session of Congress has opened a variety of topics of real importance, not the least of which is our means of extricating the country from its difficulties of currency and inflation. Fortunately for us, we have a Secretary of the Treasury, who came to his high position without the aid of political intrigue, without the desire of political promotion, and with but the single motive of doing his duty. Many times there are men elevated to high positions, who after all are found incompetent to the task assigned them, but Mr. McCulloch with sound practical views, unimpeached integrity and great personal experience as a banker, has proved fully equal to his responsibilities, and has been growing in popular favor from the first moment of his administration. Each monthly report has even been more satisfactory than the preceding one; we see in each a palpable improvement in our financial condition, a steady movement in the right direction, an unwavering attachment to established principles, and an ease and readiness in the management of details, a thorough comprehension of the demands of the day, the peculiarities of our position, the wants of commerce, and the operations of the revenue systems which give confidence to the public and assure us we are once more on the right track to substantial prosperity.

The following is an analysis of his monthly statement for the 1st of December, and shows us the condition of the public debt and the Government circulation:

COMPARATIVE STATEMENT OF THE PUBLIC DEBT.

	Oct. 31.	Nov. 30.
Debt bearing interest in coin	$1,161,137,691 80	$1.167,169,941 80
Debt bearing interest in currency	1,191,819,787 46	1,177,531,149 10
Debt on which interest has ceased	1,373,920 09	1,187,480 82
Debt bearing no interest.	386,523,359 51	368,744,743 53
Total	$2,740,854,758 85	$2,714,633,314 76

The interest account compares as follows:

	Oct. 31.	Nov. 30.
Interest in coin	$67,670,340	$68,032,276
Interest in currency	71,267,738	70,864,679
Total interest	$138,938,078	$138,896,955

The legal tender money in circulation compares as follows:

	October 31.	November 30.
Five per cents	$32,536,901 00	$32,536,901 00
U. S. Notes, old issue	392,070 00	392,070 00
U. S. Notes, new issue	427,768,499 00	426,349,326 00
Comp. In. Notes	173,012,141 00	167,012,141 00
Total	$633,709,611 00	$626,290,438 00

The total currency in circulation compares as follows:

	October 31.	November 30.
Government legal tenders	$633,709,611	$626,290,438
Notes of National banks	203,877,355	221,230.215
Notes of State Banks	60,000,000	55,000,000
Total currency	$897,586,966	$902,520,653

Thus it will be perceived, that in the past month the public debt actually decreased by the sum of more than twenty-six millions of dollars. At the same time, the amount of interest has been lessened between 40 and 50 thousand dollars, and what is better and tells more directly on our currency, is that the legal tenders have been reduced by the sum of $7,419,173. It appears by this statement that the whole circulation of the National Banks is about 221 millions, certainly not a very appalling amount, not ten dollars per capita of the population, and the total circulation afloat in the country is but $30 per head. We therefore believe that the contraction aimed at by the Secretary is entirely practicable, and will be less difficult than has been supposed. We also believe that a contraction of even 50 per cent. would bring up paper very nearly to par of gold. The plan of

effecting this appears to be by funding and by cancellation of legal tenders with our surplus revenues, which being estimated in all, at four hundred millions of dollars per annum, will give Mr. McCulloch at least a surplus of one hundred millions to dispose of in this way. He cannot begin too soon for prices have run mad under the present inflation, and a vast majority of the people this day are on their former and fixed incomes unable to supply themselves with many of the necessaries of life. When a person has to pay $60 for an overcoat, not worth more than $15 or $20, and a poor garment at that, he at least comprehends the results of our present system. When he knows that for cotton shirting he is paying five times as much as it is worth, he feels that he is the victim of a very bad state of things. This inflation helps only one class of people, and ignores the economy, the labor, the acquisitions of the industrious, and the accumulations of labor of all the rest.

Our foreign imports at this port from the 1st of January to the 1st of October exclusive of specie, were of the declared value of $197,489,439 being less by $11,877,444 than for the same period in 1864. Our total foreign exports for the same period exclusive of specie were $155,451,650, against $201,735,438 in 1864, showing a decrease of $46,283,788. Prices are altogether too high to allow exports of our products. But for cotton this balance would be much smaller. The receipts of gold at this port from California since January 1, were $19,057,560, and for the same time in 1864 they were $11,118,675, showing an increase of $7,938,903.

The amount of customs received in gold at New York since 1st January last was $95,369,305, out of which has been paid as interest on gold bearing bonds $37,621,626, thus showing the impregnable position of the Treasury, and the solid basis on which the credit and punctuality of the nation rest.

In this condition of things the croakers are temporarily silenced, and the Governments are again advancing. When they see that since 31st August last the public debt has been actually reduced $43,656,257, and the legal tenders, and other Treasury notes have since that date been also reduced by the large amount of $57,848,521 they have not a word to say. All this has been quietly but steadily accomplished without any financial disturbance, and we see in the late decline of prices in manufactured goods, that a great gain has even now been effected. English political economists, looking at our resources, and practical good sense have to confess that a resumption of specie payments should not be so difficult, nor so tedious as it was in their case. Nothing can put us back in this honorable effort but hasty and ill judged legislation by the present Congress, who it is to be hoped will not place any unnecessary obstructions in the way of re-construction, or the return to production in the Southern States.

The last weekly statement of the Associated Banks, shows the following change from that of Nov. 25.

Loans, increase	$3,852,667
Specie "	1,087,561
Circulat'n "	536,872
Deposits "	1,653,625
Legal tenders, decrease	1,776,466

This last circumstance is in harmony with the statement of the Secretary of the Treasury.

The various documents emanating from the Government at the commencement of a session of Congress, including the President's message and the reports of the various departments have reached us, but too late in the week to be fully considered in this article. The report of the Secretary of the Treasury is a full and clear exposition of the condition of the finances of the country, contains the soundest maxims on the subject of money, currency and circulation but is deficient according to our notion in the remedies proposed, and seems to look forward to a long and serious procrastination in the work of resumption, though it admits the immense advantage of an early return to it. Mr. McCulloch was master of the situation, if he had chosen to be. All he had to do was to say to the National Banks, change your deposit securities, take back my promises to pay interest, (or bonds) and deposit my promises to pay without interest (or greenbacks) which Congress have a perfect right to demand, and he could then have contracted his circulation as rapidly as he chose, and need not have funded a dollar as he now proposes.

In great emergencies we want great measures. We have no patience for those temporising remedies which cannot cure, and only extend the sufferings of the patients. We shall, however, give a more careful examination to these documents at an early day. The President's Message seems to give general satisfaction, especially that part of it which recommends a contruction of our financial system. It contains an assertion which we reprint with hearty approval, "the duty devolves on us to diminish by law the amount of paper money now in circulation." We have shown how this can be done without costing the people one dollar, and without funding one dollar more. We do not despair of success, and do not wish to have our recovery from inflation and debt postponed or continued for 30 years.

Gold has reached 148½, and we now look for a further advance as paper is increasing and contraction proposed at a distant day, a policy which will yet wring the hearts of the people. Money is plentiful though gold is getting dearer. Exchange is still below par and steady at that. Railway securities are reported firm and advancing.

The market generally may be said to be quiet but much relieved from the apprehension of foreign difficulties by the tone of the President's Message.

The balance in the Sub-Treasury on Tuesday was $73,546,813 11.

The exports, exclusive of specie, from the port of New York for the week ending Dec. 4th, were $5,618,019, against $3,998,585 in 1864, and $3,505,610 in 1863. Total since Jan. 1, $156,423,797; same time in 1864, $202,502,454; in 1863, $160,390,899.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—American Gold, 146¾; U. S. 5-20s 1865, 99⅜; State 7s Bounty Loan, 99; Connecticut 6s, 96; Louisiana 6s, 75; City 6s, 1875, 90; Milwaukee and St. Paul, pref., 76½; do., 1st mort., 84; Mariposa pref., 21¾; do., 1st mort., 45; Chicago and Milwaukee, 77; McGregor Western, 28; Long Island R. Continental Bank Note Co,

This company, of which Ed. E. Dunbar, Esq., is president, E. P. Moore, secretary, execute orders for engraving or printing Bank notes, Stock certificates, bonds, drafts, bills of exchange and in fact all kinds of commercial papers, in the highest style of art, having on hand a large assortment of designs, and executing orders with promptness and accuracy. We refer our readers to their advertisement in another place.

☞ We publish in another column the advertisement of HENRY B. SMITH, Esq., whose office is at 47 Exchange Place. It will be seen that he buys, sells and negotiates stocks, bonds and all kinds of public securities, and in the most liberal manner as we have reason to know. His references are of the first class, and his experience large, as he has been associated with the United States Trust Company for ten years; and as a Transfer Clerk of the Cleveland, Columbus and Cincinnati Railroad, he has become familiar with the character of similar companies. Dealing at the Public and Regular Boards, he knows its phases perfectly, but he also negotiates securities not dealt with at either. We recommend Mr. Smith to the particular attention of our readers.

Baltimore, Catonsville & Ellicotts Mills R.R.

At the recent annual meeting of the stockholders of this company, the following gentlemen were elected directors for the ensuing year: Wm. Wilkens, Herman H. Grane, George M. Gill, Wm. M. Frick, Benj. Whitely, D. C. Howell and M. Benzinger. Mr. Wilkens was chosen president, Mr. Grane vice-president, and Wm. W. Orndoff secretary and treasurer. From the annual report, it appears that the revenue from passengers, rents, &c., during the year ending 31st of October, was $42,415 48, whilst the general expense was $35,417 72, making the net earnings $6,997 76. The interest on bonds and dividends amounted to $7,669 20, leaving a deficiency of $671 44. The average daily receipts were $116 20, and the average daily expenses $97 03; number of passengers carried during the year 222,841, being an average of 610 per day. The board of directors have declared a dividend of 3 per cent.

Laing, Wetherill & Co.

These gentlemen, established in 18 Broad street, give particular attention to the sale and negotiation of Government, railway and insurance securities, and petroleum stocks; also allowing interest on deposits, and giving attention to orders by telegraph. They buy and sell exclusively on commission.

Maryland and Delaware Railroad.

Gov. Bradford has issued his proclamation announcing that a contract was made by the Maryland and Delaware Railroad Company with Charles B. Dungan, on the 16th of September last, for the construction and completion of said road from Smyrna station, on the Delaware Railroad, to the terminus on Tred-Haven River, near Oxford, in Talbot County, and that said contract has been approved by the board of public works. Also, that the lien held by the State on the property of said railroad is waived, deferred and postponed in favor of the holders of any bonds necessary to be issued by said company for the completion and equipment of said work, and of no other parties whatever, not exceeding one million of dollars, as provided by the act of 1865.

Hempfield Railroad.

The Baltimore *Sun*, in noticing the proceedings of the stockholders of the Hempfield Railroad, states that it has heard that English capitalists have it in contemplation to complete the line to a connection with the Connellsville road. This is a very important announcement, implying, as it does, the early completion of the latter line, without which the proposed connection would hardly pay. By the completion of the Connellsville road, and the extension of the Hempfield so as to connect with it, the Baltimore and Ohio road, would have a connection with the Connellsville road independent of either the Cleveland and Pittsburg or Steubenville roads.

☞ *The St. Louis Republican* of the 21st ult., mentions a report that "a railroad corporation is in process of formation, with the intention of buying out the South West Branch of the Pacific Railroad, and extending it to the northern border of Texas, where it will be met by the Texas Central Road, a part of which is now under construction in a northerly direction from Galveston. The whole line, when laid, will be 900 miles long, and will place St. Louis and Galveston in direct communication."

Finances of Alabama.

The following statement shows the entire debt of the State—how and when created, except the interest on the University and Common School funds. This the State has assumed in perpetuity, and the annual interest is $134,367 80.

Outstanding State bonds issued for the capital of the State Bank and branches, viz:	$3,445,000 00
The annual interest on the bonds payable in New York is	105,450 00
The annual interest on the bonds payable in London is	80,370 13
The interest on the bonds due in New York was paid up to and including the dividend due Nov. 1, 1861; and there has since accrued instalments of interest in all amounting to	$121,800
Of which there has been paid at Bank of Mobile	53,400
Leaving due and unpaid	$368,400

The bonds due in New York in 1863 were authorized to be extended by an act passed at the called session of 1861. The new bonds were issued and some of them given in exchange for those due in 1863.

The interest on the bonds due in London was paid up to and including the dividend due Jan. 1, 1865, and there has since accrued as follows:

On June 1, 1865	$45,028 25
On July 1, 1866	17,670 96
Due and unpaid in London	$26,699 17
And there will be due on Jan. 1, 1866.	17,670 96

RECAPITULATION.

Due and unpaid on bonds in New York	$368,400 00
Due and unpaid on bonds in London.	62,699 17
Total	$431,099 17
Due in London on Jan. 1, 1866	17,670 93
Total amount	$448,770 13

For the purpose of meeting the expenses of the convention and the Provisional Government the sum of $40,000 was borrowed in New York in September. He believes the State can resume the payment of interest on the 1st of January, 1867, or the 1st of July thereafter, and recommends that an official statement is made to this effect.

Albany and Coeymans Railroad.

A corps of engineers are engaged in surveying and locating the line for the Railroad between Albany and Coeymans. The route which will most probably be selected is the one which passes through the tier of farms fronting the river. This line passes most of the way between the old Albany and Greene turnpike and the river.

Reno and Pithole Railroad.

Work upon this Road is being pushed with all the vigor possible, in the hope and determination to put it through to Pithole before the frosts make the work of grading difficult if not impracticable. Already, track laying has commenced from the Reno end of the route, and the track layers are pursuing the graders and the trestle builders at a rapid pace.

☞ The Receivers of the Vermont Central Railroad have been directed by the Court in that State to pay the first back coupons due on the first mortgage bonds of the corporation, the payment of which was withheld, some time ago, when the half-yearly interest was merely stamped upon the bonds, instead of being paid to the holders of the coupons, whether detached or not.

Journal of Railroad Law.

LIABILITY OF N. Y. EMIGRANT COMMISSIONERS FOR LOSS OF BAGGAGE, TRANSPORTED FROM SHIP TO CASTLE GARDEN.

This action was brought in the Court of Common Pleas of the city of New York by the plaintiff against the Commissioners of Emigration, to recover the value of a trunk and its contents, which it was claimed were delivered to the defendants, on ship board in the harbor of New York. On the plaintiff's arrival at that port, in the ship Ontario; which trunk the defendants undertook to forward to their place of business at Castle Garden, and it is alleged that the trunk and its contents, of the value of $1,290, were lost by the defendants, and judgment demanded for that sum.

The defendants denied that they received the box or its contents, and alleged that they were public officers of the State of New York, whose powers and duties were defined by statute, and they denied that they had any other powers, or that emigrants were landed at Castle Garden, or baggage taken or deposited there, by the defendants, or by any one by their authority, or on their behalf; or that they employed servants to do so.

It appeared on the trial, that the plaintiff, in August 1857, came as a passenger on the ship Ontario to New York, and brought three boxes or trunks, containing baggage; that a tug boat came alongside of the ship in the harbor, and persons on board put strap checks on the trunks, gave the plaintiff the checks and the trunks were put on board the tug boat, and taken to Castle Garden. The plaintiff subsequently obtained two of her trunks, but the other was missing, and could not be found. At one time when she called to make inquiries concerning it, Mr. Kennedy one of the commissioners of emigration, was there, and he took the check and refused to return it to her, and put her out of the garden.

The commissioners of emigration, composing a board of ten persons, was organized in 1847, to provide for the support and maintenance of indigent emigrants. By subsequent statutes they were authorized to designate a place in the city of New York where emigrants should be landed; to purchase, lease, construct and occupy wharves, piers and other accommodations, in the city of New York, for that purpose; to license the owners or captains of steamboats and other craft; to receive and land passengers and their baggage; and to revoke such licenses; and such persons were prohibited from acting without such licenses. Like power was given to them to license persons to solicit emigrant passengers and baggage, for boarding houses and transportation lines, &c., and the law required all personal baggage of emigrants to be landed at the place designated by them. In pursuance of these powers, the defendants designated Castle Garden as the place for the landing of emigrant passengers and their baggage; and procured an assignment of a lease of the place, to themselves, subject to a reservation by the assignor, of the right to rent such parts of the same as should be required for officers for the sale of tickets, and contracting for the transportation of emigrants and baggage.

They also licensed various steamboat captains and solicitors for boarding houses and transportation lines, and retained the control of the Garden, the regulation of its police, &c., but they w not engaged or interested in the transportation of passengers or baggage, and had no agents who were so engaged.

On this state of facts, a motion for a non-suit was denied, and the defendant's council excepted. The Judge then charged the Jury that the doctrine of *respondeat superior* was applicable to this case, and that the defendants were the superiors or principals; to which the defendants' counsel excepted.

The Jury found a verdict for plaintiff for $1,283 73, for which sum judgment was entered, with costs, after the denial at special term of a motion for a new trial.

On appeal to the court at general term, the judgment was reversed, and a new trial ordered, on payment of costs to the appellants; and from that order the plaintiff brought the present appeal, stipulating for final judgment, in case the order shall be affirmed.

SELDON, J.—The motion for a non-suit in this case should have been granted, and the exception to the charge was well taken. The proof does not show the defendants were in any way interested in the transportation, or care of the baggage, of the plaintiff, or that it ever came into their possession or under their control. The licensing of steamboat men and "runners," as they are called in the case, does not make the licensed persons their agents or render them responsbile for their good conduct. (Lane *vs.* Cotton, 1 Ld. Ray, 646.)

The ground, however, upon which the recovery below proceeded, was that the defendants were the principals in the transportation of passengers and baggage to the landing place appointed by them, and in taking care of the baggage when landed. This position cannot be sustained. In the first place, the commissioners of emigration, in their official character, in which, character they are prosecuted, have no authority to engage in such business; and if they were in a body, to overstep the bounds of their official duty and engage in such business, the responsibility which would attach to them in consequence of such business, would affect them as individuals, and not in their official character. In the second place, there is no evidence that either as a board or as individuals they have been in any way interested in, or connected with, the landing of passengers or baggage, or in the case of baggage after it was landed, or have appointed any agents for that purpose.

The government, in assuming control over the landing of emigrants and their baggage, does not undertake, either by itself or its officers, to indemnify emigrants against fraud, but it has established the regulations, which have been referred to in the belief, doubtless, that the opportunity to commit frauds would be thereby diminished. If those regulations have failed to protect the plaintiff, it is a misfortune, for which she has no remedy against the State or against the defendants. Her remedy is against the persons to whose care she entrusted her baggage, whose fidelity and vigilance the government has endeavored (in this instance unsuccessfully) to secure.

If any of the members of the board have failed in their duty, and the plaintiff has suffered in consequence of such failure, they may be individually liable, but the consequences of individual misconduct, if there were any, could not be visited upon the board.

The order of the general term must be affirmed, and jugdment absolute for the defendants ordered, in accordance with the stipulation.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway for the week ending Nov. 25th, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$46,454 00
Express, freight, mails and sundries	6,036 00
Freight and live stock	100,014 00
Total	$152,504 00
Corresponding week, 1864	129,903 00
Increase	$22,601 00

Railroad Earnings--Monthly.

The earnings of the Ogdensburg and Lake Champlain Railroad for October were:

1865	$86,978 09
1864	67,361 13
Increase	$19,616 96

The earnings and expenses for three months, August, September and October, 1865, were as follows:

Earnings	$245,653 71
Expenses	161,750 23
Net earnings	$83,903 48

The traffic of the Great Western Railway for the week ending Dec. 1, 1865, was as follows:

Passengers	$33,634 73
Freight and live stock	33,984 53
Mails and sundries	4,009 99
Total	$71,629 25
Corresponding week of 1864	60,188 39
Increase	$11,440 85

Railroads of Minnesota.

St. Paul and Superior.—There are now about two hundred men at work on the road, and the line is nearly graded—with the exception of the deep cut near St. Paul, and the filling at or near the levee on the river—continuously from St. Paul to a point near Forest Lake, within a short distance of Wyoming, and about twenty-five miles from St. Paul. After leaving a few miles of this end of the line, and the uneven country between St. Paul and White Bear Lake, the line of the road is nearly straight and the grade remarkably easy, and this we understand is the case over the entire line to the St. Louis River, a distance of one hundred and thirty-three miles from St. Paul, and to the waters of Lake Superior. Messrs. Banning and Branch and the other gentlemen connected with the road, confidently predict that they can have the cars running to White Bear Lake early next season, thus securing the sale of the bonds of the company, when they will grade the entire line through to the waters of the lake, and have the road completed and equipped in from two to three years.

St. Paul and Pacific.—On the route to St. Cloud and beyond, the St. Paul and Pacific Railroad is running cars to Elk River, a distance of forty miles north of St. Paul. Iron for ten additional miles is on its way here and will be laid this fall. On the main line extending west from Minneapolis, seven miles have been graded, and the company expect to have twenty miles ready for the iron by the 1st of June next. Iron will be brought up early in the season, and the track laying will then be commenced.

St. Paul and Winona.—Capital has been secured for building this road, and work on it is rapidly progressing. The route was surveyed some time since, and found to be very practicable. Grading has been commenced fifteen miles below St. Paul, and is progressing towards the city. Two or three miles are already completed, and between one

and two hundred men are constantly employed (and more are wanted) upon the work.

Minnesota Valley.—This line extends from St. Paul to Mankato and beyond, toward Sioux City, where it is to connect with the Union Pacific Railroad. The track is laid from Mendota to Shakopee, a distance of twenty-six miles. The line from Mendota to St. Paul will be built early next season to the foot of the bridge in West St. Paul, and in the meantime the distance (six miles) is traversed by steamboats and omnibuses.

Minnesota Central.—This road is now completed, and passenger and freight trains are running from Minneapolis to Faribault, a distance of fifty-six miles. The connection with St. Paul is at Mendota, and is the same as that with the valley road. Next season the work will be again pushed forward, and connection made with the Winona and St. Peter Railroad at Owatonna, and as rapidly as possible the road will be extended to the Iowa line, where it will connect with the Prairie du Chien road for McGregor and Chicago, and the Cedar Falls road and its connections for St. Louis. Though this road has been open for business but a few weeks, it is already taxed to its utmost capacity to transact the local trade, and a rapid increase of its facilities is being made.

Winona and St. Peter.—For about a year cars have been running on this line from Winona to Rochester, a distance of fifty miles, and a very large business has been done. This season the track has been graded fifteen miles further, to Mantorville, Dodge County, and the iron is now being laid upon it. The track is already laid three or four miles beyond Rochester, and will reach Mantorville next month. This will reduce the gap between the Winona and St. Peter and Central roads to a little more than thirty miles. The stage ride necessary to reach the East this winter, will consist of this gap, and forty miles from Winona to La Crosse.

Hudson and Tomah.—There is now a fair prospect for the early completion of this road. It extends from Hudson, Wis., to Tomah, on the Milwaukee and St. Paul Railway, and will ultimately be extended from Hudson to this city. When this is accomplished, it will afford us a very direct outlet to the East. A company of capitalists have taken hold of the enterprise, and grading will be commenced at both ends of the line early in the spring.

RECAPITULATION.

The following table shows the No. of miles of railroad which are actually completed in this State:

	Miles.
St. Paul and Pacific	40
Minnesota Central	56
Minnesota Valley	20
Winona and St. Peter	54
Total	170

Nearly twenty-five miles more will be completed this fall, and it is a moderate calculation to state that the cars will be running on three hundred miles of Minnesota road by next fall.

In addition to the above is the Minnesota Southern Railroad laid out from La Crescent westerly, the first twenty miles of which it is intended will be in operation by the first of January next. Five miles of track are already laid, and two hundred men are at work grading and laying the track.—*St. Paul Press.*

Orange and Alexandria Railroad.

We learn that upon the report of Mr. Dewitt, the secretary of the board of public works, the election of Andrew Jamieson as president, and the directors chosen at the meeting at the council chamber, have been recognized, and the road will be under their control.—*Alex. Gazette.*

☞ The Hudson *Republican* says there is a rumor to the effect that the Harlem road is to have a branch connecting by a bridge with the Saratoga and Hudson River Railroad, at a point some four miles above Hudson.

☞ Within a few months past the three Philadelphia horse railroads, Hestonville and Callowhill, Race and Vine, and Arch street, have been consolidated into one company, known on the stock books as "Hestonville." Besides covering four of the most populous streets named, in the heart of the city, the combined companies have the right to construct a railway on the west side of the Schuylkill, from Walnut to Girard avenue.

THE NORRIS LOCOMOTIVE WORKS,

LANCASTER, PA.

HAVE for sale and ready for delivery, the following First-Class Passenger Locomotives and Tenders, built of the best material, and guaranteed in every particular.

1 of 16½x22 Cylinders, 5 foot Drivers.
1 of 16½x22 Cylinders, 5½ foot Drivers.
1 of 16½x24 Cylinders, 5½ foot Drivers.

And will take orders for April delivery for either Freight or Passenger Engines, either for Coal or Wood.

BULKLEY & McNEILL,

CONSULTING ENGINEERS,

NATIONAL BUILDINGS,

57 Broadway, New York.

THE undersigned having established themselves in this City, and opened an office as above, would respectfully inform their friends, and those who may require their services, that they are prepared to furnish designs, specifications and working drawings for marine and stationary machinery of every description.

Those having mechanical designs which they wish elaborated, are invited to consult with the above, who will give professional advice, and if required furnish drawings, and estimate on the value of such inventions.

The undersigned also offer their services as general agents for the purchase and sale of all kinds of machinery.

Their experience in this country and in Europe in the practical designing of machinery, and the possession of designs, and detail drawings from approved European and American Workshops, render them confident of conducting satisfactorily any business that may be entrusted to their care.

READ THE FOLLOWING LETTER:

AMERICAN INSTITUTE, New York, Oct. 18, 1865. Wm. P Pierce, Esq., President Whipple File Manufacturing Co

Dear Sir,—I have the pleasure of handing to you, with this, the samples of Files as tested by me as one of the judges in connection with the Thirty-Sixth Annual Exhibition of the American Institute. You will notice in addition to those furnished by the Whipple File Manufacturing Company, which I understand are made from steel of their own production, that two of the most celebrated English makers are represented, namely, Messrs. Greaves & Sons and Messrs. Moss & Gamole, and it affords me much satisfaction to state that after having given the samples an equal and impartial test I find those presented by the Whipple File Manufacturing Co., to be fully equal if not superior, to the English, and in confirmation of my opinion, I refer parties interested to accompanying samples, which are one 12 in. half round bastard by Messrs. Greaves & Sons, one 12 in. half round bastard by Messrs. Moss & Gamble, one 13 in. half round bastard by the Whipple File Manufacturing Company.

With the results of this test in view I can see no reason why we need look to England for our supply of Files, either on account of superior quality of steel or excellence in workmanship.

Very respectfully,

(Signed) R. O. McDOUGALL,
Engineer and Machinist.

New York, Saturday, December 16, 1865.

Improved Method of Super-Heating Steam.

Steam as ordinarily used, and known as saturated steam, has of necessity particles of water diffused throughout it mechanically as dust is diffused through the air by agitation. When the agitation in a boiler is great, much water rises, some of which passes over into the engine, and the boiler is said to "prime." The principal loss incurred in using saturated steam, is by the water thus "primed" over, clogging the motion of the engine, and abstracting heat from the boiler and cylinder without rendering useful effect. By moderately superheating the steam, it is not only expended as a gas, and its power and elasticity increased, but the watery particles which it holds in suspension are vaporized, and made to perform work as steam. The economy resulting from this operation has been found by many trials to be very great, amounting to from 20 to 30 per cent. of the fuel used. In some cases the saving has been found to be even greater than this, and boilers deficient in power have been rendered entirely effective by the use of a superheater, doing away with the necessity of continually urging the fires. Very thorough and scientific experiments made on the steamers of the "Bay Line," while on their regular trips between Baltimore and Fortress Monroe, Va., gave the following results. With the steam superheated to a temperature of 375 degrees, the consumption of coal was reduced from 3⅝ lbs. per hour per horse power, when using saturated steam, to 2½ lbs., equivalent to a saving of 30 per cent. Such are the results which always follow the judicious use of superheated steam. Ordinary steam cannot part with any of its heat without suffering condensation, consequently, when it is allowed to expand in a cylinder a part of it is condensed. This loss is often a large per centage of the total steam used. As superheated steam admits of losing some of its surplus heat without being condensed, it will remain in the cylinder, pure, and dry to the end of the stroke. The economy effected in this way by the use of superheated steam is very great. A foolish prejudice exists in the minds of some in regard to the use of superheated steam. Such persons cannot have given the subject a careful consideration. Steam cut off from the boiler may be made perfectly pure and dry at 212 degrees, and the opinion of the highest authority is that superheating steam, 100 degrees above the temperature due to its pressure is ample to give most satisfactory results. Steam of a temperature of 400 degrees in the cylinder, is, and may in every instance be used with perfect safety to the lubrication employed, and the cylinder of the engine; practical proof of this assertion may be seen every day. At the late Fair of the American Institute held in this city, was on exhibition a very simple and efficient superheating apparatus, the invention of Mr. S. N. Carvalho, who has given much time and study to its improvement. Its operation was truly surprising, for when steam was passed through the superheater, its elasticity and power were doubled, and it was delivered to the engine so pure and dry as not to burn the hand, as will ordinary steam. The merits of the apparatus were thoroughly tested by the committee on machinery, (all of whom were practical experts) and a silver medal awarded. The essential parts of the invention are, first, a metal retort or heating chamer, and of a cylindrical form to insure strength; second, of a metallic filling, such as coils of wire for conducting the heat into the retort, and throughout the steam. The various apparatuses which have been employed to superheat steam, have given so much trouble by leakage at their many and necessary joints, and by the rapid deterioration and oxydation of the thin metal of which they are composed, that the general introduction of superheated steam has been slow. These defects are overcome by the peculiar construction of this superheater, and by the employment of a metal well calculated to stand the fire, as well as by a very simple compensating arrangement by which the decomposition of the steam by heat is entirely avoided. As steam is a partial non-conductor of heat, a column of it passed swiftly through a pipe, would not become thoroughly heated, the part next to the heated surface receiving heat, while the centre would be comparatively cool. The coils of wire introduced, which are elliptical in shape, then serve to break up the direct current of steam, and bring each distinct particle of it into contact with a heating surface, either the inside of the retort or the heated coils themselves. By these means pure steam of a moderate temperature may be obtained for operating an engine; or, when required, highly superheated steam will be produced, for the various pressure of distillation, and manufacture, fumigating ships, &c., without the slightest damage of decomposition in the steam.

As is readily seen, this superheating apparatus may be applied at a small expense to any of the forms of boilers in use. It may be placed in the back connection, back of the bridge wall, or in the furnace itself, according as a higher or lower temperature is required in the steam, and as it occupies little space, does not interfere with the draft. By the use of a check valve between the superheater and the boiler, the elastic force gained by superheating is prevented from re-acting on the boiler, thus making the superheater the fulcrum of the power. By this arrangement a weak boiler may be worked with a greatly increased pressure, and with not the slightest danger. On the boilers of the Ordnance Department of the Washington Navy Yard, where the apparatus is in successful operation, the following are results ob-

tained. With a pressure of 45 pounds in the boiler, and the superheater disconnected, 40 revolutions were obtained from the engine. With the superheater in operation 15 pounds of steam gave 45 revolutions; these facts need no comment. Where a moderate degree of superheating is employed, as in warming buildings, a practical test made in this city where the apparatus is in use, showed that a pressure of only 5 pounds was required to preserve the steam in the highest rooms of the building without condensation, and a greatly increased heating effect was obtained, Carvalho's improved superheater may be applied at a trifling expense to locomotive engines, and will entirely prevent "priming," greatly increasing their economy and efficiency.

In those cases, more speed will be obtained, with the same amount of fuel, and condensation in the cylinder will be prevented, thereby relieving the piston from much of its back pressure. The decomposition of the steam by the heat in the fire-box is perfectly compensated by a very simple preparation of the coils. The gain resulting from the superheating of steam is much greater for the first 50 degrees above its saturated temperature than afterwards, as has been proved by careful experiments; consequently it is necessary to expend but a very small quantity of heat, to greatly augment the power and efficiency of ordinary saturated steam. In marine boilers which are provided with high steam jackets around the smoke pipes, the introduction of the coils of wire into this space, by increasing the superheating surface, has been found to effect a large saving in fuel; and by equalizing the temperature of the metal and the steam, prevents that alternate expansion and contraction which is the principal cause of the frequent destruction of the inner lining of the steam jacket.

In comparing Carvalho's superheater with others which have been used, the following advantages will be prominent:

1st. Its simplicity, practicability, and durability. 2nd. Its adaptability to every form of boiler, marine, locomotive, stationary, &c. 3rd. Its cheapness of construction, and 4th. Its perfect method of compensating for the decomposition of steam by heat, which feature is not possessed by any other superheater.

Further particulars in regard to this valuable invention will be given, by calling upon, or addressing HENRY W. BULKLEY, Esq., 57 Broadway, N. Y., who is the sole agent for the United States.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 30th Nov., inclusive, during the years 1864 and 1865, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1864	1,129,200	14,808,700	9,281,900	2,853,000
1865	863,800	9,404,500	17,313,100	4,000,900
Dec.	265,400	5,404,200	*8,031,200	*1,147,900

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 1,346,240 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of Nov., in the years indicated:

	1863.	1864.	1865.
Canal opened—	May 1.	April 30.	May 1.
Flour, bbls	1,410,000	1,029,200	863,800
Wheat, bush	21,078,200	14,808,700	9,404,500
Corn, bush	20,553,400	9,281,900	17,313,100
Barley, bush	2,778,700	2,853,000	4,000,900
Oats, bush	11,289,400	11,272,000	9,787,300
Rye, bush	400,900	592,200	1,081,400
Malt, bush	.....	.....	491,500
Beef, bbls	57,200	48,700	9,864
Pork, bbls	229,800	56,800	15.109
Bacon, lbs	3,624,900	579,600	1,273,100
Butter, lbs	4,939,600	865,800	1,099,600
Lard, lbs	20,082,800	2,225,400	1,996,000
Cheese, lbs	9,006,600	3,305,100	15,109,200
Wool	388,800	1,226,100	617,000

Hartford and New Haven Railroad.

The earnings and expenses of this road for the years ending August 31, 1864 and 1865, have been as follows:

Earnings.	1864.	1865.
From passengers	$787,626 65	$944,627 39
" freight	457,110 09	456,742 62
" rents, mail and expresses	47,570 21	58,341 30
	$1,292,306 95	$1,459,711 31
Expenses, viz:		
Repairs of road and bridges	$166,361 27	$242,377 12
Material and labor on engines and cars, and new cars	194,845 33	180,308 57
Station repairs and improvements, including new buildings	41,001 83	56,883 60
Transportation & general expenses	204,284 95	264,913 37
Wood, coal and oil	103,901 39	163,880 60
Lost & damaged goods, gratuities, etc.	9,313 59	4,013 81
	$719,708 36	$912,377 07
Balance of interest	50,337 69	53,996 99
Taxes—State & N'tion'l	64,935 12	138,806 55
	$834,981 17	$1,100,180 61
Net receipts	$457,325 78	$359,530 70

The gross earnings of 1865, compared with those of 1864, show an increase of $167,404 36; with an increase in operation expenses of $192,668 71; of interest, $3,659 30; and of taxes, $68,871 43—making a decrease in net receipts of $97,795 08.

The number of miles run by passenger trains during the year was 298,178; by freight trains, 116,112; by other trains 37,948—total 452,238—making a decrease as compared with the previous year of 6,007 miles. Number of passengers carried, 924,501; tons of freight transported, 288,253—showing an increase in the former of 68,136, and in the latter a decrease of 42,354. The report says:

A new railroad of about two and a half miles in length, constructed by the New Britain and Middletown Railroad Company, connecting the village of New Britain with our road at Berlin Station, was opened for use in January last, and has since that time been operated by this company, for a certain percentage of the gross receipts on that road.

The expenses of operating the road have continued to increase, and only the very large earnings have enabled the company to continue its business without increasing the rate of charges for transportation of passengers and freight. The cost of coal for locomotives, and of new rails, have, during the greater portion of the year been largely in advance of any previous experience, while at the same time the business has required a larger supply than heretofore of these, as well as of all other articles used in the operation and repairs of the road and its equipment.

We have been obliged to add largely during the year to the rolling stock of the road, as well as to the accommodations at various points on the line, to meet the requirements of the increased business. Thirty new freight cars and five new passenger cars have been put upon the road, which with our proportion of a supply of new passenger, baggage and post office cars, for the New York and Boston Line, have caused an expenditure of more than $70,000, in addition to which about $60,000 have been paid for new structures on the line of the road, both these items of expenditures being included in the accounts of current expenses for the year.

The taxes, State and National, it will be observed are equal to nearly four and one half per cent. on the present increased capital of the company.

The Iron Bridge for crossing Connecticut River at Warehouse Point, mentioned in our last Report as being under construction in England, was received in New York during the early part of the present season, in parts suitable for shipment, and since that time the process of erecting it has been going forward under the immediate care and direction of James Laurie, Esq., Civil Engineer, who had prepared the plans, and personally supervised the making and execution of the contract for this work in England. Six spans of the new bridge are in position and now carrying the trains. The remaining spans are nearly all in process of erection, and we trust that during the present autumn the whole will be completed. The high reputation of Mr. Laurie and the constant personal care and oversight which he has devoted to this work, with the evidences of strength and stability furnished by those portions of the bridge now in use, afford assurance that when completed it will give us what has long been felt to be indispensable as a protection against a sudden interruption of the business of the road, by a disaster of some kind to which the present wooden bridge is at all times liable.

The total cost of the bridge up to the present time is as stated in the report of the Secretary, in addition to a sum of $36,000 which was paid in the preceding year and charged in the account of current expenses for that year.

In the suit against the New York and New Haven Railroad Company, commenced in September, 1857, in the Superior Court of the City of New York, a judgment was rendered in December last, in favor of this company, for damages and costs, amounting to $40,242 97, and sustaining, substantially, the claims of this company as to the matters in controversy. The New York and New Haven Company have appealed this case to the General Term of the same Court, where it is now pending, and where, we have reason to hope, it will soon be argued and determined. As this suit only covered our claims for the year previous to its commencement, a new suit has been commenced, embracing the intermediate period, and covering, of course, a much larger amount. This we suppose will await, and be determined by, the ultimate result of the case now pending in the Superior Court.

The capital stock of the company previous to the pro rata distribution of stock to the stockholders in October last, consisted of 23,500 shares, amounting at par to $2,350,000
That distribution absorbed 4,671 shares 467,100
(29 shares in fractional rights having been paid for by the company,)
28,171 shares. $2,817,100

It being apparent that the large payments for the Iron Bridge, the steamboat and other permanent additions to property of the company, rendered necessary by its increased business, could not be met at once out of the current earnings without encroaching upon the means for the regular dividends, the President was authorized to sell 500 shares of the unissued stock at market rates;

337 shares had been sold under this authority when it was determined by the Board of Directors to make the capital stock $3,000,000, and to offer the remainder then undisposed of, being 1,492 shares to the stockholders at $150 per share, as the stockholders were informed by Circular issued 15th March, 1865. Of this amount 1,386 shares were taken on the terms indicated, and the balance, 106 shares have since been sold at market rates.

The aggregate avails of these several sales of stock amount to $305,810—a balance of $14,660 beyond the amount stated in the Secretary's report having been received since the closing of the accounts for the year, which amount will be accounted for in the report for the coming year.

A quarterly dividend of three dollars per share, free of Government tax, was declared payable October 2, 1865.

The income account of the company for the past year is as follows:

Cash on hand September 1, 1864	$69,203 66
Income of the road	1,459,711 31
Sale of stock	291,150 00
Sale of real estate	659 11
Debts due the company, decreased	9,908 88
	$1,830,632 96
Dividends paid	$327,437 50
Interest	53,996 99
Operating and repairing road	947,991 04
State and National taxes	133,806 55
Real estate	13,567 36
Steamboat Orient	62,058 15
New Connecticut River Bridge	148,337 08
Fractional shares	6,300 00
Cash on hand	137,138 29
	$1,830,632 96

The following from the ledger presents a general statement of the affairs of the company, September 1, 1865:

Capital stock	$3,000,000 00
Bonds	927,000 00
Contingent fund	268,901 45
Reserved "	150,000 00
Profit and loss	211,409 70
Dividends unpaid	8,092 00
Debts due by the company	88,930 08
	$4,654,333 23
Construction	$3,129,047 20
Middletown Extension Railroad	27,682 66
Real estate, land, dwellings, etc	87,589 71
Bonds purchased	37,000 00
Tomlinson bridge stock	102,888 67
Advances to Tomlinson bridge Co	33,421 21
Equipment, engines and cars	254,000 00
Wood, stock and tools	195,882 71
Debts due the company, including account due from N. Y. & N. H. R. R. Co. unadjusted, and funds in the hands of agents	289,502 19
New Connecticut River Bridge	178,964 80
Steamboat Orient	181,215 79
Cash on hand	137,138 29
	$4,654,333 23

The office of the company is at Hartford, Conn. The Directors chosen September 20th, 1865, are as follows:

President.—C. F. Pond.

Directors.—Charles F. Pond, Julius Catlin, H. C. Robinson, Cornelius Vanderbilt, John A. Robinson, Ezra C. Read, Chester W. Chapin, A. G. Hazard and Samuel H. Parsons.

Vice President.—W. P. Burrall.

Treasurer.—C. M. Pond.

Secretary.—S. P. Conner.

Superintendent.—E. M. Reed.

☞ Gen. Wm. Mahone has been elected President of the South Side Railroad Company.

Finances of Virginia.

The following is an extract from the recent message of the Governor:

The amount of State bonds registered and bearing interest at six per cent. is		$21,888,398 38
Registered 5 per cent. bonds		108,000 00
		$21,996,839 38
6 per cent. coupon b'ds.	$11,108,000	
5 per cent. coupon b'ds, payable in London	1,865,000	
		12,973,000 00
Aggregate amount		$34,966,398 38
Interest outstanding and unpaid July 1, 1865		5,071,337 29
Add guaranteed bonds, by which the State is liable, and will have to pay		822,855 00
Interest thereon to July 1, 1865		197,726 20
Making an aggregate up to July 1, 1865		$41,061,316 89
ASSETS OF THE STATE.		
Stocks in the railroads		$18,649,843 34
Seven per cent. bonds loaned to railroads		3,093,333 33
Add four years' interest		866,133 20
		$22,709,319 87

Of the above stocks there is expended in railroads, from which it is not probable that the State will derive any income (for many years, at least,) and which should be deducted from the estimate of available assets of the State, $7,359,946 52. It is hoped that in time the residue of these stocks and bonds may be made available to the Commonwealth.

The holders of Virginia State bonds are pressing for payment of the interest due. On the first day of January next, the interest due on these bonds will amount to above $6,000.000. Various plans have been suggested for funding this interest, and the issue of bonds for the same, bearing different rates of interest; those who hold no bonds, for the most part, propose that the bonds issued to pay this interest shall not themselves bear interest, while others, including the bondholders, insist on different amounts of interest from one to six per cent. The English bondholders propose that the State shall fund the interest due them, issue bonds for the same, and commence the payment of interest on the whole debt on the first day of January, 1867.

Patent Office Report.

During the year ending September 30, 1865, there were received at the Patent Office 11,860 applications for patents, and 70 applications for an extension of patents. 6,292 patents (including reissues and designs) were issued, and 61 extensions granted. 1,538 caveats were filed. 741 applications allowed, but no patents issued thereon by reason of the non-payment of the final fee.

On the 1st day of October, 1864, there was a balance to the credit of the fund of $56,117 39. The fees received for the succeeding 12 months amounted to $316,987 27. The expenditures during the same period were $262,445 47. Leaving a balance on the 1st day of October, 1865 of $110,659 19.

The law provides that in interference cases, or where letters patent have been refused, an appeal lies from the decision of the primary examiner to the examiners-in-chief, and from their decision to the Commissioner of Patents. According to a judicial construction of existing laws, an appeal may be taken from the decision of the Commissioner to the Chief Justice, or one of the Associate Judges of the Supreme Court of this District. This procedure is unnecessarily circuitous and protracted, and should be abridged by an amendment of the law so as to allow an appeal from the decision of the primary examiner or the examiners-in-Chief directly to the Supreme Court of the District of Columbia, if the party against whom it is rendered so elects.

The Commissioner of Patents is clothed with unrestrained discretionary power in all cases of application for the extension of patents. His decision, whether favorable or unfavorable, is final, and frequently involves private and public interests of enormous value. It is submitted for the consideration of Congress whether it is wise to lodge so large a power with a subordinate officer, without subjecting its exercise to the supervisory control of the head of the department.

Navy Department.—Expenses and Estimates.

The total expenses of this department from the 4th of March, 1861, to the 30th of June, 1865, embracing a period of four years and four months, and covering not only the ordinary expenses of the navy, but such as have arisen in the purchase, construction and equipment of vessels, and in the maintenance of the large naval force required during the war, were $314,170,960, an average annual expenditure of $72,500,990. It is gratifying to note that the expenses of this Department since the commencement of the war have been but nine and three-tenths per cent. of the expenditures of the Government during the same time.

The available resources for the fiscal year ending June 30, 1865, were	$140,091,125
Expenditures during the same time	116,781,675
Total	$23,309,450
Appropriations not wanted and carried to surplus fund	900,459
Leaving a balance at the commencement of the present fiscal year of	22,408,990
The appropriations for the current year are	119,882,928
Making the total available resources from appropriations for the fiscal year ending June 30, 1866	$142,291,919

This is exclusive of what has been and may be derived from the sale of vessels and other property which the close of the war has enabled the department to dispose of.

The whole of this large amount will not be needed for disbursement during the year, and several of the bureaus will have balances sufficiently large to cover their expenditures for the succeeding fiscal year. The estimates for the year ending June 30, 1867, are as follows:

Pay of the navy	$9,336,638
Bounties to discharged seamen	800,000
Equipment of vessels	1,000,000
Navy yards, pay of superintendents, &c.	7,185,536
Navigation, naval academy, observatory, &c.	436,779
Surgeons' necessaries and hospitals	265,750
Marine corps	1,757,754
Contingent and miscellaneous	3,200,000
Total	$23,982,457

This amount includes the sum of $5,500,000 for the erection of barracks for the accommodation of seamen now quartered on board receiving ships, for the erection of additional dwelling houses for officers in the several navy yards, the purchase of land and other improvements of a permanent character.

☞ The Atlantic and Great Western Railway took possession of the Catawissa Railroad on the 1st instant. The former President is General Manager of the road.

Liability of Railroad Company for death of Person, caused by Negligence of Servants.—Measure of Damages in such cases.

Since the general introduction of the railway, and owing doubtless to the increased peril to life by railroad travelling, it has been sought to throw about the traveller some additional protection by providing a redress which shall be had against the company in case of his death from personal injuries received through the carelessness of the company or its servants.

At the common law, the death of a human being, though clearly involving pecuniary loss, is not the ground of an action for damages. Therefore where the wife of the plaintiff was killed by the overturning of a coach, it was held that he could recover damages for the loss of her society &c., only up to the time of her death. So no action lies at common law by a husband whose wife was killed instantaneously by the carelessness of another. But the common law in this regard has been abrogated by statutes which exist in England, and in most, if not all, of the American States.

The statute of this state was passed in 1847, and subsequently amended in 1849. It provides that when the death of a person is caused by wrongful act, neglect or default, such as would (if death had not ensued) have entitled the party injured to sue, then the person or corporation who would have been liable if death had not ensued, is liable for an action for damages notwithstanding the death, and although it was not caused under circumstances which amount to felony.

Such action is to be brought by the personal representatives, and the recovery is to be for the benefit of the widow and next of kin, to be distributed to them as personal assets. In such actions the jury may give damages they may seem fair and just compensation not exceeding $5,000, with reference to the pecuniary injuries resulting from such death to the wife and next of kin.

It is also provided that every agent, engineer, conductor, or other person in the employ of the company or person through whose wrongful act, neglect or default, the death of a person shall have been caused shall be liable to indictment, and upon conviction thereof, may be sentenced to a state prison for a term not exceeding five years, or in a county jail not exceeding one year or to pay a fine not exceeding two hundred and fifty dollars, or both fine and imprisonment.

It is to be observed that this statute only gives a right of action to the personal representatives of the person injured and dying, when the person so injured, *if living*, might have maintained an action, and recovered damages for the same injury. For instance, before the act of the legislature of this State, giving a married woman the right to sue for personal injuries in her own name, the husband could not maintain an action for damages sustained by reason of the killing of his wife. (Lynch *vs.* Davis 12 How. Pr., 323.) It is now, however, well settled that an action may be maintained by a husband as adminstrator of his deceased wife, whose death was caused by the negligence of the defendant, on a complaint alleging that the deceased left a mother who was the next of kin surviving her. (Green *vs.* Hudson River R. R. Co., 31 Barb., 260.) In the case of Stafford *vs.* Drew, 8 Duer 627 the plaintiff was the administrator of his son, who it was alleged, had lost his life by the wrongful acts of the agent of the defendant, and he had described himself simply as the father of the deceased. On demurrer the court held the complaint defective because it did not aver that the deceased left a widow or next of kin, who alone would be entitled to recover damages resulting from the death of the person. The court were of opinion that the act may be interpreted so as to allow an action where there is a widow only or next of kin only, as well as where both are in existence.

In the case of Quin *vs.* Moore, in the Court of Appeals, (15 N. Y. Rep. 432) the party who lost his life was a child of twelve years of age, and the action was brought by the administrator for the benefit of the mother who, it was admitted, was the sole heir and next of kin to the child. A recovery was had, and the judgment was sustained on appeal. In rendering the opinion of the court, Judge Comstock says, that the only condition on which the right of the adminstrator to sue under the statute depends, is the common law right of the injured person to maintain an action if he were living; and that it is not required that the person killed should be a husband, father or protector, although the legislature in passing the act, were doubtless mainly influenced by the evident justice of compelling the wrong doer to compensate families dependent, in a greater or less degree, for support, on the life of the deceased.

Therefore, although, a child, twelve years of age, might not maintain an action for personal injuries to himself (such an action should be brought by the father) yet, as was held in the case of Green *vs.* Hudson River R. R. Co., his administrator may bring the action for the benefit of his father, in case of the child's death from the injuries. As the court remarks in this case, "this point is rather too fine."

The statute, in allowing an action to be sustained in cases where an action would lie by the party injured, if living, does not refer to the party in any technical or narrow sense. It manifestly looks to the cause of action, rather than to the particular parties, whose names it might be necessary to use on the record.

Of course where there are no next of kin or widow of the person dying, such as father, mother, child, brother or sister, &c., no recovery can be had. The recovery is fort he benefit of the next of kin, or widow only. The money which may be recovered is not for the benefit of the estate generally, nor does it become assets, to be administered according to the general law of distributions. The ground upon which the damages are to be estimated, is not the detriment which the estate of the deceased has suffered from the wrongful act of the defendant in causing his death, but the pecuniary loss which certain parties connected with him have sustained on that account.

AMOUNT OF DAMAGES RECOVERABLE.

The interest which the next of kin have in the life of a person negligently killed, is pecuniary. The purpose of the statute is to give the widow and next of kin a pecuniary compensation for the loss they may suffer by the destruction of the life of a husband, parent or other person upon whom they may be dependent, or the preservation of whose life is of any pecuniary value to them. The language of the act is express, that the jury are to "give such damages as they shall deem fair and just, with reference to the pecuniary injury resulting from such death, to the wife or next of kin of the deceased," subject to the limitation as to the amount ($5,000,) mentioned in the statute. The money, when recovered is to be distributed to the widow and next of kin, according to the statute for the distribution of personal property.

In the case of Lehman *vs.* The City of Brooklyn, 29 Barb., 234, a father sued to recover damages for the death of his son, aged 4 years, caused by falling into a well under a sidewalk. The jury gave the plaintiff a verdict for $1,500, from which judgment the defendants appealed. The judgment was reversed on the ground that the damages were excessive. The Court say: "The child was four years and one month old when he died. For the next ten years, had he lived, it may safely be said, that he would have been a burden, in place of a benefit, pecuniarily, to his parents. And for the next seven years after that, if educated to a profession or mercantile calling, or put to a trade, he would have done well, if he supported himself. During all this time he would have been exposed to disease and death and the other ills that beset human life in all its stages. The life of this little boy, however priceless it may have been in other respects, had no *pecuniary value*, which the jury could justly estimate at $1,500."

It may be stated therefore, in general terms, that the suffering of the deceased or the anguish of a parent, husband, widow, or next of kin, cannot be taken into account. So, no damages can be recovered by a husband for the loss of the society of his wife, or for his own mental suffering for her death. (Green *vs.* Hudson River Railroad Company, 32 Barb., 25.) In an English case, (Gillard *vs.* Lancashire and Y. R. R. Co., 12 Law Times, 356,) which was an action for the benefit of a widow, for the damages resulting from the death of her husband, the Court ruled that it is utterly impossible for a jury to estimate any sum as compensation for the injured feelings of the survivor; that all that is left which was applicable was the pecuniary loss sustained by his family. He said, "The framers of the act never could have meant to give compensation to the parent for the mere deprivation of his son, or to the widow for that of her husband." The plaintiff's counsel observed, "In that view a widower would not be entitled to sue for compensation for the loss of the society and comfort of his wife." And the Lord Chief Baron said, "clearly not unless her death is the cause of a pecuniary loss to her husband." The damages are to be calculated on a reasonable expectation of pecuniary benefit as of right or otherwise, from the continuance of the life. At the best, the measure of damages must be somewhat indefinite, and much must be left to the good judgment of the jury, but they must confine their inquiries to the pecuniary loss. (Franklin *vs.* The South Eastern Railway Company, 3 Hurlston & Meriam's Rep., 211; Pennsylvania Railroad Company *vs.* McCluskey, (23 Penn. Rep., 525.) Safford *vs.* Drew, (3 Duer., 627,) supports this view of the act, and is an authority for excluding from the consideration of the jury the loss of the society of the deceased. The Superior Court affirm the decision of the Queen's bench in Blake's case, and apply its principles to the interpretation of our own statute.

Oldfield *vs.* The New York and Harlem Railroad Company, (14 N. Y, Rep., 310,) decides 1st. That there need be no proof of any pecuniary or special injury sustained by the next of kin, but in the absence of such proof a recovery for nominal damages, at least, may be had; 2d. That it is not necessary that the next of kin should have a legal right to pecuniary benefit from the continuance of the life of the deceased; and 3d. That the damages may be assessed in reference to the prospective as well as the present loss. The two last propositions were involved and decided in Franklin's case, (Supra;) the Court holding that a reasonable expectation of a pecuniary benefit to the party was sufficient. But Judge Wright does say that the jury "were not to compensate for the pain and suffering endured by the deceased, or the anguish and mental distress of a wife or children incident to the loss of a husband or father, but were to measure the compensation by the pecuniary injury exclusively," and to this extent affirms the doctrine of the Court of Queen's bench. Quinn *vs.* Moore, (15 N. Y. Rep., 432,) is put upon the ground that the mother, by the death of her son, was deprived of his services to which she was entitled until he became of age. No pecuniary damage can be predicated upon the loss of the society of the wife. It is a case for which money cannot compensate, and cannot be estimated in money. A pecuniary loss is a loss of money, or of something by which money, or of something of money value, may be acquired. See Beach *vs.* Rawney, (2 Hill, 309,) and the cases cited by Bronson, J., and Ransom *vs.* The New York and Erie Railroad Company, 15 N. Y., Rep., 415.

In estimating the damages in an action under the statute for the death of a father, the jury may take into consideration the value of the support by the deceased of his wife and children, during his probable life, less their earnings. The jury should not, however, in assessing the damages, allow any deduction because of the fact that his wife had received the amount of an insurance effected upon his life for her benefit. The only limit to the damages which it is in the power of the jury to award, is the sum fixed by the statute, $5,000. (Athof *vs.* Wolf, 2 Hilt., 344.)

In the case of Tilly *vs.* Hudson River Railroad Company, (24 N. Y., 471,) it was held that in an action by the administrator of a married woman to recover damages for her death, caused by the defendant's negligence, the loss sustained by her infant children in being deprived of maternal nurture and education was a proper ground of substantial damages. The injury in such a case is not pecuniary in a very strict sense of the word, but it belongs to that class of wrongs, as distinguished from injuries to the feelings and sentiments; and in the opinion of the Court in the last case, falls within the term as used in our statute.

The mere fact, however, that a wife was employed in a lucrative business, rendering it probable that, had she lived, her children upon the death of her husband, would have received an estate augmented by her earnings, cannot be taken into account in estimating the damages. (24 N. Y., 471.)

Such damages are too remote, as it would be impossible to know whether the husband would have accumulated the earnings, or who would be entitled to succeed to his estate. The case might be different, however, where the person deceased was a widow, having children dependent upon her.

General Land Office Report.

It appears from the report of the Commissioners of the General Land Office that during the fiscal year ending June 30, 1865, public lands were disposed of as follows:

Acres sold for cash	557,212.53
Acres located with military warrants	348,660.00
Acres located with agricultural scrip	460,130.27
Acres selected under agricultural college grant	808,358.11
Acres approved to the States as swamp lands	571,429.24
Acres approved to the States for R. R.	607,415.39
Acres taken under the homestead law	1,160,532.92
	4,513,738.46
During the quarter ending Sept. 30, 1865, the aggregate quantity taken for the same purposes was	880,591.13
Making, during five quarters, the total number	5,394,329.59

The cash receipts from sales, homestead and location fees, for the same five quarters, ending Sept. 30, 1865, were $1,038,400 78.

The cash sales for the year ending June 30, 1865, amounted to $748,427 25, an excess of $70,-420 04 over the sum received from the same source the previous year.

During the first fiscal year ending June 30, 1865, 4,161,778 acres of public lands were surveyed. The aggregate quantity of surveyed public lands undisposed of Sept. 30, 1865, was 132,-285,035 acres.

Owing to the failure of the appropriation for that purpose at the last session of Congress, no contracts have been made for surveys during the current fiscal year, except where there were unexpended balances from previous years, or where the expense of survey was defrayed by private parties.

Ride in a Pneumatic Railroad Tube.

A London paper contains an account of the recent opening of a pneumatic line of railway from the General Post Office to the London and Northwestern Railroad, and the passage through the tube of several gentlemen who were anxious for a new sensation. Due preparation was made, and against many remonstrances the party determined to go. The account of the expedition says:

"The first sensation at starting, and still more so upon arriving, was certainly not agreeable. For about a quarter of a minute in each case there was a pressure upon the ears suggestive of diving bell experience, a suction like that with which one is drawn under a wave, and a cold draft of wind upon the eyes, having almost the effect of falling water; but once fairly within the tube these sensations were got rid of, or left behind, and the motion had little positive discomfort about it. It was a curious sensation to be flying along through the earth, feet foremost, in utter darkness, for the best part of ten minutes, which, in such a place, seemed half an hour.

Various experiments have been tried with the tube and its powers of suction, one of the officials at last determined to see what would happen in case the train stuck fast at any point on its journey. A carriage was accordingly 'scotched,' or fastened in such a way that it could not move, and then the power of the engine was exerted to the utmost. The carriage in question was intended for passengers, and furnished accordingly. By and bye one of the cushions, the others, and finally all the moveables which the carriage contained, were hurled through the tube and delivered at the other end, the force exerted being such that even the nails keeping down the carpet were extracted. The air within the tube was by no means foul or disagreeable. Finally the party reached the end of the journey in safety."

Interest and Dividends.

The Philadelphia and Reading Railroad Company has declared a semi-annul dividend of ten per cent. on the preferred and common stock, payable in cash or in the stock of the company at par, at the option of the holder, clear of all taxes, on the 30th inst.

The Vermont and Canada Railroad a semi-annual dividend of 4 per cent. payable Dec. 1.

The Cleveland and Pittsburg Railroad Company has declared a dividend of four per cent. payable, free of tax, on the 10th of January.

The coupons of the McGregor Western Railway Company's bonds, due 1st August, 1865, will be paid at 48 Exchange Place.

The interest on the public debt of the State of Illinois maturing in January will be paid at the Ocean National Bank, in this city.

New Lines of Railroad.

Three new lines of railroad, extending through the counties of Montgomery, Chester, and Berks are likely to be built next year—the Perkiomen railroad, connecting with the Reading railroad near Pawling's Bridge, and with the Auburn railroad in Lehigh county; the Colebrookdale railroad, connecting with the Reading railroad at Pottstown, and running by way of Boyertown to the Rock Mines, Berks county, and connecting with the Catasaqua and Fogelsville railroad, and the Berks and Chester railroad, which is to connect with the Reading railroad at Birdsboro', Berks county, and running by way of Downington, Chester county, to New Castle, Delaware. The routes of all these proposed lines have been surveyed, and one or two, if not all three will be put under contract next spring. They will pass through districts that will furnish a heavy local trade, and will be important feeders to the Philadelphia and Reading road.—*Montgomery County Ledger.*

☞ The South Carolina Railroad is making steady progress toward completion. It is thought that the Augusta branch will be completed to Midway, 12 miles beyond Branchville, about the first of the coming month; and if no unusual obstacle present itself, the entire line will be open to Augusta on the 1st of Februury next, or perhaps sooner. The Savannah Railroad Company have contracted for the rebuilding of their bridges across the Edista and Ashepoo and Congaree rivers, and this work will be pushed forward rapidly to completion.

☞ The Columbia, Penn., *Spy* says: "The survey for a new railroad from New Oxford to Wrightsville has just been completed by Mr. Joseph S. Gitt, Civil Engineer. It starts from a point on the Gettysburg Railroad and New Oxford Adams county, and runs along north to the Pigeon Hills, to Abbotstown, York and Gettysburg turnpike, crossing the Codorous near Chicken Bridge the Northern Central Railroad near the Almshouse near York, and runs north of the pike to Wrightsville. The route is said to be a good one and olight grade."

☞ S. M. Felton, Esq., has been elected President of the Delaware Railroad Company, in place of Hon. R. M. Harrington, deceased.

Finances of the United States.

REPORT OF THE SECRETARY OF THE TREASURY.

The report of the Secretary of the Treasury on the 4th December, is a very extended document, covering the whole ground of the financial situation of the country. In this particular it is very ample, while on the other hand it pays no attention whatever to our foreign commerce or the condition of our external trade. The introductory parts relate to the following topics. The means adopted to raise money independent of foreign loans, the right of Congress to borrow and coin money, its limit to issue legal tenders, the duty of retiring them, their effect on prices, and on trade and commerce, the cause of the expansion in 1835–'36, the financial crisis of 1857, and that also of 1861 in consequence of expenditure and a new measure of value, and the bad consequences of a plethora of paper money are all distinctly and justly pointed out.

The paper circulation of the United States, on the 31st of October last, was substantially as follows:

1. United States notes and fractional currency	$454,218,038 20
2. Notes of the National Banks	185,000,000 00
3. Notes of State Banks, including outstanding issues of State Banks converted into National Banks	65,000,000 00
	$704,218,038 20

The amount of notes furnished to the National Banks up to and including the 31st of October was a little over $205,000,000; but it is estimated that $20,000,000 of these had not then been put into circulation.

In addition to the United States notes, there were also outstanding $32,536,900 five per cent. Treasury notes, and $173,012,140 compound interest notes, of which it would, doubtless, be safe to estimate that $30,000,000 were in circulation as currency.

From this statement, it appears that, without including seven and three-tenth notes, many of the small denominations of which were in circulation as money, and all of which tend in some measure to swell the inflation, the paper money of the country amounted, on the 31st of October, to the sum of $734,218,038 20, which has been daily increased by the notes since furnished to the National Banks, and is likely to be still further increased by those to which they are entitled, until the amount authorized by law (300,000,000) shall have been reached, subject to such reduction as may be made by the withdrawal of the notes of the State banks.

The following is a statement of the bank note circulation of the country at various periods of highest and lowest issues prior to the war:

January, 1830	$61,324,000
" 1835	103,692,495
" 1836	140,301,038
" 1837	149,185,890
" 1843	58,564,000
" 1856	195,747,950
" 1857	214,778,822
" 1858	155,208,344
" 1860	207,102,000

It will be noticed by this statement that the bank note circulation of the United States increased from $61,324,000 to $149,185,890 between the 1st of January, 1830, and the first of January, 1837, in which latter year the great financial collapse took place; fell from $149,185,890 in 1837, to $58,564,000 in 1843, and rose to $214,778,822 on the 1st of January, 1857, in which year the next severe crisis occurred; falling during that year to $155,208,344, and rising to $207,102,000 on the 1st of January, 1860.

The following is a statement of bank deposits and loans in the same years:

Years.	Deposits.	Loans.
January 1, 1830	$55,560,000	$300,451,000
" 1835	83,081,000	365,163,000
" 1836	115,104,000	457,506,000
" 1837	127,397,000	525,115,000
" 1843	56,168,000	254,544,000
" 1856	212,706,000	634,183,000
" 1857	230,351,000	684,456,000
" 1858	185,932,000	583,165,000
" 1860	253,802,000	691,945,000

On the 30th of September, the date of their last quarterly reports, the deposits and loans of the National Banks (the Secretary has no reliable returns of these items from the few remaining State Banks) were as follows:

Deposits, individual and Government	$544,150,194
Loans	$485,314,029
To which should be added—	
Investments in U. S. b'ds & other U.S. securities	427,731,600
	$913,045,729

These figures are a history in themselves, exhibiting not only the past and present condition of the country in matters of exceeding interest, but indicating unerringly the dangerous direction in which the financial current is sweeping.

On the 1st of January, in the memorable year 1837, the bank note circulation of the United States was $149,185,890, the deposits were $127,397,000, the loans $525,115,000. In January, 1857, the year of the next great crisis, the circulation was $214,778,822, the deposits were $230,351,000, the loans $684,456,000. There are no statistics to exhibit the amount of specie actually in circulation in those periods, but it would be a liberal estimate to put it at $30,000,000 for 1837, and $50,000,000 for 1857.

The years of 1837–'57 were years of great prostration and embarrassment. The relations of the National Banks to the General Government on the 30th of September last, were as follows:

On the 30th of September last, the deposits of the National Banks alone amounted to $544,150,194; their loans—estimating their national securities as a loan to the Government—to $913,045,629; both of which items must have been increased during the month of October; while on the 31st of that month the circulation, bank and national, had reached the startling amount of upwards of $700,000,000. Nothing beyond this statement is required to exhibit the present inflation or to explain the causes of the current and advancing prices. If disaster followed the expansions of 1837 and 1857, what must be the consequences of the present expansion unless speedily checked and reduced!

The report then proceeds to discuss the popular objections to a reduction of the currency, clearly refuting them at length, and showing that as regards production, credit, revenues and the banks, it will not be injurious.

The Secretary does not see any way of accomplishing the payment of the national debt, but by an increase of income beyond expenditure. He in the meantime recommends as follows:

1st. That Congress declare that the compound interest notes shall cease to be a legal tender from the day of their maturity.

2d. That the Secretary be authorized, in his discretion, to sell bonds of the United States, bearing interest at a rate not exceeding six per cent., and redeemable and payable at such periods as may be conducive to the interests of the Government, for the purpose of retiring not only compound interest notes, but the United States notes.

He thinks it will not be advisable to contract rapidly, and that it will not be necessary to retire for practical ends more than 100 or 200 millions of United States notes in addition to the compound interest notes. He believes that this debt is in part at least an accumulation of the wealth and capital of the country, and need not become oppressive if judicious taxation is maintained. The first and immediate step is to fund the obligations soon to mature, and the next, to remove oppressive exactions, and to pay the interest of the debt not only, but a certain definite annual amount of the principal.

On the 31st day of October, 1865, since which time no material change has taken place, the public debt, without deducting funds in the Treasury, amounted to $2,808,549.437 55, consisting of the following items:

Bonds, 10-40's, 5 per cent. due in 1904	$172,770,100 00
" Pacific R. R., 6 per cent. due in 1895	1,258 000 00
" 5-20's, 6 per ct. due in '62, '64 and '65	659,259,600 00
" 6 per cent. due in 1881	285,347,400 00
" 5 " " 1880	18,415,000 00
" 5 " " 1874	20,000,000 00
" 5 " " 1871	7,022,000 00
" 6 " " 1868	8,908,341 80
" 6 " " 1867	9,415,250 00
Compound inst. notes, due in 1867 and 1868	173,012,141 00
7-30 Treasury notes, due in 1867 and 1868	850,000,000 00
Bonds, Texas idemnity, past due	760,000 00
Bonds, Treas. notes, &c., past due	613,920 09
Temporary loan, ten days' notice	99,107,745 46
Certificates of indebtedness, due in 1866	55,995,000 00
Treas. notes, 5 per cent. Dec. 1, 1865	32,536,901 00
United States notes	428,160,569 00
Fractional currency	26,057,469 20
	$2,808,549,437 55

The following is a statement of receipts and expenditures for the fiscal year ending June 30, 1865:

Balance in Treas. agreeably to warrants, July 1, 1864	$96,739,905 73
Rec'ts from loans applicable to expenditures	861,863,499 17
Receipts from loans applied to payment of public debt	667,361,241 68
Receipts from customs	84,928,200 60
Receipts from lands	996,553 31
Receipts from direct tax	1,200,578 03
Receipts from internal revenue	209,464,215 25
Receipts from miscellaneous sources	32,978,284 47
	$1,893,532,583 24

EXPENDITURES.

Redemption of public debt	$667,361,241 68	
For the civil service	44,765,553 12	
For pensions and Indians	14,258,575 38	
For the War Department	1,031,323,300 79	
For the Navy "	122,567,776 12	
For interest on public debt	77,397,712 00	
		1,897,674,224 09
Leaving a balance in the Treasury on the 1st day of July, 1865, of		$958,809 15

The following statement exhibits the items of the increase and decrease of the public debt for the fiscal year, 1865:

Amount of public debt June 30, 1865	$2,682,593,026 53
Amount of public debt June 30, 1864	1,740,690,489 49
Total increase	$941.902,537 04

Which increase was caused as follows, by—

Bonds, 6 per cent. acts July 17, 1861	$29,799,500 00
" 6 " " Feb. 25, 1862	4,000,000 00
" 6 " " March 3, 1863	32,347,726 66
" 6 " " June 30, 1864	91,789,000 00
" 5 " " March 3, 1864	99,432,350 00
" 7 " " July 1, 1862, and July 2, 1864, issued to Central Pacific Railroad Company, int. payable in lawful money	1,258,000 00
Treasury notes, 7-30, acts June 30, 1864, and March 3, 1865, interest payable in lawful money	671,610,400 00
Compound Interest notes, 6 per cent. act June 30, 1864	178,756,080 00
Temporary loan, 6 per ct. act July 11, 1862	17,386,869 96
United States notes, acts Feb. 25, 1862, July 11, 1862, and January 17, 1863	1,509,295 16
Fractional currency, act March 3, 1863	7,363,098 85
Gross increase	$1,135,232,320 63

From which deduct for payments—

Bonds, 6 per ct. act July 21, 1842	$1,400 00	
Treasury notes, 6 per cent. acts Dec. 23, 1857, and March 2, 1861	18,800 00	
Bonds, 5 per cent., act Sept. 9, 1850, (Texas Indemnity)	1,307,000 00	
Treasury notes, 7-30, act July 17, 1861	30,212,500 00	
Certificates of indebtedness, 6 per cent. act March 1, 1862	44,957,000 00	
Treasury notes, 5 per cent. one and two year act, March 3'63	111,132,740 00	
United States notes, act July 17, 1861, and Feb. 12, 1862	308,396 25	
Postal currency, act July 17, '62	5,252,147 34	
		193,229,783 59
Net increase		$941,902,537 04

In the report of the Secretary for the year '64, there was excluded from the public debt the sum of $77,897,347 02, which amount had been paid out of the Treasury, but had not been reimbursed to the Treasurer by warrants, and was not reimbursed until after the commencement of the next fiscal year. This explains the difference between $18,842,558 71, assumed in that report as the balance in the Treasury July 1, 1864, and $96,739,900 73, the balance according to the warrant account, as above stated.

The following is a statement of the receipts and expenditures for the quarter ending September 30, 1865:

Balance in Treasury, agreeable to warrants, July 1, 1865		$358,309 15
Rec'ts from loans applicable to expenditu's		138,773,097 22
" " " applied to payment of public debt		138,409,163 35
Receipts from customs		47,009,583 03
Receipts from lands		132,890 68
Receipts from direct tax		31,111 30
Receipts from internal revenue		96,616,885 65
Receipts from miscellaneous sources		18,393,729 94
		$140,226,770 27
EXPENDITURES.		
For the redemption of public debt	$138,409,163 35	
For the civil service	10,571,460 99	
For pensions and Indians	6,024,241 86	
For the War Department	165,369,237 32	
For the Navy Department	16,520,669 81	
For the int. on the public debt	36,173,481 50	
		373,068,254 83
Leaving a balance in the Treasury on the 1st day of October, 1865, of		$67,158,515 44

The Secretary estimates that the receipts for the remaining three quarters of the year ending June 30, 1866, will be as follows:

Balance in Treasury Oct. 1, 1865	$67,158,515 44
Receipts from customs	100,000,000 00
Receipts from lands	500,000 00
Receipts from internal revenue	175,000,000 00
Receipts from miscellaneous sources	30,000,000 00
	$372,658,515 44

The expenditures according to the estimates, will be:

For the civil service	$32,994,052 38	
For pensions and Indians	12,256,790 94	
For the War Department	207,788,560 57	
For the Navy Department	35,000,000 00	
For int. on public debt	96,813,868 75	
		484,853,462 64
Deficiency		$112,194,947 20

The receipts for the year ending June 30th, 1867, are estimated as follows:

From customs	$100,000,000 00
From internal revenue	275,000,000 00
From lands	1,000,000 00
Miscellaneous sources	20,000,000 00
	$396,000,000 00

The expenditures according to the estimates, will be:

For the civil service	$42,165,599 47	
For pensions and Indians	17,602,640 23	
For War Department	39,017,416 18	
For Navy Department	43,982,457 50	
For int. on public debt	141,542,068 50	
		284,317,181 88
Leaving a surplus of estimated receipts over estimated expenditures of		$111,682,818 12

The debt of the United States was increased during the fiscal year ending June 30, 1865, $941,902,537 04, and during the first quarter of the present fiscal year $138,773,097 22. The Secretary has, however, the satisfaction of being able to state that during the months of September and October the public debt was diminished to the amount of about thirteen millions of dollars.

If the expenditures for the remaining three quarters of the present fiscal year shall equal the estimates, there will be a deficiency, to be provided for by loans, of $112,194,947 20, to which must be added $32,536,901 for the five per cent. Treasury notes (part of the public debt,) which become due the present month, and are now being paid out of moneys in the Treasury, and all other payments which may be made on the public debt.

The estimates for the next fiscal year are highly satisfactory, leaving a clear balance of $111,682,118 12.

By the statement of the public debt on the 31st of October, it appears that, besides the compound interest of the United States, and the fractional notes.

The past-due debt amounted to	$1,373,920 09
The debt due in 1865 and 1866 to	187,549,646 46
The debt due in 1867 and 1868 to	848,323,591 80

During the month of October about $50,000,000 of the compound interest notes were funded in 5-20 six per cent. bonds under the provisions of the act of March 3, 1865.

The Secretary would be gratified if the Treasury could be put at once in a condition to obviate the necessity of issuing any more certificates of indebtedness, or raising money by any kind of temporary loans; but he may, for a short period, be obliged to avail himself of any means now authorized by law for meeting current expenses and other proper demands upon the Treasury.

Of the debt falling due in 1867 and 1868, $830,000,000 consist of 7 3-10 notes. It may be regarded as premature to fund any considerable amount of these notes within the next year; but in view of the fact that they are convertible into bonds only at the pleasure of the holders, it will be evidently prudent for Congress to authorize the Secretary whenever it can be advantageously done, to fund them in advance of their maturity.

He recommends the granting of authority to sell United States 6 per cent. bonds, to retire Treasury and United States notes, and to meet if necessary any deficiencies in the present fiscal year. When the debt is so liquidated that nothing will be called for but interest, it will be easily manageable. The following is an estimate of the time required to pay the national debt if funded at 5 or 5½ per cent. by the payment of $200,000,000 annually on interest and principal, estimated on the 1st July 1866 at $3,000,000,000:

The annual interest upon three thousand millions, if funded at 5½ per cent. per annum, would be one hundred and sixty-five millions, but if funded at 5 per cent., it would be one hundred and fifty millions.

Now, if two hundred millions per annum should be applied in half-yearly instalments of one hundred millions each, in payment of the accruing interest and in reduction of the principal funded at the higher rate of 5½ per cent., the debt would be entirely paid in thirty-two and one-eighth years. At 5 per cent. per annum, it would be extinguished by the like application of one hundred millions every six months, in a little over twenty-eight years.

At the higher rate, the sum applied in the first year in the reduction of the principal of the debt would be thirty-five millions of dollars; in the last or thirty-second year, when the interest would be diminished to a little over nine millions, about one hundred and ninety-one millions of the uniform annual payment would go to the reduction of the principal.

On the assumption that the debt may be funded at 5 per cent., fifty millions would be applicable to the reduction of the principal in the first year, and in the twenty-eighth or last year of the period —the interest falling to less than eight millions— one hundred and ninety-two millions of the annual payment would go to the principal.

The annual interest accruing upon seventeen hundred and twenty-five millions of the debt on the 31st of October last averages 6.62 per cent. A part of this sum is now due, another portion will be payable next year, and the balance will be due or payable, at the option of the Government, in 1867 and 1868. If these seventeen hundred and twenty-five millions shall be funded or converted into 5 per cents by the year 1869, the average interest of the whole debt will be 5.195 per cent. In the year 1871, if the debt then maturing should be funded at the same rate, the average interest would be reduced to 5.15, and 1881 to 5 per cent., excepting the bonds for fifty millions to be advanced in aid of the Pacific Railroad at 6 per cent., which will have thirty years to run from their respective dates. The interest of these bonds, added to the supposed five per cents, would, in 1881, make the average rate of the entire debt five and three one-hundreths of one per cent. until the whole should be discharged.

In these calculations of the average rate of interest upon the funded debt, the outstanding United States notes and fractional currency are not embraced. Whatever amount of these four hundred and fifty-four millions may eventually be funded at 5 per cent. per annum, will proportionately reduce the average rates of interest upon the whole debt.

The report estimates the wealth of the loyal states in 1870 at $2,400,100,111, and if the whole United States at that time at $27,578,000,000, and in 1890 at $31,025,000,000 thus showing the per centage will then be less than ⅓ per cent.

The Secretary then recommends that the principal of the bonds of February 25th 1862, and June 30 1864, should be paid in Europe in coin as an advantage to their market credit, that Government securities should remain free from municipal and state taxation, that the system should be revised and the whole subject considered, it now being under revisal by a special commission, and that the collection of the revenue in the Southern States be postponed.

The reciprocity treaty is considered as not being of equivalent advantage on our part, and is a better subject for legislation than negotiation. He recommends amendments to the revenue laws, and in the management of the mineral lands, a change in the character in the revenue cutter service, and refers to the marine hospitals, recommends the redemption of Bank notes at one of the three largest cities, with the reasons therefor, explains as to the option reserved, as to paying interest in coin or currency on the 7-30s, asserts, the impracticability of working the sinking fund, explains the disposal of surplus coin in the Sub-Treasury from time to time, the receipt of gold on deposit there, and alludes to other various topics of no particular interest.

Florida Railroads.

The railroads in Florida did not suffer much damage during the war, in comparison to other Southern roads. The Pensacola and Georgia road is in fair running order from Quincy to Lake City. The cars are running tri-weekly. On the Central road the cars make their weekly trips between Lake City and Jacksonville. The Florida Railroad from Fernandina to Cedar Keys, it is expected, will be in operation by the 1st of January. The Pensacola and Georgia Railroad runs no further west than Quincy, although it is hoped it will be completed before long to the Chattahooche.

☞ The Boston, Hartford and Erie Railroad Co., will petition the next Massachusetts Legislature for power to enter the city of Boston over the Grand Junction and Eastern or Boston and Maine Railroads. The Boston and Worcester Railroad will petition the Legislature for power to use the Grand Junction Railroad, or to construct a road of their own to some convenient point of deep water at East Boston.

☞ The New Lisbon, Ohio, *Patriot* says the engineers who have been surveying the Old Peacock road reached New Lisbon Tuesday noon. They are in the employ of the South Western Railroad Company. They report favorably of the route and express the opinion that the road will be built.

American Railroad Journal.

Saturday, December 16, 1865.

Stock Exchange and Money Market.

There seems to be a received impression kept up by the almost unanimous declarations of our financial writers, as well as confirmed by the careful operations of our bankers and capitalists, that contraction of the currency is certainly to be attempted as the policy of the Treasury. Mr. McCulloch's report is accepted as his ultimatum; and though as yet there is no falling off in the paper afloat, beyond the sums stated in his two former monthly publications, yet it is believed the process will be continued with as little delay as is practicable consistent with the means at hand, and the powers entrusted to the Secretary. We naturally therefore look to the gold room as to the barometer of the hour, to see what the calculations of the operators are under the present condition of things. These men are sharp, sagacious, well backed up here and abroad, and they hold in their hands a power which is everywhere recognized and felt.

On the coming out of the Treasury report, it is understood there was a concurrent movement from the Sub-Treasury, and a very large amount of gold was put upon the street to be converted into currency applicable to the disbursements falling due on the 7-30s. The effect of these was to put down gold at least 4 per cent., though at the close of the week there was a slight reaction and a tendency to a rise. It was demonstrated, however, on this occasion, that the premium on gold was more under the control of the Treasury than many believed, and as we have always contended. The sales of limited sums from day to day make but little impression on the markets, but the blocks which were put out last week crushed out speculation completely for the time. Some parties, claiming to know, predict a fall of at least 10 per cent., before the level of the price will be reached; others again are confident that as paper money is continually increasing through the operations of the National Banks, the Treasury may be in the market for a further loan to meet the deficiencies of the present fiscal year, and that Congress will by hasty legislation, endanger our relations with France, and thus renew our enormous expenditures, we are by no means on the return to a sound financial condition, or assured of a permanent decline in gold.

Certainly in so great a complication of possibilities, and so much under the control as we are of our public men if they choose to err, it is impossible to foresee, and unsafe to predict anything of the future beyond the truisms which we all adopt. We all admit the enormous wealth and resources of the United States; we all agree that we can and will pay the National debt; we do not object to excessive taxation for this purpose; and we have a prudent and skilful financier in charge of the public means and credit; and yet, if the leading men in Congress do not take care, if they rush wildly into measures that shall again involve the country in expenditures, not an angel from heaven could carry us through our financial difficulties.

It is certainly a subject of curious reflection that while events, natural causes, and inherent truths are helping us forward constantly, we are pulled back by small intellects, and a wretched *vis inertiæ*.

What this country wants just now, is not new issues, not the introduction of political forces hitherto unknown and unusual in any one of the States, not the procrastination of the difficulties at the South, and not any foreign difficulties that can be avoided by remonstrance. To exercise a great moral influence on the world we must now gather up our strength and show that we have the power of absolute and perfect recuperation. We can afford to wait for this the work of time, since a continuance of internal disorders, financial difficulties and factious divisions, will deprive us entirely of the great influence which we gained by the splendid termination of the war.

Indirectly, there lies one material power in our favor, which the doubt and uncertainty of our affairs at Washington weaken and that is the great staple of the South, which cannot be

brought into play until it is pacified and brought into harmony with the Northern and Western States, financially and industrially.

We cannot too earnestly press the cultivation of cotton as one of our most potent aids for the correction of our commercial disadvantages. We are therefore much interested in the practical bearings of this question, as we always have been. It appears from a commercial circular, emanating from the English house of Messrs. Niell Brothers, that they have been specially engaged in ascertaining the actual amount of cotton that has to be calculated upon as an active element in our trade. These gentlemen have arrived at the conclusion that the total immediate yield is from two millions to two millions one hundred thousand bales, of which about one half has already been sent to market. The growth of the present year is estimated at 400,000 bales. Estimating the weight per bale at 460 lbs., the total weight of the stock would be 960,000,000 lbs., on which a revenue tax of 2 cents per lb., will yield the Government $19,320,000, and the whole estimated value to tell in our business, is upwards of four hundred millions of dollars. This enormous sum of money must therefore come into play, through the direct influence of commerce, and must produce an important effect on the balance of trade. As these facts are realized abroad, we shall see a favorable turn in regard to our securities there. We find the following remarks in a late English paper which show a returning sense of fairness:

"The 5-20 bonds are now quoted at 64, or 36 per cent. discount. These bonds pay six per cent. interest on their par value *in gold*. They were issued in 1862, and are payable at the option of the government in five or twenty years from date. And as the United States have commenced to pay off their debt already, from the large revenue receipts—which according to the *Times'* correspondent will exceed the expenses of the government $250,000,000, the present fiscal year—it is reasonable to suppose that a portion of the bonds at least (there are but $600,000,000 5-20 bonds in all) will be paid in 1867. So that at the present price they pay 8½ per cent. interest, and will pay to the holders 36 *per cent. premium besides*, when they are paid off at par, as in our judgment many of them will be in less than two years from this time. The 5-20 bonds, compared with English Consols, are selling for 25 per cent. less than Consols, while they pay *double* the interest. And are they less safe than Consols? Sir M. Peto, who has just returned from America, says: 'Any man who doubts the ability of America to pay all her obligations deserves contempt for his ignorance.'"

Consequent on the rise of our foreign securities abroad they have increased in demand here, and it is believed large amounts went abroad for sale on Wednesday last.

Money continues abundant in the street on good paper. The condition of the associated Banks in this city on the 9th inst., was as follows: loans, $227,839,344; Specie, $15,624,780; Circulation, $16,570,613; Deposits, $176,480,562; Legal tenders, $48,271,757.

The differences between this statement and that of Dec. 2d are as follows: decrease in loans, $1,358,500; increase in specie, $2,191,697; increase in circulation, $703,213; increase in deposits, $956,668; increase in legal tenders, $50,952.

Our advices from the Southern States are in many respects quite encouraging. A large majority of the people there are sincerely engaged in the work of social and industrial reconstruction. Gentlemen who have recently visited them for business purposes, express themselves highly satisfied with what they have seen. We trust that they will be treated with an unaffected sincerity and good will. They have greatly erred, and as greatly suffered, but they have a bright future before them if they will cordially accept the altered condition of things.

We learn that the most vigorous efforts are every where being made, to place the railroads of that region in the best possible condition, and we anticipate for them a very prosperous business. We are also happy to state that while the Southern people are applying their own shoulders to the wheel, northern capitalists are also freely and liberally assisting.

The relations between the Atlantic and Great Western and the Erie Railway Companies having recently attracted considerable attention, and it being generally supposed that any unity of policy or harmony in operation was now impracticable in consequence of the purchase or lease of routes through Pennsylvania, on the part of the Atlantic and Great Western, we confess to considerable surprise on reading the speech of Sir Morton Peto at the late meeting of the holders of bonds, debentures and shares of the company, held about three weeks since in London. In that very able and explicit address, we find the following remarks "With regard to the Erie Railway, we thought it our duty to make to that company certain proposals not involving in themselves the slightest probable degree of pecuniary liability either to your line or to theirs, and I am happy to say I saw a letter yesterday from Mr. Kennard, the Engineer-in-chief of our line, in which he tells me he met the Vice President of the Erie, who told him that we might consider practically *that those proposals of ours were accepted*, and that the two companies might consider that they were on the most amiable and friendly terms possible." This of course puts an entirely different complexion on the affairs of the Erie, and will we hope have a tendency to appease the wrath of some of our confreres of the Press, in the city of Philadelphia.

Railroad shares and securities are rather unsettled and irregular, with a tendency upwards as a whole. There is a good demand for miscellaneous shares, including the petroleum companies, a large number of which maintain their credit, and continue their flow. The number of new wells going down continues to be large, and it is now understood that the business carefully conducted on sound principles is one of the most lucrative in this country. Every producing well can pay back its cost, and a handsome profit if properly managed, long before it gives out. We are not surprised therefore, to see our most prudent men investing confidently in the business. In the meantime these wells are wonderfully adding to the wealth of the country, and came to light at a very seasonable moment. The disbursement of half a years interest on the 7-30 loan, amounting to upwards of ten millions, was justly expected to give a full supply of money this week.

We notice that the financial articles of the *Herald*, are not in the interest of contraction. It says, as late as the 13th. "However much we may regret the necessities of the financial situation, it is idle to shut our eyes to them and indulge in day dreams of a phantom contraction, and an impossible *restoration of specie payments*." It is plainly to be seen that a party is already forming to prevent any such result. But so much the more important is it that it should be foreseen and resisted by all who wish to see a sound currency, and a solvent nation.

It is observable that a very considerable decline in numerous articles of necessary consumption has taken place, much to the relief of consumers, within the last fortnight.

The amounts of specie held in this city by the Banks and Sub-Treasury on the 1st of December, 1865, was $50,695,037, against in 1864, $28,961,268, and in 1863, $36,847,190.

The balance in the Sub-Treasury on Wednesday was $72,858,955 71.

The exports, exclusive of specie, from the port of New York for the week ending Dec. 11th, were $4,810,189, against $3,444,886 in 1864, and $2,903,444 in 1863. Total since Jan. 1, $171,234,076; same time in 1864, $205,947,340; in 1863, $163,294,343.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Seven Per Cent. Gold Bonds.

Messrs. Fisk & Hatch, No. 5 Nassau street, advertise a new and desirable security, in the shape of *Central Pacific Railroad State Aid Bonds* of California, interest payable semi-annually in gold. Beyond all question these bonds are equal to any in the market, if not superior, since they are secured by a mortgage on 160 miles of railroad, a part of the great Pacific route; also by a sinking fund of $50,000 gold per annum, and are guaranteed by the State of California. The bonds of this State stand considerably above par, and the present opportunity for investment offers a very great inducement to capitalists, which they no doubt fully understand.

Architect and Engineer.

We invite the attention of our readers to the card of E. J. M. Derrick, Esq., an Architect and Civil Engineer, late with the Erie Railway Company, who is recommended for his skill and capacity as such by our most eminent citizens.

☞ We publish in another place the advertisement of H. W. Bulkley, Esq., 57 Broadway, who offers to economists in fuel the improved superheater of Carvalho, which has been awarded a prize medal for its superior advantages, furnishes pure steam of any required temperature for operating engines, prevents priming, saves 20 to 30 per cent. of fuel, and is applicable at small cost to any boiler, stationary or locomotive.

Boston, Hardford and Erie Railroad.

At a meeting of this company, held at Boston on the 13th inst, the following Board of Directors was unanimously elected: Daniel Drew, Robert H. Berdell, Henry L. Pierson, James Low, A. V. Stout, Richard Schell, Edward Crane, of New York; Wm. Evans, London, Eng.; Dudley S. Gregory, Jersey City, N. J.; Alexander S. Diven, Elmira, N. Y.; Ambrose S. Murray, Goshen, N. Y.; Legrand Lockwood, G. M. Bartholemew, Henry Hotchkiss, Joseph W. Alsop, Connecticut; Joseph W. Clark, Mark Healey, Boston; Edward Harris, Ohio; J. Rathburn, Rhode Island. H. N. Otis, of New York, was elected Secretary and Clerk. A majority of the above gentlemen are connected with the direction of the Erie Railroad.

☞ The Illinois Central Railroad Company will pay 1st of February, a dividend of five per cent. The books will close 20th January, and will reopen 3d of February.

☞ Messrs. Eugene Kelly & Co. will pay, 1st proximo. coupons of the Central Pacific Railroad Company's bonds, less Government tax.

☞ The Pittsburg *Dispatch* says that the Atlantic and Great Western Railway Company has determined to extend the Cleveland and Mahoning Road from Youngstown to Pittsburgh, following the canal to Mahoningtown, and thence across the country. It is thought that if this should be done, the Erie and Pittsburgh Road would form a junction at Mahoningtown by extension of their track.

New Railway Projects.

The citizens of Utica, at a meeting held at that place on the 30th ult., adopted resolutions to construct a railway under the general law of the State, by the name of the "Utica, Susquehanna and Chenango Valley Railway Company," the route of which is to be from Utica by the Sauquoit Valley, Cassville and Bridgewater to Colliersville, Otsego Co., and from Cassville and Bridgewater to Sherburne, Chenango Co. The length of the road is to be 82 miles; the capital stock two and a half millions; number of shares 25,000. The following persons have been chosen directors: Lewis Lawrence, Daniel Crouse, A. J. Williams, Jas. F. Mann, Jas. K. Hitchcock, Daniel Butterfield, Thomas Foster, John Thorn, Utica; Geo. Chadwick, New Hartford; N. W. Moore, Sauquoit; A. M. Perkins, Bridgewater; D. B. Goodwin, Waterville; Devillo White, Sherburne.

At the same meeting it was resolved that the city should subscribe $100,000 for a continuation of the Black River road a further distance of 30 miles.

New York Central Railroad.

The following gentlemen have been elected Directors of the New York Central Railroad Company for the ensuing year: Dean Richmond, Richard M. Blatchford, John H. Chedell, Alonzo C. Paige, J. V. L. Pruyn, Nathaniel Thayer, Livingston Spraker, Cornelius L. Tracy, Charles H. Russell, Henry A. Martin, James H. Banker, Horace F. Clark, A. D. White.

Central Pacific Railroad.

This road is now finished to the new town of Colfax, fifty-five miles from Sacramento, and 2,450 feet above the level of the sea. In the entire route of this road only three tunnels are contemplated, their aggregate length about one mile. The road is expected to cross the summit of the mountains at the height of about 7,000 feet above the sea. The cost of the most expensive mile is estimated at $350,000. For several miles the track must be roofed to slide off the snow.

☞ We learn from San Francisco that articles of association have been filed by a company to build a railroad from San Francisco Bay to a town in San Deigo, thence eastward to the State line, and there connect with the contemplated road to the Mississippi River. The capital is $30,000,000; length of the road seven hundred and twenty miles. The directors are: T. G. Phelps, Charles N. Fox, Benjamin Flint, C. J. Hutchinson, B. G. Lathrop, J. B. Cox, and B. W. Hathaway. Mr. Phelps is President.

☞ The stockholders of the South Side (Va.) Railroad, have adopted a proposition to form a consolidation with the Virginia and Tennessee and the Norfolk and Petersburg roads. This, if carried out, would make a continuous line of railway from Bristol, Tennessee, to Norfolk, Virginia, a distance of four hundred miles.

☞ The Darlington *Union* says the railroad from Janesville to Monroe is to be continued through to Dubuque. This has been fully determined upon, we are informed.

☞ J. W. Garrett has been unanimously re-elected President of the Baltimore and Ohio Railroad Company.

Railroad Earnings--Monthly.

The earnings of the Marietta and Cincinnati Railroad for the month of Nov., 1865. $114,511 85
Corresponding month of previous year 96,908 02

Increase $17,603 83

The traffic receipts of the European and North American Railway for the month of Nov., 1865, compared with the corresponding month last year, is as follows:

	1865.	1864.
Passengers	$5,059 69	$4,942 24
Freight	8,095 53	7,143 09
Mails and Sundries	392 00	471 00
Total	$13,547 22	$12,556 33

Increase in 1865 ..... $990 89.

The earnings of the Chicago and Milwaukee Railw'y for the month of Nov. 1865, were. $93,397 00
Corresponding months of prev. year... 90,940 00

Increase $22,457 00

The earnings of the Atlantic and Great Western Railway for the month of Nov., 1865, were $731,270 00
Corrresponding period of previous year 381,810 00

Increase $349,460 00

The earnings of the Michigan Central Railroad for the month of Nov, 1865, were $447,669 79
Corresponding month of previous year 405,509 77

Increase $42,160 02

The earnings of the Chicago and Rock Island Railroad Company for the month of Nov., 1865, were. $261,141 00
Corresponding month of previous year 336,617 00

Decrease $75,476 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of Nov., 1865, were $498.421 00
Corresponding month of previous year 448,934 00

Increase $49,487 00

The earnings of the Chicago and Alton Railroad for Nov., 1865, were $294,805 00
Nov., 1864 ..... 307,803 00

Increase $12,998 00

The following is a statement of the business done by the Illinois Central Railroad for the month of Nov., 1865:

LAND DEPARTMENT.

Acres Construction Lands Sold	8,310.29 for	$96,551 09
Acres Int. Fund Lands sold	120.00 for	1,605 00
Acres Free Lands sold..	1,934.29 for	20,280 80
Total sales during month of Nov., 1865	10,364.58 for	$118,436 89
To which add Town Lot Sales		505 00
Total of all	10,364.58 for	$118,941 89
Cash collected in November		$158,397 68

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$223,631 56
do.	Freight	362,191 00
do.	Mails	6,199 38
do.	Rent of Road	5,606 25
do.	Other Sources	27,340 11
Total Receipts in month of Nov., 1865.		$624,968 30
Total Receipts in month of Nov., 1864.		657,141 12

The earnings of the Chicago and Northwestern Railroad in Nov., 1865, were $749,191 00
Same period last year 716,378 00

Increase $32,813 00

The earnings of the Detroit and Milwaukee Railroad for the month Nov. 1865 were. $32,661 00
Same period last year 27,598 00

Increase $5,063 00

The earnings of the Milwaukee and St. Paul Railway for November, 1865, were... $383,772 57
Corresponding month previous year.. 229,313 05

Increase $153,959 52

The earnings of the Erie Railway for the month of Nov., 1865, were $1,451,217 56
Corresponding month last year 1,224,908 81

Increase $226,308 75

Railroad Earnings.--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 4th week in Nov., 1865, were:

	1865.	1864.
Passengers	$11,865 75	$12,033 61
Freight	23.928 45	19,853 41
Mail, express & telegraph	1,281 55	1,084 48
Total	$36,575 75	$32,971 50
Total for the fiscal year commencing Jan. 1.	$1,117,481 43	$933,363 70

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Nov. 30, were:

	1865.	1864.
Passengers	$4,247 27	$3,808 01
Freight	13,431 76	10,631 86
Express	338 22	104 16
Mail	296 58	296 58
Total	$18,313 83	$14,840 61

Receipts from January 1 to Nov. 30:

1865	$651,552 82
1864	540,883 27
Increase	$110,669 55

The traffic of the Great Western Railway for the week ending Dec. 8, 1865, was as follows:

Passengers	$29,689 35
Freight and live stock.	31,142 82
Mails and sundries..	2,557 42
Total	$63,389 59
Corresponding week of 1864	56,615 72
Increase.	$6,775 86

The earnings of the Chicago and Northwestern Railway for the first week in December, 1865, were $147,542 29
Corresponding week of previous year. 134,823 65

Increase $12,718 64

The Pacific Railroad.

EXTRACT FROM THE REPORT OF THE SECRETARY OF THE INTERIOR.

The act approved July 1, 1862, to aid in the construction of a railroad from the Missouri River to the navigable waters of the Pacific, and subsequent legislation on this subject, with its hearty approval by the people, furnish a striking proof of the unconquerable determination of the nation and an unfaltering faith in its ability to preserve its territorial integrity. Had it been deemed possible that our country could fall a prey to Rebellion, and its dissevered parts become subjected to the control of separate and alien governments, the construction of such a work would never have been undertaken, and its execution would have been impracticable. Although at the date of the enactment of these several laws, the resources of the nation were severely taxed, measures were adopted deemed adequate to induce capitalists to engage in the construction of this great thoroughfare, in the conviction that it would forever remain the property of a united people. The energy displayed in its prosecution for two or three years did not, however, equal public expectation and the wishes of the Government. But during the past year, as will be seen from the report of Lieutenant Colonel Simpson, of the engineer corps of the army, detailed by your order to serve, under the instructions of the Secretary of the Interior in supervising this and other kindred works, it has been progressing in a satisfactory manner, from Omaha, Kansas City, and Atcuison, westward, and from Sacramento, California, eastward.

The amount of private capital already invested, the high personal character of the gentlemen connected with its prosecution, and the munificent subsidy of the Government, combine to give assurance that the whole will be completed within the period fixed by law, thus furnishing a continuous line of railway from the Atlantic to the Pacific.

Its effects, in promoting immigration, opening vast and rich regions of the continent to settlement, developing our inexhaustible national resources, and perpetuating the unity of the American people, will be more and more appreciated as it approaches completion.

The Union Pacific Railroad Company, incorporated under the Congressional act above cited, reports, by its president, under date of the 5th ultimo, that on the 19th of October last 16 miles of track had been laid west from Omaha, and that arrangements had been made to prosecute the work at the rate of one-half mile per day. The company has five locomotives and 70 cars on the road. Machine shops and station buildings of the most permanent character are in progress of construction, and will be finished in the course of the present month. The grading of the first hundred miles was, at that date nearly ready for the superstructure, and that of the second hundred miles had been commenced. The first 60 miles of the track will be ready by the end of next month, and no doubt is entertained that the first hundred miles will be in operation by the 1st day of July next, in compliance with the requirements of law. The directors express the belief that an additional hundred miles will be in operation by the first day of July, 1867, and they are not without hope that they will, at that date, have constructed 250 miles of road, and reached the one hundredth meridian, where the line of the eastern division, commonly called the Kansas branch, is to unite with it.

Several parties of engineers have been actively engaged; one in surveying the Spanish Fork and the country west from Salt Lake to the valley of the Humboldt; another up the Cache de la Poudre to the Laramie river, and a third from the one hundredth meridian west. A fourth has been occupied in locating the second hundred miles of the road. Strenuous efforts have been made by the directors to press on the work with a dispatch commensurate with its acknowledged importance. The expenditures already amount to three and a half million dollars, wholly derived from private contributions.

In this connection it may not be amiss to state that on the 12th of May last the company made application to substitute a new line for that adopted between Omaha and the crossing of the Elkhorn. It was deemed advisable, before determining which line offered the most "direct and practicable route," to order a thorough personal examination of both by a competent engineer, who was instructed to report on their relative advantages. The officer detailed by the Secretary of War at my request, as above mentioned, discharged his duty with fidelity and success. His report embraces the instructions of the department, as well as the result of his careful examination, and the consequence to which it gave rise.

The contemplated new location received your approval. Some time was in this way unavoidably consumed, and the company deemed it expedient to suspend active operations on the part of the road, until the result of your final action upon the application was officially communicated.

The Union Pacific Railroad Company, eastern division, has completed 40 miles of the railway and telegraph line, extending from the mouth of the Kansas River to a point near Lawrence; and

it had in October last four locomotives on the road, and was then expecting the arrival of another at Wyandotte. There were on the track three first-class passenger, 44 freight, 21 box, one baggage, 12 hand-cars, and two iron truck-cars. The company has also contracted for four additional first-class passenger, two express and mail, and ten box freight-cars, all to be delivered within a short period. The company reported on the 11th ultimo that an additional section of 20 miles had been completed, which is now in process of examination by commissioners, in the mode required by law. Surveys have been extended to the one-hundredth meridian, a distance of about 381 miles. There is also a party in the field making surveys of the Smoky Hill route, who are to extend their surveys to Denver city, about 581 miles from the eastern terminus of the road.

The President of the Atchison branch of the Union Pacific Railroad submitted a report bearing date of the 15th ultimo. It represents that the bridges and masonry on the first section of twenty miles of the road are all completed, cross-ties prepared, the track being laid, and that this portion of the road is under contract, and will be finished by the first day of January next. It further represents that the bridges are constructed of the best materials, and that the buildings now in process of erection are of stone, roofed with corrugated iron; that the second section of 10 miles is also under contract, and will be completed on the first day of May next.

The commissioners appointed by your predecessor, under date September 8, 1864, reported upon 31 miles of the railway and telegraph line constructed by the Central Pacific Railroad Company of California. This part of the road, extending eastward from Sacramento City to a point near Newcastle, in Placer County, California, is completed and in daily use. Under date of the 17th July last, 12 additional miles of the road were reported to be in running order. On the 16th day of September last, the President of the Company filed in the office of the Surveyor General of California his affidavit, setting forth that the company had completed the grading and all the work required to prepare the railroad for the superstructure on the section of 20 miles lying next eastward of the town of Newcastle, at an expense of $1,098,000. Five thousand laborers, it is alleged, are employed, and the company manifest the greatest vigor and activity in carrying on their operations.

On the 24th day of December last, the Sioux City and Pacific Railroad Company, a corporation organized under the laws of Iowa, was designated by the President of the United States for the purpose of constructing and operating a line of railroad and telegraph from Sioux City to such point on, and so as to connect with, the Iowa branch of the Union Pacific Railroad, from Omaha, or the Union Pacific Railroad, as the company might select. The President of the company, on the 15th of June last, submitted a map designating the general route of said road, but the Department is not advised that its construction has been commenced.

I accordingly concur in the views expressed by my predecessor in his last annual report, as to the propriety of securing, if practicable, the appointment of Government Directors in each of the companies engaged in the construction of a branch or any part of the main line of this road. Such directors are now appointed for the company organized under the act of Congress, and with evident advantage to the public interests. The concurrent action of the States from which the companies derive their corporate power, and the consent of the latter, may be necessary to accomplish that object; but Congress might with propriety initiate the requisite legislation on the part of the General Government.

The patents for land and the bonds provided for in the fourth and fifth sections of the original act are not to be issued on the completion of a section of the road, until the fact of its construction and equipment as a first class railroad shall have been ascertained and declared in the mode prescribed. The words "*first class railroad*" are, perhaps, as precise and definite as any other; but some difficulty may arise in the practical enforcement of the provision in which they occur. With a view to obviate the difficulty, and secure uniformity, I have invited the directors, on the part of the Government, and the several boards of commissioners to meet in this city on the 10th proximo, for the purpose of establishing a standard of excellence, to which the companies in the construction and equipment of their respective roads shall be required to conform.

The Northern Pacific Railroad Company, on the 11th of December, 1864, filed their acceptance of the provisions of the act of Congress entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Lake Superior to Puget Sound, on the Pacific coast, by the northern route;" and under date of the 6th of March last submitted their map designating the general direction of their road from a point on Lake Superior, in the State of Wisconsin, to a point on Puget Sound, in Washington Territory. The records of the Department do not, however, show any further action by the company in the premises.

Fredericksburg and Gordonsville R. R.

The people of Fredericksburg, Va., are considering the matter of building the long projected and partly-constructed railroad from their city to Gordonsville. The company has recently been reorganized, with some of their most influential citizens at its head, and they seem to be determined to make a strong effort to finish the work.

☞ A meeting was recently held at Bellefont, Pa., of the directors of the Lewisburg Centre and Spruce Creek Railroad, one of the connecting links by which the Atlantic and Great Western Railway is to reach the seaboard upon its independent line. Hon. G. R. Barrett, of Clearfield, was elected President of the corporation: Sir Morton Peto, of England, Vice-President: and T. W. Kennard, Engineer. Judge Barrett then, as Attorney of the Atlantic and Geeat Western Railway Company, subscribed one million of dollars towards the completion of this road, and gave notice that he would take the balance of whatever stock was not subscribed by the people along the line.

Central Pacific Railroad
STATE AID BONDS.

INTEREST AT THE RATE OF

Seven per Cent. per Annum in Gold,

PAYABLE SEMI-ANNUALLY,

Guaranteed and Paid by the State of California.

The Bonds are secured by a mortgage on 160 miles of road from Sacramento to the California State Line, forming part of the great Pacific Railroad Route adopted and aided by the United States Government. They are further secured by a Sinking Fund of $50,000 per annum in Gold received from the earnings of the Road, and pledged for their redemption. They are a first class Security in every respect, and a limited amount will be offered upon terms which render them a very attractive and desirable investment. For further particulars, inquire at our Office, No. 5 Nassau Street.

CONSULTING ENGINEERS,

NATIONAL BUILDINGS,

57 Broadway, New York.

THE undersigned having established themselves in this City, and opened an office as above, would respectfully inform their friends, and those who may require their services, that they are prepared to furnish designs, specifications and working drawings for marine and stationary machinery of every description.

Those having mechanical designs which they wish elaborated, are invited to consult with the above, who will give professional advice, and if required furnish drawings, and estimate on the value of such inventions.

The undersigned also offer their services as general agents for the purchase and sale of all kinds of machinery.

Their experience in this country and in Europe in the practical designing of machinery, and the possession of designs, and detail drawings from approved European and American Workshops, render them confident of conducting satisfactorily any business that may be entrusted to their care.

American Railroad Journal.

New York, Saturday, December 23, 1865.

Railroad on the West Bank of the Hudson River.

Movements are on foot which will in a comparatively short time insure an unbroken railroad line between this city and Albany on the west side of the Hudson. At present the Erie Road communicates with Newburgh by the way of Chesterville, and this route is to be materially shortened by building the twelve miles link between Turner's and Vail's Gates, along the Western base of the Highlands which the road proposes to do. Beyond Newburgh the line as far as Catskill is under survey, and the Albanians are moving to build a road southward from their city. Still another line between Nyack and Jersey City has already been chartered, and this work will be commenced next Spring. Peter De Pew, Esq., of Nyack, is the President of this Road.

☞ The Lehigh *Register* understands that on the 1st of February, 1866, the name of the Morris and Essex Railroad will be changed to Atlantic, Pacific and Great Western.

New York Central Railroad.

The annual statement of the operations of this company for the fiscal year ending September 30, 1865, was submitted at a meeting of the stockholders held on the 13th inst. The following is an abstract:

EARNINGS AND RECEIPTS.

From through passengers		$1,384,222 88
" way "		3,137,231 22
" through freight		5,671,845 47
" way "		2,980,582 06
" mail transportation		95,790 00
" express		123,600 00
" rents, storage, etc.		582,252 76
Total		$13,975,524 39

PAYMENTS OTHER THAN FOR CONSTRUCTION.

For transportation expenses, viz:

For passenger business	$4,185,524 60	
" freight "	6,696,833 49	
		$10,882,358 09

Totals	$2,608,431 69	$999,313 03	1,609,118 66

The following is a detailed statement of the funded debt:

Debt certificates, or premium bonds, issued to stockholders in 1853, under the consolidation agreement, payable May 1, 1883, with interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$8,892,600 00	
Deduct the amount of the sinking fund provided for their payment under the consolidation agreem'nt, consisting of $1,658,100.00 in said certificates duly cancelled, $34,000.00 in U. S. 6 per cent. bonds, $201,650.24 in U. S. indebtedness for which certificates are due, and cash for amount temporarily uninvested $308,730.14	2,202,480 38	
Amount outstanding of the debts of the former companies, assumed under the consolidation agreement	100,000 00	
Bonds for funding the principal of the debts assumed for the former companies, at consolidation, payable August 1st, 1876, interest at 7 per cent. per annum, payable semi-annually, on 1st February and August	$1,780,000	
Less in sink'g f'd cancelled	382,000	
		1,398,000 00
Bonds to stockholders in Buffalo and Niagara Falls Railroad Company, under the lease of that company's road payable May 1st 1883, interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$110,800	
Less in sink'g f'd cancelled.	32,800	
		78,000 00
Bonds for railroad stock, payable May 1st, 1883, interest at 6 per ct. per annum, payable semi-annually, on 1st of May and Nov.	$817,000	
Less in sink'g f'd cancelled.	183,000	
		634,000 00
Bonds for real estate purchased, payable May 1st 1883, interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$235,000	
Less in sink'g f'd cancelled.	70,000	
		165,000 00
Bonds and mortgages, for real estate purchased, with interest at 7 per ct. per annum, excepting $45,550.50, the interest upon which is at 6 per cent. per annum		238,323 15
Bonds payable August, 1876, interest at 7 per cent. per annum, payable semi-annually, on 1st February and August, with convertible privilege at par, till 1st August, 1869	$2,990,000	
Less conv. into capital st'k	591,000	
		2,399,000 00
Bonds payable December, 1887, interest at 6 per cent. per annum, payable semi-annually on 15th June and December—issued in renewal of 7 per cent bonds, due 15th June, 1864*	$3,000,000	
Less in sink'g f'd cancelled	75,000	
		2,925,000 00
Total amount of funded debt, September 30th, 1865		$14,627,442 77

* Of these bonds $37,300 in amount had not been presented for payment at the close of the fiscal year—the funds to meet them having been appropriated, they are not included in the statement of debt.

The company has no Floating Debt.

During the year acceptances have been given as heretofore; those outstanding at the close of the fiscal year (amounting to $38,000), have all been paid before the verification of this report, at the date of which the company has none outstanding.

The average rate per annum of interest on funded debt, is 6.24 per cent, and all interest, except on mortgages, is payable in the city of New York.

COST OF ROAD AND EQUIPMENT.

	By last report.	To present time.
For graduation & masonry	$6,777,107	$6,777,107
Bridges	808,068	808,068

ADDITIONAL STATEMENTS.

The items charged to construction account, during the year, have been:

Land: principally at Troy, Syracuse and Buffalo	$110,718 18
17 engines, 18 passenger and 322 freight cars added to equipment	659,300 00
5.85 miles of second track on the Syracuse and Rochester direct road	52,650 00
	$822,668 18

The entire main line is now double tracked, except as follows:

From Port Byron to Clyde	13.09 miles.
From Rochester to Churchville	14.51 "
Total	27.60 "

All the other expenditures during the year (except as shown in the increased value of fuel and supplies) have been charged to transportation expenses, and include a very general and thorough overhauling and repairing of the motive power and rolling stock, and of the road-bed and superstructure, the rebuilding of the cattle sheds at Buffalo, and a portion of the car shops at West Albany, which had, respectively, been destroyed by fire, and the rebuilding of the bridge over the Genesee River at Rochester, which had been carried away by the flood in March. The uniformly extreme cold weather in January, February and March, and the unusual fall of snow and rain in the two months last named, caused great general damage and consequent additional expenses for repairs, besides materially diminishing the traffic.

The stock of fuel and supplies (from the light supply of which during the winter of 1864 and '65 some difficulty was experienced) has been increased to a proper standard. The enhanced price of the articles made the value of nearly similar quantities much greater than formerly, and necessarily involved a larger investment of money to provide for the requirements of the line.

Owing mainly to the great increase in prices, the net result of the business of the year did not afford sufficient means to meet this investment, in order to provide for which, and for the amounts paid on construction account, and for account of Hudson River Bridge at Albany (the latter $330,000 00), there was issued, during the year $2,000,000 00 in convertible seven per cent. bonds, due in 1876. During the same period certain items of debt matured and were paid off, so that, at the close of the fiscal year, the capital stock and funded debt stood $1,621,000 more than at the close of last fiscal year.

The Iron Bridge over the Erie Canal at Schenectady, spoken of in last year's report, has been completed this year. The length of iron bridging now upon the line, reduced to single track, is 5,677.8 feet.

The renewal of Iron Rails, during the year, amounted to 15,708 tons, equal to 163.62 miles of single track. The number of Ties renewed during the same period was 536,669.

Balance Sheet.

From General Ledger, September 30th, 1865.

Railroad and equipment		$33,701,919 56
Cash in banks	$172,770 64

Income account; bal. Sept. 30, 1865		3,921,297 49
		$44,075,497 40

The capital stock has been increased during the year $205,000, by the conversion of an equivalent amount of 7 per cent. bonds due in 1876. In 1864, $177,000 of these bonds were converted; in 1863, $209,000—making the amount to date $591,000. The funded debt has also been increased $1,416,101 20—making the total increase of capital stock and funded debt $1,621,101 20.

The increase in gross earnings over the previous year has been $977,634 56; with an increase in expenses of $1,789,666 70—making the decrease of net earnings $812,032 14. The increase of fuel and supplies on hand is $681,877 14.

The company have 258 locomotives; 206 first class passenger cars; 78 second class and emigrant cars; 82 baggage, mail and express cars; 4,904 freight cars; and 350 cars for gravel and other service.

Miles run by passenger trains, 2,276,888; by freight trains, 3,094,565; by other trains, 432,595—total, 5,804,048, a decrease as compared with 1864 of 186,160. Aggregate miles run by passenger cars in passenger trains, 8,967,904; do., by baggage, mail and express cars, 3,202,409—total, 12,170,313, an increase of 602,786.

Number of passengers carried eastward, 1,968,008, of which 108,455 were through and 1,859,553 way. Do., carried westward, 1,815,255, of which 127,349 were through, and 1,687,906 way. Aggregate both ways, 3,783,263, of which 235,754 were through and 3,547,509 way. Total miles travelled by passengers, 223,229,271—an increase over the previous year of 29,781,536.

Tons of freight carried eastward 892,537, of which 455,984 were through and 436,553 way. Do. carried westward 382,762, of which 184,591 were through and 198,171 way. Aggregate both ways, 1,275,299, of which 640,575 were through and 634,724 way. Total movement of freight, or number of tons carried one mile, 264,993,626—a decrease, as compared with the previous year, of 49,087,784.

Length of main line from Albany to Buffalo, 297.75 miles; length of side or parallel and branch lines, 258.13—total length of main, side and branch lines owned by the company, 555.88; length of second track on main line and branches, 268.71; length of sidings turnouts and switches, 152.27—total length of equivalent single track, 976.86 miles.

Length of Niagara Bridge and Canandaigua railroad, (leased) 98.46; sidings, turnouts and switches, 3.42—total length of equivalent single track, 101.88.

Baltimore and Ohio Railroad.

The regular monthly meeting of the Board of Directors of the Baltimore and Ohio Railroad Co., was held in Baltimore on the 13th inst., at which J. W. Garrett, Esq., was re-elected President, a position he has hitherto filled with signal ability. On taking the chair he delivered an address of which the following is an abstract and the substance.

At the time of his last annual address twelve months since, a momentous conflict had continued for four years, and a million and a half of men had exercised their highest abilities in the work of destruction. During this time, the peculiar geographical position of this road exposed it to constant injury and damage. Tracks, bridges, tunnels, and engines were again and again destroyed by the enemy.

But restoration was as speedy, continuous and effective, and the performance of their arduous duties by the officers and men in the employment of the company, challenged the admiration alike of the Government and the people. Mr. Garrett congratulated the company on the exchange of peace and prosperity for a disastrous war, and scenes of blood. With a large horizon in the future he pointed out some of the immediate consequences and duties devolving on the company. One is to construct the shortest and most direct lines of travel and transportation to the capital. Already a first-class double track road is completed between Baltimore and Washington, but under the charter granted by the Legislature of Maryland at its last session, a route has been located from Washington to the Point of Rocks, by which the distance *via* the Main Stem and Relay House to the capital 91 miles, will be reduced to 45 miles, thus presenting to the travel of the South West and the great West, a saving of 46 miles. Notwithstanding the difficulties interposed by the Legislature of Pennsylvania, to the prosecution of the Pittsburg and Connellsville road to Cumberland, yet a decision of the United States District Court has maintained the rights of the company, and the Baltimore and Ohio company, and its associates are prepared to complete the short line to Pittsburg, and thus reduce the distance to Washington from that central point 72 miles. A direct outlet to Washington and Baltimore being thus attained, the city of Pittsburg will have a future, scarce secondary to Philadelphia itself. In connection with this, the English capitalists recently in this country are prepared to complete the line between Cleveland *via* Youngstown, and Pittsburg. Mr. Garrett calls upon the company not to be diverted from the execution of this work by any attempt at hostile legislation or threats of imaginary "air lines," and expresses his gratification that the City of Baltimore appreciates its importance, and is in accord with the company in its design to carry it out.

Anticipating the accomplishment of these direct lines, the prosecution of the double track on the existing line is vigorously urged. In less than a month 40 miles will be added to this double-track, and during the next year, the whole double track to Cumberland will be finished.

The Parkersburg branch is being rapidly improved, so also the work for the bridges connecting the Central Ohio and Baltimore and Ohio Roads, between Bellaire and Benwood, and the Marietta and Cincinnati and Parkersburg roads between Parkersburg and Belpre. Another new and important subject has been opened for consideration, the early construction of a line of railway from Harper's Ferry through Winchester, and Strasburg to connect with the great Virginia and Tennessee road in the South Western part of the State, and thus open a direct and effective line of communication from Baltimore to New O leans, bringing Virginia, Tennessee, Georgia, Alabama, Mississippi and Louisiana in an admirable economical and direct line to the national capital, and the seat of commerce at the head of the Chesapeake. Mr. Garrett points out the great advantages this will effect. The jealousy of lines leading to the free states is now removed, and Virginia may enjoy a "a rich position in the increasing fraternity and commercial prosperity." On this topic Mr. Garrett remarks:

A natural route, full of local and general advantages, is thus presented. It is true, that whilst a portion of traffic which now comes up the Ohio river, and is received by Western railways from the Southwest—thus passing over the whole 379 miles of the Baltimore and Ohio road, would, through a valley line, pass over but 80 miles of the main stem, yet, in view of the great objects to be achieved for those interests, and in securing a direct communication to Washington, and adding vastly to the commercial strength and importance of Baltimore, I do not hesitate to commend to the most earnest and favorable consideration of the community and to this board this interesting subject.

The Baltimore and Ohio road has built up the region of Virginia through which it passes. It has aided largely in the construction of the Parkersburg road, which has cost more than seven millions of dollars, and whilst it has enormously increased business and prosperity upon that line and made millionaires of the owners of oil lands, of coal lands, and largely advanced the values of all properties in that region, that road has thus far failed directly in paying any interest upon the

investment; yet in the future it is believed that remuneration can be secured, whilst the general commerce of Baltimore has been benefitted, and that region so specially improved. Like difficulties may embarrass the enterprise proposed, but its results in the future will justify every effort in its behalf.

The advantages to the people of Virginia of a similar system of management to the Baltimore and Ohio road can perhaps not be better presented than by quoting from the recent message of his Excellency, Governor Pierpoint, of Virginia, namely:

"As above stated, we have upwards of $22,000,000 invested in railroad stocks and bonds. Something more than $15,000,000 of this sum is in railroads in running condition, and would, in the hands of private stockholders, soon yield a revenue of from seven to ten per cent. to the owners; but whether they will ever yield anything to the State and stockholders under the existing system, remains to be seen. I express this doubt from the experience of this and other States that have embarked in a general system of internal improvements. It was found that while the State was an owner or a partner, little or no profit was realized. A number of States sold out their interest in internal improvements to private companies, who became the owners where the State owned the whole, or the joint owners with original stockholders. These works, in the hands of private individuals, immediately became profitable. I make the suggestion with great deference, but I think it must be seen, from the present organization of our roads, that if continued they are not likely to be very profitable to the State or to the stockholders. On the south side of James river we have the Norfolk and Petersburg, South Side, Virginia and Tennessee, and the Richmond and Danville railroads. These roads are under the management of four different corps of officers, employed at remunerative salaries. All these roads combined are less than 550 miles in length. Their aggregate gross earnings in 1860 was about $1,800,000. Three of these roads form a continuous line of about four hundred miles, and all three of them affording business for the fourth. Yet the officers of these roads have been found jarring among themselves, and indisposed to accommodate each other, whilst the State owns three-fifths of the stock in each of them, and is a money lender to them in addition. If one prudent man owned all these roads, he would, manifestly, place them all under the control of one head, and work them in harmony. His first saving would be about forty thousand dollars per annum in the item of officers' salaries. Co-operation would insure increased business and income. By working these roads separately a car is loaded at Norfolk with freight for Danville or Abingdon; it is brought to Petersburg to the South Side road, and there transferred from the Norfolk to a South Side car; thence it is taken to Burksville, where it is again transferred to a Danville car, if its destination is to that town, or taken to Lynchburg and reshipped on the Virginia and Tennessee road, if it goes to Abingdon. In these transactions the cars are delayed, thereby causing a much larger investment in rolling stock to accommodate the business of these roads, in addition to the labor required to load and unload the freight, besides exposing the merchandise to loss and delaying its transportation, which is always to be avoided by the shipper, if possible. Wherever the cars are loaded on any of these roads, they should be run to the place of destination of the freight without breaking bulk. The consolidation of these improvements under one set of officers is entirely practicable. The Baltimore and Ohio railroad, with the Northwestern Virginia and Washington branches, is nearly as long as the four roads above named, and the gross earnings of that railroad is about three times as great, the charges for passengers and freight being 33 per cent. less than on the Virginia roads referred to; yet the whole business of the Baltimore and Ohio road is done by one corps of officers with moderate salaries. There is the same reason for consolidating the Orange and Alexandria and Virginia Central roads. There may have been a necessity for a different corps of officers on each of these roads during their construction, but now that they are completed, it is the obvious interest of the State and stockholders to consolidate them. It is believed that there will be no difficulty in harmonizing the interests of the private stockholders. By the existing system of supporting six separate corps of officers on these improvements, when the business could be more efficiently conducted by two, it is simply taxing the people $40,000 or $50,000 annually to support railroad officers who may be advantageously dispensed with. As above stated, I am of opinion that all these improvements in the hands of private individuals would, in a short time, yield dividends of from seven to ten per cent., and believe that the interest of the State in them can be leased, say for a period of thirty years, for more than six per cent. per annum on the investment, by giving the lessees the privilege at any time within the thirty years, of purchasing the interest of the State, paying the amount of the State's investment in money, or in the bonds of the State. Some of these roads are deemed more valuable than others; each one, therefore, should be leased or sold to the highest bidder, and in no case should the State's interest be sold or leased for less than its cost to the State. This would obviously be greatly to the advantage of the private stockholders by furnishing them active and able partners instead of the State, which is now unable to assist them. This plan would at once relieve the State about fifteen millions of its debt."

Mr. Garrett points out the advantage of the low tariffs of the Baltimore and Ohio Road to the State of West Virginia, andwhich willbe applicable also to the inhabitants of the region generally traversed by the road.

Mr. Garrett then proceeds to comment favorably on the establishment of a line of steamships between Baltimore and Liverpool, believing there will be business enough for five first class steamers of 2,000 tons each, the port itself having peculiar advantages for the trade. The policy of a low tariff on coal is approved, and the gratifying increase of the tonnage of Baltimore stated, to wit: 80 steamers of 42,750 tons. The company is bringing over the railway 2,500 tons of coal daily furnished at a cost of $6 75 and $7 per ton, in Baltimore, against $10 and $14 per ton at Philadelphia and New York. The following calculation in relation to this subject is given by Mr. Garrett:

When we recognize the fact that the chief railway routes from New York to Cincinnati are respectively the New York Central and New York and Erie roads, and that the distance by the former from New York to Cincinnati is 888 miles, and by the latter 361 miles, and that the distance from Baltimore to Cincinnati is but 586 miles, and that thus the city of Baltimore has a geographical advantage, in connection with the business of the Ohio valley, as compared with the city of New York, of 275 miles as *via* the New York and Erie, and 297 miles as compared with the New York Central road, it is very clear that, with proper facilities for shipment, with the cheap fuel for steamers and the large demand for imports as well as the abundance of material for exports, that the entire region west of Baltimore and south of its parallel can most economically use the Baltimore and Ohio railroad to the city of Baltimore as their route for European commerce.

These advantages are, of course, still more striking in connection with the business of Virginia, the Carolinas, Tennessee, Kentucky and the Southwest. To illustrate the extent of the business now passing from those regions over our line, there is now in transit of the single article of cotton more than 5,000 bales, of a value of more than a million of dollars. Tobacco, cereals, provisions, every class of product for export are being received in our market beyond the capacity of our marine for its prompt shipment.

A further commercial arrangement between the ports of Bremen and Hamburg and Baltimore, with first class steamships is also urged, with reference to emigration, and the openings and facilities of a new trade. He anticipates that the improvements in the harbor of Baltimore will make it a great commercial centre and enable ships to enter it of the largest capacity.

The Baltimore and Ohio Railroad Company has moved in harmony with these anticipations. It has increased its equipment to 300 locomotives and 4,000 cars; 75 trains pass daily over the main stem of the Baltimore and Ohio road in the Baltimore division. The power of the company is being constantly enlarged, and direct outlets for the vast accumulation of traffic must follow. The expenses at the port of Baltimore being much less than at New York, corresponding advantages present themselves.

Mr. Garrett concluded his remarks by expressing his thanks for the support he has received from the company, which we beg leave to say is honorable to both parties. As a railroad admintrator he stands in the first rank.

Report of the Commissioner of Internal Revenue.

The report commences with the flattering statement that in spite of the withdrawal of more than a million of men from productive pursuits in 1864-'65, and the destruction of our commercial marine, yet the people paid more revenue to the Government than the aggregate collected from the foundation of the Government to the war of 1812—and that too without either complaining or feeling oppressed.

The aggregate receipts of internal revenue for the fiscal year:—

1863 ten months were	$41,003,192 93
1864 were	116,850,672 44
1865 were	211,129,529 17

These amounts are exclusive of the direct tax, or tax of twenty millions of dollars upon the lands of the country, which has been partially paid in various ways, and the duty upon the circulation and deposits of National Banks, which in 1863 was paid to the Comptroller of the Currency.

It is expected that the aggregate for 1865 will reach $272,000,000.

The receipts from various sources for 1864 and 1865 were as follows:

	1864.	1865.
Banks	$4,414,730 56	$8,834,319 98
Railroads	1,524,242 47	3,317,500 50
Insurance compan's	968,948 59	1,726,162 37
Government salaries	1,705,124 63	2,886,333 37
Revenue stamps	5,894,946 14	11,162,892 14
Licenses	7,145,388 71	12,598,691 25
Incomes	14,919,279 58	20,567,540 26
Iron and steel	3,694,168 49	9,219,713 13
Petroleum	2,255,328 80	3,047,212 77
Cigars	1,255,424 79	3,069,448 21
Tobacco	7,086,684 74	8,016,119 78
Fermented liquors	2,223,719 73	3,657,091 06
Distilled liquors	28,431,797 83	15,995,633 86

The tax upon bank dividends was three per cent. until June 30, 1864, after which it was five per cent.

"Circulation" and "Deposits" were not taxed until October, 1863.

"Capital" was first charged under the act of June 30, 1864, when the duty upon "Circulation" was increased.

By the act of March 3, 1865, the tax upon de-

posits was extended to Savings Banks having no capital stock.

The taxes upon the "Capital," "Circulation" and "Deposits" of National Banks are not received at this office nor included in the above.

The tax upon railroad dividends and interest on bonds was three per cent. until July 1, 1864, afterward five per cent. The same tax was then imposed upon all profits carried to the account of any fund, or used in construction. The amount received from this source is included in the dividends for 1865.

The tax upon insurance dividends and additions to surplus is the same as upon dividends of banks. That upon gross receipts of premiums and assessments was one per cent. until July, 1864, payable quarterly to the Commissioner; after that one and one half per cent.

The tax upon Government salaries is received only from those whose compensation exceeds $600 per year, and was at the rate of three per cent. until July 1, 1864, and afterward five per cent.

Passports were taxed three dollars each until July 1, 1864, five dollars since. These accounts were mainly paid through the Department of State. A small sum each year was received from collectors.

The receipts from revenue stamps include the receipts from stamps required by schedule C, as well as schedule B, upon proprietary articles, matches, photographs and cards, as well as upon written instruments. The law in respect to these duties has been repeatedly and variously modified, sometimes adding and sometimes subtracting from the receipts. The large increase of revenue is due in no small degree to the growing observance of the law. After September 1, 1864, stamps were required upon matches, and the receipts from that source, for the remaining portion of the fiscal year, was probably not less than one million dollars.

The taxes in schedule A are specific, upon carriages, yachts, billiard tables and gold and silver plate kept for use. In 1864 the schedule was increased by the addition of gold watches and piano fortes, but the change was made after the annual lists in which the taxes are included were in the hands of the collectors, and the receipts reported are mainly from the operation of the statute of 1862.

The receipts from licenses, like those of income and schedule A, are almost entirely in the report of the year subsequent to their assessment. The re-assessment under the act of June, 1864, furnished the principal exception to this rule. The returns are received in May, but the lists upon which they are entered by the assessor do not ordinarily reach the collectors until after the 30th of June, or the beginning of another fiscal year. The increase in 1864 accrued, in part from the addition by the act of March, 1863, to the list of persons subjected to duty and the increased charge for several descriptions of license, and that of 1865 from the same source, as well as from a like addition under the act of June 30, 1864, and the increased tax upon wholesale dealers, which, by special provision of the statute, was immediately assessed as additional to that assessed under the prior law.

The tax upon incomes with licenses and schedule A make up the annual list. For the reasons given above, the tax upon the income of 1862, assessed in 1863, is mainly included in the receipts of the fiscal year, 1864, less than half a million dollars having been collected, in 1863, and the receipts for 1865 consist almost entirely of the tax assessed in 1864 upon the income of 1863.

Most of the tax upon the income of 1864 has been collected since the commencement of the current fiscal year 1866, and will appear in the next annual report from this office. A small part of it is found in the receipts of 1865.

Of the amounts collected in 1863 $279,333 76 was returned at five per cent. upon incomes above $10,000, $172,770 35 at three per cent. upon incomes of less than $10,000 and $3,637 15 upon incomes from United States securities.

Of that collected in 1864, there were returned at

5 per cent	$6,913,834 88
3 per cent	7,930,070 77
1½ per cent	75,373 93

Of that collected in 1865, there were returned at

10 per cent	$801,941 99
5 per cent	9,934,748 55
3 per cent	9,697,246 96
1½ per cent	133,402 76

The receipts from the ten per cent. tax were all from taxes upon the income of 1864. It cannot easily be determined precisely how much of the receipts at five per cent. are due to that year.

The special tax of five per cent. upon all incomes above six hundred dollars, as well as from banks, railroads and salaries, as from other sources, brought into the Treasury $28,929,122 37.

The iron and steel tax is upon the varieties named and described in the 75th section of the act of July, 1862, amended and somewhat increased by the act of March 3, 1863; still further enlarged with increased rates under the act of June 30, 1864, and twenty per cent. additional to those rates after April 1, 1865.

Pig iron was taxed two dollars per ton by the act of 1864, and during eleven months ending June 30th last, added nearly one and a half million dollars to the public revenue.

The additional twenty per cent. to the rate, taking effect April 1, did not increase the receipts until May.

Several causes have contributed to secure the tax upon these articles, and it is believed that it has almost universally been paid.

The tax upon petroleum was ten cents per gallon, and upon oil distilled from coal exclusively eight cents until June 30, 1864, after which the rates were twenty and fifteen cents respectively.

Specific taxes graduated by the different values of the cigars were imposed by the act of July, 1862. These were largely increased in 1864, but under the act of March 3, 1865, the duty was made uniform at two dollars per thousand. The anticipation of additional tax largely increased the manufacture in 1864, and the supply at that time has hardly yet been consumed.

Plug and fine cut tobacco was merely taxed fifteen cents per pound until June 30, 1864, when the rate was increased to thirty-five cents, and in March, 1865, it was still further increased to forty cents.

The tax upon smoking tobacco was at first five cents; increased to twenty-five cents in 1864, and to thirty-five cents in 1865.

Smoking tobacco, made exclusively of stems, was taxed at two cents until March, 1863, when it was raised to five cents. In 1864 it was increased to fifteen cents, where it still remains.

The tax collected in 1863 represents 23,680,056 pounds; that of 1864, 63,372,426 pounds, and that of 1865, only 36,639,020 pounds.

Of the amount charged in 1865, 10,061,173 pounds were manufactured and returned in June, 1864, in anticipation of the increased rates, and the duties paid in the following year. The amounts for the first and the last years were less than the ordinary annual consumption, while the amount for 1864 was greatly in excess. This excess was brought into consumption during the last year at rates at which the regular manufacturers could not compete, except with their old stocks, and the production was of necessity largely obstructed. It has been unfavorably affected by the arrival of large quantities of Southern tobacco in Northern markets.

The average annual taxable production of the different kind of manufactured tobacco from Sept. 1, 1862, to June 30, 1865, was 42,809,168 pounds, which at present rates would have produced $15,736,795 65.

From September 1, 1862, to March 3, 1863, the tax upon fermented liquors was one dollar per barrel, of not more than thirty-one gallons; from that date to April 1, 1864, sixty cents, and since that time, one dollar.

The number of barrels upon which tax was received, as nearly as can be ascertained, was 1,765,827 in 1863, 3,459,119 in 1864, and 3,657,181 in 1865.

During the fiscal year 1863 the tax upon distilled spirits was uniformly twenty cents per gallon. For the fiscal year 1864 the tax was twenty cents until March 7; after which it was sixty cents. From July 1, 1864, until January 1, 1865, it was one dollar and fifty cents per gallon, and afterwards two dollars.

Of the amount reported in the year 1865, however, $3,862,752 86, or nearly one-fourth the whole amount, was at twenty or sixty cents per gallon. This resulted mainly from the fact that large quantities of spirits were sold by the distillers within the last ten days of June, 1864, thus escaping the increased duty, while the taxes thereon did not fall due until the following month of July, being the first of the next fiscal year.

Considerable quantities were removed from the distilleries, too, under transportation bonds, or under bills of lading, prior to the first day of July, under conditions which produced a similar result.

The receipts from distilled spirits in

1863 (10 months)	were from	16,149,954 gallons.
1864	" were from	85,295,391 gallons.
1865	" were from	16,937,778 gallons.

Average taxable production per year from September 1, 1862, to June 30, 1865, 40,537,371 gallons.

The cost of collecting the internal revenue is estimated at 3½ per cent. for the whole country. In England it is about ⅞ per cent.

The receipts for first three months of the fiscal years of 1863, 1864 and 1865 are as follows:

	1863.	1864.	1865.
July	$5,298,967.18	$16,570,548.39	$21,693,470.75
Aug.	5,604,201.35	15,712,066.84	34,087,539.09
Sept.	6,136,205.48	15,819,770.72	37,939,415.82
Tot'l	$17,039,373.96	$48,101,385.95	$93,720,425.66

The following is a comparative statement of receipts from several large sources of revenue during the first quarter of the fiscal year 1865 and the first quarter of 1866, ending September 30th, last:

	1864–'65.	1865–'66.
Fermented liquors..	$913,252 53	$1,230,353 69
Refined petroleum & coal oil	302,411 63	310,056 09
Revenue stamps	2,560,509 85	3,010,135 37
Salaries	471,863 07	1,206,878 59
Paper of all descriptions	228,851 60	204,917 76
Cigars and cheroots.	526,840 91	600,116 88
Articles in schedule A	316,621 77	981,547 14
Income	13,510,492 98	41,766,016 63
Smoking & chewing tobacco	2,233,926 16	2,078,974 95
Distilled spirits	3,501,071 43	1,085,031 20
Total	$24,565,841 93	$52,974,028 30

The sums refunded on taxes erroneously assessed and collected are as follows:

1864	$237,470 37
1865	422,737 86

Though the taxes rightfully due from citizens in the insurrectionary States for 1863–'64 and '65, are still held as due, yet the department thought proper to insist upon the collection of such only as accrued after the establishment of collection districts therein.

The Commissioner thinks that the repeal of the clause in the statute requiring a written demand of payment, before the 10 per cent. finally attaches, to be a mistake, and recommends its re-enactment.

The amounts received from sales of lands and lots in several States are as follows:

Florida	$40,414 81
South Carolina	170,878 01
Virginia	131,608 38
North Carolina	38,786 10
Tennessee	112,366 00
Louisiana	108,207 72
Arkansas	33,537 00

Since Dec. 10th, 1863, 617 certificates of homesteads to colored persons in South Carolina, of 20 acres each, were issued, most of which during the past fiscal year.

The Government has reserved on the Sea Islands of South Carolina, 81 plantations for military, naval, charitable, educational and police purposes.

Large tracts of land, bid in for taxes, still remain in the hands of the Government, concerning the disposition of which legislation is solicited.

The Coal Trade.

The Pottsville *Miner's Journal*, says the trade by the canal is now closed.

The tonnage this year is	1,017,384 01
In 1864	998,423 10
Increase in 1865	18,960 11

The tonnage by railroad in 1865 was as follows:

Anthracite, main branch	2,813,518 00
Via Lebanon Valley	277,295 00
Total in 1865	3,090,813 00
1864—Main branch	2,763,564
Via Lebanon Valley	305,012
	3,068,576 00
Increase in 1865, tons	22,237 00

☞ The Fredonia *Censor* says that about 400 hands are at work along the line of the Buffalo and Oil Creek Cross Cut Railroad between Fredonia and Brockton, and Corry and State Line.

Enterprise of Baltimore.

We are pleased to notice that the people of Baltimore are actively employed in enlarging the business of their city by the establishment of steam navigation on a large scale.

In the Baltimore *American* we find an interesting statement to that effect, from which we take the following interesting particulars:

1. There is a line of steamers known as the Baltimore and Ohio Railroad Company's Liverpool line, which has successfully commenced operations, consisting of two first class propellers, the Somerset and Worcester, with large capacity and the best accommodations for freight and passengers.

2. The same company has a line between Baltimore and New York, composed of two large vessels like those already mentioned, running weekly.

3. Two first class propellers now also perform weekly trips to Savannah.

4. There is also an outside line consisting of three fine propellers, making tri-weekly outside trips to New York. This line is highly commended.

5. A weekly line of two propellers between Baltimore and Boston.

6. A line running every ten days to Charleston and Savannah, at present to be maintained by a fine side wheel steamer, the Isabella.

7. Another line called the old Bay line for the coasting and Bay trade, consisting of four steamers, and another on the stocks. Connected with it is another line operating on the Eastern shore of Virginia, and alternates on the route to Gloucester and Yorktown.

8. A daily line to Fortress Monroe composed of five steamers, all of the best description.

9. The People's line, to run down the bay, consisting of two steamers, two boats, a third to be added, and to carry freight and passengers to Richmond and Petersburg.

10. The Powhatan Company, a tri-weekly line to the same ports, with four steamers.

11. The Enterprise Company with four steamers to ply to the Eastern and Western shores tri-weekly.

12. The Potomac Transportation Line with two steamers running to Alexandria, Washington and Georgetown, twice a week.

13. The Oxford, Cambridge and Denton Eastern Shore Line, with side wheel steamer, twice a week.

14. The Sassafras River, tri-weekly, making a direct communication with Philadelphia, running to Northern Creek and Sassafras River, and Port Deposit.

15. Pocomoke and Annamesse River, once a week.

16. Baltimore and Susquehanna Line, with four side wheel steamers, making daily trips to Port Deposit.

17. Weems' Patuxent Line to Fair Haven, Plumpoint, and other places on the Western shore of the Chesapeake and Patuxent with two steamers; days of departure not given.

18. Chester River line, tri-weekly, for Kent Island, Corsica, Booker's, Rolph's and Chestertown.

19. Another line known as the Washington, Alexandria and Georgetown, semi-weekly.

20. New York and Baltimore Line by the inland route, nine propellers, a daily line, starting from Light and Pratt streets.

21. Baltimore and Philadelphia, 4 propellers daily.

22. Mitchell's Line to Petersburg, two propellers, not a periodical line.

23. Slaughter's Line to Chester River, three steamers daily.

The Baltimore merchants anticipated large results from this activity, the influence of the Baltimore and Ohio Railroad, and their own central position.

They thus have 22 lines, and 68 steamers all doing a good business.

Pension Bureau Report.

The act of February 27, 1865, made an annual allowance of $300 for life to each of the five survivors of the army of the revolution. Four of these aged and venerable men lived to receive this token of the Nation's gratitude. Two of them have since died. William Hutchings of Penobscot, Hancock County, Maine, aged 101 years, and Samuel Cook of Clarendon, Orleans County, New York, aged 99 years, are the only persons among the living known to the department, who participated in the heroic struggle which achieved our national independence.

The names of 1,115 widows of revolutionary soldiers are inscribed on the pension rolls.

The right to a pension was confined, by the act of July 4, 1836, to those whose marriage with the deceased soldier took place before the close of his military service. It was subsequently extended, by the act of February 21, 1848, to those whose marriage took place prior to January 1, 1794, and by the act of July 29, 1848, to such as were married prior, and by the act of February 3, 1853, to those who were married subsequent to January 1, 1800. Under the first named law there are 4 surviving claimants; under the second, 108; under the third, 70, and under the fourth, 880, to five of whom pensions were allowed during the last fiscal year. The remaining widows of revolutionary soldiers receive their pension under special acts of Congress.

During the fiscal year ending June 30, 1865, the names of 14,962 army invalid pensioners, were on original application, added to the roll, and the number to whom the pension theretofore awarded was increased, amounted to 366. The whole number admitted was 15,328 requiring an annual payment of $1,220,785 90.

The aggregate number of claims of widows, or other dependent relatives of soldiers of the army, (except revolutionary,) allowed during the same period, was 24,693, and the number of pensions of this class which were increased during the same period was 14, making a total of 24,707, and constituting an annual charge of $2,574,179.

There was paid during the same year to army invalids, revolutionary soldiers, widows and other dependent relatives, including arrearages of pensions and expenses properly chargeable to the appropriation for revolutionary pensions, the sum of $8,319,672 49. The total number of army pensioners on the rolls at the close of the year ending June 30, 1865, was 84,130, requiring for the payment thereof, exclusive of expenses, an annual appropriation of $7,792,772 51.

The number of navy invalid pensions allowed on original applications during that fiscal year was 250, and there were 7 navy invalids whose pensions were increased. 266 navy pensions were awarded to widows or other dependent relatives of deceased officers, seamen, or marines. The aggregate amount paid to naval pensioners of all

classes was $205,480 62. At the close of the fiscal year there were on the navy pension rolls 839 invalids, the amount of whose pensions was $64,854 92, and 1,017 widows and other dependent relatives, requiring the sum of $168,818. The total number of navy pensioners at that date was 1,856, whose annual stipends amount to $230,672 92. The total amount, therefore, required for the payment of pensions of all classes adjudicated and allowed up to the close of the last fiscal year, or conferred by special acts of Congress, is exclusive of expenses, $8,023,445 43.

The navy pension fund, which had accumulated under the act of April 22, 1800, was exhausted many years since; and Congress, by the act of July 17, 1862, declared that all moneys accruing, or which had already accrued, to the United States from the sale of prizes should be, and remain forever, a fund for the payment of pensions to the officers, seamen and marines, who might be entitled to receive the same. If the fund should be insufficient for this purpose, the public faith was thereby pledged to make up the deficiency; if it should be more than sufficient, the surplus was to be applied for the making of further provision for the comfort of the officers, seamen and marines. The act of July 1, 1864, provides for the investment in the registered securities of the United States of so much of the fund as is not required for the payment of naval pensions, that is, such pensions as by law are chargeable thereto. When the interest payable in coin upon such securities is collected, it is made the duty of the Secretary of the Navy to exchange the amount of such interest for so much of the legal currency of the United States, as may be obtained therefor at the current rate of premium on gold. The interest, so converted, is to be deposited in the Treasury to the credit of the fund. The latter is made applicable, by the act of 1862, to the payment of the pensions of disabled officers, seamen and marines, but not of the widows and other dependent relatives of such as have died of wounds received, or of disease contracted in the service. The fund invested in gold bearing registered bonds of the United States amount to $9,000,000, and there is on hand, subject to investment, or use if required, the sum of $1,395,114 21. The annual interest upon the invested fund, if payable in paper currency, exceeds by 100 per cent. the amount required for the payment of all naval pensions authorized by existing laws. No necessity exists, nor is any likely ever to occur, for the large and constantly increasing accumulation of this fund; but further legislative action is necessary to subject it to the payment of all classes of navy pensions.

The aggregate annual amounts of pensions, and the total actual payments per annum, during the last five years, were as follows:

	Annual Rate.	Actual Payment.
1861	$957,772 08	$1,072,461 55
1862	921,076 69	790,384 76
1863	1,371,716 40	1,025,139 91
1864	4,595,376 33	4,504,616 92
1865	8,023,445 43	3,525,153 11

The number of pensioners, of the several classes, during the same years, will appear from the following table:

	1861.	1862.	1863.	1864.	1865.
Revolutionary soldiers	63	30	18	12	2
Widows of soldiers	2,728	1,850	1,573	1,418	1,115
Army invalids.	4,729	3,878	7,248	22,767	35,041
Widows, &c., (army).....	2,236	1,485	4,820	25,483	47,972
Navy invalids.	427	421	544	712	839
Widows, &c., (navy)	530	483	577	793	1,017
Totals....	11,307	8,147	14,780	51,135	85,986

During the four years ending June 30, 1865, the numbers of pensioners (in the loyal States) stricken from the rolls by reason of deaths, re-enlistments of invalids, remarriages of widows, or other causes, were as follows:

	1862.	1863.	1864.	1865.
Invalids, (army).....	334	568	1,251	2,688
Widows & others, (army).	699	598	1,756	2,708
Invalids, (navy)	56	61	113	123
Widows, &c., (navy)	32	39	32	421
Total	1,121	1,266	3,152	5,561

Whole number dropped from the rolls during four years, 11,100. More than half this number disappeared from the pension list during the last year, exclusive of the rolls of the States lately in insurrection. This diminution is equal to nearly one-seventh of the whole number (41,176) added to the rolls during the year.

New York and Oswego Midland R. R. Co.

Pursuant to the call of the Chairman of the General Committee, appointed at Delhi, Oct. 4, 1865, a Convention of delegates from the various counties, interested in the proposed railroad from New York to Oswego over the midland route, assembled at the St. Nicholas Hotel in this city on Wednesday, Dec. 13, at 12 m.

Samuel B. Ruggles of New York City was appointed Chiarman of the Convention, and B. Gage Berry of Chenango County, Secretary.

Upon a call of the several counties, the following delegates were admitted to seats in the Convention:

Oswego County.—The Hon. Dewitt C. Littlejohn, A. B. Grant, G. Mulinson, E. P. Burt, A. P. Wright, R. K. Sanford, W. Johnson, Dr. S. Avery, Joseph Gilbert. Onondaga County—A. C. Powell, G. P. Kenyon, George Burns, D. P. Phelps, E. B. Judson, O. Vendenburgh, D. H. Eaton, Anson Bangs, James Appleton. Madison County—L. B. Kern, Joseph W. Merchant, A. F. Smith, Erastus Abbott, H. P. Hart, E. C. Litchfield, B. F. Ferris, O. W. Sage, C. L. Chappell, S. W. Ledyard, Charles Crandall, Alpheus Morse, G. B. Mowry, A. N. Wood, A. M. Holmes. Chenango County—B. Gage Berry, George Ryder, Warren Newton, John Shattuck, John A. Randall, Andrew J. Carpenter. Delaware County—The Hon. Samuel Gordon, the Hon. S. C. Johnson, Samuel Gordon, jr. Sullivan County.—The Hon. Henry R. Low, Edward Palen, Wynkoop Kiersted, Samuel G. Thompson, W. M. Gillespie, Chester Darbee, Horace Uster, John H. Divine, David Clements, Nathan S. Hamilton. Ulster County—Thomas Cornell. Orange County—Homer Ramsdell, R. A. Forsyth, A. M. Sherman, W. L. F. Warren, James Bigler, Enoch Carter, E. P. Gumaer. Otsego County—James H. Gilberts, D. G. Hakes. New York City—The Hon. Samuel B. Ruggles.

The meeting being thus organized, the Hon. Henry R. Low of Sullivan addressed the Convention at length, giving a history of the origin of the enterprise, and of the effort which has thus far been made towards its development and completion. He also read a paper, showing that the proposed railroad was a great necessity to the people upon the line, as well as to the cities of New York and Oswego and to the State at large.

Col. Edward W. Serrell exhibited to the Convention the maps and profiles of the proposed route, surveyed some twelve years ago, with new preliminary surveys, recently made by him upon the eastern part of the route. Mr. Serrell stated that the maximum grade of the portion of the road surveyed by him, would not exceed 50 feet to the mile; that the topography of the country was favorable to the construction of the road, and that along the entire route the materials, which enter into its construction, with the exception perhaps of the iron, could be found in abundance.

Mr. A. C. Powell of Syracuse, who surveyed the Western portion of the route at the same time, also submitted maps and made statements, showing the entire feasibility of the route, and that the grades would not exceed 52 feet to the mile upon the route west of the Susquehanna.

Both engineers agree in the fact that throughout the entire line, fuel was abundant for all purposes of the road, which could not only be easily obtained, but was seeking a market.

Messrs. M. N. Randall, Samuel Gordon, Homer Ramsdell, D. C. Littlejohn, A. B. Grant and the Chairman followed, expressing their warm interest in the road and its obvious necessity.

On motion of Mr. Kern, a Committee of seven, consisting of Messrs. Littlejohn, Powell, Gordon, N. Randall, Low, Ramsdell and Ruggles, were appointed to report articles of association and nominate Directors. The meeting then adjourned until 8 p. m.

Upon the reassembling of the convention Mr. Littlejohn reported the articles of association, organizing the "New York and Oswego Midland Railroad Company," with a capital stock of $10,000,000, which were unanimously approved.

Upon the recommendation of the committee the following Directors were chosen:

Hon. Dewitt C. Littlejohn, Oswego; John Crouse, Syracuse; G. P. Kenyon, Syracuse; Elisha C. Litchfield, Cazenovia; Joseph W. Merchant, De Ruyter; Edward F. Hayes, Norwich; John A. Randall, Norwich; A. C. Edgerton, Delhi; Hon. S. Gordon, Delhi; Hon. H. R. Low, Monticello; Edward Palen, Fallsburgh; Homer Ramsdell, Newburgh; Nathan Randall, Homer.

On motion of Mr. Dow, directors and delegates present were appointed a committee to secure the necessary subscriptions and report at a subsequent meeting.

On motion of Mr. Shattuck, a copy of the paper read by Mr. Low was requested for publication, and the Secretary was requested to have the same, together with the proceedings of the meeting, printed in pamphlet form for general circulation, and that an abstract of the same be furnished the city papers for immediate publication.

Mr. Berry from the Chenango delegation stated that the town of Norwich had already made its pledge to take its full share of stock up to a million of dollars, and that several other towns had pledged $150,000 each; Delhi had pledged $500,000 in aid of the enterprise.

The meeting then adjourned until Dec. 14, at 10 a. m.

Convention re-assembled, and on motion of Mr. Randall, a committee of three, consisting of Messrs. Ramsdell, Low and Kenyon, was appointed a committee to confer with other railroad companies in relation to the business of the organization.

Two hundred copies of the Articles of Association, with the subscription clause attached, were ordered printed for circulation.

On motion of Mr. Randall, the Convention recommended to the Legislature to pass a law enabling the towns on the route to raise funds, upon bonds or otherwise, to aid in the construction of the "New York and Oswego Midland Railroad," and that a copy of these proceedings be forwarded to the members of either House from the counties interested.

The books were then opened for subscriptions, and a large amount of stock was at once subscribed in aid of the enterprise by delegates and others present, and the meeting then adjourned.

☞ The Cape Cod Central Railroad is now completed to Orleans, its terminus, nineteen miles below Yarmouthport, and both passenger and freight trains began to run regularly on the 6th inst. The terminus of this road is within thirty miles of Provincetown at the end of Cape Cod.

☞ The Boston, Hartford and Erie Railroad will be opened for travel as far as Webster, Conn., by the 1st of January.

American Railroad Journal.

Saturday, December 23, 1865.

Stock Exchange and Money Market.

It is very evident that a sensation of uneasiness pervades the public mind as to the present condition of our foreign relations. The French Minister, formerly Consul in a Southern State, and the husband of a Southern lady never very friendly to the North, is said to be displeased at the indications of feeling displayed in Congress, and to have sent a special agent to his master for fresh instructions against an emergency. In this state of affairs the question is asked where are we drifting?

It is quite practicable we think to answer it in the fairest manner; and we believe it is the duty of the press to do its full share in steadying public opinion at a very critical moment. We therefore notice with great satisfaction the recent remarks of the Baltimore *American* on this subject, a print always judicious, considerate and honest. It does not hesitate to say:

"War means increased expenses, and an augmentation of the already enormous public debt. It means another drawing off of the industrial classes of the country from the arts of peace to those of war; destruction in place of production. It means risks in the disorganized Southern States which may take an undesired shape, though they may, indeed, be benefitted and strengthened in their devotion to the Union by fighting once more under the Old Flag.

"We take it for granted that Messrs. Wade and Schenck have taken these matters into consideration, and that they are satisfied either that Louis Napoleon will not fight, or that the financial condition of the Union and the present condition of the South justify us in driving his puppet Maximilian and the French troops out of Mexico by force.

"If these resolutions pass, they mean but one thing, and that is—*War!* Without a full knowledge of the situation, we cannot say whether war is necessary; and if it be not necessary, woe unto him by whom it cometh. If it is to be precipitated for purposes at home disconnected with our relations with Mexico, it will be a sad day for somebody."

The *N. Y. Herald*, which has been the open advocate of the Munroe doctrine, asserts in its issue of the 19th, that the Mexican movement in Congress is by men "who have made so much money out of the civil war, and acquired such power in the country that they are ready to plunge us into another war." This bold assertion may have some truth in it; and will not pass without consideration. We think it is possible to look at this question in a purely economical and financial light, and to decide it without any regard to party politics.

In the first place, the Munroe doctrine is so popular a one, and has always been so flattering to our National feeling, that to doubt it, to criticise it, to hesitate about it requires considerable moral courage, and very few persons openly venture to so express themselves. Any opposition to it must be of an indirect character, or it meets with instant rebuke. There has been therefore great danger that the current of public feeling might roll over all obstacles with such resistless force as to prevent a fair consideration of the subject. For it is very plainly to be seen that a great European war would place this country just now in greater difficulties than did the rebellion itself.

A war with France would require enormous expenditures along the whole coast to defend it from the shifting assaults of a formidable iron clad fleet. It would break up all our foreign commerce, give the English Government still further opportunities to violate neutralities, and prey upon our ships, if it did not place it at once in alliance with France. It would lead to new and large loans, and issues of paper money, and the piling up of a load of National debt which could not hope to be discharged in hundreds of years. In short, the whole value of our institutions would be impaired if not destroyed by the loads laid upon the people, "their heirs and assigns forever."

Now, are we called on to descend to this lower depth? Are we obliged to utterly destroy our material strength, or our political influence for the support of an abstract principle? Shall we to avoid a supposed evil, plunge into an actual one? In this we assume the worst, and if war arises we shall see it thus.

On the other hand, is it not plain to be seen, that if we remain in our present position, events will regulate themselves. No one pretends that France contemplates a permanent occupation of Mexico. Sooner or later it will withdraw; it must withdraw, for many obvious reasons. We can then afford to wait a year or two for that event, and when that occurs the whole question will be solved by the people of Mexico themselves, just as they have settled their internal difficulties on former occasions, and with which we have nothing to do.

All we have to do is to remonstrate, refuse recognition, and the Munroe doctrine will vindicate itself by its moral force, by its operation in the judgment of mankind, by its appeal to the enlightened and liberal minds of the French themselves, and by the irresistible logic of events. We may therefore save our breath and our money. Every hour's pause makes our position stronger, our influence more marked, the result more certain. We have the clearest, most unmistakable course before us to pursue, while a deviation from it may end in almost irreparable disaster. We can wait a few years before we plunge into further trials and troubles. We are not called on to make ourselves bankrupt for any political movement, which may in a former day have assumed a shape of danger to our institutions, but which now is seen to be of the least possible consequence. After the splendid vindication of the power and policy of the country against the most dangerous foe we could possibly encounter, no temporary occupation of Mexico by any intruded Government could be of the least danger to us, or indeed of the least consequence. The value and effect therefore of the principle in the abstract, are not yet brought to us for support, vindication or even discussion. We can wait with the certainty that time, will do more for us than war, and solvency give us a future, while fresh financial difficulties would not only prevent us from sustaining other republics, but tend to destroy our own.

We therefore conclude, that on this occasion, the dollar and cent argument may prevail, since it will practically keep the country whole and strong. We cannot bear more debt, we cannot endure further taxation. It is the elasticity of the Nation rather than its material solidity which keeps us in strength. All we want is time, repose and the continuance of peace to fill up the great outlines of our colossal form with real muscle, sinew and solid flesh.

Apart and separate from this element of disquiet, the country is doing well. It is believed that the internal revenues as well as the customs will be largely in advance of the present calculations for the next fiscal year.

Among the interesting facts bearing upon Exchange is this, that about eleven millions of dollars in gold are to be transferred to this country, between this and next March by the Atlantic and Great Western Railway Company, for the further prosecution of its works. It is very evident that the confident tone of foreign capitalists has affected that of our own, as we hear in many directions of extensively projected lines with large capital and important interests. The railway securities, it must however be admitted, are at present very much the sport of the Stock Exchange; and it is thought that the managers of the companies themselves are sometimes parties to their systematic discredit for speculative purposes.

Money is easy in the market, having been loaned at 6 per cent., the large disbursements by the Treasury, and public companies tending materially to this condition of abundance. The Banks of the City appear to be plethoric of funds, their deposits being $4,438,191 in excess of those of the previous week, and their specie reserve has increased by $1,358,655. Their loans have fallen off a few thousand dollars, about twenty-five. Every where the Banks are making large profits, and yet strange to say their stocks are not quoted much above par except in a few instances. The 1st National stands the highest on the list being quoted at 205.

The dividends are generally very largely above the legal rate. The gold market is considered firm with a tendency to rise as the contraction of the currency is not yet perceptible, while the circulation of the National Banks is continually increasing. We still hold to the opinion that contraction cannot be brought about to any great degree, but by changing the form of their deposit securities from bonds to legal tenders.

Governments are reported steady having a stability and hold on the public confidence, which can scarcely be reached by any other security on the market.

The foreign quotations are by the last accounts slightly reduced, though from the changing tone of the British journals towards this country, we infer that our stocks are soon to be petted and made much of. For most certainly it is far better for our friends the English, to invest their surplus capital where they can get a high rate of interest punctually in gold, than to be going into the desperate loans with which the effete nations of Europe are trying to keep their expensive and unsatisfactory goverments afloat. Far better than sending their money into Turkey, never to be returned, or bolstering up the repudiating government of Spain, or adding to the financial morasses of Austria, or doing any such foolish thing as this. The true policy of England is to cultivate the most friendly relations with this country, with which she has many excellent things in common, to lay aside her foolish jealousy of our progress, to do us justice to the letter in every thing, and then the world could see what progress is. There seems to be a disposition to reconsider this subject, and the sooner it is done the better for the security of liberty and the peace of mankind. We are pleased to observe that the decline in prices to which we have lately alluded still continues much to the gratification of consumers. Flour which in January last was quoted at $16 per bbl., is now held at $7.65. Oats then $1.06, now 62 per bushel. Cotton then $1.20 per lb. now 49 cents. Indeed an average fall of 50 per cent. has taken place in most of the necessaries of life, and this is a sensible relief to working people and those of fixed incomes, who have found prices hundreds of per cents higher than gold. No country can be prosperous where there is not a general distribution of comfort and a full share of personal independences. The exports from this port for the past week, included 13,596 bales of cotton, of the value of $3,165,579 thus showing where the strength of the exporting power of the country now lies,

The arrivals of specie at this port within a few days past were: from Vera Cruz $16,000, Bermuda $4,000.

The balance in the Sub-Treasury on Wednesday was $78,217,958.

The exports, exclusive of specie, from the port of New York for the week ending Dec. 18th, were $5,449,445, against $5,112,979 in 1864, and $2,606,113 in 1863. Total since Jan. 1, $176,683,521; same time in 1864, $211,070,319; in 1863, $165,900,456.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Ohio and Miss. 1st mort., 83; N. J. Central, 120½; Brooklyn, Bath and Coney Island, 55; Morris and Essex, 99¾; Rome and Watertown, 100; McGregor Western, 27; Mariposa pref., 21; State 7s Bounty Loan, 98¼; Tennessee 6s, 1868, 85; Spring Mt. ☞ The laboring force at the Hoosac Tunnel has been reduced to about one hundred men, that being as many as can be effectively employed.

American Iron and Steel.

The second annual meeting of the "American Iron and Steel Manufacturers' Association of the United States," was held at the Board of Trade room, Philadelphia, on the 13th inst. In the absence of the President, E. B. Ward, Esq., of Detroit, Samuel J. Reeves, Esq., Vice President of the Phœnix Iron Company, Philadelphia, occupied the chair. From the report of the Secretary *pro tem.*, we learn that the product of the blast furnaces in 1864 was 1,149,913 net tons. Of this, 684,319 tons were anthracite pigs, 210,108 of raw coal make, and the balance of charcoal make. The product of Pennsylvania and Ohio exceeded one million tons. In 1856, the whole number of charcoal furnaces in the United States was 156. The product of new iron for 1864 was 974,876 tons. The amount of pig iron, scrap iron, &c., worked up in 1864 was about 1,400,000 tons. It is evident that this important interest is to be largely developed here in the next few years, and it is the duty of the Government to extend to it every encouragement. In 1849 there were 79 charcoal furnaces in Pennsylvania east of the mountains, which produced in that year 55,617 tons. By the year 1860, 32 of these had finally ceased operations. To the remaining 47, at least 7 new furnaces had been added; the production in that year was 36,576 tons. In 1864, 42,953 tons were made. West of the Alleghany Mountains, in Pennsylvania, there has been since 1849 a very marked and rapid decrease in the production of charcoal iron. This region in 1849 produced 55,494 tons of charcoal iron, 85 furnaces being in operation. In 1864, 9 furnaces only were in blast, producing 8,701 tons. This remarkable decrease in the quantity of charcoal iron made in Pennsylvania can be ascribed to the operations of several agencies:

1. One that has been active for a number of years, viz., the absorption of wood for agricultural purposes.

2. One of recent introduction, viz., the great demand and consequent high price of labor, resulting from the discovery of vast quantities of petroleum in the valleys of the Alleghany and its tributaries.

3. The extensive introduction of the manufacture of iron from coke and raw coal. These causes, operating with more or less intensity throughout the Eastern States, will probably drive the charcoal iron manufacture into the Western and Northwestern States, where wood is cheap and where the ores are of unexampled purity and richness. The total production of charcoal pig iron in the country in 1864 amounts to 255,486 tons.

The product of the rolling mills making railroad rails in the United States for 1864 was as follows:

	Roll Mills.	Total Produced.	Present Capacity.
Massachusetts	2	30,312	37,000
New York	5	57,433	98,000
New Jersey	1	11,687	12,000
Pennsylvania	14	159,610	348,000
Maryland	2	5,488	29,000
West Virginia	2	844	18,000
Ohio	3	20,301	66,000
Kentucky	2	4,441	26,000
Indiana	1	12,773	30,000
Illinois	3	26,880	80,000
Michigan	1	5,600	20,000
Missouri	1	.....	10,000
Tennessee	1	.....	9,000
Georgia	1	.....	9,000
Total		335,369	732,000

The following Board of Managers was elected: E. B. Ward, Detroit, Michigan; C. S. Wood, Philadelphia, Pa.; James M. Cooper, Pittsburg, Pa.; A. S. Hewitt, New York; Samuel Thomas, Hockendaqua, Pa.; John H. Reed, Boston, Mass.; James Park, Jr., Pittsburg, Pa.; Joseph Kinsey, Cincinnati, Ohio; W. B. Ogden, Chicago, Illinois; Thomas S. Blair, Pittsburg, Pa.; John A. Griswold, Troy, New York; Joseph H. Scranton, Scranton, Pa.; A. B. Stone, Cleveland, Ohio; B. F. Jones, Pittsburg, Pa.; J. K. Thompson, Jersey City, N. J.; Charles Wheeler, Philadelphia, Pa.; C. F. Wadworth, Buffalo, N. Y.; William M. Lyon, Pittsburg, Pa.; Horace Abott, Baltimore, Md.; B. Haywood, Pottsville, Pa.; Samuel J. Reeves, Philadelphia, Pa.; J. M. Lord, Indianapolis, Ind.; Simon Cameron, Harrisburg, Pa.; Thomas Beaver, Danville, Pa.; Henry G. Morris, Philadelphia, Pa.; James Harrison, St. Louis, Mo.; E. Hammond, Hollidaysburg, Pa.; Alfred Hunt, Bethlehem, Pa.; Percival Roberts, Philadelphia, Pa.; James Roberts, Essex, N. J.

Flagler & Brother, Iron Merchants.

We would invite the attention of purchasers of boiler plate iron, &c., to Messrs. Flagler & Brother's advertisement in another column, who are largely engaged in the iron business in all its branches, and have extensive facilities for furnishing railroad and locomotive materials promptly from the leading rolling mills in Pennsylvania. Also armor and gunboat plates of all dimensions.

☞ We invite attention to the advertisement of Messrs. Cooper & Sheridan, Stationers and Blank Book Manufacturers, 26 Exchange Place. These gentlemen has been for the past fifteen years in the largest and oldest established stationery houses in this city, and have now laid in a selected stock of Foreign and Domestic Stationery, and are prepared to execute all orders for Engraving, Lithographing and Printing in the best manner.

Old Colony and Newport and Dighton and Somerset Railroads.

At a recent meeting of the stockholders of the Old Colony and Newport Railroad, it was voted to unite and form one corporation with the Dighton and Somerset Company, and that the capital stock of the company should be increased by ten thousand shares, eight thousand five hundred of which should be delivered to the stockholders of the Dighton and Somerset Company, the remaining fifteen hundred shares to be disposed of in such a manner as the Directors should deem expedient for the best interests of the company.

At a meeting of the stockholders of the Dighton and Somerset Railroad, held immediately after the adjournment of the above meeting, it was voted to unite with the Old Colony and Newport Railroad according to the terms proposed by the latter.

☞ That portion of the Sandusky, Dayton and Cincinnati Railroad, extending from Sandusky City on Lake Erie to Tiffin, a distance of thirty-four miles, is advertised for sale, to satisfy a claim against it by Daniel Miller, trustee of $1,367,742, and one of $1,635,036, brought by Wm. D. Pickering, J. Willard Peele and Wm. B. Howe, trustees. The sale is to take place at Sandusky City on the 5th of January, the minimum for which it can be struck off being $750,000.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Northwestern Railway for the second week in December, 1865, were $123,259 45
Corresponding week of previous year. 115,233 94

Increase $8,025 51

The earnings of the Marietta and Cincinnati Railroad for the 1st week in Dec., 1865, were:

	1865.	1864.
Passengers	$7,695 10	$7,988 11
Freight	17,247 40	10,140 99
Mail, express & telegraph	1,185 00	1,079 58
Total	$26,127 50	$19,208 68
Total for the fiscal year commencing Jan. 1.	$1,143,558 93	$952,572 38

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Dec. 7, were:

	1865.	1864.
Passengers	$3,325 54	$2,675 53
Freight	5,710 08	6,048 61
Express	130 22	104 16
Mail	296 58	296 58
Total	$9,462 42	$9,124 88

Receipts from January 1 to Dec. 7:

1865 ..... $661,015 24
1864 ..... 550,008 15

Increase $111,007 09

The traffic of the Great Western Railway for the week ending Dec. 15, 1865, was as follows:

Passengers $29,931 56
Freight and live stock. 30,423 32
Mails and sundries. 2,497 50

Total $62,852 38
Corresponding week of 1864 ..... 61,205 76

Increase. $1,646 61

The earnings of the Grand Trunk Railway for the week ending Dec. 9th, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers $46,789 00
Express, freight, mails and sundries. . 7,500 00
Freight and live stock 76,785 00

Total $131,074 00
Corresponding week, 1864 ..... 120,470 00

Increase. $10,604 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Dec., 1865, were $81,311 00
Corresponding week of 1864 ..... 80,365 00

Increase $946 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in December, 1865, were $43,786 00
Corresponding week of previous year.. 75,183 00

Decrease $31,397 00

☞ At an election for directors of the Lewisburg Central and Spruce Creek railroad company, held at Aaronsburg on the 13th inst., the following board was elected: Hon. Geo. F. Miller, Lewisburg, President; T. W. Kennard, New York; George R. Barrett, Clearfield; Gaylord Church, Meadville; W. G. Hamilton, New York; S. Wann, New York; Alexander McAndrew, New York; William C. Duncan, Lewisburg; Pearson Church, Meadville; R. M. Taylor, New York; John Walls, Lewisburg; R. H. Duncan, Spring Mills; Mark Halfpenny, Laurelton.

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of Nov., compared with the same period last year, were as follows, viz:

	1865.	1864.
Freight	$442,042 97	$409,844 81
Passengers	243,592 29	257,553 89
Express matter	10,963 00	8,023 70
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous.	1,965 04	1,225 04
Total	$713,471 63	$691,555 77

Earnings from Jan. 1, to Sept. 30:

1865. ..... $7,821,291 57
1864. ..... 6,206,083 31

Increase $1,615,208 26

The earnings of the Housatonic Railroad for the month of Nov., 1865, were $43,157 29
Corresponding period of previous year. 37,118 82

Increase $6,038 47

The following are the comparative earnings of the Norwich and Worcester Railroad during the month of November:—

1865 ..... $60,098 29
1864 ..... 53,726 92

Increase this year $6,371 37

Earnings for the year ending Nov. 30,

1865. ..... $704,876 49
1864 ..... 626,872 73

Increase $78,003 76

The earnings of the Cleveland and Pittsburg Railroad for the month of November, 1865 were $220,137 81
Corresponding period of prev. year .. 220,062 63

Increase $75 18

Michigan Central Railroad Company.

The financial condition of this company, on the first of December, 1865, is exhibited in the following report:

INCOME ACCOUNT.

July 1, 1865, to dividend of 4 per cent. in cash.	$259,648 00
Do. 6 per cent. in stock.	389,472 00
U. S. tax on dividends	25,321 85
Nov. 30, U. S. tax on receipts	59,926 34
Annual pay'ts towards sinking fund.	84,500 00
Operating acc. exclusive of interest and exchange, from June 1, to Dec. 1, 1865	1,407,938 87
Interest and exchange accs. from June 1 to Dec. 1, 1865	297,410 99
Balance to new account	641,973 77
	$3,166,191 82
By balance of income account per Treasurer's report.	$708,385 50
Receipts of road, from June 1, to Dec. 1, 1865	2,457,806 32
	$3,166,191 82

The foregoing account shows the net receipts of the road for six months ending 1st inst., after deducting operating, interest, and exchange accounts but excluding the amount paid to the sinking funds, to be $667,208 27. After deducting the amount paid to sinking funds, the balance is $582,708 27. Adding the balance to credit of this account, June 1st, $708,385 50 less the July dividend, $649,120, the amount to credit of income account is $641,973 77.

The operating expenses include about $40,000 paid to complete new grain house in Detroit; also about $50,000 paid for merchandise consumed at the burning of our freight house, in October last, and about $30,000 expended towards the erection of a new building for freight, which is intended to be fire-proof.

The total loss by the fire, over insurance, is estimated at $200,000, equal to about 3 per cent. of the capital stock.

The sum invested in the sinking funds amount to $836,458 80. The company is free from floating debt.

The balance of income account, 1st Dec., as per above report. $641,973 77
Deduct amount of dividend, payable Jan. 1, 1866, including gov. tax 362,142 10

Leaves a balance to income acc. of .. $279,831 67

Interest and Dividends.

The Michigan Central Railroad Company has declared a dividend of $5 per share, payable Jan. 1, free of tax.

The Old Colony and Newport Railroad Company has declared a dividend of $4 per share, payable Jan. 1.

The Boston and Maine Railroad Company has declared a dividend of 4 per cent., payable Jan. 1.

The Morris Canal Company will pay 10th January, free of tax, a semi-annual dividend of 5 per cent. on the preferred stock, and of 6 per cent. on the consolidated stock.

The Board of Trustees of the Illinois and Michigan Canal have, by a resolution dated Nov. 20, 1865, ordered a dividend of ten per cent. to be paid on the 2d of January, 1866, on account of the principal of "Registered Illinois and Michigan Canal Bonds.

The Boston and Worcester Railroad Company has declared a dividend of 5½ per cent., payable Jan. 1.

The Boston and Providence Railroad Company has declared a dividend of 5 per cent. payable Jan. 1.

The Tunneling of Mount Cenis.

We have already published an account of the progress of the work on the French side in the great Alpine tunnel, usually though incorrectly styled the Mt. Cenis tunnel. The condition of that portion of it on the Italian side is thus stated by the correspondent of the *Herald:*

The system of compressing the air to one-sixth of its natural bulk differs here from that in operation at Fourneaux, and in the manner of applying the motive power. There the water which works the compressers is first pumped up by a water wheel, turned by the river Arc, while here a mountain torrent, the Melzet, which comes pouring down a gorge in the Alps, is applied directly to the wheels. Here there are seven compressers constantly at work, ranged in seven different buildings, commencing at the base and reaching up the mountain side, and the same water which turns one wheel, when it has passed through that, sets another in revolution, and so on till it has passed through the whole seven, when it empties into the Dora. It is utterly impossible without the aid of diagrams to give an understandable explanation in detail of the operation of these compressers. To each one of the wheels set in motion by the descending stream is attached by a crank a piston working in an immense iron tube. As the piston moves up it closes a valve opening inwardly near the top of the tube, and, compressing the air the tube contains, forces it into a strong iron reservoir. Having completed its upward motion the piston, upon returning, permits the valve spoken of to be opened by the pressure of the external air, which immediately fills the tube, and which is, by the ascending motion of the piston, compressed to one-sixth its natural bulk.

I have already stated that whereas the mouth of the tunnel in the Fourneaux side is situated at

a height of 106 metres above the level of the valley, that upon the Bardonneche side, on account of the difference above the level of the sea of the beds of the two valleys themselves, is commenced at the base of the mountain. With this exception and the difference in the character of the rock through which the perforators are now making their way here at the rate of from two to three metres a day, there is no material difference in the appearance of the tunnel or the character of the work here from that upon the other side, and a detailed description of them would therefore, be a mere repetition of what I have already written from Fourneaux.

The work upon this side has always been conducted with greater rapidity and with less difficulty than upon the other. The rock here, so far as the perforators have reached, has been hornblende, mica and calcareous schiste, comparatively easy to pierce. Just at present, however, the machines are working in a "schiste" formation which is infiltrated with veins of quartz, and which, when struck by one of the drills, twists it into a very auger. Still, they are advancing here from two to three metres per day, and by the end of the year expect to have made eight hundred metres. By the old process of working by hand, with a much larger number of men, but two hundred metres a year were made. As an exhibition of the difference between the progress upon this side and the other, particularly since the quartz ledge was struck there, I may state that in the month of September of the present year, while an advance of sixty-eight metres and ninety centimetres was made here, but nineteen metres and a half were made at Fourneaux. At the latter place, however, in the months of May and June last, advances of ninety-one and fifty metres were respectively made. In July the quartz vein was struck, and the progress was diminished in that month to sixteen metres and a tenth, and in the month of August last it amounted to but little more than thirteen metres.

By the end of the present year the engineers calculate that at the present rate of progress the tunnel upon this side will have reached a distance of 3,110 metres, or about 3,370 yards, into the bowels of the Alps. As the whole tunnel is to be 12,220 metres, or about 13,238 yards, in length, it will be seen that upon this side more than one-half the distance from the entrance to the centre of the tunnel will have been completed. Upon the other side it is calculated that if no greater obstacles than those already encountered are met with between now and the 1st of January at that time on that side, 2,200 metres, or about 2,383 yards, will have been completed. This will make a total of 5,310 metres, or 5,753 yards, then finished, leaving 6.910 metres, or about 7,485 yards, still to be bored, and this, unless some unforeseen obstacles present themselves, M. Sommelier and the engineers are confident can be accomplished by the 1st of January, 1870, when the Alpine tunnel, four times larger than any other in existence, will, it is hoped, echo through its length and breadth and depth with the shrill music of the steam whistle as the first train of cars goes tearing through the Alps.

Pittsburg and Connellsville R. R.

The following gentlemen have been elected Directors of this company for the ensuing year: Wm. Oden Hughart, John Fleming, G. L. B. Fetman, Wm. Baldwin and Joseph Pennock, of Pittsburg; Cyrus Myers, of Somerset; Benjamin Deford, John A. Thompson, Johns Hopkins, Joseph R. Marston and W. W. Taylor of Baltimore. The officers are: President, Wm. O. Hughart; Chief Engineer, Benjamin H. Latrobe; Secretary and Treasurer, John H. Page, Jr.

☞ The Delaware Railroad has extended its line to within two miles of Princess Anne, Somerset county, Maryland. It is expected that the trains can run to that town by New Year's.

Important Railroad Case.

Philadelphia, December 13.—To-day, in the Supreme Court of this State, Chief Justice Woodward, presiding, in the case of the Philadelphia and Erie Railroad and Pennsylvania Railroad Companies *vs.* the Catawissa Railroad, the Western Central Railroad, of Pennsylvania, and the Atlantic and Great Western Railroad Companies, of Ohio, New York and Pennsylvania, delivered a decision, granting a special injunction restraining the defendants, and declaring null and void the lease of the Catawissa Railroad, dated 1st of November, and also the contract dated 31st of October, between the Philadelphia and Erie and Catawissa Companies, and that said contract be delivered up to be cancelled.

Richmond and Danville Railroad.

The receipts of the Richmond and Danville Railroad from the 17th of June, when the road was restored by the military authorities, to the 30th of September, were $183,136 31; the working expenses for the same period were $101,243 41—leaving net earnings $81,892 41. Since the 30th of September, which is the close of the fiscal year, the receipts have steadily increased.

Chesapeake and Ohio Canal.

Business on this canal for the season has ceased. During the year 3,163 boats have passed over it, carrying 343,954 tons of coal according to a statement in the Cumberland Alleganian, more by at least 50,000 than in any one year since its completion. The increase over last year is 86,312 tons.

The Pacific Railroad.

OMAHA, Nebraska, Dec. 19.—The first forty miles of the Union Pacific Railroad, from Omaha west, was finished yesterday. The track to Fremont, eight miles further west, will be finished at the end of this week.

☞ The railroad from Augusta to Savannah will probably be repaired and in running order about the 1st of January. A much longer period will be required to repair the road from Augusta to Charleston, about fifty miles of which are now totally destroyed. This will not be closed before next summer.

☞ The annual election of twenty-one Directors of the Atlantic and Great Western Railway and of a Stockholders' Board of Control in Europe consisting of nine members will be held in Meadville on the 2d of January. The transfer books close on the 22d inst.

☞ The Manassas Gap Railroad will shortly be put in operation between Strasburg and Harrisonburg, Va.

Chicago and Great Eastern Railway.

The last twelve months have witnessed no improvements on any road out of Chicago so great in themselves, or so important in their relations to this city and the west, as upon this railway, known to the traveling public under the late and more familiar title of the "Cincinnati Air Line." Into every department new energy has been infused, its road and route largely improved, its equipment increased, and its cars furnished with the most substantial and luxurious accommodations.

It is but a few months since the track of this road was relaid from the New Albany crossing, 68 miles, upon a new and favorable route by Crown Point, crossing the roads running south and west from the city, and skirting its western limits to enter over the Galena Branch of the Northwestern. It has a Union Passenger Depot with the Milwaukee Railway, and is only the breadth of a street from the Northwestern. Besides the usual facilities for connecting with all the roads centering at Chicago, it will have commodious houses at the various crossings of the southern and western roads for the transfer of passengers when trains are behind time.

The greatest activity has been shown in ballasting, fencing and otherwise perfecting the new portion of the line which is now in a highly safe and excellent condition. A double track is laid from its junction with the Galena road to the new Union Stock Yards, for the perfect accommodation of this branch of its business. New ties and iron are being rapidly put in on the older portion of the road, new side tracks added, and station buildings erected. Twenty-three new engines from the best shops have been purchased and mainly delivered, while six passenger and three hundred freight cars are being built to meet the increasing demands of its business. The new passenger cars will be furnished with Ruttan's Patent Ventilating Apparatus which will also be placed upon all those now in use as fast as possible.

At the eastern terminus of the road improvements of equal importance in its lines of connection have been made, so that it now take its place as a fourth GREAT ROUTE from the metropolis of the West to the Eastern cities—exceeding in distance only *one* of those heretofore in operation. It is not, however, confined to one outlet East, but has connections with *three* distinct trunk lines. From Richmond, Ind., the terminus of the Great Eastern Railway proper, the route is either *via* the Columbus and Indianapolis Railroad, through Piqua and Urbana, or by the Little Miami Railroad and branches, *via* Dayton and Xenia, to Columbus, thence by the Central Ohio Railroad to Bellaire, four miles below Wheeling, and the point of transfer with the Baltimore and Ohio Railroad. A great bridge is being built by this company over the Ohio River at this place, which, when completed, will permit the passage of cars from Chicago to Baltimore, Philadelphia and Jersey City without change, over this route. This is the great through rail route of the Baltimore and Ohio road, which has been for months in successful operation, notwithstanding the assertion of a late number of a leading city paper that this road has as yet *no* outlet to Chicago and the Northwest. A line of steamers is owned by this company, plying between Baltimore and New York and Boston, affording an additional cheap and speedy means of forwarding their freights to those cities. They are also owners of a semi-monthly line of ocean steamers to Liverpool. Eighty new locomotives, fifty-five coaches, and two hundred freight cars have lately been added to the equipment of this road. All their bridges have been rebuilt of iron and twenty miles of double track laid.

From Columbus again, the Great Eastern finds its way over the Steubenville and the newly opened Panhandle road to Pittsburgh, making a competing route for the travel and immense manufacturing interests of that city, and connecting with the Pennsylvania Railroad for all the great Eastern markets. This must prove a favorite route, being one of the shortest between Chicago, and the greatest Eastern cities, and passing, as it does, through many large intermediate towns upon its line.

A third route East *via* this line, is to Cincinnati without change of cars, thence by the Marietta Road, now in good hands and in fine condition, to Parkersburgh, where it connects with the Northwestern Virginia, or Parkersburgh branch of the Baltimore and Ohio Railroad, to Grafton, where it unites with the main line before described. A bridge over the Ohio river is also being built at this point by the B. & O. Road. This is a very desirable route for the merchant desirous of studying all the markets before purchasing, as it takes in all the leading cities upon one ticket, and is the only route selling through tickets East *via* Cincinnati. It has also great attractions for the tourist, passing, as it does, through so many large towns, and the location of many events of historical and national interest during the war, and the wildest and most romantic of American scenery.

The fourth connection of this road for New York and Boston, is *via* the Atlantic and Great Western Railway, which is reached both *via* Dayton and Urbana, on either of which routes there is but one change of cars for freight, and two for passengers to New York.

We have said nothing of the local advantages of this road, but by no means intend to overlook the fact that it opens to the trade of Chicago the whole interior portion of Indiana, which has hitherto had but small means of communication with this city—and that it is the shortest route between Chicago and Cincinnati, Dayton, Columbus, Indianapolis, Louisville and other leading points in Central and Southern Ohio, Indiana, Kentucky, and the Southern States, including Nashville, Atlanta, Macon, Montgomery, &c., the routes to which are fully re-opened. It is also the shortest *all rail* route to Memphis, Vicksburg, Mobile and New Orleans. Arrangements will doubtless be made at an early day to run passenger cars through from Chicago to Louisville without change.

The accommodations of this line for doing its business to the highest public satisfaction will be as ample as its connections are numerous and complete. It is the aim of its officers to carry it up to every other competing line in point of speed, safety and comfort for passengers, and of punctuality and economy for freights. Nor is this their only ambition. Their main line to Cincinnati, thirty-two miles the shortest, they are determined to make so much the *best*, that presently no other line can afford to compete with it. Our citizens may justly feel a proud interest in this young road

which has thus early assumed so much importance among our leading tributaries, and which promises to make good in the future its title as the Great Eastern Line.—*Western R. R. Gazette.*

Dubuque and Sioux City Railroad.

The earnings of the first division of this road for the year ending December 31st, 1864, were:

From passengers and mails		$136,296 89
" freight and express		275,653 82
" rents		205 00
		$412,155 71
Expenses, viz:		
Repairs of road	$56,476 12	
" buildings	7,195 30	
" engines	15,229 41	
" cars	22,263 07	
" tools, etc	3,820 15	
Fuel	20,775 14	
Handling freight	23,291 24	
Agents and clerks	13,061 83	
Watchmen, etc	1,708 94	
Conductors, etc	20,751 64	
Wood and water station attendance	738 63	
Oil and waste	4,106 52	
Loss and damage	757 03	
Office expenses & station'y	4,828 88	
Telegraph	2,276 79	
Miscellaneous	10,620 52	
	$207,901 21	
Company expenses, salaries, etc	9,530 64	
Insurance and taxes	12,551 22	
Excess of permanent improvements over proceeds of bonds	19,904 78	
		249,887 85
Net earnings		$162,267 86
Required to pay interest on $2,000,000 of preferred stock, and $300,000 of bonds at 7 per cent		161,000 00
Excess		$1,267 86

The following table shows the gross earnings of the road for each year since it was opened:

Year.	Length of road.	Earnings.	Increase over previous year.
1858	37 miles.	$62,519 68	$
1859	37 "	58,620 19	
1860	80 "	121,025 95	62,405 76
1861	100 "	199,410 11	78,384 16
1862	100 "	228,559 53	29,149 42
1863	100 "	276,197 40	47,637 87
1864	100 "	412,155 71	135,958 31

The total mileage of freight and passenger trains on the road during the year, was 181,827 miles, at a total cost of $229,983 07, or $1.26 per mile. The gross earnings per train mile run, were $2.27. The cost of running 2,305 miles of wood trains, and 16,681 miles of construction trains carrying iron, wood and other material for the second division, is included in the total cost, and causes the cost of traffic mileage to appear more than it really was.

The total number of passengers carried during the year was 67,241; of which 34,722 traveled west; 32,519 east; of these, 12,305 were through, and 54,936 way. The total number of tons of freight carried was 160,073.

The equipment of the road consists of 11 locomotives; 7 passenger, 2 baggage, 2 express and mail, 80 house, 20 stock, 37 platform, 5 way, 19 hand cars and 22 hand trucks.

The track is in good condition excepting some badly worn iron on the first twenty miles. Fifty tons of new iron have been laid during the year where most needed, replacing iron much worn. The number of ties used was 13,139. No bridging has been done on account of disappointment in procuring timber. A new freight house has been built at Dubuque. An engine house at Waterloo, with stalls for six engines, has been commenced. Three water stations have been rebuilt, one at Dyersville, Manchester and Independence.

Work upon the second division was commenced in October, 1863. In reference to the progress made upon this division, the report says:

The grading is done to Ackley, a distance of thirty-two miles from Cedar Falls, except about 77,000 yards, which can be finished up early in the spring. The contractors are rapidly getting out ties and timber. We expect to lay the track through the bad cuts a short distance beyond Cedar Fall this winter, and have it ballasted before the frost comes out in the spring. It is believed that the track can be completed to Ackley by the first of July, and to Iowa Falls by the first of September, 1865.

An injunction was sued out to enjoin the financial plan adopted by the board of directors last spring, which also had a tendency to materially delay the progress of the work as well as the prompt raising of money to go forward with the work. The company have already been compelled to pay the contractors for the work and iron over twenty thousand dollars damage sustained in consequence of said injunction. After considerable vexation and delay the injunction was finally dissolved. There has been great difficulty experienced in getting men to carry on the work. The extraordinary advance in the price of gold from 167, when the contract was let, to 250 and upwards, tended still further to embarrass the progress of construction and enhance the cost of the road.

The interest during construction on the six hundred and sixty thousand dollars of bonds issued for the purpose of constructing the road to Iowa Falls, with the damages and losses occasioned, will increase the cost of the road to Iowa Falls, beyond the original expectation of the company.

By the completion of the road to Iowa Falls the company will acquire 153,600 acres of land. The company authorized the sale of these lands for not less than one dollar an acre, the proceeds to be used in the completion of the road. These lands constituted a portion of the means on which the company originally relied for the completion of the road to Iowa Falls. As soon as twenty miles of track is laid it is recommended that the lands be offered to the stockholders pro rata at one dollar or one dollar twenty-five cents per acre, and all that is not taken by the stockholders shall be sold to such other parties as will pay the above price. No movement has yet been made to dispose of the lands for the reason that no part of the road has been completed. The lands are well worth the money; and with the track laid twenty miles beyond Cedar Falls and still progressing westwardly purchasers can and will be found.

LAND GRANT.

The quantity of land yet to be acquired by the company by the construction of the road, is 761,539.68 acres. The company are required to build at least twenty miles a year, counting from the first day of July last, as provided by section 8 of the act of Congress of June 2, 1864, amending the land grant act, and which section is as follows: "That no lands hereby granted shall be certified to either of said companies until the Governor of the State of Iowa shall certify to the Secretary of the Interior that the said company has completed, ready for the rolling stock, within one year from the first day of July next, a section of not less than twenty miles from the present terminus of the completed portion of said railroad, and in each year thereafter an additional section of twenty miles; but the number of sections per mile originally authorized shall be certified to each company, upon proof as aforesaid of the completion of the additional sections of the road as aforesaid; and upon the failure of either company to complete either section as aforesaid, to be annually built, the portion of the land remaining uncertified shall become subject to the control and disposition of the Legislature of the State of Iowa, to aid in the completion of such road."

Two important suits in the Supreme Court of the United States, involving the title of what is known as the Desmoines river lands, were finally disposed of in the year 1864. The Circuit Court of the United States for the district of Iowa, were ordered by the Supreme Court to enter up judgment in favor of the railroad company and against the claimants under the Desmoines river grant, and the judgment was entered accordingly by the Circuit Court at the October Term. It is believed that the question of title to these lands may be now considered as finally settled quite to the satisfaction of the railroad companies interested.

A claim has been set up by purchasers from several counties on the line of the road, to a portion of the land grant claimed as swamp lands. Suits will be instituted to settle these cases; it is believed that the company will be successful. The quantity claimed to be swamp is some sixty-two thousand acres.

THIRD DIVISION.

On the 17th of March, 1864, the directors appointed a committee to procure legislation authorizing the company to make a change in the route between Fort Dodge and Sioux City. Congress on the 2d of June passed an act, containing a section as follows: "That the Dubuque and Sioux City Railroad Company may so far change their line between Fort Dodge and Sioux City as to secure the best route between these points; said change shall not impair the right to, nor change the location of, their present land grant. A map of the change shall be filed with the commissioner of the general land office within one year after the passage of this act." A survey has been made and a much better route than the old one has been found, and as soon as the engineer can complete the profile and estimates, it will be presented to the board of directors for their action.

During the months of August and September, 1864, an examination of the country was made between Fort Dodge and Sioux City, with a view to changing the line from the old survey, making all necessary detours from a direct line between those two points, south instead of north. A survey of a line was made in October, November and December, going down the valley of the Maple River to Onawa, in Monona County, and thence to Sioux City. Some of the advantages of this line over the old survey, are these: The country is better settled and better timbered; after leaving the Des Moines River, structures will have to be built entirely of wood, there being no stone between Fort Dodge and Sioux City. The distance on this survey from Fort Dodge to Onawa, is 112½ miles, and to Sioux City 149 miles.

TAXES.

By section 16 of the Revenue Act of April 8, 1862, the company are required to make by the first of February, a return to the State Treasurer, of the amount of the gross receipts of the road for the year previous, without reduction for expenses. "And the Treasurer of the State shall levy on said gross receipts a tax of one per cent.," to be paid on or before the 15th of February. "The tax to be in lieu of all taxes for any and all purposes on the road bed, track rolling stock and necessary buildings for operating their road."

In the case of the Dubuque and Sioux City Railroad Company *vs.* the City of Dubuque, at the October term, 1864, of the Supreme Court, of Iowa, it was decided that the above tax of one per cent. was also in lieu of city taxes. The principle laid down in that case will save the company many thousands of dollars.

GENERAL BALANCE SHEET, JANUARY 2, 1865.

Dubuque and Pacific Railroad Obligations	$2,968,035 28

President.—JAMES ROBB.

Directors.—Allan Campbell, Morris K. Jesup, D. Willis James, Isaac H. Knox, Platt Smith, James Robb, Fred. Schuchardt, Charles L. Frost and H. L. Stout.

Vice President.—PLATT SMITH.

Secretary and Treasurer.—LOUIS BOISOT.

Northern Illinois Railroad.

At a meeting of the stockholders of this company, held at Freeport, Illinois, on the 11th of October last, for the election of directors for the ensuing year, in accordance with the articles of consolidation as embodied in agreement entered into on the 13th of June last, upon which the Northern Illinois Railroad Company was organized, the president submitted the following report of the business transacted for the company to that date:

The books of the consolidating companies, the Northern Illinois Railroad Company and the Mississippi Railroad Company, were balanced to the 13th day of June, and all the accounts were transferred to the new books opened for the new company, the Northern Illinois Railroad Company.

The following balance sheet represents the position of the new Company at June 13th, 1865:

Capital stock $1,000,000, 25 per cent. paid	$250,000 00
Mortgage on 28½ miles of road	500,000 00
Revenue, interest and dividend (credit from old company)	30,056 84
Bills payable	226,635 14
Open accounts payable	148,810 45
	$1,155,502 43
Construction and general expense, to date	$1,073,806 88
Real estate to be disposed of	7,869 80
Personal property	724 15
Supplies of material	4,924 95
Bills receivable	6,644 52
Open accounts receivable	18,090 25
Cash	43,441 88
	$1,155,502 43

The property of the company consists of the following:

	miles.
R. R. in operation from Freeport to Savanna	38½
" " Savanna to Fulton	17½
	56
R. R. graded, and now having track put down, from Fulton to Port Byron	20
	76

The company own chartered rights from Port Byron to Rock Island, 17 miles, and from Savanna to Galena, 30 miles.

The Road is well constructed throughout, and has extensive depot accommodations. At Savanna, buildings have been erected and tracks laid down to provide for business on the most extensive scale. In addition to stationary passenger and freight houses, engine house and car building shop, there are two extensive floating freight houses and a floating elevator. A stationary elevator, on solid stone foundation and with the most approved machinery and equipments, affords facility in transferring grain with ease and expedition which is not excelled at any point on the Mississippi River.

The company have the right of the ferry between Sabula and Savanna, and own an equipment of two good steam ferry boats and two barges for ferry business, with nine large barges for river business generally.

The road is operated in connection with the Racine and Mississippi Railroad, by which rolling stock is supplied, with the exception of 4 engines and 11 freight cars, which have been put on the road as the first installment of equipment being provided.

The work of extending the line down the Mississippi has been carried on steadily. The line was opened for business to Fulton on the 10th of August. The track is being put down below Fulton, and with favorable weather will be completed to Port Byron before the close of the working season; so that a continuous line will be made, in connection with the Chicago and Rock Island Company, from Racine to Rock Island, a distance of 194 miles. This line will form the shortest route for all Northern travel from the Iowa and Nebraska and Missouri and Mississippi Railroads.

In accordance with the resolutions of the meeting of directors of 13th June, I have made a mortgage on the entire line from Freeport to Savanna, and from Galena to Rock Island, to secure $2,000,000 of first mortgage bonds bearing 7 per cent. interest and having thirty years to run. The mortgage has been executed in due form, and recorded in the several counties through which the line passes. The Farmers' Loan and Trust Company, of New York, are appointed the Trustees. Two thousand bonds have been executed and placed in the hands of the Trust Company, to be used as required for the work.

The bonds issued by the old Northern Illinois Railroad Company, amounting to $500,000, with coupons complete, have all been taken up, and the mortgage has been discharged in full.

The iron for the extension of the road to Port Byron, was contracted for in England early in the season, and was shipped direct *via* Quebec to Racine, where it is now arriving, and being forwarded as required on the track. Three additional engines have been put on the road.

The elevator at Savanna has worked most successfully, and enables the company to ship over the line to the Lake ports a very large amount of grain from Minnesota and Iowa, and all points on the Mississippi north of Savanna. There is no detention of barges, and cars can be loaded (with an average quantity of 330 bushels,) at the rate of two in 2½ minutes. The floating elevator hitherto used, which is serviceable for ferry business, will be transferred to advantage to a southerly point on the River line.

The capital stock of the company consists of $1,000,000, of which 25 per cent. has been paid in ($250,000.)

The bonds now being issued will amount to $2,000,000, of which there will be used on completion of the road to Port Byron $1,300,000, leaving $700,000 in reserve. The interest for the coming year will amount to $91,000.

The net earnings for the year ending 30th September, 1865, are $67,135 09. The line was only opened to Fulton on the 10th of August, and arrangements for business at that point are not yet completed. With the addition of the 20 miles to Port Byron, now being completed, the net earnings for the coming year may be estimated at double the amount of the past year—say $134,270 18
Deduct bond interest 91,000 00

Leaving surplus $43,270 18

The traffic shows a large increase upon the previous year. A new running arrangement is about to be entered into with the Racine and Mississippi Railroad, and from the development of business now exhibited there is little doubt that a satisfactory dividend will be earned upon the stock.

In conclusion, I would recommend the future balance of the company's accounts for the year to be made at the end of each year, as more convenient for publication and comparison; and I would prefer to commence by closing the books on 31st December, when a report will be prepared and submitted to a meeting of Stockholders early in the new year.

The report was approved, ordered to be printed, and the old board of directors and officers re-elected for another year, viz.:

President.—GEO. A. THOMSON.

Directors.—Richard Irvin, Elijah Northey, Enoch Chamberlin, L. H. Bowen, H. A. Mills, Duncan Mackay, Edward P. Barton, William Shannon, G. A. Thomson, Robert A. Knapp, S. C. Tuckerman, Henry T. Fuller, D. W. Dame.

Secretary and Treasurer.—W. V. BAKER.

Chief Engineer.—NATHANIEL A. BAILLIE.

Interest and Dividends.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of $3 per share, free of U. S. tax, payable January 2, at the Union Bank.

A quarterly dividend of 1¼ per cent. on Joliet and Chicago, and Alton and St. Louis Railroad stock will be paid by the U. S. Trust Co., on the 2d January, free of government tax.

The Rome, Watertown and Ogdensburg Railroad Co., have declared a semi-annual dividend of 5 per cent. free of U. S. Tax.

The semi-annual dividend of 3½ per cent. on the preferred stock of the Elmira Railroad Company will be paid after the 1st of January, less State and National tax.

Atlantic and Great Western Railway.

This company have announced in London the terms upon which they invite subscriptions of an issue of consolidated sterling mortgage bonds. The mortgage capital of the undertaking is limited to £6,000,000, and it has been decided to issue bonds to the amount of £2,771,600, the remaining £3,228,400 being renewed for the redemption of mortgage bonds already issued on the several divisions. The present issue is secured on the whole line, with its branches, extensions and equipments. The bonds are issued for a term of twenty-five years, and are offered at £70 and £100 bond, exclusive of the coupon payable in January. The actual price of the bonds is therefore about £78, on which is offered an interest of seven per cent., payable quarterly.

☞ We learn from the Newton, Iowa *Banner*, of 18th ult., that a railroad meeting was held at that place on the 15th, for the purpose of considering a new project in connection with the Pella, Newton, Marshalltown and St. Paul Railroad. It is now proposed to commence at Pella, in Marion Co., and run to Newton, in Jasper Co., and from thence to Marshalltown, from which point strike off in a northeasterly direction to either Cedar Falls or Waterloo, to connect with a road running to St. Paul.

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDED JUNE 30TH, 1865.

Gross receipts of the half year, £614,876 3s 3d;* deduct ordinary working expenses, £397,025 12s 6d; net balance over ordinary working expenses, £217,850 10s 9d; deduct total cost of renewals of permanent way over the whole system, £51,535 5s 2d; leaving £166,315 5s 7d; deduct extra amounts for renewals in reduction of suspense account, as per report, £26,712 6s 8d; leaving £139,602 18s 11d; deduct loss on American currency, £35,849 7s 10d; balance, £103,753 11s 1d.

This sum of £103,753 11s 1d, minus the nominal amount of postal, &c., revenue, £9,475 16s 5d, and plus the small balance carried over from the past half-year, or £94,215 11s 5d in all, has been appropriated as follows:—

Interest, &c., paid on lands	£3,144
" on mortgage to Bank of Upper Canada	4,424
Interest on loans, bankers' balances, promissory notes, European exchanges, &c.	6,113
British American Land Company's debentures	616
Montreal Seminary debentures	616
Island Pond debentures	2,706
Half-yearly installments on Portland sinking fund	2,812
Atlantic and St. Lawrence lease (in full)	32,598
Detroit line lease	11,250
Montreal and Champlain Company	10,274
Buffalo and Lake Huron Company	13,788
Equipment Bond interest, half-year	7,335
Third preference, not charged in June, '64.	897
	£95,568
Deduct second preference interest over charged in June, 1864	1,352
	£94,215

In the corresponding half-year of 1864, loss on American currency (which has been £35,849 in this half year) was obviated by the purchase out of United States funds on hand, of £111,500 of Portland Bonds maturing in 1866, an operation which would have been continued to the advantage of the company had the Directors been enabled to provide capital, *pari passu*, with the outlay involved. Again, in the half-year ended June, 1865, the whole of the cost of renewals, or £51,535 5s 2d., has been debited to revenue as against £31,488 17s. 3d., and a small amount to be added for the Buffalo line, in June, 1864. A sum of £26,712 6s. 8d. has also been taken this half-year from suspense account, and debited against the net revenue.

But for the above extra deductions, the net revenue devisable amongst the bondholders on account of the half-year ended 30th June, 1865, would have been over £80,000.

The amount now left at the debit of the permanent way renewal suspense account is only £52,945 7s. 9d., and the Directors propose to write this off against net revenue in the current half-year's accounts.

It may be appropriate here to notice that the length of the Grand Trunk and Atlantic and St. Lawrence lines, renewed with better rails (principally fish-jointed) since 1860 inclusive, has been 516¼ miles, out of a total of mileage of 1,030 miles. In the same period, 1,754,530 new sleepers have been put in, or equal to the renewal of the sleepers (ties) on 800 miles of railway. The cost of the relaying and renewing operations, of which the above form part, has been over £500,000, the whole of which, except the amount now in suspense, viz., £52,945, has been debited to and paid for out of the net revenue earned in working the line.

The debit to capital account in the half-year is £64,523, but this includes £24,219 for discounts, on bonds, &c., leaving £40,304 as the real expenditure for additions to the company's property, of which £21,000 is on account of new engines, cars, and plant.

The bondholders will see at once that in the absence of new capital, net revenue only remains available to meet current requirements, objectionable as the addition to capital of unpaid interest on bonds must be.

The Company's officers estimate that to pay off the existing cash liabilities on capital and revenue accounts, and to secure the freedom of the net revenue from such demands upon it, so that as from and after the 31st December next all net revenue earned may be remitted and divided—a sum of £300,000 should be raised. This is less than 2 per cent. upon the company's gross capital account of £16,600,000. Further capital for additional working stock to meet the rapid [progress of the traffic will also from time to time be needed.

To meet capital requirements the company hold at the date of this report the following securities:—

Atlantic and St. Lawrence Railroad Sterling Mortgage Bonds	£106,000
Equipment mortgage bonds	250,200
Second preference bonds	101,913
" " (deferred)	18,372
Fourth " stock	130,105
	£606,590

Arrangements have been made in Canada, under the instructions of the president of the Company, whereby the larger proportion of the above sum of £300,000 has been provided; and the directors have had before them offers to purchase securities, the proceeds of which would cover the balance. They have, however, considered that the great increase in the company's revenue justified the expectation that higher prices would shortly be realized. The directors are most anxious to relieve the net profit account from the present undue and unexceptional drains upon it, at the earliest period possible. The development of the traffic would now appear to be mainly a question of the quantity of plant applicable to the conveyance of freight and passengers.

The late issue of this report enables the board to state that the net balance on the current half-year's working; up to the 30th September last, was £94,045, as against £57,125 for the corresponding months of 1864—notwithstanding that the total amount of expenditures for renewals, the cost of additional weight of rails, and all other outlay, except two small sums for an improvement at the Richmond station, and for a new engine house at St. John's, one-half of which is to be repaid by the Vermont Central Company, have been all debited to net revenue.

The accounts, including the Buffalo receipts, in each case show an increase of gross revenue (taking the American currency at par in both periods) over the corresponding half-year of 1864 of £31,486; but the charges against revenue have increased by a sum of no less than £36,493. This increase appears mainly in the locomotive and traffic departments.

The increase in the gross receipts from traffic from all sources, including Grand Trunk proper, the leased lines, and the Montreal and Champlain and Buffalo and Lake Huron lines, as compared with the corresponding half year of 1864, is equal to 5.40 per cent. The number of passengers carried of all classes was 596,571 as against 591,418 in 1864, being an increase of 5,153, or 0.87 per cent. The average receipt per passeeger in 1865 was 6s. 3d. per head as against 5s. 10d., and the increase in the receipts from coaching traffic, mails, &c., over the whole of the united lines, as compared with 1865, was equal to 7-65 per cent., the figures being £207,871 against £192,642. The total tonnage of freight carried was 477,837 tons, against 523,385 tons, showing a decrease of 45,548 tons carried, whilst the receipts have been £403,245 against £386,028 in 1864, or an increase of £17,217, equal to 4.46 per cent. The average rate per ton in the half-year ended June 30, 1865, was 16s. 10d., as against 14s. 9d. in 1864. The per centage rate of working expenses was 64.57, as against 61.78, the expenditure being in 1865 £397,025, and in 1864 £360,532, or an increase of £36,493, equal to 10.12 per cent. The following statement shows the percentage rate of ordinary working expenses, exclusive of renewals, since 1861, inclusive:

June half-year.	Dec. half-year.
1865....†64.57 per cent.	
1864....*59.62 per cent.	†59.68 per cent.
1863....*63·59 per cent.	57.11 per cent.
1862.... 77.23 per cent.	59.68 per cent.
1861.... 87.32 per cent.	68.64 per cent.

*Including the Champlain Railway.

†Including the Champlain and Buffalo and Lake Huron Railways.

The Ottawa and Prescott Company have elected to retain the existing gauge of their line, and to work it with their own narrow gauge stock, thus no further proceedings in Parliament have been necessary. A bill for confirming the arrangements between the Grand Trunk and Buffalo and Lake Huron Companies was further proceded with in the recent session of the Canadian Parliament. It passed through a second reading, and was approved by a majority of the railway committee, but the early prorogation of the Parliament compelled the withdrawal of the bill. It will, however, be again introduced next year.

Preliminary arrangements have been made in concert with the Atlantic and Great Western Company, with a view to the early construction of an international bridge to connect the company's system at Fort Erie with the City of Buffalo and the New York Central, Erie, and Atlantic and Great Western Railways, and the proposed agreements connected therewith will be submitted to the meeting.

The following statement shows the net revenue of the Company since 1859:

	Miles open.	Earnings.	Expenses including renewals.	Revenue balance.
		£	£	£
1859, June...	880	223,930	203,062	20,867

*Including the Champlain Railway.

†Including the Champlain and Buffalo and Lake Huron railway from August 1st.

‡Including the Champlain and Buffalo and Arthabaska and Berlin lines.

The Three Rivers branch, 35 miles opened on the 12th of December last, has only contributed since that date £4,000 to the revenue shown in these accounts. The Preston and Berlin line is now opened.

EDWARD W. WATKIN, President.

LONDON, E. C., Nov. 15, 1865.

*In this sum is included the receipts of the Grand Trunk system, and of the Champlain and Buffalo Railways—1,377 miles.

☞ The Rock Island *Union* says: "The Chicago and Rock Island Railroad Company have served an injunction on the Mississippi Railroad Company to stop them from crossing the old Sterling and Rock Island track, near Port Byron. The object is to prevent the Mississippi Company from making connection with the Port Byron road to that city."

☞ Fourteen hundred men are now employed on the Reno, Oil Creek and Pit Hole Railroad. In about two weeks the railroad will be open.

Commerce of Chile.

From a compilation issued from the Custom House office of Valparaiso it appears that the "commercial movement" of Chile, during the year 1864, was as follows:—Imports, $18,867,365; exports, $27,242,853; transit, $4,418,089; coast trade, $28,896,783. The imports from Great Britain alone were $8,201,638; exports, $15,913,-295; and transit trade, $1,807.236. The value of the mercandise deposited in the Custom House stores on the 31st December, 1864, was:

Great Britain	$13,068,358
France	6,850,987
Germany	9,940,381
United States	2,513,672
Spain	653,417
Other countries	6,644,180
Total	$39,670,895

Post Office Statistics.

The annual report of the Post Master General is one of the most satisfactory documents which has ever been presented to the attention of the American people. Mr. Dennison possesses a clear head and fine administrative talent. He wields a great department, and its operations are conducted with unequivocal success.

The receipts have gone up from $2,102,329 58, in 1831, to $14,556,158 70 in 1865—making a grand total of receipts $200,311,894 47; and of expenditures, $244,748,881 59.

It also appears that in the years, 1831-'35-'36-'37-'45-'46-'47-'49-'50-51 and '65, there was an excess of receipts in all to the amount of $3,-427,906 81; but the excess of expenditures up to the present time has been $47,864,893 93.

The number of postage stamps issued during the fiscal year 1864-'65, was:

1 cent	2,120,800
2 cent	49,749,250
3 cent	326,512,950
5 cent	1,207,180
10 cent	4,166,460
12 cent	1,216,625
24 cent	1,808,350
30 cent	571,090
90 cent	66,750

The total length of the United States Mail routes in 1865 in operation, was 142,340, of which 13,038 were operated by steamboats, and 23,401 by railways. The total annual transportation was 57,993,494 miles, and the whole cost of the mail service was $6,246,884.

The foreign postages are thus stated:

Aggregate of postage sea, inland and foreign on mails exchanged with

Great Britain	$865,936 94
Prussia	246,476 89
France	187,927 13
Hamburg	66,447 70
Bremen	69,717 31
Belgium	13,024 79
Total	$1,449,530 76

—an increase over those of last year of $49,925 07.

The tendency of our foreign correspondence is shown by the following figures:

The postages on mails sent to Europe were $770,612 24; received from do., $678,918 52.

The total postages collected in the United States were $930,556 54; collected in Europe, $518,974 22.

The total amount of letters sent from the United States was 3,117,217; and received was 3,596,300.

The correspondence shows an increase of letters from the previous year of 522,354.

The whole number of Post Offices in the United States on the 30th of June, 1865, was 28,882.

There are 46 different cities and towns at which letter carriers are employed for free distribution.

The cost of this distribution by 157 carriers in New York is $126,538 62; in Philadelphia by 129, $91,909 88; in Boston by 49, $31,694 52; in Baltimore by 35, $21,919 40; in Chicago by 38, $21,-980 96.

The smallest service of this kind is at Cambridge, Mass., by 1 carrier, at an expense of $366 66.

The letters *delivered* in New York amounted to 12,030,918; newspapers to 947,475.

In Philadelphia they were respectively, 7,339,-647, and 821,066; in Boston, 3,383,860, and 263,-362; Baltimore, 1,905,940, and 236,832.

It appears that the gross fiscal revenue, June 30th, was $143,798,345 81, and the amount still due the United States, $1,356,219 56, of which in suit there was $483,883 46.

The money order system appears to be popular. The number issued up to June 30th, was 74,277, of the value of $1,360,122 52, the fees on which amounted to $11,534 90, but the expenses of conducting the business were something greater, being $18,584 37. Extensive and radical changes are, however proposed in the system.

Very full tables are attached to the report showing the condition of the mail service at home and abroad, and furnishing valuable material for legislation and comment by the press.

Debt of Cincinnati.

The funded debt of Cincinnati on the 1st of March last was as follows:

	Amount outstanding.	Principal payable.
Funding Loan (1845)	$100,000	1871.
" " (1835)	80,000	1885.
" " (1842-43)	90 000	1865.
Little Miami R. R. Loan (1844).	100,000	1885.
Whitewater Canal (1839 and '41)	320,000	1865.
" " Loan (1847)	38,000	1897.
Funding Loan (1847)	150,000	1898.
Hillsboro & Cin.R.R.Loan(1850)	100,000	1880.
Eaton & Ham. R.R. Loan (1850)	150,000	1881.
Cov. & Lex. R. R. Loan (1851).	100,000	1881.
City Hall Loan (1850)	60,000	1870.
Ohio & Miss. R. R. Loan (1853)	600,000	1882.
Funding Loan (1853)	83,000	1790.
Marietta & Cin. Loan (1854)	133,000	1884.
Wharf Loan (1855)	216,000	1885.
" "	250,000	1890.
Orphan Asylum Loan (1858)	45,000	1888.
" " "	100,000	1908.
Epis. Burying Ground L'n (1860)	36,007	1890.
Water Bonds of 1839	278,000	1865.
" (Extension) of 1847	199,000	1895.
" (Improv'nt) of 1848	100,000	1895.
" " of 1850	100,000	1855.
" (Extension) of 1851	100,000	1890.
" " of 1853	75,000	1900.
School Bonds of 1834	40,000	1885.
" of 1843	3,000	1865.
" of 1837	25,000	1885.
" of 1859	99,000	1890.
Bounty Bonds	100,000	1876.
"	100,000	1872.
Total	$3,840,000	

All the above bear 6 per cent. interest, except the school bonds of 1834, and the funding loans of 1845, 1835, and 1842-'43, bearing 5 per cent. interest.

Commerce of New York.

The New York imports for the ten months from January 1st compare as follows:

	1864.	1865.
Ent'd for consumption	$100,545,269	$97,310,788
Do. for warehousing	94,888,563	64,050,528
Free goods	10,608,184	8,337,652
Specie and bullion	2,150,646	1,759,701
Total entered at port	$208,190,662	$171,458,669
Withd'n from wareh's	62,379,804	72,642,299

The revenue from customs at New York compares as follows:

	1864.	1865.
1st quarter	$21,314,334 49	$14,415,082 [illegible]
2d quarter	21,148,915 49	22,280,494 24
3d quarter	13,907,680 15	34,821,581 79
In October	3,670,188 38	10,973,513 01
Total from Jan. 1	$60,041,118 51	$82,490,671 87

The New York exports for ten months from Jan. 1, compare as follows:

	1864.	1865.
Domestic produce	$170,592,397	$128,921,892
Foreign mdse. free	1,653,313	805,415
Foreign dutiable	15,065,534	2,993,718
Specie and bullion	37,453,782	25,205,342
Total exports	$224,764,026	$157,925,768
Total exports of specie	187,310,244	132,720,741

The exports for the month of October, exclusive of specie, were $21,272,343, against $17,914,668 in 1864. The imports for October were $23,134,675, against $10,088,308 in 1864. The imports of specie during the same month were: in 1865, $77,942; in 1864, $129,775.

Catawissa Railroad.

The Catawissa Railroad is, we are informed by a gentleman who passed over it recently, undergoing extensive repair and improvement. Rails and ties, he said, are strewn along it; and as this is the work of the lessee, the Atlantic and Great Western Railroad Company, every dollar expended on the Catawissa road is so much *security* given, that the rental will be paid, and the conditions of the lease be fulfilled.

Whatever may be thought of this route or that route between the Schuylkill and the Susquehanna, the matter is fixed, irrevocably, that the Catawissa Railroad is to be a link in the Atlantic and Great Western Railroad extension to New York and Philadelphia.—*U. S. R.R. & Mining Reg.*

Pork Packing in the West.

The following, from the Cincinnati *Price Current*, will show the number of hogs packed in the West for the past fifteen years. It is evident that the returns were not as full as they should have been for the first three years, but the idea was then a new one, and a good deal of trouble was experienced in obtaining them:

	No. of Hogs.
1849-'50	1,652,220
1850-'51	1,332,867
1351-'52	1,182,846
1852-'53	3,201,110
1853-'54	2,534,770
1854-'55	2,124,404
1855-'56	2,489,502
1856-'57	2,818,468
1857-'58	2,210,778
1858-'59	1,465,652
1859-'60	2,350,822
1860-'61	2,155,702
1861-'62	2,893,666
1862-'63	4,069,520
1863-'64	3,261,105

☞ A despatch dated Sacramento, Cal., December 21, says: "Frank Pixley has bought for the Yuba Railroad the California Central Railroad and its rolling stock for $78,560."

American Railroad Journal.

Saturday, December 30, 1865.

Stock Exchange and Money Market.

It is now admitted by foreign political economists that the United States, in addition to its other wonderful peculiarities and advantages, is a great gold producing country; and that in this respect, as well as in many others, it is to lead the world. These same persons also express the opinion that the highest results in the past are to be eclipsed by those of the future time, in the production of the precious metals; and no doubt console themselves that, no matter who produces them, the largest share is ever to come to England. Travers' *Circular*, of the 9th of December, indulging in some curious speculations on the subject, says: "Since the discovery of gold in California, £550,000,000 have been obtained from that part of the continent, and about half that sum from Australia. The product of the present year is calculated at $200,000,000, and will be exceeded in future years." It continues, "the public mind can hardly have been prepared for the wide area of the gold and silver field that has been traced within the last two years in the United States and its territories; the deposits being as remarkable for their richness as extent." "Exaggerated as have been the representations, there is every reason to believe that the supplies thus provided will for years to come, rapidly augment the world's store of precious metals." And these supplies are admitted to be unique in character, and without rivalry. It asserts that in the Ural range in Russia, along a distance of 600 miles of the auriferous region, there are scarcely 20 points where the mines are worked at a profit. The silver mines of our country are looked to as promising an enormous increment, and as likely to influence our trade favorably with Asia. The supply from Mexico about $30,000,000 per annum, is not thought to be on the increase; while the explorations for silver in Australia are not popular, being difficult and expensive.

It is considered that though paper money may come into more extensive circulation than formerly, so too with the precious metals, silver keeps up its present relations to gold. The yield of this last for the present year is estimated at $125,000,000.

The conclusion these British writers arrive at is, that the increase of these metals must follow the rule of all other commodities. With a sound basis for commercial transactions, will exist confidence in their character, and the most industrious and enterprising nations will be the final gainers. The mines may be very distant, but the coin will flow into the pockets of the most vigilant. "It is therefore," says the *Circular*, "an object of the first concern that we shall bring home and seek to retain our required portion of the golden fleece."

We have in this remark a key to the whole policy of England. It is the thread of her labyrinth, by which it ever directs her steps. It is gold for which she struggles, diplomatizes, legislates or fights. Of course as our country is thus recognized as the great source of the future flow of the article to her shores, she will seek by every means in her power, that it may be uninterrupted, and she will make great sacrifices to retain a customer that buys largely, pays a handsome profit, and can spare millions of pounds annually from its mines. It then becomes a question of some importance to us, whether we of the Atlantic and Middle States might not manage to do some of this profitable business at home, and for ourselves. Can we not exchange for this gold our own products, as well as bring similar ones from abroad? Can we not also "retain our portion of the golden fleece?"

That there has been a constant and regular increase of the supply of the precious metals in this country, remaining with us for some years past, there is no doubt. The tables show it conclusively. How much we ought to retain is not so clear. As paper money is the medium of our home exchange, we do with less of the precious metals than we otherwise would, but with the disadvantage of frequent suspensions, large inflations, and great irregularity of prices. All this is

bad in trade and in morals. The correction of the evil, we may speculate about; but to effect it, will be difficult in the last degree. With an enormous production of gold, thousands of millions since the discovery of our gold fields, circumstances have been such as to cause a continuous drain to foreign countries, and an enormous expansion of paper money at home. None of this exported gold ever comes back to us. It is lost forever, and seems to disappear from civilization. Even England can scarcely manage with all her wealth to retain a reserve in the National Bank, to meet the frequently recurring exigencies of her commerce. Her wealth is not in her ingots or sovereigns after all, but in other things less movable. With all our mineral wealth are we also to meet the fate of mining countries, to be the slaves of other and distant people who are more vigilant and enterprising? On the contrary may we not hope ere long to be possessed of such complete home markets, that our gold may be exchanged here rather than be sent abroad. And is this not a condition of things for which we may properly exert ourselves, and to bring which about, our manufacturers, bankers, legislatures and people generally, should in some way cooperate. It is certainly a poor state of things which asserts a nominal and not a real independence.

We had the pleasure of an interview with the Secretary of the Treasury during his recent visit to this city. It was a visit of relaxation rather than business. He is very frank and outspoken as to his financial policy, and desires an early return to the specie basis, though not disposed to bring it about by violent measures, though they are within his reach. Mr. McCulloch has immense faith in the people, in their spirit, resources and patriotism, as well as in the superior moral government of the world, which while it has carried us through our recent great and trying difficulties will not desert us now. There seems to be in his mind, no apprehensions whatever as to the future, but a confidence that we shall be able to get on without any further financial embarrassments of any moment.

We perceive from our last foreign files that the probable cotton supply continues to agitate the manufacturers in England. Numerous estimates are continually put forth, all differing considerably in amount, yet they all agree in this, that the total will be so moderate as not to affect present prices to any degree, and this opinion appears to prevail among our merchants and manufacturers here, who confidently expect an advance by spring. We may console ourselves even in this aspect of affairs by the reflection that if cotton does go up, the price will nevertheless tell favorably on our exchanges and thus act upon the financial affairs of the country.

In the meantime the merchants of Boston are bestirring themselves vigorously to excite an increased cultivation of cotton the coming year, an effort no less far seeing than patriotic, which we hope will be successful. It is well enough to notice in connection with this subject that exchange the last week considerably under par for good bills.

The money market remains well supplied and easy. The fears of any tightness in this respect appear to have vanished. The truth is, the supply is in excess of the demand, and many persons effect their loans at 6 per cent. The Associated Bank returns are also favorable in their character. On the 23d their loans had increased $757,678; their circulation, $904,400; their deposits, $2,-108,117; their legal tenders, $5,003,964; while their specie had fallen off from $10,981,435, the previous week, to $10,055,037.

The Sub-Treasury continues strong. Between the 16th and 23d of December inclusive the payments were $17,302,808 15, and the receipts $15,-660,224 25 yet, notwithstanding, the actual balance remaining was $77,416,949 04 making a slight decrease from the balance of the former week of $1,042,383 90.

Governments continue steady and state bonds are also firm and stand at full previous prices.

Railway securities and shares are reported steady, but dull. There seems to be a feeling of insecurity as to the management of many of the leading companies, an idea abroad that they are controlled for the street rather than the benefit of the property itself; and yet it is to be remarked that our railways stand very well abroad and attention is directed to them as being largely remunerative.

The gold market has lost its tone, yet many persons confidently predict its rise very shortly to 150 in consequence of the increase of the circulation of the National Banks. On Wednesday it stood at 145½.

The total exports of specie from this port for the week ending Dec. 24, were but $463,389, and the total for the year to that date was $29,689,842 a very favorable change from previous years, and explained by the circumstance of the export of cotton the last few months.

We notice the continuous arrival of specie in small parcels at this port the last week—from Curacoa 3 packages, and Nassau 5.

The exports, exclusive of specie, from the port of New York for the week ending Dec. 25th, were $3,076,073, against $1,619,706 in 1864, and $3,-424,351 in 1863. Total since Jan. 1, $179,759,-594; same time in 1864, $212,680,025; in 1863, $169,324,807.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Underground Railway.

We perceive that the scheme of an underground railway is again revived, and that a combination of interests is at work to procure its adoption. That we want all the means of transit across this island which ingenuity can devise and capital construct there is no doubt; and yet it is worthy of consideration whether the proposition if carried out will be of the value to the public, many suppose. It is true that in London railways of this description have begun to be constructed, and a short line is said to be a complete success; but even there serious objections are already made to the system. The cars which pass through the pneumatic underground tubes have to traverse in the dark, and are destitute of all ventilation except such as attends the motion by the pressure of the air upon them. The cars in fact are in an air-tight tube, secured with valves, for otherwise the plan would not work. The motion is produced by atmospheric pressure at one end against a vacuum at another. If any accident to the working of the machinery should take place, and the cars be detained in the tube, the passengers might all be suffocated before relief could be afforded them.

Then again the plan will require a large number of dangerous openings and stairways along the route, which will be constantly crowded with people in each other's way, exposing them to the assaults of thieves and robbers, and many inconveniences of a perplexing character. And if the plan of driving steam engines through ordinary tunnels is resorted to for the hauling of the cars, it is plain to be seen that ventilation will be still more difficult, and the atmosphere more intolerable. It is said that by ingenious devices the smoke, steam and hot air are guarded against. Our experience of tunnel transit is against all this. Many medical writers have asserted that even a few minutes' transit of a tunnel is injurious to health, how much more so where there is a continous exposure, and where persons use them frequently. In short, there will be an occurrence of danger to health and limb, which few people will care to encounter, when they can take the street cars above ground, see where they are, and where they are going. These two objections seem sufficient to throw considerable doubt over the plan. On the other hand, a railway in Broadway, properly constructed and managed for the good of the public, their transit, and to increase the city revenue would be a far better plan, answer all the purpose of the underground, and be a far safer and more comfortable arrangement.

The "Lake Shore Line."

A writer in *Herapath's Railway Journal*, of December 2, says that—"the price of shares, dividends, etc., of this line we never see quoted in the AMERICAN RAILWAY JOURNAL." For the information of this writer it may be as well to state that the "Lake Shore Line" is composed of the Buffalo and State Line Railroad, 68.34 miles in length; the Erie and Northeast, 18.50 miles; and the Cleveland, Painesville and Ashtabula, 95.40 miles. These roads make up the "Lake Shore Line," as it is commonly called, extending from Buffalo, N. Y., to Cleveland, O. To this may be added the Cleveland and Toledo, 112.50 miles and the Michigan Southern and Northern Indiana Railroad, 246 miles—making a total length of "Line" from Buffalo to Chicago of 540.74 miles. All these roads may be found in their appropriate places in both our Share and Bond Lists.

The St. Lawrence and Hudson Ship Canal.

At a lecture delivered a few evenings since, before the Geographical Society in this city, Mr. Derby of Boston, among other things connected with the subject of the trade with Canada, made a considerable point on the advantage of a ship canal by the way of Chamblee and Champlain between the St. Lawrence and the Hudson which has been frequently discussed in this JOURNAL. The Hon. John Young, of Montreal, who was present, stated that the project was in contemplation, and we learn that it is his intention to push it forward as one of the most desirable schemes of the day, and one which will be of immense benefit to the producers of cereals in the far west.

Tax on Building Stone.

By a decision of the Commissioner of Internal Revenue, all stones used in the outward structure of buildings, bridges, aqueducts, reservoirs, wharfs, piers, monuments, fences, &c., if hewn or dressed, are subject to a duty of 3 3-5 per cent., as building stone. The decision was made in accordance with the amended act of March 3, 1865. It does not apply to or include rough walls or walls built of roughly dressed stones.

☞ Among the passengers by the *Java* on Wednesday, was Mr. George E. Gray, Engineer-in-Chief of the Central Pacific Railway, California Division. His object abroad, after a thorough examination of the surveys of his own great work, is to review the practical operations of the French and English railways, in order to profit by their experience in the working of the line on the Pacific.

☞ The Pacific Railroad Land Grant Bill passed the California Senate on the 21st inst.

Finances of Chicago.

The financial condition of Chicago on the 1st of April, 1865, is shown in the annexed statement:

Floating debt	$14,294 20
Bills payable	15,512 88
Funded municipal debt—old issues.	371,000 00
" " " new issues.	961,000 00
Sewerage debt	1,087,000 00
Water bonds	1,282,000 00
Total	$3,730,807 08

The following is a description of the bonds, and the amount of each issue:

MUNICIPAL DEBT.

7 per cent, due July, 1866	$10,000
7 per cent, due January, 1871	60,000
10 per cent, due January, 1868	1,000
6 per cent, due January, 1867	10,000
6 per cent, due July, 1873	50,000
6 per cent, due July, 1874	40,000
6 per cent, due July, 1875	100,000
6 per cent, due July, 1876	100,000
Total old issues	$371,000
7 per cent, due April, 1881	907,000
7 per cent, due Dec., 1872	54,000
Total new issues	$961,000
Total old and new issues	$1,332,000

SEWERAGE DEBT.

7 per cent, 1st loan	$87,000
6 per cent, 1st loan	413,000
7 per cent, 2d and 3d loans	687,000
Total	$1,187,000
Less purchased and cancelled	100,000
Total outstanding	$1,083,000

WATER DEBT.

6 per cent bonds	$1,030,000
7 per cent bonds	252,000
Total outstanding	$1,282,000

The progress of the city since 1840, is exhibited in the annexed statement:

	Population of city.	Real Estate.	Personal Property.	Total.
1840..	4,479	$94,437	$.....	$94,437
1845..	12,088	2,273,171	791,851	3,065,022
1850..	29,963	5,685,965	1,534,284	7,220,249
1855..	80,000	12,637,500	5,355,393	26,992,893
1860..	109,260	31,198,135	5,855,377	37,053,512
1865..	178,539	37,148,023	11,584,759	48,732,782

☞ The Titusville and Pithole Railroad, the Oil Creek Lake and Titusville Mining and Transportation Company, and the Westfield Railroad Company have been consolidated into one company to be called the Westfield, Titusville and Pithole Railroad Company. This line will include the proposed railroad from Titusville to Union.

☞ It is reported that a company of capitalists have agreed to construct the Indianapolis and Vincennes Railroad, if the citizens along the line will donate $3,000 per mile, payable when the road is completed.

☞ The work on the reconstruction of the Savannah, Albany and Gulf Railroad is progressing rapidly, and by the 1st of February cars will be running from Savannah to Thomasville, a distance of two hundred miles.

☞ In the case of the New York and New Haven Railroad Company against Robert Schuyler and others, the Court of Appeals, at Albany, have rendered judgments in all cases against plaintiffs affirmed with costs, and general judgments in favor of plaintiffs affirmed with costs.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Northwestern Railway for the third week in December, 1865, were.....$122,398 00
Corresponding week of previous year. 132,729 00

Decrease.....$10,331 00

The earnings of the Marietta and Cincinnati Railroad for the 2d week in Dec., 1865, were:

	1865.	1864.
Passengers	$9,667 90	$8,095 08
Freight	14,806 85	13,157 71
Mail, express & telegraph	1,185 00	1,079 58
Total	$25,659 75	$22,332 37
Total for the fiscal year commencing Jan. 1.	$1,169,217 68	$974,904 75

The earnings of the Grand Trunk Railway for the week ending Dec. 16th, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers.....$44,310 00
Express, freight, mails and sundries.. 7,500 00
Freight and live stock.....76,904 00
Total.....$128,714 00
Corresponding week, 1864.....113,298 00
Increase.....$15,416 00

The earnings of the Michigan Central Railroad for the 2d week in Dec., 1865, were...$76,407 85
Corresponding week of previous year.. 76,344 63
Increase.....$63 22

The traffic of the Great Western Railway for the week ending Dec. 22, 1865, was as follows:

Passengers.....$30,430 63
Freight and live stock.....31,409 71
Mails and sundries.....2,705 21
Total.....$64,545 55
Corresponding week of 1864.....64,045 50
Increase.....$500 05

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Dec., 1865, were.....$78,967 00
Corresponding week of 1864.....92,639 00
Decrease.....$13,672 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in December, 1865, were.....$49,348 00
Corresponding week of previous year.. 88,572 00
Decrease.....$39,224 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Dec. 14, were:

	1865.	1864.
Passengers	$3,269 00	$2,278 84

Receipts from January 1 to Dec. 14:
1865.....$669,318 38
1864.....558,228 17
Increase.....$111,090 21

☞ The grading on the Western Pacific Railroad, California, has been suspended, it is said, in consequence of the work being far in advance of the reception of the iron. A contract has been made with Eastern manufactures for eight thousand tons. One locomotive and sixteen cars have been received.

Railroad Earnings--Monthly.

The earnings of the Pacific Railroad of Missouri for the three months ending November 30, have been as follows:

	1864.	1865.
September	$118,135	$143,634
October	33,489	200,893
November	99,028	236,664
Totals	$250,652	$581,191

The earnings of the Ohio and Mississippi Railroad line from Cincinnati to St. Louis for Nov., were:

	1865.	1864.
Eastern division	$242,581 35	$203,590 35
Western "	169,971 98	142,652 60
Total	$412,553 33	$346,242 95
Increase of 1865 over 1864		66,310 38

Comparative earnings from Jan. 1, to Nov. 30:

	1865.	1864.
Eastern division	$2,063,107 69	$1,787,368 63
Western "	1,445,579 09	1,247,751 98
Total.	$3,508,686 78	$3,035,120 61
Increase of 1865 over 1864		$473,566 17

Journal of Railroad Law.

THE QUESTION OF NEGLIGENCE; THE CONSTRUCTION OF A "RUNNING SWITCH" OVER A CROSSING IN A VILLAGE, POSITIVE PROOF OF NEGLIGENCE.

The case of Brown *vs.* N. Y. Central Railroad possesses the interesting feature of deciding substantially that it is an act of gross and criminal negligence for a railroad company to make a "running switch" over the crossing of the track of a public road, in the populous part of a village.

The question submitted to the jury was whether the company exercised its right of making a "running switch" at a proper place, and with the use of due care.

In this particular case, a stage coach approached the track, and the driver seeing some cars pass down the track, supposed the whole train had passed, and neglected to look in the opposite direction. When his horses were on the track, the other part of the train, which had been "switched off" came down the track, colliding with the coach, and severely injuring the plaintiff who was a passenger.

The Court decided that the act of the company in placing the switch where it did, was gross negligence for which it might be held to a criminal responsibility. The Judge also remarks: it is also claimed to be error not to have non-suited for the alleged negligence of the driver of the stage, and to have submitted the question of his negligence to the jury. The Court charged the jury that the negligence of the driver must be regarded as the negligence of the plaintiff; that he represented her, and she could not recover in this action if his negligence contributed to produce the injury. Since the trial of this action, the decision of this Court in Chipinaw *vs.* The New Haven Railroad Company, (19 N. Y., 341,) and Colegrave *vs.* N. Y. and N. H. R. R. Co., (20 N. Y., 492,) have been published. In the former of these cases, this Court held that a passenger by railroad is not so identified with the proprietors of the train conveying him or their servants, as to be responsible for negligence on their part, and could recover for personal injuries from a collision through negligence of the defendant, although there was such negligence contributing to the collision on the part of the train conveying him as would have defeated an action by its owners; and in the latter case, it was held that the injured passenger could not maintain his action against the proprietors of both on the ground of their concurrent negligence. I do not perceive why these cases do not dispose of the question as to the negligence of the driver in this case. The plaintiff was a passenger in a public stage. She had no control of its management or direction; and occupied no relation to the driver different from that which passengers occupy to any public carrier of persons. In principle there is no difference whatever between her relation to the carrier and that of a passenger on a train of railroad cars. The difference is one of fact merely, growing out of the difference of motive power and the corresponding necessity for more stringent rules and greater vigilance in one case than in the other. But the majority of the judges are of opinion that the true rule, in a case of this kind, was laid down at the Circuit. It becomes necessary therefore, to consider the question in the aspect in which it was presented at the trial. It is not pretended that there was any fault or want of care on the part of the plaintiff herself; and it seems to me there was no error in submitting the question of the driver's negligence to the jury. As he approached the crossing and heard the train, he stopped and waited. He started on when danger from it had passed, and had got very near the track when the first detached car came by; he stopped again, and when that had passed, suspecting no further danger he drove on. His horses were on the track, and were trotting when he saw the danger; it was within two rods of him, and he quickly whipped up his horses to escape. Could he have more safely drawn back and stopped? It is impossible to tell. He was placed where there was no time to decide the question. His peril called into action his instincts, and not his reasoning faculties; and under such circumstances, the party who had put him in jeopardy is responsible, and not he, if he mistook the safest means of escape. (Stokes *vs.* Saltonstall, 13 Pat., 181.)

It was no error therefore to leave it to the jury to say, whether under all the circumstances, the driver was negligent in attempting to escape by crossing the track. But was it negligence not to have seen the cars by which his carriage was hit in time to have stopped? They gave him no warning. He had seen a train pass and had stopped for it, a single car following at a distance from it, and had waited for that. These had attracted his attention, his eye naturally following them. Was he bound to suspect that more were coming, and be on the look out for them? I think it is asking too much to say that it was negligence, as matter of law, not to have anticipated that detached cars were following in the rear of the train that had passed. The signals of the train had told him where the danger was, but gave no warning of unsignaled danger to follow.

It was not error to submit to the jury the question whether the injury to the plaintiff's sight was permanent or not. There was slight evidence on the question, and the Court gave the jury a caution on the subject, which the amount of the verdict shows they did not fail to heed.

There was no error in allowing proof that plaintiff complained of suffering from headache

and defective sight. The fact of making complaint in such cases is admissible. (Caldwell *vs.* Murphy, 1 Duer., 233; S. C., 1 Kern., 416, 419, per Denio, J.; 1 Greenl. Ev., §102; Aveson *vs.* Kinnard, 6 East, 188; Bacon *vs.* Charlton, 6 Cush., 581.)

But as the fact of plaintiff's suffering from those causes was distinctly proved and not controverted, no harm could have resulted from the evidence, if not strictly admissible.

Judgment affirmed.

Cincinnati Street Railroads.

There are four Horse Railroads in Cincinnati, viz.: "Cincinnati Street Railroad Co.;" "City Passenger Railroad Co.;" "Passenger Railroad Co.;" and "Pendleton and Fifth Street Railroad Co." The earnings of each of these roads from September 1st 1862, to November 1st, 1865, were as follows:

	Cin. Co.	City Pass.	Pass. Co.	Pen. Co.
1862	$16,573	$14,602	$13,874	$7,967
1863	70,647	74,803	47,797	34,917
1864	94,389	98,191	59,247	74,243
1885	95,744	103,245	51,400	79,901
	$277,353	290,841	172,318	117,058

Debt of Virginia.

The governor, in his recent Message to the Legislature, calls attention to the public debt, showing an aggregate of $41,000,000 against $22,000,000 available assets, and says the State has several millions in unproductive internal improvements. The interest due on the 1st of January exceeds $6,000,000. The question of taxation is considered at length, and it is stated that a levy of sixty per cent. on real estate will be required, and a tax or license for taking oysters in the waters of Virginia recommended. The Governor also suggests the sale of the State investments in railroad stocks and bonds, which would relieve the State of $15,000,000 of debt and promote the efficiency of the railroads. He advises that the $3,000,000 heretofore invested in the Covington and Ohio Railroad be given to any company that will complete the road. The repeal of the usury laws is recommended.

Lumber Trade of Chicago.

The following table shows the aggregate amount of lumber, shingles and lath forwarded from Chicago since 1860:

	Lumber.	Shingles.	Lath.
1861 ..	189,379,445	94,431,186	31,282,725
1862 ..	189,277,679	55,761,630	16,966,600
1863 ..	221,789,330	102,684,447	30,293,247
1864 ..	269,406,579	138,497,256	36,242,010
1865 ..	345,390,089	239,738,057	60,744,520

☞ The Island City *Times* says that "a meeting of the citizens of Neenah and Menasha will soon be held for the purpose of appointing a committee to confer with the leading men of Milwaukee with a view to aiding the extension of the Ripon Railroad to this point. The road now runs to Omro and is to be completed to Winneconne next spring. The latter place is only 14 miles from this, the heaviest manufacturing city in Wisconsin."

☞ A party of engineers are now engaged in surveying a railroad between New Lisbon and Marietta, Ohio. A good deal of grading has been already done on the proposed line of route, and it will open up, if completed, one of the richest mineral regions in the State.

Debt of Alabama.

The following is an extract from the Inaugural Address of Gov. Patton:

In the year 1845 the bonded liabilities of Alabama amounted to over $10,000,000. This heavy indebtedness was created, in part at least, by a system of banking, the general operations of which were detrimental to the public interests. But, by a wise and judicious policy, this large debt has been so far reduced that our liabilities on account of State bonds of the present time amount to only $3,445,000. These bonds are payable as follows: $2,109,000 payable in the City of New York and bearing only 5 per cent. interest; $600,000 payable in London and bearing also 5 per cent. interest; and the remaining $688,000, payable likewise in London, bearing an interest of 6 per cent. per annum. This is comparatively a small debt, which comes completely within the financial control and management of the State.

Manassas Gap Railroad.

We learn from the Alexandria (Va.) *Gazette*, that preparations have been made by which this road will be put into immediate operation between Strasburg and Harrisonburg. As soon as orders can be obtained from the Government for the return of the iron, which it is hoped will be soon, the whole line will be relaid, and trade and travel at once be resumed.

☞ The trouble between the Central Pacific and California Central Railroad Companies having been settled, trains from Folsom to Lincoln, Cal., will soon be running. The laying of the track from Lincoln to Marysville, will be immediately resumed.

Tennessee Railroad Relief Bill.

The Railroad Relief Bill, now before the Legislature of Tennessee, appropriates bonds to the amount of $1,622,000 to eight railroads in that State, viz:

Memphis and Charleston	$300,000
Memphis and Clarksville	400,000
Manchester and McMinnville	100,000
Nashville and Northwestern	300,000
Knoxville and Kentucky	250,000
Winchester and Alabama	372,000
East Tennessee and Virginia	150,000
Mississippi and Tennessee	50,000
Total	$1,622,000

☞ The Western (Mass.) Railroad will commence building their second track from Springfield westward next week. It is to extend as far as Washington, Berkshire County, and when completed there will be a double track through from Boston to Albany.

☞ The surveys for a railroad between Poughkeepsie and Copake, are complete, and the work will be commenced in the Spring.

Car Covering or Roofing.
